Prairie Farms Creamery At Henry Opens May 25

COMPLETION of the new $180,000 Prairie Farms Creamery at Henry was announced by J. B. Countiss, manager of the state organization, with the formal opening of the plant for business May 25.

The new creamery, the 10th in the list of Prairie Farms Creameries scattered throughout the state, is on the bank of the Illinois River about a stone's throw from the Marshall-Putnam County Farm Bureau building.

The new plant will serve farmers in Bureau, Marshall-Putnam, Stark, Woodford and Peoria counties and can be geared to produce 1,000,000 pounds of butter annually.

Serve 600 Producers

The creamery will service a minimum of 600 milk and cream producers daily and can handle a maximum of 100,000 pounds of milk daily. Output of the new plant will include sweetened and unsweetened condensed milk, condensed buttermilk, butter, cream, and whole milk.

On the job as general manager of the Prairie Farms Creamery at Henry is Dave W. Smith, who has been with the state company in Chicago for more than 10 years. His experience includes 25 years of creamery operation.

Plant manager is Leo J. Kelly, who also spent several years with the state company in Chicago. Field Manager Ray Carlson was associated with the former Peoria plant, during its lifetime.

Forerunner of the Henry plant, the Producers Creamery of Peoria plant operated for 12 years until about a year ago making more than 12 million pounds of Prairie Farms butter and paying back to producer members more than $64,000 in patronage refunds.

Replaces Peoria Plant

The Peoria organization, was liquidated paying off 100 cents on the dollar plus a dividend of seven per cent on all the outstanding stock.

The new plant at Henry was built to take the place of the Peoria creamery in its northern buying area.

Funds were raised by selling now assessable seven per cent preferred stock to producers with a limit of $1,000 in stock to any one member. Any Farm Bureau member who sells to the creamery is a common stockholder in the Prairie Farms creamery.

The new plant is 50 feet by 90 feet and is lined inside with cream-colored glazed tile. It has a 3,000 gallon stainless steel tank for milk storage, and a stainless steel separator which can separate 11,000 pounds of milk an hour.

The milk evaporator cost $28,000 and is the only one of its kind in the organization's 10 creameries. The repeated use of steam to condense skim milk in two batches cuts fuel costs far below ordinary evaporator fuel costs.

The 175 horse power boiler is equipped with automatic water and fuel feeds. Milk will be picked up daily on routes by covered trucks and present cream routes will be continued without trucking duplication.

Members of the board of directors of the creamery are: President Herbert Schoemaker, Marshall-Putnam; Vice President Ray Schneider, Bureau; Secretary Joe Wilson, Stark; Peter Schirtz, Woodford, and Joe Rahn, Peoria.

Rural Youth

By ELLSWORTH D. LYON

Rural Youth marches on in education, recreation, and community service. Will closed its year March 21 with annual reports at a gala banquet in Joliet served to 70 Rural Youthers. At the first meeting of the new year Leonard Braham, director, Will County Cooperative Association, spoke on the theme, "Opportunities for Rural Youth in the Field of Cooperatives."

Montgomery's tenth annual banquet held as a formal, April 16, in Hillsboro was attended by more than 100 Rural Youthers. The Hawaiian theme was featured in the banquet hall at the country club. Each person was presented with a Hawaiian lei as a symbol of welcome. A Hawaiian dance by Mary Evelyn Good and a vocal solo by Barbara Seymour added much to the southwest Pacific atmosphere. The speaker was the Rev. Paton, missionary to Puerto Rico.

Randolph's play "She's My Daisy" was presented in four centers in the county but with a change in schedule due to an auto accident in which two members of the cast were injured following the first performance. Injured members of the cast were Glenn Sternberg and Mary Cleland. According to reports, both were able to appear in the three later performances.

Bond's sixth annual banquet and dance held in Greenville was climaxed by the crowning of Norma Jean Elam as the Rural Youth queen with Mae Jahnssen, Della Durr, June Hunter, Connie Marcoot as maids of honor. One-third of the cash proceeds of the voting for the queen was contributed to the Red Cross. The Rural Youth prophecy given by Helen Baumberger added much fun to the occasion.

Kankakee was host to three 4-H clubs in April. Representatives of these clubs presented stunts.

Wabash held a debate on "Compulsory Military Training" at its recent parent guest night.

Enjoying themselves at Montgomery county's 10th annual banquet and dance recently are, left to right: Secretary Martha Martin, President Carl Niehaus and Recreational Chairman Dorothy O'Malley.

The March meeting of the Crystal Lake Wildcats was held at the home of Earl Tessendorf. Earl played selections on both the organ and the piano.

Franklin showed a movie featuring "State Parks in Illinois" at the meeting April 11.

Edgar Rural Youthers recently heard Prof. K. H. Hinchcliff of the University of Illinois extension agricultural engineering in a chalk talk on the theme, "Farm Buildings." Members of the married group met with them. A skating party to be held in Terre Haute was planned for May.

Massac heard George Tager on "Soil Conservation." An ice cream social was scheduled to raise money for future Rural Youth activities.

DeKalb answered many questions on etiquette under the theme, "Emily Post Looks at Life."

McLean began preparing in April to send some of its members to the Rural Chorus which will sing at the state fair in August. DeKalb also sent out invitations to Rural Youthers to engage in county rehearsals for this big event.

Logan realized $41.15 on its box social held recently in Lincoln.

Warren has plans for the organization of a square dance group as well as a baseball team. At a recent meeting members of the board of directors of the Farm Bureau were invited as guests to the next Rural Youth meeting.

Bureau announces: "The first Bureau County Rural Youth banquet and dance will be held at the Princeton high school gym, May 11 at 7 p.m. Farmer Bill of Station WMBD is engaged as speaker. The theme of the dance is "The Maypole Dance."

RURAL YOUTHERS HAVE FUN

Wilbur Kluster (right) shows Lucile Conrad a Houdini trick with a piece of string. Rural Youth plan most of their recreation themselves.

NO MATTER how good an educational program is, it just won't stick with youth unless there is time for play.

That's the reason Rural Youth leaders spice their youth building program with a wide variety of recreational activities.

Some of these laughable and enjoyable moments so typical of Illinois' 84 Rural Youth organizations are shown in these pictures of Madison County Rural Youth at play.

Plays in particular have received strong support by Rural Youth organizations throughout the state during the past year. These plays, not only have offered the members some interesting knowledge of play production and self expression, but also have given a large number of people some wholesome entertainment.

Typical is the comedy "The Campbells are Coming," presented throughout Madison county in April by Rural Youth and which has more than ordinary laugh appeal.

Dormant during the war years, Madison County Rural Youth organization is again active and is taking a prominent part in youth participation and youth responsibility.

Aside from the purely social side of Rural Youth, there is the stimulation of discussion, educational talks and films, trips to county government offices and to the state College of Agriculture at Urbana, and to industries and historical places.

Rural Youth has also assumed an integral position in the life of many rural communities, assisting such organizations as the Red Cross, the USO and the Farm Bureau, and generally broadening the fullness of their own lives with enjoyment and service.

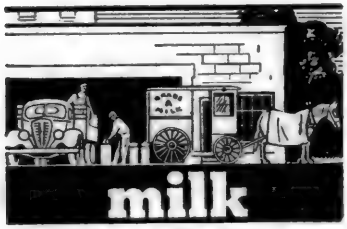
Bill Dorsey (left) and Hugh Barnett have a lively argument during a rehearsal from a scene in the play "The Campbells Are Coming."

For laughs, Madison Rural Youth play matchbox passing game. Principals in back line are Grace Highlander (left) and Glen Gratofendt. In front: Elmar Antenon and Vice President Bernoice Bardelmeier.

Grace Highlander (left) and Florence Suhre make Rural Youth President Elmar Antenon hoist his heels in a hurry during rope game. Others await chance to keep feet from being entangled.

Bernoice Bardelmeier (left) pulls her shotgun technique on Glen Gratofendt while Verna Suhre looks on during rehearsal of Madison Rural Youth play.

Having the time of their lives during recent highly successful barn dance, Madison County Rural Youth enjoy the final formation of a Virginia Reel.



By Wilfred Shaw

June Dairy Month will be observed nationally and in Illinois again this year, for the tenth consecutive year. The observance of June Dairy Month this year has been planned by the National Dairy Council, aided by dairy cooperatives, the American Dairy Association, and the National Milk Producers' Federation cooperating. E. W. Tiedeman of Appleton, Wisconsin, is national chairman of the June Dairy Month observance committee and W. J. Sawyer, president of Pure Milk Association, Chicago, is Illinois producer chairman. The theme of the dairy month observance this year is "First in Foods".

Chester Bowles, director of economic stabilization, announced on April 15 a revised program of dairy subsidies to be paid by the Government to dairymen who sell milk or farm separated cream.

The principal points in the new program as announced by Mr. Bowles are as follows: (1) A May and June dairy subsidy upon milk sold by producers of 45 cents per cwt. (The subsidy in April was 60c per cwt. and was originally scheduled to be lowered to 25c per cwt. for May and June.) (2) A May and June dairy subsidy to producers of 15c per lb. butterfat in cream sold. (The subsidy in April upon butterfat sold in cream was 17c per lb. and was scheduled to be lowered to 10c per lb. for May and June.)

The following are the blended prices received by producers supplying the respective Illinois markets. All are March prices for 3.5% milk f.o.b. dealers' platforms (except Chicago) and are for milk meeting the respective city milk ordinances:

Bloomington	$2.47
Canton	2.75
Champaign	2.75
Chicago	3.23
Danville	2.45
Decatur	2.75
DeKalb	2.74
Freeport	2.85
Galesburg	2.65
Harrisburg	2.50
Jacksonville	2.85
Kewanee	2.55
LaSalle-Peru	2.70
Moline	3.13
Peoria	2.89
Pontiac	2.406
Quincy	2.60
Rockford	3.125
Springfield	2.85
St. Louis	3.51
Streator	2.50

The following are the gross blended prices paid to producers for milk in the following named cities throughout the United States, and are quoted on a 3.5% butterfat basis, delivered f.o.b. dealers' platforms (with exceptions noted), as reported by the respective milk cooperatives. These prices are for February unless otherwise noted:

Akron, Ohio (Mar.)	$3.50
Baltimore	3.85
Boston	3.92
Chicago (70-mile zone) (Mar.)	3.23
Cleveland	3.50
Denver (Mar.)	3.01
Detroit	3.52
Flint, Mich.	3.22
Hartford	3.98
Indianapolis (Mar.)	3.40
Kansas City	3.53
Knoxville, Tenn. (Mar.)	3.55
Louisville, Ky.	3.54
Madison, Wis.	3.01
New York City	4.12
Columbus, Ohio	3.20
Pittsburgh	3.60
Seattle (Mar.)	3.50
Sioux City, Ia. (Mar.)	3.02
St. Joseph, Mo.	3.30
St. Paul, Minn. (Mar.)	3.06
Toledo	3.48
Youngstown, Ohio	3.56

The 12th annual banquet of the Danville Producers Dairy was held in the ball room of the Hotel Wolford in Danville, April 15, with 609 producer members and guests in attendance.

Retiring director of the dairy since its incorporation, George Lenhart, of Georgetown, was presented with a table radio in appreciation of his service to the dairy as a director and as vice president. Charles Matthews was elected to succeed Lenhart upon the Board of Directors.

At the conclusion of the meeting, Manager F. F. Bott supervised the distribution of dividend checks to members in the amount of $8,884.00 patronage dividends and $2,345.00 capital stock dividends upon the past year's operations.

Yes FARM BUREAU SERUM WORKS LIKE MAGIC IN PREVENTING HOG CHOLERA!

Fresh, potent Farm Bureau Serum and virus, administered when your pigs are still young, is the best assurance for their reaching market. Farm Bureau Serum, because of its fine reputation for dependability, is a favorite among farmers!

REMEMBER: The smaller the shoat The cheaper the shot

Let's talk about QUALITY

QUALITY means "the degree of goodness or relative excellence." The degree of excellence of Blue Seal tires is high — here's why — First: the materials have been used to the best advantage. For example, the new synthetic rubber has been combined with natural rubber in various ways so that the best characteristics of each can be utilized.

Second. In making the cord piles for the tire carcass, it was discovered that rayon fibre was much stronger and less susceptible to heat than cotton. This means that a lighter weight tire can now be made with the same strength as the older, heavier one. (As a result of this improvement, tire strength is now designated as "ply rating." A tire marked as "eight ply rating" may actually have only six plies, but will be as strong as the tire formerly having eight ply.)

Third: The high quality of Blue Seal tires has been proved in hard war-time use by thousands of farmers. Our production today is far greater than ever, but we have not yet been able to produce enough tires to meet the demand. We have on display in our home office a Blue Seal tire which was put in service September 16, 1940. It was driven 59,400 miles before recapping and has traveled 19,242 miles since. The tire is still in such good condition that an additional life of 20,000 miles is anticipated. There are many similar examples of Blue Seal quality throughout the state.

So when someone mentions "QUALITY" in tires, think of Blue Seals as an outstanding example.

BLUE SEAL

NEW! BLUE SEAL TRACTOR TIRES

Wide base construction with full width and depth tread. Tread bars beveled at rear side for easy cleaning. Continuous center rib makes for smoother riding and braces tread bars.

BLUE SEAL MASTER

HEAVY SERVICE

TRUCK TIRES

The newly improved Blue Seal heavy service truck tires are now available. All the latest engineering improvements have been utilized to produce a tougher, more durable tire. Entire carcass is made of RAYON CORD construction, thus reducing heat and weight and increasing strength. Tough tread rubber gives long wear.

BLUE SEAL TUBES IMPROVED

Butyl, a new, tough, synthetic rubber is now being used. This new rubber holds air longer and is more resistant to tearing and punctures than natural rubber.

High school winner of McLean county's soil conservation essay contest, Adeline Norman is shown with Farm Adviser O. L. Welsh (left) and D. A. Hofer of Arrowsmith high school, her principal. She received $100 prize.

HUNGER . . . ONE CAUSE OF WAR

ESSAY CONTEST STRESSES SOIL CONSERVATION NEED

IF TOMORROW'S farmers come to accept soil conservation practices as something as commonplace as soil cultivation, then half the battle to save the county's soil resources is won.

It was with this shrewd thought in mind that McLean County Farm Bureau and the county soil conservation district approached the task of furthering the cause of soil conservation in the county.

The obvious channel for spreading the gospel of conservation of the nation's greatest natural resource was through the schools. And with the full backing of the school authorities a $1,000 contest was announced.

The contest was open to all school children with similar prizes offered to high school and elementary school students for the best essay on soil conserving practices. Other prizes were offered for the best scrap books illustrating the benefits of conservation.

Backed by the Farm Bureau, the conservation district, the schools and public officials, the contest got off to a flying start with widely publicized public ceremonies, including tree plantings on the courthouse lawn, radio programs and newspaper articles.

Winners of the top prizes in the essay contest which attracted 300 entries were Adeline Norman of Arrowsmith high school and Ronald D. Fendrick, 13-year-old elementary school pupil at Hudson. Both received $100 prizes.

Scrap book winners were Heyworth high school and Prairie Cottage elementary school. Each received $25 and eight Norway spruce trees for their school grounds.

The widely acclaimed contest was climaxed by a meeting in Bloomington high school one afternoon and a dinner at the county Farm Bureau building in the evening.

Speakers included Arnold P. Benson, Illinois Director of Agriculture; Farm Adviser O. L. Welsh, who contributed much to the success of the contest; Frank Hubert, chairman of the soil conservation district; C. C. Morgan, soil conservationist; Ralph Arends, county superintendent of schools; Les Wright, state conservationist; Oliver J. Muser, director of information, regional office, Milwaukee, and O. A. Potts, district conservationist.

"Hunger in the world today is not merely the result of war," Director Benson said. "In many lands soil fertility has been wasted and adequate food production is nearly impossible. And hunger is one cause of war."

Fully endorsing the aims of all men interested in saving Illinois' topsoil, Farm Bureau President C. R. Ropp said regarding the contest: "Fewer programs in Farm Bureau history have been conducted which have come more nearly striking at the heart of civilization's greatest problem of survival."

Said Superintendent of Schools Arends: "Since the climax of the essay and scrapbook contest, it has been my pleasure to visit numerous teachers and schools that took part in the program. I know of no other single program in the study of conservation that has had greater influence on the understanding and meaning of conservation."

Bloomington high school's conservation class, which had 64 entries in the contest and six cash prize winners, plants an evergreen on school lawn. At left is teacher Miss Margaret Means.

Friendly Enemy
OF MAN

The modern highway — what would life be without it? It provides quick access to markets . . . fast trips to town for fun or for business . . . the means of pleasurable Sunday drives and a fast and comfortable route for seeing America first. But alas, it is an enemy, too! The winding ribbon of concrete which looks so peaceful may be the scene of a collision, a crackup, a skid into the ditch. Soon, the roads will be thick with buzzing, zooming traffic. Not all these drivers will be careful. Not always will this friendly highway be safe, for there will be sleet and ice and slippery wet. You'll need full protection on your car and truck . . . property damage and public liability. Nowhere can you get better coverage. Rates low, too. You, as a member of the Illinois Farm Bureau, are entitled to buy your auto insurance co-operatively and receive a portion of your premium back as dividends, when earned from the operations of your Company.

NEW ILLINI PREMIUM MOTOR OIL

OFFERS FARMERS 5 DISTINCT ADVANTAGES

1. Keeps a clean motor clean longer
2. Provides a better piston-seal
3. Non-corrosive to bearing metals
4. Holds resinous varnish formation to minimum
5. Assures longer life for piston rings and cylinder walls

For your protection, the new Illini Premium Quality Motor Oil will be available only in new drums, refinery sealed.

ILLINI is an outstanding improvement in postwar motor oil. All the knowledge gained in laboratory research and through hard tests on battlefield is used to make this better oil for farm use in tractors, trucks and cars.

Emphasis here is on *quality* plus *economy* in accordance with the original objectives of this cooperative. ILLINI has been developed by the latest refining processes to meet the needs of today's tractor, truck and car motors. It has been thoroughly tested. It is offered you with the *knowledge* that ILLINI will give safe and economical lubrication to modern engines.

Try ILLINI. Call your salesman who drives the the Blue and White Service Company truck.

WHAT A SCHOOL CAN DO FOR A COMMUNITY

(*Continued from page 9*)

be a farmer after graduation. I think the agricultural outlook is good and everybody will have to eat."

A farm shop is provided where the agriculture students repair farm machinery, build hog feeders, etc., and learn how to handle tools. Farm management is also taught in combination with farm shop.

Fourteen out of 15 vocational agriculture boys questioned said that they planned to live on the farm after they get through school. Their school program has shown them that farming has possibilities and offers a challenge. The 15th boy said he planned to run a feed store. All 15 pupils named agriculture as their favorite subject.

"How will your work in vocational agriculture contribute to your future success?" brought the following answers:

Boys See Benefits

Marshall Taggart: "I hope to develop a pure bred herd of Angus and the things I have learned about judging, selecting, and management of beef cattle will help me."

Jim Hatton who plans to run a feed store: "The things I have learned about rations and feeds will aid me in serving my customers better."

Dean Shute: "I will understand plant foods, soil testing, balancing rations and livestock sanitation."

Charles Finney: "The feeding, care, and management of livestock will aid me materially after I graduate from high school as my father works in the oil field and I will manage the farm."

Wise Planning

The program at Casey was a result of wise planning. Its success depended much upon cooperation of farmers with the school. The results obtained also required time and the program was continuous. It is doubtful if a succession of agriculture teachers could have done what one man with an idea was able to do in that space of time.

This school recognized a responsibility to the community that supported it. The service that the vocational agriculture department gave in the Casey community is only one example of what a good high school program can contribute to community life.

Cattle are more susceptible to lead poisoning than are other animals, and calves are especially sensitive. White paint on barns and fences may be an expensive luxury.

IS THE GRASS ALWAYS GREENER?

HELP YOURSELF
To the Advantages of Good Pasture

No factor is of greater importance in reducing the cost of livestock and poultry production than good pasturage over a long season. Land devoted to a well managed pasture system will provide more nutrients than can be produced from utilizing the land in any other manner. Green, succulent grasses and legumes are excellent sources of energy, protein, minerals, and vitamins and, therefore, are very valuable for growing and producing animals. Some animals can satisfy their entire nutrient demand on good pasturage. We are all familiar with the need of clean pasture in carrying out a desirable program of sanitation to control filth-borne diseases and parasites. Animals and poultry on pasture are almost always more vigorous and healthy.

This year pastures assume a role of extraordinary proportion. The supply of feed grains and protein supplements are very acute and livestock numbers are high. We are approaching a period of extreme shortage insofar as feed supplies are concerned. This can be greatly alleviated by the judicious planning and use of pasture crops. The planting of temporary pasture crops such as Sudan Grass will provide a good feed supply throughout the summer months when permanent pastures usually become short. This will assure good pasturage over a long season and will do much to avert a crisis in the overall feed supply.

POULTRY

We seldom think of pasture and the ration of poultry in the same breath. We ordinarily confine our thinking of poultry feeds to those more concentrated forms such as grains, mashes, and protein supplements. Fresh green pastures are desirable, however, as they do conserve other feeds to advantage and provide a clean sanitary environment necessary to control parasites and maintain a healthy flock. To stretch available grains and poultry feeds, provide good pastures, cull out borderline producers, and balance the ration for the good producers with Blue Seal Poultry Feeds.

HOGS

Pasture is of especial value for hogs because good pasture crops are rich in the proteins, minerals, and vitamins lacking in farm grains. Young, immature pasture crops contain about 15 percent protein on a dry matter basis, are rich in mineral matter, particularly calcium, and contain a high amount of carotene (vitamin A). A summary of tests conducted by several experiment stations show that hogs on pasture required only about half as much protein supplement, less grain, and made more rapid gains than similar hogs in dry lot. Nothing is more important than clean pasture in preventing round worm infestation and filth-borne diseases, and in keeping the hogs generally doing well. Extend the available feed supplies with more pasture and needed amounts of Blue Seal Summer Hog Supplement.

DAIRY CATTLE

The amount of grains and protein supplement needed by dairy cattle on pasture depends entirely on the character of the pasture. Ordinarily pastures tend to dry up through the summer months and the dairyman must draw on other feeds to maintain production. However, many dairymen follow the wise practice of providing additional temporary pasture for this period and extends his available feed supply. This provides an abundance of cheap nutrients and usually maintains production at a higher level throughout the summer. It may be wise, however, to feed high producing dairy cows additional grain and Blue Seal Dairy Balancer.

Scholarships Available

Applications for the two scholarships offered annually in each county by the Illinois Farmers' Institute to the University of Illinois College of Agriculture must be made not later than May 31.

The two scholarships include one for a student in home economics and one for a student in agriculture.

The scholarships are offered once each year and must be used in the session starting following a competitive examination given the first Saturday in June at the office of the county superintendent of schools.

Candidates must be from the upper 50 per cent of the high school graduating class and must be certified by the student's high school principal.

Instructions and information regarding the scholarships may be obtained by writing to The Illinois Farmers' Institute, 104 New Agriculture Building, Urbana, Ill.

FILET CURTAINS FOR WARM WEATHER

Change from heavy draperies to these crisp curtains for summer. Designed in simple filet-crochet mesh, they can be made in no time at all. Write for free instructions to WOMEN'S EDITOR, ILLINOIS AGRICULTURAL ASSOCIATION RECORD, 608 South Dearborn Street, Chicago 5, Ill., enclosing a self-addressed stamped envelope.

RASPBERRY CAKES

Individual Raspberry Filled Cakes

¼ cup shortening
½ cup sugar
1 egg
1 cup sifted flour
1½ teas. baking powder
¼ teasp. salt
½ teasp. vanilla extract
⅓ to ½ cup milk

Cream together shortening and sugar until fluffy and light. Add egg and beat well. Sift together flour, baking powder, and salt. Add flour mixture and milk alternately to the creamed mixture to make a soft batter. Add vanilla extract. Pour into greased individual baking cups into each of which has been placed 2 tablespoons of raspberry mixture. Bake in moderately hot oven (375° F.) 30 minutes. Yield: 5 servings.

My Favorite Recipe

BEEF WITH DUMPLINGS

1 pt. beef (or more)
1 pt. hot water
1 cup sour cream and milk (or more)
½ teaspoon soda
1 cup flour (more or less to stiffen batter)
½ teaspoon baking powder
¼ teaspoon salt

Empty beef into good sized pan, add hot water, let come to boil. Add soda to sour milk and cream, add baking powder to cup of flour, also salt, stir into milk and cream, drop into boiling broth. Cook for 10 minutes or more. The good beef and cream in the dumplings is what makes this a grand dish.

—Mrs. Hilda Renshaw
Pike County

Miss Christie C. Hepler, Douglas county home adviser, has resigned to become home adviser in Warren county.

Food Facts

Asparagus au gratin served with crisp butterhorn rolls is a delightful luncheon combination. Add a fruit compote and a beverage to complete a meal as sound in nutrition as it is elegant to eat.

Hot bacon muffins go well with an asparagus salad and deviled eggs. To make these muffins, add ½ cup crisp chopped cooked bacon to the sifted dry ingredients of a standard muffin recipe and proceed as for standard muffins.

One elegant sandwich filling sure to please both young and old lunch box carriers is made by blending equal portions of grated American cheese and cooked mashed peas. Add a bit of salad dressing to moisten and season with salt, pepper, and 1 or 2 drops of vinegar. Spread on sliced fresh enriched bread.

Adding 1 teaspoon poultry seasoning to the dry ingredients of a standard muffin recipe gives them a peppy flavor that is excellent with cooked shrimp in curry-seasoned white sauce.

Add a dash of nutmeg to a standard waffle batter. Serve 2 quarters of golden checkerboard waffle in sandwich-fashion with sliced fresh peaches. A spoonful of smooth ice cream topping this waffle creation makes it a dessert extravaganza.

HOME BUREAU BRIEFS

A landscape gardening tour to cooperators' homes has been planned for June 28 by the Champaign County Home Bureau. The landscape gardening project was halted during the war.

Home advisers from five counties — Tazewell, Fulton, Peoria, Woodford and Marshall-Putnam — are cooperating on weekly broadcasts over a Peoria radio station.

Home Bureau women in Jackson-Perry counties are planning a fall tour of a demonstration homes project which has been underway the past few years. Ten homes are enrolled in the study.

Mrs. Jane Modesitt Pritchett of Cory, Ind., is the new home adviser at Shelby county. She is a graduate of Indiana State Teachers' College and for two years taught home economics in Cory high school.

for HOMEMAKERS

Do Farmers Want Compulsory Insurance?

DO FARMERS want compulsory federal hospital and health insurance? A government official recently indicated that farmers favor such plans. What do readers of the IAA RECORD think about this question?

Addressing a recent Chicago conference on rural health, Mrs. Charles B. Sewell of the AFBF Associated Women said:

"Our chief concern is to get more adequate medical care and hospitalization for our farm folk.

"Yet, we wonder if the personnel set up to administer such a health program would know no more about the subject than those placed in positions of authority of other governmental bureaus dealing with agriculture who recommended 'taking the shoes off a horse at night to save critical steel as a war measure.'

"We wonder if the stork could delay his visit while the necessary red tape was being cut, or if we might receive a directive such as sheep men were presented, advising them in the face of the shortage of herds for the critical lambing season, to 'postpone the lambing until more favorable weather'?"

Mrs. Sewell said she wondered if "it would require as many trips to the county seat to secure stamps for medical care as it has required to get gasoline, tires, farm machinery and rubber boots in order to carry on agricultural production?"

Repeatedly, Farm Bureau has expressed by resolution opposition to compulsory insurance, Mrs. Sewell said.

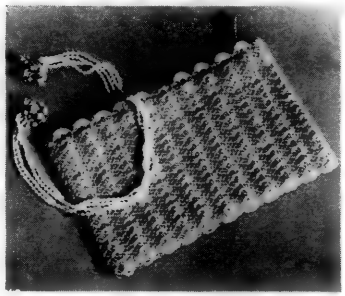
The AFBF has favored objectives of legislation providing for the federal government to extend reasonably its public health program for those unable to provide such care for themselves.

Such legislation, however, should safeguard the rights of states to develop their own programs to meet their own local needs, Mrs. Sewell added.

The federal government is not justified in assuming the burden of supporting health and medical facilities the states can and should bear, but only to the extent necessary to bring about equalization of such health and medical facilities among the several states, Mrs. Sewell said.

"Farmers want adequate medical care," she said, "at reasonable cost. They want the medical profession to learn the needs of rural America, and they believe health problems can best be attacked at local level — in conferences of farm people, hospital associations, public health officials and county medical societies."

SUMMER HANDBAG



This white sea-shell pattern handbag is smart looking yet easy to make and just right for warm weather. Instructions are available free of charge. Write to WOMEN'S EDITOR, ILLINOIS AGRICULTURAL ASSOCIATION RECORD, 608 South Dearborn Street, Chicago 5, Ill., enclosing self-addressed stamped envelope.

VETERANS WIVES STUDY HOMEMAKING AT UNIVERSITY

Wives of veterans attending the University of Illinois have been offered the opportunity of enrolling in non-credit home economics courses at the College of Agriculture.

The young women, numbering 1,500, will be taught such things as preparing meals, mending clothes, caring for clothes and housing equipment, spending money wisely and caring for the children.

The courses are being offered because of many requests from veterans wives for practical training to help them with their homemaking.

Freeze Rhubarb Now

RHUBARB is one food that can be canned or frozen without spending a single sugar stamp, according to Miss Grace Armstrong, extension nutritionist at the University of Illinois College of Agriculture. Sugar stamp No. 9 is good until Oct. 31.

Food research workers at the University have found that rhubarb can be frozen satisfactorily without using a sweetening agent.

It may be blanched or not according to your preference. If the blanching procedure is chosen, select young, tender rhubarb, wash and cut into ¾-inch pieces but do not skin. Blanch in 2½ quarts of boiling water for 1½ minutes. Cool in cold water, drain, pack and freeze.

In packing, ¼-inch space should be left at top of carton to allow for expansion during freezing. Freeze rhubarb as soon as possible after packing for best results.

COLORFUL SWEATER FOR LITTLE GIRLS

This light, colorful sweater is just the thing to make for the little girl in your family. Get instructions free by enclosing self-addressed stamped envelope addressing WOMEN'S EDITOR, ILLINOIS AGRICULTURAL ASSOCIATION RECORD, 608 South Dearborn Street, Chicago 5, Ill.

"LET'S IMPROVE QUALITY OF OUR FRUIT" — *ECKERT*

DEMAND for better quality fruit from members of the Illinois Fruit Growers Exchange was voiced by President A. O. Eckert at the organization's annual meeting in Carbondale last month.

"Let's improve the quality of our fruit," he said. "We have done an excellent job thus far, but there is still plenty of room for improvement.

"Let's make our product so good that people from all over the country will demand Southern Illinois fruit."

Principal speaker at the meeting which attracted 200 fruit growers to the campus of Southern Illinois Normal University was President Charles B. Shuman of the Illinois Agricultural Association.

A bright future for cooperatives and cooperative marketing was pictured by President Shuman. He congratulated members on their progress and forward-looking program designed to improve quality, processing and marketing.

Three new directors were added to the board of the Illinois Fruit Growers Exchange and a fourth new man was elected when Talmage Defrees, vice president and member of the board for 15 years, declined to run again.

New members of the board are William Beauman, Johnson county; Dwight Kirtland, Clark; Lyman Creed, Washington, and Dr. L. A. Floyd, Bond, who replaced Defrees. The three new members were added to give better representation to heavy fruit-growing districts.

Illinois Fruit Supply Company, the cooperative which furnishes supplies to the growers, paid patronage dividends of $20,433.52 at the annual meeting on sales of $383,733.42 for the past year.

Storage and freezing of fruits to take advantage of more profitable marketing periods of the year was considered one of the major factors in the near future by many of the growers present.

Manager Larry Colvis explained the progress that has been made so far on the construction of a cold storage building which is expected to be completed in the fall. When completed the building will have space for 80,000 bushels of apples and facilities for quick-freezing.

Richard McBride

IAA Field Secretary George Metzger commended the fruit growers on their preparations for future developments in the fruit business and emphasized the interest in frozen fruits by relaying a message to Manager Colvis from Cecil Musser, recently appointed head of the Illinois Cooperative Locker Service.

Metzger quoted Musser as saying that he was looking forward to doing an extensive business with the Fruit Growers Exchange by selling frozen fruit raised by Southern Illinois growers through his organization's 80 refrigerated locker plants scattered throughout the state.

Manager Colvis announced that the Illinois Fruit Growers Exchange had employed the services of two experienced men to handle the organization's sales work beginning in June.

Richard S. McBride, 35, recently discharged from the armed service, and his uncle, D. F. McBride, 47, will come from their homes in Texas this summer to take over the selling job.

The hiring of the Texas men came after some discussion by the board of directors brought out the fact that while Illinois fruit and vegetable marketing is almost all done between May and November, marketing in Texas is generally from November to May.

It looked like an excellent set-up for Illinois to use Texas salesmen during its slack season and vice versa. The McBrides liked the idea too and an agreement was made. Dick will arrive in June and stay until November and D. F. McBride will come to Carbondale in August for the peach harvest.

Both men have been in fruit sales work all of their working lives and are thoroughly experienced selling fruits and vegetables in truck and carlot.

Other speakers on the annual meeting program were: S. C. Chandler, state entomologist; President Chester Lay of Southern University, and Fred Bierer, Fruit Exchange Supply Company manager.

Manager and board of directors of Illinois Fruit Growers Exchange are shown during recent annual meeting in Carbondale. L. to R. (front): D. B. Kirtland, Clark county; President A. O. Eckert, St. Clair; Manager L. L. Colvis; L. A. Floyd, Bond; Secretary-Treasurer F. G. Anderson, Union; (second row), H. E. Hartley, Marion; Orin Hertz, Washington county farm adviser; Vice President E. D. McGuire, Jackson; William Beauman, Johnson; (back row), Trevor Jeffries, Jefferson; Arthur Foreman, Pike; Lyman Creed, Marion; and R. B. Endicott, Pulaski. Not in picture is Chester Boland of Edgar.

"HAIL STONES AS BIG AS NEST EGGS!"

In the quiet of his banker's office, on a gray winter's day, a farmer sits and talks about a hail storm. He tells no tall tale about hail stones big as hens' eggs. They were just little stones — but they rained like bullets from last June's sky and cut one hundred acres of growing corn to ribbons. They were just little stones, but bigger than this farmer's NEST egg! Now, he must borrow heavily to operate for another year.

Hail does not always strike on the "other fellow's" farm. But the danger of hail loss need not worry a wise farmer; protection through a Farm Bureau policy for his growing crops costs very, very little. See your Farm Bureau insurance representative today.

Country Life
INSURANCE COMPANY

Farming is made up of a thousand skills. That is why, when the breadwinner is removed, a farm family faces a serious adjustment. That adjustment, however, no matter how unexpected, need not find a family unprepared.

Today, moderate-priced Country Life Insurance is within the reach of every farmer. Proof of this is found among the more than 140,000 Country Life policies now in force — approximately 80% of which are held by Farm Bureau families.

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

WHICH ROAD?

By President Charles B. Shuman

DURING and immediately following World War I a premium price was paid for cereal grains. Farmers were urged to plow up every possible acre to produce corn and wheat to feed the hungry people of the world.

We were assured that the export market would last for many years. Experts told us that the shell torn fields of Europe could not be restored to normal production for several years. Many of us remember quite vividly how far wrong were these predictions.

We had underestimated the remarkable ingenuity and determination of the European farmers. Within a matter of months European agriculture was producing at near self-sufficiency levels. Too late we found that we had converted our agriculture to a cereal grain producing structure. We had encouraged our consumers to reduce their consumption of meat and livestock products in favor of cereal foods. Great grain surpluses accumulated. To a considerable extent the disaster which engulfed agriculture during the twenty years from 1921 to 1940 was chargeable to these basic errors.

Today we are being urged and possibly will be forced to pursue the same course. Much of the same reasoning is being used today. We are told that there will be a continuing demand for our grain in the foreign market for many years. Government experts tell us that many more people can be fed from the products of an acre of land if the grain is used as cereal foods, rather than being fed to livestock and the livestock products used for food.

Several city newspapers and propaganda-spreading national magazines have branded farmers as heartless and selfish because "they permit hogs to eat the grains that should be filling the stomachs of starving children". Contrary to actual facts, the American farmer has been charged with grain hoarding and waste. U. S. Department of Agriculture figures disprove these charges as the spring holdings of grain by farmers are in reality far below normal. Government planners themselves are to blame if too much grain has been fed to livestock, as they alone could have changed the controlling price relationships long ago.

What is the picture today? Apparently having decided that our livestock industry must be sacrificed, the planners have issued another order! Grain and feed prices have been increased out of all proportion to the price of livestock. If these price adjustments were needed, they should have been made last fall while farmers had possession of the grain, or postponed until the start of the new crop movement. In any case, adjustment of livestock prices to prevent undue liquidation of breeding herds is now imperative. Unless corrective measures are taken immediately, these drastic grain and feed price increases may be the beginning of the same road to ruin we followed at the close of World War I.

Normally our livestock population serves as a huge ever-normal granary. Livestock feeding is the cushion that absorbs the surplus grain crops and carries them over so that the people have plenty of food during short crop years. Once our breeding flocks are depleted and the public becomes educated to eating cereals in the absence of animal product foods, it requires many years to recover a normal balance. For the future welfare of all the Nation, we must not permit those who plan to make the same series of mistakes that were made after the first World War.

Ping Pong, Plows and the O

By L. H. SIMERL
IAA Director, Research and Taxation

AS A farmer you probably can't buy the lumber you need for a tool shed, but you can get a brightly painted ping pong table — for $50. That's because under OPA price ceilings greater profits are realized when lumber is made up into game tables.

As a housewife you can't buy cotton yard goods to make clothes for yourself and children but are forced to pay high prices for skimpy, low-quality ready-made garments. Under OPA orders, there's no profit in selling yard goods.

A farmer has great difficulty buying a plow or fencing, but city stores have plenty of portable iron grills for frying hot dogs. It's OPA again.

"That's Just Too Bad"

When these conditions were brought to the attention of a Chicago OPA official, he said, "That's just too bad. We can't help it. If manufacturers want to make ping pong tables instead of things farmers want, there's nothing we can do about it."

Farmers cannot get what they need because OPA price ceilings favor the manufacture of other things. Likewise, many city consumers can't get meat and other essentials because price ceilings make it unprofitable to sell in that area or manufacture the products they require.

During the war the OPA price ceiling orders were one part of the general inflation control program. In a radio talk in April, 1942, the late President Roosevelt outlined the six basic features of that program as follows:

1. Heavier taxes
2. Increased sale of War Bonds
3. Credit control
4. Wage control
5. Rationing
6. Price ceilings

In union there was strength. Used together these six measures kept inflation under partial control during the war years.

At the end of the war, the people had about 140 billion dollars in spendable savings. The federal budget called for expenditures of 83 billion dollars a year. These highly inflationary conditions called for a continuation of anti-inflation measures. Instead, the government abandoned five of the original controls. This made it impossible to maintain the sixth — price ceilings. Here's the record.

(1) Heavier Taxes

This most basic inflation control was greatly weakened by Congress. Tax rates for all individuals and corporations were reduced, and about 12,000,000 persons were exempted entirely from federal income taxes. This gave wage earners more millions to spend and made more fuel for the inflationary fires built by heavy government spending during the war.

(2) Increased Sale of War Bonds

The War Bond drives were discontinued after November, 1945. The reduction in Bond sales left consumers with more cash for bidding up prices of scarce items.

(3) Credit Controls

Both government and private lending agencies relaxed credit controls. Appraisal values were increased, and installment credit restrictions modified. Easy credit promotes inflation.

(4) Wage Controls

The federal government reversed its wage control policy almost immediately after V-J Day. President Truman apparently was led to believe that wages had to be increased in order to maintain consumer buying power and also that wages could be increased without increasing prices. On October 30, 1945, the President said, "WAGE INCREASES ARE . . . IMPERATIVE . . ."

This was an invitation to labor leaders to demand, and a virtual order to employers to pay, higher wages. Printing pressmen, rubber workers, and oil refinery employes went on strike. Automobile workers, lumber workers, and

IN UNION THERE WAS STRENGTH

the OPA

bus drivers walked out. Glass makers, electrical workers and machinists followed suit. Textile mill workers, farm machinery employes and meat packing house laborers took their turns. Steel mill workers, coal miners, railroad trainmen and engineers brought the economic activity of the nation almost to a standstill. One after another thousands of industrial plants were closed by strikes and lack of materials. The shortages created by labor disputes made for higher prices and increased living costs.

After strikes lasting more than three months in some instances, wage rates were increased about 18½c an hour. These higher wages increased the cost of production and distribution of virtually every manufactured product. They also gave many workers about $1.50 a day additional pay to bid up prices. The administration made a disastrous mistake when it abandoned its wage control policy and started promoting wage increases.

(5) Rationing

Immediately after V-J Day, rationing of gasoline was discontinued. Soon all rationing except of sugar was ended. At the abnormally low ceiling prices, people always want to buy more than is available. Hence, without rationing the maintenance of effective price ceilings is an impossibility.

(6) Price Ceilings

It was to be expected that effective price ceilings could not be maintained after the end of rationing and other basic inflation control measures. The OPA, however, made its own failure doubly certain by following impractical policies. The OPA tried to keep prices fixed, while wages and costs of production rose everywhere. This stopped or delayed activity on production lines. The OPA based its ceiling prices on previous selling prices rather than upon current conditions. This practice favored the inefficient operators who had a record of high costs. It discriminated against the efficient managers who had sold at low prices. It became impossible for efficient manufacturers to continue production of many items.

Another fatal error of OPA was its policy of trying to keep prices of food and other essentials low while prices of non-essentials and luxury goods advanced. The natural result was that labor and materials were diverted from the production of essential commodities to the manufacture of the more profitable luxury items, knick-knacks, and gimcracks which fill so many store counters today. Many of the essential

items that were manufactured have been sold outside the United States where OPA has no jurisdiction.

Since V-J Day, OPA has issued nearly 10,000 pages of price ceiling orders. Legal methods have been found for avoiding the intent of most of them. Hundreds of others have been simply ignored. For example, according to research reports which have not been disproved by OPA, consumers in most large cities have had to pay 20 to 25 per cent over ceiling prices in order to obtain meat. Discriminating shoppers will note that in many other lines controls have been even less effective.

Even the government has found it necessary to violate its own price ceilings. A few weeks ago when a federal agency decided to purchase a quantity of wheat and corn, it was obliged to offer a "bonus" of 30c a bushel. This action was in direct contradiction to previous official statements. It has undermined farmers' confidence in and respect for the government. It probably has made any future effective price controls over grains impossible.

The original argument for price ceilings was that they would keep the cost of living down and thus prevent labor unions from demanding and getting big wage increases. The experience during the last nine months has destroyed this favorite argument for price ceilings as thoroughly as the atomic bombs destroyed Hiroshima and Nagasaki.

Under conditions which have prevailed since the end of the war and with the original supporting measures gone, a dozen OPA's could not prevent price increases. Price ceilings alone have never prevented inflation in any country, nor has the absence of such ceilings ever caused inflation anywhere. The quicker the people of this country realize these facts, the better. They should recognize that their interests will be better served by eliminating OPA entirely rather than by encouraging the false sense of security which results from the mere illusion of price control.

For many years economists have known that inflation is caused by excessive spending on the part of the government. They know that inflation can be prevented only by economy in federal expenditures and by heavy taxation.

If government officials and the American people really want to prevent inflation, they will recognize these facts. They will see to it that federal expenditures are immediately reduced to less than the amount being collected in taxes. Common sense and history alike tell us that this is the only way that inflation can really be prevented.

If labor really wants to keep living costs low and if industry really wants to maintain the free enterprise system in America, both will get on the job and see how much, not how little, they can produce.

ARMY ENGINEERS HEAR PRO-CONS ON ILLINOIS FLOOD CONTROL

Representatives of numerous organizations and just plain citizens pack the Auditorium of the Centennial building in Springfield to voice their approval or opposition to the proposed Illinois River basin flood control program.

*

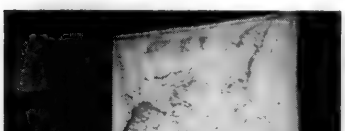
By JIM THOMSON
Ass't Editor IAA Record

PROTESTS from a score of upstream county Farm Bureaus and numerous civic, industrial, conservation and sportsmen's organizations on the proposed Illinois River basin flood control plan were heard by a board of army engineers in Springfield, May 31.

Before a jampacked audience in the auditorium of the Centennial building, a parade of spokesmen denounced the army's flood control scheme as "ill-conceived," "unsound," "morally, economically and socially wrong," "unjust and unjustifiable," "inadequate," "unwarranted," and "an extravagant waste of the taxpayers' money."

The project contemplates the expenditure of $90,924,250 (1940 estimate) for the construction or improvement of 315.7 miles of levees and flood walls and improvement of 406 miles of Illinois River tributary channels, and the purchase of 142,700 acres of upstream land for 15 flood reservoirs.

The Illinois Agricultural Association board of directors has expressed opposition to the provisions of the plan calling for the acquisition of farm lands for the reservoirs pending the adoption of an official position by the membership at the annual meeting in November.



The U. S. army board of engineers hears Evan Taylor (right), Sangamon County Farm Bureau president, protest against the flood control plan.

Objections and recommendations and a request that further study be given the plan for flood control were filed at a previous hearing before the army board of engineers in Washington, April 30.

Not quite so vociferous or numerous but just as firm as the opposition were delegations from downriver communities and civic organizations favoring the flood control plan.

Back Flood Plan

A plea for protection from future floods was voiced by representatives from Beardstown which barely averted disaster during the 1943 flood.

"People upstream think they have a God-given right to get rid of the water on their land as fast as they can, regardless of the consequences to the people downstream," I. E. Wilson, white-haired Farm Bureau member from Tazewell county, declared. Wilson said he represented farmers in the Mackinaw Valley.

Speaking for the farmers of Ford county's Vermilion Valley, R. W. Chambers of Piper City said they had experimented with private efforts at flood control and were "disappointed" at the results. Chambers said farmers he represented were ready to approve any steps the government might take to lessen flood conditions and backed the plan as it applied to the Vermilion Valley.

Confidence in the ability of U. S. army engineers and their recommendations was expressed by Charles Arnold, Farm Bureau member and former president of the Greene County Farm Bureau.

He pointed out that much water formerly was held in swamps and low wet lands up river. These swamps and naturally wet lands have been drained, he said, and a greatly increased run-off has been thrown on the lower river areas. Flood control, Arnold said, is the problem of all, not merely the burden of those in drainage districts downstream.

An endorsement of the flood control plan was heard from Lee Martin representing the Greene county soil conservation district. The board of directors of the Livingston County Farm Bureau filed its approval of the plan as it applied to the Livingston county area and on condition that the army "finish the job."

Others speaking in favor of the flood control plan included the mayor of Decatur, representatives of Paxton, Murphysboro, Chambersburg, Canton, the Spoon River Valley, Jackson county, and the Mississippi River Valley Authority.

The Sangamon County Farm Bureau and Springfield were particularly militant in their arguments against the flood control reservoirs in Sangamon county and the Springfield area.

Recommend Conservation

A proposal that the project be abandoned until the effectiveness of soil conservation measures to slow up run-off is tried was offered by Evan Taylor, president of the Sangamon County Farm Bureau.

Taylor said the plan was a "gross injustice" to Sangamon county farmers.

List Events for ILLINOIS FARM SPORTS FESTIVAL

PLANS for the seventh annual Illinois Farm Sports Festival Aug. 29 and 30 at the University of Illinois, Urbana, are moving ahead rapidly.

More details of the program were worked out at a meeting of the Festival state committee June 3 at the Illinois Agricultural Association offices, Chicago.

The list of events drawn up by the committee will provide the greatest participation possible for all folks from ages 7 to 70.

Added to this year's program are Rural Youth softball for both boys and girls, men's volley ball, and ping pong and knot tying for women.

Another program addition is a physical fitness event for 4-H club members. Some 25 counties are carrying on such competition at the present time as part of their 4-H programs.

Eliminated from the 1946 program are horse pulling, bait casting, clock-golf and badminton.

Deadline set for entries at the IAA office, 608 South Dearborn St., Chicago 5, Aug. 17 for softball teams and Aug. 26 for other entries. Eligibility lists of softball players must be postmarked not later than midnight, Aug. 23. A $5 entry fee for all softball teams entered must be forwarded not later than Aug. 17. Entry blanks are being made available at County Farm Bureau and Home Bureau offices.

Other details of the softball division include: adoption of official 1946 softball playing rules; to compete in Rural Youth softball play, players must have attended at least two regular Rural Youth meetings during the year.

Program of Events

In main, here is the program of events for the 1946 Festival:

Softball — adult county league, all county division, Farm Bureau members over 35 years old, boys' 4-H division, boys' Rural Youth division, girls' 4-H division, girls' Rural Youth division.

Track — two divisions for boys 15 years and under, and 16 and older: 50 yard dash, 100 yard dash, high jump, broad jump, and ½ mile relay. Two divisions for girls, 15 years and under and 16 and older: 75 yard dash, high jump, and broad jump.

Archery — men, individual; women, individual.

Horseshoes — men singles and men doubles; tug o' war, eight-man team; trap and skeet shoots, men individual and team (5). Rifle shoot, men, individual; men, team, (5); women, team, (5) and women, individual.

Bowling — men, individual; men, team (5); women, team (5) and women, individual.

Women's events — dart throwing, ping-pong, chair quoits, clock golf, shuffle board, knot tying, and horseshoes.

Music and folk dance contest — family singing, choral group, song leader, square dance, folk dance, novelty dance band, square dance band and square dance caller.

Music specialties and novelties.

Special events — woodchopping, individual; hog calling.

Swimming — boys' divisions: 15 years and under and 16 years and older, 50 yard and low board diving. Girls' two divisions: 15 years and under and 16 years and older, 50 yard swim and low board diving.

Checkers — individual; volley ball for men, and 4-H physical fitness event.

Men's wrestling — two divisions: one for those 17 and under as of July 1, 1946, and one for those 18 and over as of July 1, 1946.

General eligibility rules for participation in the Festival are that all contestants must be from Farm Bureau or Home Bureau families, or 4-H club or Rural Youth members, and at least one-half of the participants in square dance, folk dance, choral groups, square dance bands and novelty bands, must be from Farm Bureau or Home Bureau families or 4-H or Rural Youth members.

In the folk festival, each county may make one entry in each division or subdivision. It is also recommended that counties hold folk festivals in which selections are made for the State Festival.

Next meeting of the state committee for the Festival is schedule for 10 a.m. daylight saving time, July 29 at the Student Union building, Urbana.

Roy P. Johnson, IAA director of special services, is secretary of the Festival.

I. A. A. Issues Statements on

STRIKES - PRICES

RESTORATION of "teeth" to the Case labor bill was urged by the Illinois Agricultural Association board of directors in a statement issued following the May meeting of the board. This statement was sent to Illinois members of the House and Senate.

The Senate adopted the amendments supported by the IAA and American Farm Bureau Federation by a vote of 49 to 29 on May 25. The House on May 29 accepted the Senate-amended Case bill by a vote of 230 to 106 and sent it to the White House for President Truman's signature.

President Truman on June 11 vetoed the Case bill and the House failed by 5 votes to override his veto, thus the measure was temporarily defeated.

The American Farm Bureau Federation board of directors, of which Charles B. Shuman, IAA president, is a member, in a wire to President Truman on May 30 appealed to the President to sign the Case bill.

At the May meeting of the IAA board a statement was also adopted in regard to livestock and soybean prices. Both of these statements are printed below.

Labor Disturbances

The American government and way of life are founded on full production. If these are to continue, the production of goods must be on an ever increasing scale.

Since V-J Day a long series of strikes and labor disturbances in basic and major industries has hindered reconversion, paralyzed our economic system and undermined the very foundations of our government. The attitude and actions of certain labor groups and leaders has cost billions of dollars in loss of production, wages of workers and markets for farm products.

Our modern economy is highly specialized, and economic groups are necessarily dependent upon one another. Under these conditions a few individuals must not be allowed to throttle the nation's economic processes.

After many years of struggle, organized labor has gained, largely through national legislation, a tremendous power. Some labor leaders seem not to recognize that the possession of this great power properly carries with it corresponding responsibilities. National legislation should be enacted placing responsibilities on labor unions comparable to those which have been placed by law on management. Such legislation is essential to curb abuses by labor leaders and to check the loss of production and waste of resources we are now experiencing.

Legislation as reported by the Senate Labor Committee is entirely inadequate. We urge that Congress adopt the Ball-Taft Amendment and other appropriate legislation to protect the people, the government and the workers themselves from irresponsible labor leaders.

Price Ceiling Adjustments

As an aftermath of history's most frightful war, famine rages in many lands. Food from America is the only hope of life for millions of people. Fats, oils and protein are especially needed.

Although soybeans can produce more oils and protein than any other crop, recent actions of the Government threaten to greatly reduce the acreage to be planted to soybeans. According to a Government report issued in March, U. S. farmers expected to plant about one and one-half million acres less soybeans in 1946 than in 1945. The recent increase of 25c per bushel in the ceiling price of corn will cause a marked increase in corn acreage and a further reduction in soybean acreage, unless soybean prices are increased in proportion to the increase in corn price ceilings. If fats, oils and proteins are needed as critically as we have been led to believe, it is essential that the price for the 1946 soybean crop immediately be increased in proportion to the increase in the ceiling price of corn.

Another very important effect of the higher price ceiling for corn is to increase feeding costs and force heavy marketings of livestock. Although this brings about a temporary increase in meat production, after a few months the marketings of hogs and other livestock will be greatly reduced, and supplies of meat will be even less than the small amounts available in recent weeks. At the same time unused corn may accumulate to form a surplus which would depress prices later. In order to prevent the accumulation of such a surplus, an unnecessarily severe liquidation of livestock and a critical reduction in meat supplies, livestock price ceilings, especially those on hogs, must be increased to reflect at least part of the large increase in feed costs.

SEEK FUND TO GIVE BLIND VET A DAIRY FARM

IN GRATEFUL appreciation of his great sacrifice as a result of battle action during the Philippines campaign, Henderson county farm folk are quietly pushing a campaign of their own to raise funds to present Dale Johnson, blinded veteran, with a small farm.

Dale Johnson

Spearheading the drive to raise at least $10,000 is the Henderson County Farm Bureau and Farm Adviser A. J. Rehling, who with Charles Noble, vocational agriculture instructor at Biggsville, started the Dale Johnson Fund.

Dale Johnson is a farm boy from the Biggsville community who lost his eyesight when struck by a Jap sniper's bullet. Since returning home he has been living on his parents' farm with his wife and child.

It's Dale's wish to live on a small farm where he could handle a small dairy business of his own and the fund committee, representing every township in the county, is determined that he shall have his wish. Farm buildings contemplated would be laid out to make it simple for him to find his way about.

Townspeople of Henderson county are also backing the drive and contributions from other parts of the state are welcome. Contributions should be addressed to The Dale Johnson Fund, Henderson County Farm Bureau, Stronghurst, Ill.

IAA HIRES NEW SAFETY DIRECTOR

Walter W. Whitlock, 27, Mt. Vernon, recently discharged from the Navy, has been hired as director of safety for the Illinois Agricultural Association. He was scheduled to start work June 17.

Walter Whitlock

A native of Jefferson county, the new safety director is the son of Mr. and Mrs. Walter P. Whitlock of Mt. Vernon.

With the exception of time spent in the Navy, Whitlock for several years was connected with a large insurance company as inspector and claims director.

Whitlock first entered the Navy as an enlisted man in the Seabees and worked on various projects in this country and Hawaii. Later he worked with the Navy medical corps in epidemiology, mosquito control, and general prevention of disease. He served in this capacity at several advance bases in the Pacific area. He was commissioned from the field on Tinian Island and returned to the United States for line training, later serving as officer on U. S. S. LST 636 in the Pacific area, operating in New Guinea, Dutch East Indies, Philippines, China and Japan. Whitlock recently completed several months' duty in connection with repatriation of Japanese and Chinese in North China and Japan areas.

Whitlock was graduated from Mt. Vernon high school and completed majors in both chemistry and education at Southern Illinois Normal University in Carbondale.

While attending college, Whitlock had safety education in University high school practice classes for undergraduate teachers. Later he was adult education supervisor for a government educational project in several Southern Illinois counties. While serving in the latter capacity, Whitlock organized and directed safety education programs in several towns including Murphysboro, Carbondale and in several CCC camps of the area.

Whitlock is married and has two children. His wife is the former Lois L. Williams of Mt. Vernon.

LOCKER SERVICE EXPANSION HALTED

CONSTRUCTION work estimated at more than a half million dollars is being held up on Illinois Cooperative Locker Service plants due to rejections of applications by the Civilian Production Administration.

Nine other Cooperative Locker Service plants now under construction or in the last stages of completion involve a total expenditure of $372,000.

Eight more plants in various stages of pre-construction planning and which have been authorized by local boards, will cost an additional quarter million dollars when completed.

Applications rejected include slaughter-processing plant at Joliet, Will county, locker slaughter plant at Red Bud, Randolph county; locker plant at Mattoon, Coles county; locker plant at Palmyra, Macoupin county; locker plant addition and central processing plant at Golden, Adams county; locker plant at Anna, Union county, and locker plant at Orion, Henry county; slaughter and locker plant at Dongola, Union county.

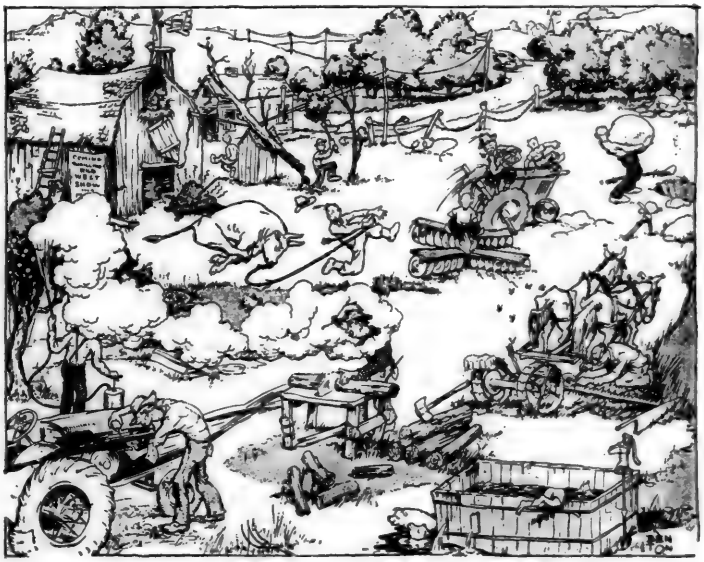
Plants now under construction or nearing completion include the locker plant at Chapin, Morgan county, in the process of construction following a fire; enlargement of the locker plant at Cambridge, Henry county; a slaughter plant at Paris, Edgar county.

Locker plant completed at Cobden, Union county; slaughter plant at Shelbyville, Shelby county; a fruit storage building being built by the Illinois Fruit Growers Exchange at Carbondale, Jackson county; additional lockers to the locker plant at Carbondale; a slaughter plant at Carbondale, and locker plant at Sidney, Champaign county (building completed).

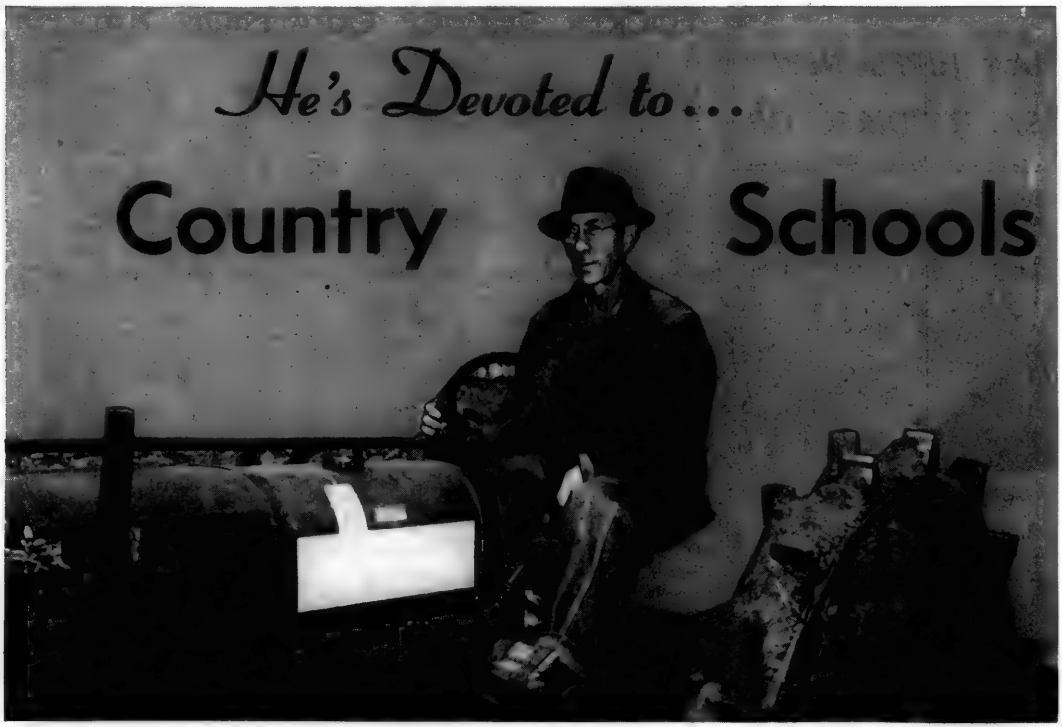
Other plants being planned and which have the approval of their local boards include locker buildings at Pinckneyville, Perry county; at Marion and Johnston City, Williamson county; locker plant expansion at Moweaqua, Shelby county; locker expansion and processing plant at Macon, Macon county; slaughter plant at Charleston, Coles county; and locker plant expansion at Mounds, Pulaski county.

Plants being considered but which have received no final official endorsement as yet include a locker plant at Ursa, Adams county; locker plant at Elizabeth, Jo Daviess county; slaughter plant at Henry, Marshall-Putnam counties; slaughter plant at Champaign, Champaign county; locker plant at Golconda, Pope county; slaughter processing plant somewhere in Whiteside county; slaughter processing plant at Ottawa, La Salle county, and a rendering plant at Carbondale, Jackson county.

What's Wrong With This Picture?



There are 62 violations of common safety rules illustrated in this picture. How many can you find? The violations are listed on Page 26.



AS IF to mock the newly elected school board, flames burst from the walls of the Franklin high school one day in 1930. Hours later, the neat little high school lay in worthless ruins.

The fire couldn't have happened at a more troublesome time. Money-scarce depression days were just ahead.

But with the farmer's stubborn will to resist misfortune, the board took up the challenge. Two years later, the community had a new school. Yet more than that, it sowed the seed that today makes it one of the top small high schools in Illinois.

Champion of the community's desire to make the Franklin high school one of the best in the state is slender, quiet Charles R. Gibson, a charter member of the Morgan County Farm Bureau who came to the board 16 years ago just before the school burned down.

From the start, Gibson made up his mind that his community of 1800 rural people would have a new school and scholastic standards second to none. There was nothing selfish in his demand for a new school. He and his wife have no children.

Shortly after the building was completed in 1931, the new school received probationary recognition and in 1935, the year Gibson became president of the board, the Franklin school was accredited by the state.

In 1942, Gibson saw his dream come true when the school received full approval of the North Central Association of Colleges and Secondary Schools. With 52 students, it is now one of the smallest schools in the state with a North Central Association rating.

For his service to education, Gibson was recently awarded the Illinois Education Association and National School Service Institute Certificate. The certificate reads in part: "In recognition of distinguished service rendered the public schools of the state of Illinois."

Despite the acknowledgment of his work by state educational leaders, however, Gibson modestly gives most of the credit to the board, the community and the school staff.

On his own contention that farmers can work out a satisfactory answer to their own problems in education and community life, he has set a good example.

Well-equipped with formal education himself, Gibson knows what he wants in education and tries hard to attain it. He was born and reared in the Franklin area and attended Franklin schools.

From DePauw University at Greencastle, Ind., he received the degree of bachelor of arts and later from the University of Illinois he earned the degree of bachelor of science in agriculture.

Gibson started farming in 1916 and lives with his wife in a comfortable, brown shingled house on his 120-acre

★

farm west of Franklin. His major cash income comes from the raising of 150-200 hogs annually. His major crops are corn and soybeans.

Gibson also is serving as chairman of the Morgan county school survey committee. He would appear to be the logical man to put at the head of a committee seeking the betterment of rural schools.

In fact, the Franklin high school board president was asked by State Superintendent of Schools Vernon Nickell to serve on the state school survey committee and the state school association advisory committee. Gibson declined the invitation because of the press of farm work and other duties. He said he was afraid he couldn't devote the time the job deserved.

Besides farming and serving as president of the school board, Gibson has been vice chairman of the AAA since its start, spending much of his time in the AAA office in nearby Jacksonville. He is also president of the National Farm Loan Association at Jacksonville. A veteran of World War I, he is a member of the American Legion and the Jacksonville Kiwanis Club.

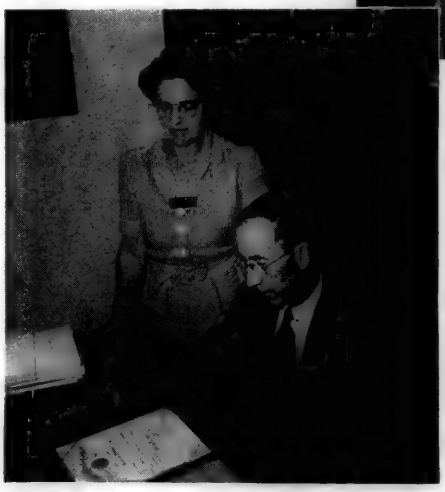
Speaking on rural elementary school reorganization, Gibson said: "Sentiment for reorganization is far stronger now than it was a few years ago. The consensus of opinion is that there are too many one-room schools in our county and that we are going to have difficulty raising enough taxes to meet the state teachers' minimum salary law."

The beautifully landscaped, eight-room Franklin high school, which cost $42,000 to build during depression years, reflects the high standards demanded by the North Central Association.

A superficial glance through the rooms reveals clean, attractive surroundings with up-to-date equipment, including an unusually large library, maps and charts, and visual aids equipment.

Principal Harry Fitzhugh and his staff enjoy the full confidence of the board. Fitzhugh, in turn, appreciates the cooperation of the board in providing needed equipment and instructional supplies. "When they see the value of any of our requests," Fitzhugh said, "they are quick to follow through for us."

Board President Gibson hopes some day to see vocational agriculture added to the curriculum. Meanwhile, Franklin high continues to enrich the community with young men and women leaving school with a finer and clearer sense of values in no small measure because of a slight, quiet farmer who believes that nothing that can be afforded is too good for the education of the youth of his community.



Above: Charles P. Gibson (right), Franklin high school board president, chats with Principal Harry Fitzhugh on the front steps of the Franklin school. High educational standards of school are due in no small part to Farmer Gibson and the close cooperation between school board and faculty.

Left: At their farm home Mr. and Mrs. Gibson look over the certificate he received from the Illinois Education Association and National School Service Institute in recognition of his distinguished service to the public schools of the state of Illinois.

He's Devoted to...

Country Schools

From the Illinois Fruit Growers Exchange at Carbondale, Manager L. L. Colvis predicts an Illinois peach crop of 50 to 70 per cent of last year's production.

Freezing weather, hail, light bud set and an unusually heavy drop of blossoms in some areas have combined to cut the peach crop potential to 60 to 70 per cent of last year's crop below Carbondale, and 50 to 60 per cent north of Carbondale.

Colvis said the crop appears to be of good quality but is subject to further damage from wind, hail and pests. The Illinois apple crop promises to be considerably larger than last year. The crop of Transparents being picked this month is reported to be unusually good.

John H. Brock, Will county farm adviser for the past two years, has resigned to become business manager of the Northern Illinois Dairy Cattle Breeders' Association with headquarters at Dundee in Kane county. He will take over his new duties soon after July 1. Brock also has served as farm adviser in Bond and McHenry counties.

"Don't be confused by the large number of names used for weed-killing chemicals," advises L. V. Sherwood, University of Illinois agronomist. "All of these weed-killers have the same chemical, 2,4-D."

The names are different because different companies sell the same chemical. The new weed-killer does not kill all weeds and very few grasses. However, it is effective, Sherwood says, against ragweed, poison ivy, lawn clovers, young crabgrass, curled dock and others.

Weeds such as Canada thistle, field bindweed, leafy spurge and bull nettle require more than one treatment of 2,4-D. Cost of the application is $10 to $20 per acre. It is non-combustible and non-poisonous to animals.

Edwin H. Henderson of Lake county has been named assistant farm adviser at Fulton county. He succeeds Kenneth Flake, now Henry county farm adviser. Henderson is a 1943 graduate of the University of Illinois College of Agriculture. He was recently discharged from the army after three years service. His wife is the former Lamoine Holland of Cuba, Ill.

George C. Engel, Knox county assistant farm adviser in 1942, has returned to his job after 3½ years in the army. He spent much of his time in the Philippines and Japan.

Shorts in the News

Earl M. Lutz, vocational agriculture teacher at Bluffs high school in Scott county since 1942, has been employed as farm adviser of Gallatin county. Lutz was born on a farm near Sandoval in Marion county, graduated from the University of Illinois College of Agriculture in 1936 and received his master's degree there in 1942. He formerly taught vocational agriculture at Equality high school in Gallatin county.

Don Duke, who has served for 17 consecutive years with producer agencies, has been named manager of Peoria Producers. He had been chief hog salesman with the Peoria organization since 1943. Duke started with Chicago Producers in 1929 and later served as manager of Fort Wayne, Ind., Producers. He was born, reared and educated in Iowa, is married and has three children.

Illinois Star Farmer, highest state honor conferred by Future Farmers of America, was given to Lon Shaw (above), a senior at Maroa high school in Macon county at FFA state meeting in Springfield. Lon cultivates 45 acres of land and raises hogs and purebred cattle.

Seventy-six county and local agricultural fairs in Illinois, offering $1,443,616 in premiums, are schedule to be held this year, according to Arnold P. Benson, state director of agriculture. This is an increase of 14 over 1945.

New fairs being organized include shows to be held at Greenville, Martinsville, Carthage, Elizabeth, Macomb, Decatur and Metropolis.

Fairs not held in 1945, which will be resumed, include those at Belvidere, Augusta, Stronghurst, Jerseyville, Elgin, Highland, Arthur, Sparta, Roseville and Ashley.

The Livingston County Fair, the Stark County Agricultural Exhibit and Horse Show, and the Stephenson County Community Fair, which were held last year, will not operate in 1946.

Net farm income for last year on 110 accounting farms in 12 counties surrounding Franklin county averaged lower than for any year since 1933, according to a report by the University of Illinois Department of Agricultural Economics. The report indicated that the low return for 1945 was due to a poor crop year and higher operating costs.

Christian and Henderson counties can look forward to being the first Illinois counties to get new soil maps now that the war's end has made it possible to resume the field work of the Illinois Soil Survey, reports Dr. R. S. Smith, head of the soil survey.

During 1942-1943 all members of the soil survey staff went into military or defense service. Four of them are back on the job now, although one has been asked to go to Japan to help make a soil map of the island.

Mapping of Christian county was about three-fourths completed before the survey lost its staff. This county will be completed this summer. Work is beginning in Henderson county, where a great many requests for a soil map have been received.

American Farm Bureau Federation is sponsoring a series of radio programs on the National Broadcasting Company network. Programs are heard at 12:15 p.m. Central Standard Time on Sundays only. Remaining broadcasts will be heard July 14, July 28, August 11, August 25, and Sept. 8.

Illinois farmers used 4,215,000 tons of limestone in 1944 as part of their soil improvement program. This is about one-fifth of all limestone used in the United States and about two-fifths of that used in the five corn-belt states.

Havana River Co-op

BUYS FRONTAGE, ELEVATOR

THE grain merchandising program of the Farm Bureau in Illinois is moving ahead rapidly with the acquisition of river frontage and elevators.

Developments during the first of June included the purchase June 7 of the elevator properties of the Havana Co-operative Grain Company at Havana by the Havana River Grain Company. The sale was approved by a unanimous vote of stockholders at the Mason County Farm Bureau with President Rudolph Hackman in charge of the meeting.

The transaction makes available to the new river operating company a 25,000-bushel elevator and nearly 500 feet of choice river frontage on which will be built a modern river terminal which will be used to load barges operating on the Illinois River.

The board of directors of the Havana River Company met June 7 and authorized immediate construction if materials can be secured.

The Western Illinois Grain Company, with headquarters at Dallas City on the Mississippi River, shipped the first load of barged grain May 18 when a barge of 40,000 bushels of corn moved from that point to the St. Louis market. The consignment was government corn assembled at the port at Dallas City.

The Bureau County Farm Bureau has filed incorporation papers for the organization of the Bureau County Grain Company. The new company will be a subsidiary of the local County Farm Bureau and is being organized for the purpose of providing a nucleus for a county-wide grain and feed service to Farm Bureau members.

A 30,000 bushel elevator has been purchased from the Larson Seed Company. This elevator is located in the same block with the Farm Bureau and adjoins the feed properties of the Bureau County Service Company.

The Bureau county grain project will be tied in with the operations of the Prairie Grain Company when the latter company starts its proposed grain business on the Illinois River.

WATTS IS MANAGER OF WESTERN GRAIN

Fred J. Watts, 30, former manager of the Norris Grain Company river elevator at Havana, has been named manager of the Western Illinois Grain Company, subsidiary of Illinois Grain Terminals Company, the IAA's new $3,000,000 grain marketing cooperative.

F. J. Watts

Western Illinois Grain Company, which will serve patrons in Hancock, McDonough, Warren, and Henderson counties, has purchased elevator properties in four localities from the Dallas City Grain and Feed Company.

Watts was employed by the Farmers National Grain Corporation from 1933 to 1938, including two years at Havana and three years at Morris. He went to work for the Norris Grain Company in 1938.

He is married and has a son, David, 5, and a daughter, Dianne, 2.

ARMY ENGINEERS HEAR

(*Continued from page 6*)

One hundred fifty, he said, say they will have to relocate and another 150 farmers say they will be unable to operate economically.

Speaking for the State Department of Agriculture, Director Arnold P. Benson also protested the acquisition of farm lands for the 15 reservoirs saying his department felt that sufficient study had not been given proper soil conservation methods for flood control.

Several of the speakers asked that some of the levees and river bottlenecks be eliminated to allow the river to flow into its natural flood plain thereby lessening the danger of floods in other areas downstream.

When Brig. Gen. Roscoe C. Crawford, chairman of the board of engineers, called a halt to the presentation of arguments by the opposition to give proponents of the plan a chance to be heard, Mayor John W. Kapp of Springfield protested that all opponents of the flood control plan should be heard.

Gen. Crawford overruled Kapp's protest saying there were only 2½ hours of the 8-hour session left for the proponents to be heard.

Kapp had previously protested to the board that the flood control project would submerge township roads, submerge or isolate 10 Sangamon county schools, submerge the cemetery containing Lincoln's tomb, damage Springfield's sewerage system and create a health hazard.

Gen. Crawford announced at the end of the hearing that the time for filing statements and data for and against the plan had been extended until July 15. Crawford said he planned no additional hearings.

The board's report will be submitted to the chief of army engineers. Before it is sent to the budget bureau on its way to Congress, the report will be referred to Gov. Dwight Green of Illinois.

Two members of Green's administration have already announced their opposition to the plan — Director of Agriculture Benson and Livingston E. Osborne, Director of Conservation. Osborne contends that the natural river flood plains should be retired from tillage and devoted to hunting and fishing.

Cool

RAYON CONSTRUCTION FOR LONGER WEAR

- **STRONGER**
- **LIGHTER**
- **COOLER**

A cooler running tire lasts longer!

Ever since this fact was discovered, the tire industry has been developing cooler tires.

Now we have them in the new Blue Seal tires made with rayon cord!

Rayon cord tires are cooler because less heat is created by internal friction with rayon.

Rayon cord tires are stronger because heat weakens other types, but strengthens rayon fibre. A stronger tire is a safer tire.

Rayon cord tires are lighter because the greater strength of rayon fibre permits building a stronger tire which actually weighs less! This lighter weight tire is also cooler because it dissipates heat faster.

Blue Seal truck tires and passenger tires in the 6.50 and larger sizes are now available in this new and better rayon construction.

By Wilfred Shaw

The 23 milk marketing cooperatives composing the membership of Illinois Milk Producers' Association marketed in April, 1946, a total of 206,754,020 pounds of milk, or 7.04% more than the amount marketed by the same organizations in April, 1945. The April, 1946, milk marketed was 9.24% more than the pounds marketed in March, 1946.

Five evaporated milk plants in Northern Illinois paid their producers $2.75 per cwt. for 3.5% milk during the period May 1-15 and one plant paid $2.70 per cwt. for 3.5% milk for the same period. The average evaporated milk price paid to producers supplying fourteen plants in Wisconsin and Michigan for the May 1-15 period was $2.782 per cwt. for 3.5% milk.

Pure Milk Association, Chicago, recently purchased a building in Kankakee as a new location for a Pure Milk plant where either Grade A or Grade B milk of members in that area can be received and handled. Pure Milk Association is now operating plants in Illinois at 515 North Pulaski Road, Chicago, at Richmond, St. Charles, Hinckley, and Lisle; in Wisconsin at Salem, Sharon, Orfordville, and Kansasville. PMA has buildings or sites for future plants at the following locations: Mazon, Ill.; Gary, Ind.; Sycamore, Ill., and another plant at Lisle.

The following are the gross blended prices paid to producers for milk in the following named cities throughout the United States, and are quoted on a 3.5% butterfat basis, delivered f.o.b. dealers' platforms (with exceptions noted), as reported by the respective milk cooperatives. These prices are for March unless otherwise noted:

Akron, Ohio (April)	$3.45
Baltimore, Md.	3.85
Boston, Mass.	3.88
Canton, Ohio	3.40
Chicago (70-mile zone) (April)	3.27
Cleveland, Ohio	3.49
Dayton-Springfield, Ohio	3.30
Denver, Col. (April)	3.01
Hartford, Conn.	3.94
Indianapolis (April)	3.20
Kansas City, Mo.	3.51
Knoxville, Tenn. (April)	3.55
Louisville, Ky. (April)	3.21
Madison, Wis.	3.01
New York City	3.96
Omaha, Neb.	3.01
Pittsburgh, Penn.	3.58
Seattle, Wash.	3.55
Sioux City, Ia. (April)	3.02
St. Louis, Mo. (April)	3.39
St. Paul-Minn. (April)	3.11
Toledo, Ohio	3.53
Washington, D. C. (April)	4.06

The following are the blended prices received by producers supplying the respective Illinois markets. All are April prices for 3.5% milk f.o.b. dealers' platforms (except Chicago) and are for milk meeting the respective city milk ordinances:

Bloomington	$2.57
Canton	2.70
Champaign	2.75
Chicago	3.27
Danville	2.45
Decatur	2.75
DeKalb	2.74
Freeport	2.84
Galesburg	2.65
Harrisburg	2.50
Jacksonville	2.85
Kewanee	2.75
LaSalle-Peru	2.69
Moline	3.03
Peoria	2.89
Pontiac	2.406
Quincy	2.60
Rockford	3.11
Springfield	2.85
St. Louis	3.39
Streator	2.50

Two dairy equipment manufacturers have recently announced the development of continuous process butter churns which have proven very successful in initial tests in producing a good bodied butter. These churns are not yet available to purchasers but will be in production soon. This new type of churn, which will permit a continuous manufacture of butter to speed up the process of churning and to lower the costs of manufacture, is believed by many in the industry to be a revolutionary development for the future in the butter manufacturing industry.

Why live in FEAR?

HERE'S A QUICK, EASY WAY TO PREVENT H. C.* !!

Mrs. Hamfat, Hogville, says: "After having my litter I lived in constant anxiety for fear of H.C. Everybody had heard about what had happened to Mrs. Great Haunch down the road — H.C. had wiped out her entire family, overnight. Then one day a neighbor told my boss about Farm Bureau Serum and Virus. One shot was all my young ones needed. Today they are big fat hogs and full of the dickens. I'm thankful for F. B. Serum and that I've got such a smart boss."

SCHOLAR PREDICTS

Drouth This Summer

IS THERE a drouth due this year? There's been a lot of speculation on this subject lately. Some folks say yes and others try not to think about it.

Recent news stories have quoted the opinion of Prof. E. L. Moseley of Bowling Green, Ohio, State university, who predicts a severe drouth this summer. Let's hope he's wrong.

He predicts the drouth will extend from eastern Kansas nearly to the Hudson and Delaware rivers.

Professor Moseley bases his forecast on weather records and tree ring growths that reveal such dry periods come every 90.4 years.

The summer of 1946, he says, will mark the completion of a 90.4-year cycle since the last solar-influenced drouth.

In Illinois, the drouth is expected to be broken with more rain than is usual from April to August in 1947.

Particular attention is paid by Professor Moseley to some 300 cross sections cut from stumps of old trees that tell the scientist a story of weather conditions for past centuries. The cross sections show wide and narrow rings and it is inferred that the narrow rings are the result of poor growth of the tree due to lack of moisture.

Very narrow rings are found in four old trees in the year 1494. Again in 1584, these and other trees in the collection show narrow rings. The narrow rings seem to appear in 90 to 91-year cycles which points to 1946-47 as the next drouth year.

Records indicate that 1856 was a drouth year.

In Illinois, five of the six U. S. weather stations with records show deficient rainfall in that year.

Eighty-one-year-old Professor Moseley made his prediction for a 1946 drouth at a meeting of scientists in 1939. In September, 1945, he was quoted in a Chicago newspaper warning farmers that in 1946 they "should not count on a large yield of corn, or any other crop that cannot be harvested before midsummer."

While Professor Moseley no doubt has some professional pride at stake in his predictions, he probably hopes that he will be proved wrong this summer.

MASON DIRECTOR SETS RECORD OF LONG SERVICE

IF YOU'RE looking for a man who has established something of a record for continuous service as a Farm Bureau board member, you will find the answer in John H. Deverman of Mason county.

J. H. Deverman

Mr. Deverman retired from the Mason County Farm Bureau board of directors this year after more than 30 years of service. A charter member of the Mason Farm Bureau which was organized in 1915, Mr. Deverman represented Quiver township on the board from the time of organization.

Mr. Deverman also enjoys the distinction of being one of a small group of Farm Bureau pioneers who signed $100 notes in 1919 to give the newly reorganized Illinois Agricultural Association financial backing. This was when the IAA was reorganized from a federation of County Farm Bureaus to a direct membership organization.

The notes, dated Jan. 1, 1919, read: "The undersigned promised to pay the sum of $100 each year, for a period of three years, to the Treasurer of the Illinois Agricultural Association.

"It is distinctly understood that the above sum or any part thereof is to be paid whenever called for by said Association to defray any deficit in the Treasury of said Association caused by the payment of the legitimate expenses of said Association. It is further understood that the undersigned shall not be required to pay more than $100 in any one year."

These pledges were never needed, however, and the notes were later returned to the signers without a dime ever having been called for from them.

In addition to serving as a board member of the Mason County Farm Bureau since 1915, Mr. Deverman also served during the entire time as its treasurer. He was also active in livestock marketing programs and was township chairman on the Mason county livestock marketing committee. He served on the first corn-hog committee in 1933. Active in community activities, Mr. Deverman worked in War Bond and Red Cross drives during World War II and is a member of the Bishop Lutheran Church near Topeka, Ill.

Mr. Deverman retired from farming in January and moved to Havana. He was born in Topeka and owned and operated a 225-acre farm near there until his retirement.

Mr. Deverman has four children: Mrs. Ollie Fritz, Havana; Wilmer Deverman, Pekin, and Leland Deverman, Los Angeles.

BALE TIE SCARCITY EXPECTED TO CONTINUE

Little encouragement is held out to farmers hoping for an end to the bale tie scarcity soon. Lack of wire and twine has created another burden for many gathering in their hay.

However, surplus wire held by the War Assets Administration has been channeled to hay bale tie mills to permit capacity production. Mills closed down or running part time will get 2,500 tons of surplus wire. This will permit capacity operation for 30 to 45 days.

Other mills are running at capacity but ties will still be short for the second half of 1946. Twine appears to be a bit more plentiful than wire but is still far below demand.

The first step in building up soil for improved yields is to find out whether it lacks essential nutrients.

The quality of a pasture is almost as important in keeping cattle where they belong as is the durability of the fence.

LETTERS TO THE EDITOR

"Let the man who is without fault cast the first stone," is the admonition of William Twenhafel of Marion county in answer to the five faults city dwellers found in farmers in a recent national poll. His letter follows:

In our RECORD for May there was a write-up about "The Farmer's Faults." I for one don't think our city friends are in the top bracket either.

Their crack about us being "too narrow and provincial" is all wet; for there are any number of city people who are more homely and unpolished than any farmer ever could be.

Next they say we are "always complaining." Have you ever heard of a farmer striking over some trivial thing?

Third, they say we are "poor managers." Well, if they know so much, why don't they come out and show us how to farm. So, we won't learn new methods? Well, if we had to depend on city people for advice they'd all be starving right now.

And they say we are "stubborn." To that I say if we were as stubborn as they think we are we would get rid of our hogs and not buy $1.60 corn to feed to $14.80 hogs.

And now the last fault. They say we get "too much money for what we raise." If I lived in the city, I would be the last to make this complaint. Many workers paid $2 to $3 an hour are getting far more than they are worth. They should know too that the average farmer has about a $6,000 investment, whereas the city bird needs no more than street care fare to get to work until pay day.

William Twenhafel
Marion County

Also aroused by the fault finding of urban dwellers, 67-year-old Edna Grein of Champaign county reminds them of a few things they might not be aware of:

First, it takes a lot of money for farm machinery in original cost and upkeep and that doesn't take into account the cost of the land and buildings. In fact, very few farmers ever become well enough off to wholly own their farms.

Which brings us to the point that farmers are among those most poorly paid for their labor. And there is more to farming than just talk. Work on the farm isn't all riding on a tractor. There are a thousand things to do and the farmer has to know what he is doing.

And you never know what kind of a crop you will raise. Poor, medium or good, it takes the same amount of labor to get it. If it isn't rain, it's drouth or bugs.

He has to be around the farm seven days a week to do his chores. There is no eight-hour day on the farm.

So if the city people want to work, I can tell them from many years of experience that the farm is the place to find it.

Edna Grein,
Champaign County

In the May RECORD, I read about "Our Faults". Speaking as a farmer this is my opinion. How many city people really know anything about the farm? How I would like to give them a workout. Do they know what it takes to be a farmer?

City people think you can sit under a shade tree while the wheat, corn, oats, hay, by some mysterious method, get harvested and in the bins and barns. Perhaps they better come and see. Just now the farmer is really busy. Up at 3:30 and 4 o'clock and work till 7:30 — supper at 8 — sometimes even later.

How many city people could take even one week of that? Then, our work is dirty and I'll say most farmers don't even have modern homes — not even a bathroom. How would they like that?

It certainly would be too bad if the farmer should strike as they do in the city. Shame on them, it's a disgrace to the American people. And as far as receiving too much money for what they raise, how would they know? Let's take chickens. Baby chix are high. Feed is very high. Start and grow mash is $4.25, egg mash $3.85, corn $1.40. You don't get a thing out of your work. Keeping poultry houses clean is no little job, and eggs only 28c per dozen.

It's the middle man who gets the profit, and the poor farmer does the work. Now if these city slickers think the farmer is getting rich, perhaps they better give it a try. Seeing is believing.

—M. Mills
Gallatin County

Again we open our Poet's Corner to our genial organization director for District One (the northern third of the state), Harry Claar, who combines his ballads with his philosophy. If you think you can do as well as Harry, send us your contributions.

TO A FIELD

The same old fields are lying there
Our fathers used to till,
The peeping corn, the waving grain
Still greet us with a thrill.

Yes, time has flown, change has come
With advancing civilization,
But time means little to a field
Where God reveals creation.

The basic wonder changes not
Through many thousand years
With proper stewardship of these fields
Each spring new life appears.

Their beauty bursting shells have marred
Kind hosts, to evil hordes are they.
Yet, for each scar their bosom bears,
A weaker world must pay.

No marching horde or bursting shell
Will e'er make us secure,
But wisdom in a quiet field
Will after all endure.

Yea, then in the last analysis
Man's only trusty shield
Is the peeping corn, the waving grain
Each spring in the lowly field.

Ol' Long Green

(Editor's Note: This poem was inspired by the back cover page of the May issue of the IAA Record which pictured a sphinx with a headline "Silence Is Not Always Golden.")

SILENCE IS NOT GOLDEN

Silence is not golden when there is a
story to be told.
The cause of a people demands to be
sold.
The farmer was silent while others com-
plained
Too busy at sowing and harvesting
grain.

When classes would gather and plan for
their cause
There was no one to speak for the
world's Santa Claus.
At home and bedraggled without compass
or plan
Growing food for the masses and de-
leting the land.

When there is no one to speak in defense
of a cause
Advantages are taken without thought
or a pause
Though guilty they stand to a certain
degree
The farmer must accept that more
guilty was he.

Necessity mothered the need of a plan,
An organization united to stand
With leaders well chosen for justice to
seek
Endowed with understanding and the
courage to speak.

All hail to the day when the farmer
organized
Respected by all, even those who
criticized
His silence was broken, the story pro-
claimed
A position among men he at last had
attained.

The problems are many, there will be
many more
Let us roll up our sleeves and do as
before
There is more to this job than corn,
wheat, and barley
Every lad must roll out and back up
our Charlie.

Fritz Louderspeck

Letters to the Editor are welcomed from readers on any subject related to agriculture. Writers should sign letters with name and address. Names may be withheld if desired. Address *Letters to the Editor, Illinois Agricultural Association Record, 608 South Dearborn, Chicago 5, Ill.*

Dale (left) and Duane Sutter, sons of Merle Sutter, McLean county, are shown with the midget tractor they helped Dad make to take care of garden cultivation.

Veterans Melvin Johnson (left), Kankakee county, and Gene Davis, Coles county, prepare for cow testing work at the University of Illinois College of Agriculture.

Mrs. Chester Kurts, Clark county, sends in this picture of her Granddaughter Lynn balancing herself on her Daddy's hand. Her father, Harry Bumesbergers, is a former army airman.

*' Personal Injury
** Property Damage

THE Board of Directors of Country Mutual Casualty Company at its regular monthly meeting on May 11, 1946, authorized an increase in the collision and property damage rates of the company. These rates have been approved by the Department of Insurance, State of Illinois, and will become effective July 1, 1946.

The table above shows the semi-annual rate which will be charged on all new policies written on pleasure cars and also represents the rate which will apply to all policies in effect which are renewed on and after July 1, 1946. The collision and property damage rates, (printed in red) being the only rates which are increased, are also increased on trucks.

This increase in rates for collision coverage (that is, damage to your own car) and the P.D. or propery damage (that is, cost of repairing the other car) has been brought about largely from three causes: first, the increased charges which are being made by garages and repair shops for doing the same work today as compared with five years ago; second, the increased frequency of accidents upon the highway and third, the severity of accidents brought about by cars being driven at high rates of speed with faulty brakes and other mechanical defects.

Your Company was originally organized to write insurance for Farm Bureau members and their dependents at cost. When costs go up, rates will go up; likewise when costs go down, rates will go down or excess earnings will be returned in the form of special dividends such as was done during the war period when gas and tires were rationed.

This increase in rates has not been brought about in any way because of operating costs. The operating costs of the company today are the lowest they have ever been since the company was organized.

You will note in the table above that there has been no increase in fire, theft or windstorm rates, no increase in P.I. or personal injury rates and no increase in the medical expense reimbursement rate. The only increase that is necessary is that for material damage or damage to the motor vehicle.

COUNTRY FIRE CITES RULES ON GAS STORAGE

"ANY farmer who buys fire insurance on a building or the contents of a building and has gasoline stored within 15 feet is paying premiums for nothing," advises Lyman Peaks, chief underwriter for Country Mutual Fire Company.

"No fire insurance company wants to take money for nothing," Peaks said, "but the state fire marshal strictly forbids storage of gasoline close to buildings, and all companies which operate statewide in Illinois must use a standard policy which denies liability for fire damage on any building which has gasoline stored within 15 feet."

Concurring with Peaks' advice, Manager J. H. Kelker of Country Fire said destruction of farm property and loss of lives caused by gasoline fires on farmsteads is something for farmers to stop and consider. Too much care, he said, cannot be used in placing your gasoline tank where it will be least dangerous.

A ride through a farming district in almost any part of Illinois, Peaks said, will reveal such dangerous gasoline tank installations as tanks resting on timbers extending from a haymow door, tanks on wooden supports too close to a building, many tanks in machine sheds, and in extreme cases recent observation showed a few actually sitting on wooden supports connected to expensive dairy barns.

"Underground tanks," Peaks said, "are preferable but neither tanks nor pumps are as yet available in sufficient quantities.

"Whatever type of gasoline storage tank is used on your farm," he continued, "please be sure that it is located at least 15 feet — greater distances are more desirable — from any building so you will have protection from any gasoline fire on your premises and so your fire policy will not be voided by violation of policy provisions."

NAME BASEBALL DIRECTORS

Five counties have named directors to represent their teams on the board of the Illinois Farm Bureau Baseball League, Roy P. Johnson, IAA director of special services, reported June 10.

Teams are being organized and plans are moving ahead to put the Farm Bureau Baseball league into action this summer.

County Farm Bureaus naming baseball directors are: Kendall, Ed Williamson; Cass, Oscar Reichert; DeKalb, Floyd Phillips; Macon, O. E. Jacob, and Will, Bob Seeley.

HOUSE COMMITTEE MAKES CO-OP REPORT

HOUSE of Representatives Committee on Small Business gave the anti-cooperative propaganda of some groups an emphatic setback April 9, when after a year's study, including a number of public hearings, it declared that cooperatives do not endanger other forms of business enterprise.

Its interim report was signed by all members of the committee, including five Democrats and four Republicans. Congressman Evan Howell of Illinois was one of the committee members.

Representative excerpts from the conclusions of the report (the full text of which is available to those interested) follow:

"Agricultural cooperatives were originally formed as a possible means of providing assistance to the independent small farmer who was at a marked disadvantage in his bargaining position, being forced to accept low prices for his products and to pay high prices for all of the articles which he required for his production . . . . the abnormal conditions that led to the original cooperative movement may be intensified.

"Tax-exempt farmer cooperatives apparently do have an advantage over competitive businesses operating in the same fields *to the extent* that amounts of income available for the payment of dividends *on capital stock* and accumulated in reserve . . . . escape Federal income taxation . . . . The cooperative reserves apparently constitute a substitute for the capital markets normally available to other business enterprises, since the capital for an exempt cooperative comes principally from farmers, and they have a very limited capacity for supplying capital at any one time. Apparently only about 54% of the farm cooperatives have elected to and have taken the requisite affirmative action necessary for qualification as an exempt cooperative . . . . the aggregate amount of income available for the payment of dividends on capital stock and/or retained in one allocated reserve is relatively small. No appreciable revenue would accrue to the government if income tax were levied on these amounts. It does not appear that the tax exemption available to exempt farmer cooperatives has any true bearing upon any competitive advantage which the cooperative might have in its normal operations."

"Agricultural cooperatives which are non-exempt from Federal income tax and all consumer cooperatives apparently enjoy no privileges or advantages under the tax laws which are not available to all other types of competitive businesses operating in the same lines of endeavor. It seems readily apparent that non-cooperative business agencies, if they were willing to render services at cost, would not be subject to any income tax."

"The Bureau of Internal Revenue has ruled, and the courts have upheld, the principle that the cooperative entity serves only as an agent for and on behalf of its members, and that at no time does its income belong to other than its members . . . . it does not appear to be reasonable or equitable to attempt to levy a tax on a cooperative for income which does not belong to it."

"There is substantial evidence to show that the cooperative movement operates as a very successful means of combating monopolistic concentrations, and, as such, is a very healthy addition to the American economy."

"There is no evidence to show that cooperatives have been granted a type of preferential financial treatment by the Federal Government that has not likewise been made available to and accepted by other forms of business enterprise."

"The theory that the cooperative movement is seriously endangering other economic forms of business operation can be utterly disregarded."

BROWN NAMED DISTRICT IFS FIELD MANAGER

DeWitt Brown, recently discharged from service and former manager of the Douglas County Service Company, has been employed as district field manager for Illinois Farm Supply Company for the Effingham territory.

DeWitt Brown

Born, reared and schooled in Shelby county, Brown first was employed as bookkeeper for Shelby - Effingham Service Company in 1936. Later he served Clark, Egyptian and Macoupin Service companies in the same capacity. In July of 1942 he was employed as manager of the Douglas Service Company. He was called into service in July of last year.

PLANT 105,000 TREES

To prevent wind erosion on the sand lands of western Mason county, 105,000 pine trees have been planted by farmers and schools in that area, according to O. A. Potts of Pekin, district agent of the Soil Conservation Service.

Be sure that hay is well cured before it is stored in hay mows. Damp hay will heat and start a fire.

A CREED FOR COOPERATIVE MEMBERS

1. I will keep myself informed on the affairs, problems, and methods of my cooperative so as to be an intelligent and constructive member.
2. I will exert my influence to see that my cooperative has the best possible directors and officers in terms of general competence and integrity.
3. I will faithfully support my cooperative with my patronage, and encourage my friends to use it, because in volume there is strength.
4. I will help build and maintain my cooperative by contributing my share of essential capital.
5. I will insist that full information be provided me on the operations and financial condition of my cooperative, based on accurate accounting and proper auditing.
6. I will not expect miracles from my cooperative, but I will insist on receiving from it honest values and efficient services.
7. I will refrain from asking my cooperative to give me favors in the form of credit or other special services.
8. I will take pride in my cooperative and use my influence to see that it assumes its fair share of community responsibilities.
9. I will stand by my cooperative in its days of adversity and help protect it from weaknesses which come with prosperity.
10. I will always remember that my cooperative is ME, and others like ME, and that its behavior is a reflection of MY behavior.

—By Joseph G. Knapp, Principal Agricultural Economist, Farm Credit Administration.

WILFRED SHAW LEAVES IAA TO HEAD AFBF DAIRY DEPARTMENT

WILFRED SHAW, director of milk marketing for the Illinois Agricultural Association since Aug. 1, 1935, has been named director of the dairy department of the American Farm Bureau Federation. He started work in his new position June 15.

In addition to serving as milk marketing director for the IAA, Shaw also has been secretary-treasurer of the Illinois Milk Producers Association composed of 23 member cooperative milk marketing associations in Illinois. These cooperatives marketed more than two billion pounds of milk in 1945. Shaw is also secretary-treasurer of the Illinois Milk Producers Supply Company which was organized in 1944 for the purpose of purchasing dairy supplies and equipment for member milk cooperatives.

Wilfred Shaw

At the time Shaw joined the IAA staff in 1935, the statewide milk marketing association then known as the Mississippi Valley Milk Producers Association had been reorganized and renamed the Illinois Milk Producers Association with 12 milk marketing cooperatives as members. The reorganization was made in order to bring about a better correlation between the member cooperatives and to coordinate and activate their program on price and legislative fronts.

Shaw has also worked with the legislative committee of the IAA at each session of the Illinois General Assembly in studying and testifying upon legislation affecting dairy farmers of the state.

A graduate of the University of Illinois College of Agriculture in 1920, Shaw has long been active in Farm Bureau and cooperative milk and dairy work. He served as assistant farm adviser in Peoria county from June, 1920, to March, 1923, and then operated the Shaw home farm in Clark county for one year before returning to Peoria county as farm adviser in 1924. He served four years as farm adviser during which time in 1925 and 1926 he and the farm advisers in Tazewell and Woodford counties helped to organize the Peoria Milk Producers Association. In the fall of 1928 he resigned to become manager of the Association and in 1932 helped to organize the Peoria Producers Creamery and in 1933 the Peoria Producers Dairy. He served as manager of these three cooperatives at Peoria until he joined the IAA staff in 1935.

Shaw was born in Marshall, Illinois, Clark county, on May 23, 1897. The Shaw family was one of the first farm families to settle in what later became Clark county, and the late Wilfred Shaw, Sr., was one of the first Farm Bureau members in the county.

Shaw is a veteran of World War I, having served as an ensign in the Navy for one year in 1918-1919. He married Gladys L. Paul in Peoria in 1921 and they have two children, Wilfred, Jr., 17, and Eleanor Louise, 15.

He owns and operates two farms in Clark county comprising 443 acres.

Shaw is president of the recently organized Midwest Dairy Conference composed of representatives from fluid milk marketing cooperatives, state colleges of agriculture and state and federal milk control agencies of the midwest states.

Shaw also serves on several dairy committees and boards by appointment of the board of directors of the Illinois Agricultural Association. These include the American Farm Bureau Federation dairy committee, Dairy Products Promotion of Illinois, and the Illinois Nutrition Committee. He is also a member of the American Dairy Association board of directors, and during the war served on the State Dairy Industry Committee of Illinois.

..."AS FARMERS FORWARD GO"

ORGANIZATION NOTES

By O. D. Brissenden

THE IAA RECORD was no more than in the hands of members with the news that there were over 125,000 Farm Bureau members in Illinois as of March 31, 1946, than further progress was registered. The April 30th count was 127,571, another all-time high, and on May 31, 128,220. CODs and volunteer organization workers are now enthused with the prospect that membership may reach the 130,000 mark by the close of this fiscal year, September 30.

Ten county organization directors are recognized as the first to attain their 1945-1946 105 per cent dues income quota. The ten who were "under the wire" first are: A. B. Culp, McLean; D. E. Anderson, Iroquois; C. C. Mashing, Tazewell; Wayne Lienbach, Rock Island; and C. J. Campbell, White, all approved on April 17; E. V. Stadel, Winnebago; F. F. Fleming, Wayne; C. D. Lewis, McDonough; R. H. Garrison, Jefferson; and C. H. Mills, Cook, all approved on May 20.

As of April 30, all but ten counties had made their new member quota for the year and five more made their quotas in May. Leading counties in total new members to April 30 follow with the first figure the quota and the second, the new members reported: LaSalle, 174-543; Whiteside, 146-747; Bureau, 142-405; Henry, 150-368; Champaign, 199-367; Iroquois, 206-354; McLean, 195-342; Cook, 232-329; Lee, 154-298; Livingston, 162-269.

The Midwest Farm Bureau Training School, suspended during the war, will meet at Kansas City, Missouri, June 23 to 26, inclusive. The Missouri Farm Bureau Federation will be host at a reception at 5:30 p.m., Sunday, June 23, followed at 7:30 p.m., by a Vesper Service. Group conferences, including presidents and secretaries, organization workers, Associated Women, Rural Youth, and services will be on Monday morning's program. Edward A. O'Neal, AFBF president, will speak Monday evening. Dale Carnegie, author of "How to Win Friends and Influence People," will speak Tuesday evening. A breakfast program Wednesday, followed by addresses by O. D. Brissenden of Illinois, Mrs. Raymond Sayre and Allen B. Kline will wind up the session.

L. R. Culp, former Livingston County COD, assumed his new position as COD in Warren County April 15. Temple R. Lovett, former Army major, is Livingston's new COD. Carl C. Orr has returned from service to resume the COD post in Union County and Harry M. Randolph became DeWitt's COD on May 13.

Seventy-seven counties are planning to start programs of quarterly all-employee meetings for discussions of an informational type about Farm Bureau and its subsidiaries. The Sales Service department is issuing a leaflet called the GUIDE to assist advisers and department heads in planning the discussions.

Eighty counties took part in this year's Membership Maintenance Meetings, with employee and leadership participation of over 2,100.

The National Farm Bureau Institute's name has been changed to American Farm Bureau Institute. This six-day school is for the purpose of training organization workers from many states. It will be held this year at the University of Illinois, Aug. 18-23.

The BUILDER, mimeographed publication of the Organization Department since 1931, will be published in printed form beginning in August, and will go to an expanded list of individuals, including employees of Farm Bureaus and subsidiaries and Farm Bureau Directors.

The Cook County Farm Bureau Board of Directors, upon hearing that LaSalle County had achieved a total of 3,500 members and taken the lead among counties in the state (a position held by Cook for some time) took official action to send LaSalle a letter of congratulation. Cook had 3,411 members on the April 30 report.

FROM FARM MOTORS

NEW ILLINI
PREMIUM MOTOR OIL

This improved postwar motor oil has been developed through modern laboratory research and thirteen million miles of testing. ILLINI Premium Motor Oil is *today's* better oil for farm use in tractors, trucks and cars.

ILLINI emphasizes QUALITY plus ECONOMY as outlined in the original policies of this cooperative. It offers farmers five distinct advantages:

KEEPS FARM MOTORS RUNNING SMOOTHLY

1. **Keeps a clean motor clean longer;**
2. **Provides a better piston-seal;**
3. **Non-corrosive to bearing metals;**
4. **Holds resinous varnish formation to minimum;**
5. **Assures longer life for piston rings and cylinder walls.**

Try ILLINI Premium Motor Oil—the safe and economical lubrication for your farm engines.

NEWS and VIEWS

My Favorite Recipe

SUNSHINE CAKE

1 cup sifted Swans Down cake flour
1 cup sifted sugar
¼ teaspoon salt
6 egg whites
½ teaspoon cream of tartar
4 egg yolks, beaten until thick and lemon-colored
½ teaspoon lemon extract

Sift flour once, measure, add ½ of sugar, and sift 4 more times. Add salt to egg whites and beat with flat wire whisk. When foamy, add cream of tartar, and continue beating until beater leaves faint line when drawn across surface of egg whites. Add remaining sugar gradually, and continue beating as before, until texture is very fine and even and egg whites are stiff enough to stand in peaks, but not dry. Fold in egg yolks and lemon extract. Then sift small amount of flour over mixture and fold in carefully. Continue until all is used. Pour into ungreased tube pan. Bake in slow oven (300°F.) for 30 minutes, then increase heat slightly (325°F.) and bake 35 minutes longer. Remove from oven and invert pan till cool, about one hour.

—Julia Thomas
Pike County

BAKED CREAM SPINACH

1 pt. or can of spinach
4 tbsp. butter
salt and pepper to taste
2 eggs slightly beaten
½ cup milk
½ cup grated cheese
½ cup buttered crumbs

Cook the spinach without water, drain and add butter and seasonings. Place part of it in a buttered baking dish, sprinkle it with ½ grated cheese, add remaining spinach and cheese. Add beaten eggs to milk and pour over the mixture in baking dish. Cover top with buttered crumbs and bake in moderate oven for 20 minutes.

—Mrs. A. B. Kettelkamp
Henderson County

The annual 4-H Club leadership camp will be held July 22—27 at East Bay.

MOLASSES SPICE COOKIES

½ cup shortening
½ cup sugar
½ cup molasses
¼ cup buttermilk
2½ cups sifted flour
¼ tsp. salt
½ tsp. cinnamon
½ tsp. nutmeg
Pinch of cloves
1 tsp. ginger
1½ tsps. soda

Cream shortening, add sugar, and cream well. Add molasses. Mix and sift dry ingredients and add ½ to the first mixture. Add buttermilk, then remaining dry ingredients. Chill thoroughly. Roll about ¼ inch and cut with cookie cutter. Place on greased baking sheet and bake in a moderate oven of 350° F. about 10 minutes or until done. Makes 3 dozen 2½ inch cookies.

PAMPHLET EXPLAINS HOW TO QUICK-FREEZE FRUITS

"How to Prepare Fruits and Vegetables for Freezing" is the title of a new pamphlet prepared by Miss Frances Van Duyne, assistant professor of foods at the University of Illinois.

In her circular, Miss Van Duyne tells of substitutions of syrup for sugar in quick freezing, preparing fruits and vegetables for serving and varieties suitable for freezing. A copy of this circular may be obtained by writing to the Home Economics Department, University of Illinois, Urbana, Ill.

Kane county claims a total of 247 farm families enrolled in the Safe Homes Program for 1946 according to Mrs. Gertrude Fields, home adviser.

'No Major Style Changes Expected' — U. I. Specialist

No major style changes are likely to occur for several months, according to Miss Edna Gray, clothing specialist, University of Illinois College of Agriculture. Miss Gray bases her opinion on the fact that Governmental Style Orders No. L-85, L-116 and L-118 are to be continued at least until August.

Because of a continued short supply of textiles, these orders which limit the amount of fabric in women's and children's apparel will not be lifted as early as was expected. This means that limitations on length and sweep of ready-made skirts and dresses will remain the same.

The Civilian Production Administration is asking all fashion stores to withhold from sale any new clothing which does not meet the regulations. The CPA is also examining the fashion plans of leading stylists to see that restrictions are applied.

APRONS FOR WORK AND PLAY

The right apron for the right task makes the job lighter. Entertaining calls for a more frivolous style, yet one that will protect the dress. These aprons can be made in a very short time. For free instructions send a self-addressed stamped envelope to WOMEN'S EDITOR, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

for HOMEMAKERS

82 Illinois Counties Have Home Bureau Organizations

Eighty-two of Illinois' 102 counties now have active county Home Bureau organizations. Three new organizations added since Jan. 1 are Pope-Hardin, Marion and Logan. Franklin and Carroll are about finished with the process of organization and Massac and Cumberland have shown some interest in Home Bureau work. McLean expected to have a membership high for the state of 1,900 this month.

Since last August, Clinton county has upped its membership 260 per cent. Kendall county follows a membership procedure popular among organizations in a number of counties, that is, it spends a considerable amount of time with a possible new member explaining the purposes of Home Bureau.

The 1946 turkey crop is expected to be about 15 per cent less than the record crop last year.

BANQUET CLOTH FOR THE BRIDAL TABLE

A wedding reception calls for the best of everything — silver, china and your priceless hand-crocheted tablecloth. What could be more beautiful than this exquisite cloth. Make it of mercerized crochet cotton. For instructions free of charge, write to WOMEN'S EDITOR, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

HOT PLATE MATS ON THE SQUARE

Here's a gift item for the summer bride that's small in cost but long in usefulness. Crochet a set of these hot plate mats in ecru pearl cotton with contrasting trim. They are 9, 7 and 5½ inches square. For instructions free of charge, write to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

ILLINOIS RURAL CHORUS TO BE HEARD AGAIN

Illinois Rural Chorus, discontinued in 1941 at the onset of the war, is being revived this year under the direction of James K. Van Slyke, extension specialist in music at the University of Illinois. Six counties have already organized their choruses — Moultrie, Williamson, La Salle, Winnebago, Stephenson and DeKalb — and are planning to take part in the State Fair Festival, the Chicagoland Music Festival, and the Illinois Farm Sports Festival. Seventeen other counties are now planning their choruses.

Men of McDonough county have been sitting in on Home Bureau meetings to get the proper slant on family relationships. Meetings are held in the evening under the direction of Home Adviser Hazel Adams.

The average size of Illinois farms in 1945 was 153 acres compared with 137 acres in 1935, 135 in 1920 and 124 in 1900.

Select Site of Permanent Northern 4-H Club Home

Fifty acres of wooded land along Rock Creek near its confluence with the Kankakee river in Kankakee county has been chosen as the site of a permanent 4-H club camp for the Northern Illinois district.

A temporary tent camp will be set up this summer until labor and materials become available for permanent structures which will include clubroom facilities, 20 cabins, kitchen and dining hall, recreation hall, storage and supply rooms, and swimming pool and showers. When completed the camp will accommodate 300.

EXPERIMENTS SHOW NEW FLOUR WORKS WELL

Homemakers who are experimenting with the new 80 per cent flour find that it works very well in their usual recipes, but some of the scrupulous ones are a bit disappointed that their cakes or pies aren't quite up to the standard.

They will be encouraged by some alternate methods offered by Mrs. Metta Zahorsky of the food and nutrition staff, University of Illinois College of Agriculture.

When making leavened products with baking powder or sour milk and soda, a minimum amount of mixing should be done after the flour and liquid have been combined. "Mix only until flour is moistened," is Mrs. Zahorsky's rule. Yeast products need light handling, especially after they have risen once, and they shouldn't rise too much — *not more than double* in size, or not quite double.

Eighty per cent flour has the same thickening qualities for all practical household purposes. Gravies, puddings and sauces require the usual amount.

The La Salle County Home Bureau is issuing the fourth edition of its Home Bureau cook book and is offering it to Home Bureau women through their county organizations. La Salle county reports more than 33,000 of the cook books already have been sold.

Rural Youth

By
ELLSWORTH D. LYON

The Rural Youth slogan for 1946, "Serve Your Community and Know Your Neighbor," is finding expression in the various activities of Rural Youth.

McHenry's eight groups together have planned interesting programs for several months ahead and each is now enjoying the county wide activities. The June formal at Crystal Lake was such a county activity. Examples of the unit activities are seen in Ringwood's discussion of "Highway Safety," in Pleasant Valley's "Welcome Home Party" for Merle Brooks returning from the army, in Marengo's parties in which the girls have been teaching the boys to dance, and in Hartland's interest in developing a baseball team.

Thought-stimulating discussions continue to come into the programs since the last issue of the RECORD." St. Clair heard Dr. Norman Rose, Highland health district officer upon "Health Precautions for Rural Youth." Knox conducted a lively panel discussion on the "County Health Unit." Richland heard Sergeant Stroup, a state highway patrolman, discuss safety on the highway. Tazewell heard Dr. Harry Roethe of the Northern Research Laboratory. He told of experiments in finding uses for farm products. Pulaski-Alexander and Wayne showed slides and had discussions on soil conservation. Wayne is starting a series of meetings this month built around the theme, "Know Your Country," McLean brought both the home adviser and the assistant farm adviser into their meeting to lead discussions. Mrs. Lysted discussed the theme, "Importance of Milk in the Human Diet," while Mr. Mosbacker discussed soil conservation and its relation to public health. Iroquois had current events under the theme, "Keeping Up-to-Date." This group discussed UNO, the county soil conservation district, new conveniences for the home, and recent developments in baseball. Ogle had a backwards party but went straight ahead on the study of "Weed Killers." Edwards engaged in a panel discussion — "What Should be Done to Encourage Young People to Stay on the Farm."

The building of membership in the county organization has been given serious consideration in the various counties. Whiteside, Warren, Bureau, Montgomery, Logan, Morgan, and Franklin have reported membership increases.

Guest nights have been sponsored as a means of encouraging membership growth. Bureau, McDonough, Tazewell, and La Salle, invited high school seniors from county schools. Macoupin held a family night at which Farm Adviser O. O. Mowery led a panel discussion on postwar jobs. E. H. Regnier of the University of Illinois was present to lead recreation.

Four big banquets have been reported recently. Bureau sponsored its first banquet which was attended by 200 Rural Youthers from Bureau and surrounding counties. Camilla Anderson was crowned "Queen of the May." Randolph's banquet was attended by a number of visitors from Jackson. The speaker, Roberto de la Rosa spoke on "The Youth of Mexico," Clark's fourth annual banquet was addressed by Frank Gingrich, former I. A. A. director of Young People's Activities. Washington reported 110 present at its banquet which was planned around the theme, "Pirate Ship."

Box socials, outdoor activities, and hard-times parties have provided good springtime enjoyment for a number of counties. Richland's box supper was attended by a large crowd. More than $150 was cleared. Part of the proceeds will go toward the State 4-H Memorial camp. A county-wide box social was sponsored by Whiteside's four Rural Youth clubs — Twin City Ripples, Prophetstown Tampico Warriors, Morrison Merrymakers, and Newton Notions, Friends were present from nearby counties.

Greene sends an outline of interesting summer social activities which include a boat ride on the Mississippi, (Morgan wants to join other counties in this activity. Why not get together?) fish fry, swimming party, annual hayrack ride and wiener roast. Morgan and Warren featured wiener roasts and each made plans for radio broadcasts as future activities. Morgan's party was an exchange visit with Cass. It also reported a lawn party recently at which Rural Youth slides were shown. Carroll reports a hard-times party in May, a formal dance in June as well as a square and ballroom dancing held a scavenger hunt. Cook conducted a progressive games party and scavenger hunt as well as a square and ballroom dancing party. Old fashioned hayrides were enjoyed by Macoupin, Bond, Schuyler, DeKalb, and Franklin accompanied by wiener roasts and folk games. Rock Island enjoyed a hamburger fry.

Madison and Bond participated in roller skating parties. Logan found adventure in a May breakfast which was planned by Doris Gehlback, Wayne Sheley, and Gerald Gehrke. La Salle gave an old clothes party to which high school seniors and other guests were invited. This group also served as host to nearby counties in a picnic at Starved Rock State Park. Northern Kane honored Mrs. Gertrude Fields, who resigned as home adviser, at its May meeting.

Square and social dancing provided entertainment as well as money making activities for a number of groups. St. Clair's first attempt at a big money raising enterprise was held at Mascoutah Community Hall May 11 proving that the event was successful. Knox county's spring semiformal dance in the Farm Bureau auditorium was well attended on the same date. Henry boasts of an attendance of 300 from 10 counties. A lunchstand was provided by the Munson 4-H girls. McDonough held a big square and social dance on May 31. Warren's square dance team has given several demonstrations in town and country schools. Massac sponsored the movie, "Tokyo Rose," as a money making project.

Recent weddings reported are: La Salle — Francis McCormick and Audrey Jones, Naomi Albertson and Wesley Freebairn, Bob Temple and Mercedes George; Bond — Frederick Baumberger and Della Durr; Brown — Maurice L. Bond and Roberta E. Varner; Warren White and Doris Miller; St. Clair — Russell Florreich and Irene Schnaare of Pulaski, Tom and Aleen now Mrs. Tom Renner; Whiteside — Jack Stewart and Alta Ballard.

ANSWERS — What's Wrong With This Picture?

(*See page nine*)

1. Failure to stop tractor when oiling.
2. Sloppy sleeves around machinery.
3. Unguarded saw.
4. Careless handling of log, endangering thumb.
5. Unbuttoned sleeves near saw.
6. Broken legs and supports on saw table.
7. Man at saw carrying sharp tools in pocket.
8. Double blade axe left unguarded.
9. Axe with broken handle.
10. Sharp pointed hay fork on ground.
11. Boy playing around water tank.
12. Unsanitary mudhole around tank—leaky water trough.
13. Unsanitary condition of well.
14. Working in front of mower.
15. Horses unprotected from flies.
16. Pick left sticking in ground.
17. Broken handle on pick.
18. Man overlifting.
19. Shovel presents tripping hazard.
20. Boy riding on tractor.
21. Turning sharply at high speed with tractor.
22. Harrowing with tractor rear wheels in narrow position.
23. Tractor driver not watching where he is going.
24. Child riding on harrow.
25. Failure to lead bull with a staff.
26. Broken fence.
27. Trees create blind entrance to highway.
28. Dangling electric wire over driveway.
29. Tree chopper let tree fall wrong way.
30. Tree chopper's axe caught in tree because he is standing incorrectly.
31. Unsafe windmill could fall on someone.
32. Pail resting on platform of windmill may fall off.
33. Stovepipe in window of home.
34. Upturned rake near house.
35. Smoking in haymow.
36. Door of haymow may fall on someone.
37. Faulty electric wiring near barn.
38. Nails in board on ground.
39. Broken ladder.
40. Broken wheel on ground is tripping hazard.
41. Spraying against the wind.
42. Chimney on house too low.
43. Rickety barn—roof sagging and whole barn in disrepair.
44. Barn stall in disrepair.
45. Ladder leaning against rotten barn roof.
46. Man in haymow too near opening—may fall out.
47. Manure pile poorly placed in front of barn.
48. No safety blocks on saw-tractor wheels.
49. Smooth patch on outside of tractor tire-tread.
50. Pump not braced.
51. No platform around pump.
52. Hose of fruit spray between man's legs liable to trip him.
53. Spraying trees after they have born fruit.
54. No guard rail on windmill.
55. No braces on power plant of windmill.
56. No lightning rods on farm buildings.
57. No guards on wheels of tractor.
58. Seat missing from tractor.
59. Seat support on mower broken and inadequately repaired with wire.
60. Doubletree kingpin about to come out of mower.
61. No guards on gears of mower.
62. Reins dropped between horses attached to mower.

McHenry's eight groups together have planned interesting programs for several months ahead and each is now enjoying the county wide activities. The June formal at Crystal Lake was such a county activity. Examples of the unit activities are seen in Ringwood's discussion of "Highway Safety," in Pleasant Valley's "Welcome Home Party" for Merle Brooks returning from the army, in Marengo's parties in which the girls have been teaching the boys to dance, and in Hartland's interest in developing a baseball team.

Thought-stimulating discussions continue to come into the programs since the last issue of the RECORD." St. Clair heard Dr. Norman Rose, Highland health district officer upon "Health Precautions for Rural Youth." Knox conducted a lively panel discussion on the "County Health Unit." Richland heard Sergeant Stroup, a state highway patrolman, discuss safety on the highway. Tazewell heard Dr. Harry Roethe of the Northern Research Laboratory. He told of experiments in finding uses for farm products. Pulaski-Alexander and Wayne showed slides and had discussions on soil conservation. Wayne is starting a series of meetings this month built around the theme, "Know Your Country," McLean brought both the home adviser and the assistant farm adviser into their meeting to lead discussions. Mrs. Lysted discussed the theme, "Importance of Milk in the Human Diet," while Mr. Mosbacker discussed soil conservation and its relation to public health. Iroquois had current events under the theme, "Keeping Up-to-Date." This group discussed UNO, the county soil conservation district, new conveniences for the home, and recent developments in baseball. Ogle had a backwards party but went straight ahead on the study of "Weed Killers." Edwards engaged in a panel discussion — "What Should be Done to Encourage Young People to Stay on the Farm."

The building of membership in the county organization has been given serious consideration in the various counties. Whiteside, Warren, Bureau, Montgomery, Logan, Morgan, and Franklin have reported membership increases.

Guest nights have been sponsored as a means of encouraging membership growth. Bureau, McDonough, Tazewell, and La Salle, invited high school seniors from county schools. Macoupin held a family night at which Farm Adviser O. O. Mowery led a panel discussion on postwar jobs. E. H. Regnier of the University of Illinois was present to lead recreation.

Four big banquets have been reported recently. Bureau sponsored its first banquet which was attended by 200 Rural Youthers from Bureau and surrounding counties. Camilla Anderson was crowned "Queen of the May." Randolph's banquet was attended by a number of visitors from Jackson. The speaker, Roberto de la Rosa spoke on "The Youth of Mexico," Clark's fourth annual banquet was addressed by Frank Gingrich, former I. A. A. director of Young People's Activities. Washington reported 110 present at its banquet which was planned around the theme, "Pirate Ship."

Box socials, outdoor activities, and hard-times parties have provided good springtime enjoyment for a number of counties. Richland's box supper was attended by a large crowd. More than $150 was cleared. Part of the proceeds will go toward the State 4-H Memorial camp. A county-wide box social was sponsored by Whiteside's four Rural Youth clubs — Twin City Ripples, Prophetstown Tampico Warriors, Morrison Merrymakers, and Newton Notions, Friends were present from nearby counties.

Greene sends an outline of interesting summer social activities which include a boat ride on the Mississippi, (Morgan wants to join other counties in this activity. Why not get together?) fish fry, swimming party, annual hayrack ride and wiener roast. Morgan and Warren featured wiener roasts and each made plans for radio broadcasts as future activities. Morgan's party was an exchange visit with Cass. It also reported a lawn party recently at which Rural Youth slides were shown. Carroll reports a hard-times party in May, a formal dance in June as well as a square and ballroom dancing held a scavenger hunt. Cook conducted a progressive games party and scavenger hunt as well as a square and ballroom dancing party. Old fashioned hayrides were enjoyed by Macoupin, Bond, Schuyler, DeKalb, and Franklin accompanied by wiener roasts and folk games. Rock Island enjoyed a hamburger fry.

Madison and Bond participated in roller skating parties. Logan found adventure in a May breakfast which was planned by Doris Gehlback, Wayne Sheley, and Gerald Gehrke. La Salle gave an old clothes party to which high school seniors and other guests were invited. This group also served as host to nearby counties in a picnic at Starved Rock State Park. Northern Kane honored Mrs. Gertrude Fields, who resigned as home adviser, at its May meeting.

Square and social dancing provided entertainment as well as money making activities for a number of groups. St. Clair's first attempt at a big money raising enterprise was held at Mascoutah Community Hall May 11 proving that the event was successful. Knox county's spring semiformal dance in the Farm Bureau auditorium was well attended on the same date. Henry boasts of an attendance of 300 from 10 counties. A lunchstand was provided by the Munson 4-H girls. McDonough held a big square and social dance on May 31. Warren's square dance team has given several demonstrations in town and country schools. Massac sponsored the movie, "Tokyo Rose," as a money making project.

Recent weddings reported are: La Salle — Francis McCormick and Audrey Jones, Naomi Albertson and Wesley Freebairn, Bob Temple and Mercedes George; Bond — Frederick Baumberger and Della Durr; Brown — Maurice L. Bond and Roberta E. Varner; Warren White and Doris Miller; St. Clair — Russell Florreich and Irene Schnaare of Pulaski, Tom and Aleen now Mrs. Tom Renner; Whiteside — Jack Stewart and Alta Ballard.

ANSWERS — What's Wrong With This Picture?

(*See page nine*)

1. Failure to stop tractor when oiling.
2. Sloppy sleeves around machinery.
3. Unguarded saw.
4. Careless handling of log, endangering thumb.
5. Unbuttoned sleeves near saw.
6. Broken legs and supports on saw table.
7. Man at saw carrying sharp tools in pocket.
8. Double blade axe left unguarded.
9. Axe with broken handle.
10. Sharp pointed hay fork on ground.
11. Boy playing around water tank.
12. Unsanitary mudhole around tank—leaky water trough.
13. Unsanitary condition of well.
14. Working in front of mower.
15. Horses unprotected from flies.
16. Pick left sticking in ground.
17. Broken handle on pick.
18. Man overlifting.
19. Shovel presents tripping hazard.
20. Boy riding on tractor.
21. Turning sharply at high speed with tractor.
22. Harrowing with tractor rear wheels in narrow position.
23. Tractor driver not watching where he is going.
24. Child riding on harrow.
25. Failure to lead bull with a staff.
26. Broken fence.
27. Trees create blind entrance to highway.
28. Dangling electric wire over driveway.
29. Tree chopper let tree fall wrong way.
30. Tree chopper's axe caught in tree because he is standing incorrectly.
31. Unsafe windmill could fall on someone.
32. Pail resting on platform of windmill may fall off.
33. Stovepipe in window of home.
34. Upturned rake near house.
35. Smoking in haymow.
36. Door of haymow may fall on someone.
37. Faulty electric wiring near barn.
38. Nails in board on ground.
39. Broken ladder.
40. Broken wheel on ground is tripping hazard.
41. Spraying against the wind.
42. Chimney on house too low.
43. Rickety barn—roof sagging and whole barn in disrepair.
44. Barn stall in disrepair.
45. Ladder leaning against rotten barn roof.
46. Man in haymow too near opening—may fall out.
47. Manure pile poorly placed in front of barn.
48. No safety blocks on saw-tractor wheels.
49. Smooth patch on outside of tractor tire-tread.
50. Pump not braced.
51. No platform around pump.
52. Hose of fruit spray between man's legs liable to trip him.
53. Spraying trees after they have born fruit.
54. No guard rail on windmill.
55. No braces on power plant of windmill.
56. No lightning rods on farm buildings.
57. No guards on wheels of tractor.
58. Seat missing from tractor.
59. Seat support on mower broken and inadequately repaired with wire.
60. Doubletree kingpin about to come out of mower.
61. No guards on gears of mower.
62. Reins dropped between horses attached to mower.

Insured and Assured

A wise farmer is always CAREFUL. But when prevention fails, he STILL takes no loss. For a really careful farmer is always well insured. A Farm Bureau member can buy much protection for little through his own Country Mutual Fire Company. So don't take risks when it costs so little to be safe. See your Country Mutual man today. Tomorrow may be a day too late.

IT IS the dream of every farmer that a son shall follow in his footsteps . . . . a son who will find security in land kept rich by a lifetime of prudent care. This is a rich legacy, but even good land without good prices can mean poor living. So Illinois farmers — through their Farm Bureau — have set themselves an additional task: It is to build an agriculture so strong that fair farm prices will be assured.

Here then is a task that deserves the united effort of all farmers. Nor is it a selfish task, for as your wealth grows so grows the wealth of a nation. A strong, prosperous agriculture is the foundation of a strong, prosperous, healthy America.

OUNCE OF *Prevention*
POUND OF *Cure!*

COUNTRY *Mutual* FIRE *Company*

Formerly Farmers Mutual Reinsurance Company

Because it is a **mutual** policy, with savings passed back from year to year to policy holders, the Country Mutual Fire policy is an incentive to a farmer to help **prevent** fires. It is indeed an "ounce of prevention".

But when **prevention** fails, this same policy provides the welcome, life-saving "pound of cure" — ready cash to rebuild property lost to fire or wind.

See your Country Mutual Fire agent today and learn how little it costs to be safe.

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

CONSERVATION AND PRICE

By President Charles B. Shuman

IT WAS my privilege recently to ride in one of the giant Constellation air liners. The one hour and thirty-five minute flight from Kansas City to Chicago was the regular daily routine for the efficient crew and just another pleasant flight for most of their fifty passengers. To me, with the checkerboard of recently planted fields spread out like a great map far below, it proved to be a lesson in conservation. We crossed the Missouri and the Mississippi, the Illinois and the Fox, each carrying great loads of black mud. Every few minutes another acre of good corn belt top soil was on its way to the Gulf.

Every farmer who is not yet convinced that conservation of soil and natural resources is one of our most serious and immediate problems should see his own and his neighbors' farms from the air. Nothing is concealed! Every wash, every draw, each gully extending its clutching fingers back for more soil, even the high spots worn thin by sheet erosion; all are revealed.

The ravages of erosion are not the only conservation deficiencies that are apparent. . . . There are thousands of acres of thin, scrubby timber land unfit for grazing but capable of greatly increased production of badly needed lumber if replanted and given proper forest management. Other thousands of acres of worn out pasture land are producing at a fraction of what the potential capacity of this land would be under proper soil and pasture management practices. Buildings and fences are decaying, roads are unsatisfactory, homes and schools are badly in need of modernization both within and without. Even the people themselves are feeling the effects of our exploitation of natural resources. These are conditions as they are today in America — in Illinois.

We are slowly awakening to our danger. Through 4-H, Vocational Agriculture and Agricultural College training we are preparing our young people to do a better job of conservation. Our hopes for an advancing civilization depend largely upon how well these young folks learn their lesson. Through the Extension Service, AAA programs, Soil Conservation Districts and widespread publicity, farmers are learning how the soil conservation job can be done. Professional agricultural engineering and contracting services will probably soon be conveniently available. Despite handicaps of material and labor shortages, farmers have, during recent years, used more lime, phosphate and more improved conservation practices than ever before.

The big problem today is one of accelerating these programs even more. Some are saying that all we need is larger federal appropriations, more experts, more benefit payments and more publicity. These people forget one of the primary essentials for the success of an expanded conservation program. Maintenance of a parity price level for farm products is absolutely essential if farmers are to be expected to maintain and rebuild our national soil resources. When the general price levels collapse, farm prices usually fall farther and faster than the prices of the things they must buy. Under these conditions, the individual farmer is forced to mine his soil and cut capital expenditures to the minimum. Farmers through their state and national farm organizations are wisely insisting that a fair price level for farm products is the first essential to a long time conservation program. Subsidies, benefit payments and technical advice will be relatively ineffective as an offset to a major price disaster. It is in the interest of the National welfare that continued agricultural price parity be a reality.

You are Working...

ONE DAY out of FOUR for *the Federal Government*

THE typical Illinois farmer now spends approximately 25 per cent of his working time in order to support the Federal Government. In other words, he works three hours out of every twelve, one day out of every four, one week out of every month, or three months out of every year to pay his share of Uncle Sam's bills.

Can that be true? Consider the following facts, and judge for yourself.

In 1946 the total income of all the people of the United States, it is estimated, will be about 155 billion dollars ($155,000,000,000.00). As compared with this, President Truman has asked for and Congress is expected to appropriate approximately 39 billion dollars ($39,000,000,000.00) for the 12 months beginning July 1, 1946. Thus, through taxes or other means, the Federal Government will get about one dollar of every four that farmers and other citizens earn.

Your own income may not be large, and your individual income tax may be less than 25 per cent, but don't forget that you pay other federal taxes every time you go to town and sometimes when you stay at home.

In addition to your income tax, you must pay direct or indirect federal taxes on everything you buy for your farm and your family. A substantial part of the money that you pay for your tractor and other farm machinery goes to the Federal Government through corporation taxes on distributors, manufacturers, etc.

The same is true of what you pay for household equipment, furniture, food and clothing. Consumers pay approximately twice as much in Federal Tobacco Taxes alone as is paid to the farmer for the tobacco itself. Those who purchase alcoholic beverages pay about 2 billion, 420 million dollars ($2,420,000,000.00) annually in Federal Liquor Taxes. Then you must pay a tax on any jewelry, leather goods, and toilet preparations your family buys. When you pay your telephone bill or a freight or trucking charge, a federal tax is added. There is a tax when the kids go to a movie. There is a federal tax on the sugar in your coffee and taxes on a thousand other items "too numerous to mention."

Finally, if you leave a substantial estate when you die, the federal tax collector will grab a good-sized share of it before distribution is made to your heirs.

Altogether, nearly one-fourth of the current national income is being taken for federal expenditures. The 39 billion dollar outlay for the year 1946-47 establishes a new record for peacetime. This rate of public spending is about four times greater than the average expenditures during the six pre-war years. It is approximately double the highest annual outlay during World War I. Some of this enormous expenditure is required for the interest on the war debt. Much of it, however, represents expenditures by federal agencies.

AMOUNTS AND INCREASES IN SELECTED ITEMS OF THE FEDERAL BUDGET

Department	Secretary	1946-47 amount mil. dol.	Increase over pre-war per cent
Interior	J. A. Krug	361	140
Commerce	H. A. Wallace	189	820
Labor	L. B. Schwellenbach	128	433
Agriculture	C. P. Anderson	1,594	34

The President's official budget called for 361 million dollars ($361,000,000.-00), an increase of 140 per cent for the Department of the Interior (J. A. Krug, Secretary). The official budget called for 184 million dollars ($184,-000,000.00), an increase of 820 per cent for the Department of Commerce (H. A. Wallace, Secretary). The Department of Labor (Lewis B. Schwellenbach, Secretary) has a 1946-47 budget of 128 million dollars ($128,000,000.-00) or 433 per cent over 1938-39. The President asked Congress for 1 billion, 594 million dollars ($1,594,000,000) for the department of agriculture, Clinton P. Anderson, secretary. This is $409,-000,000.00 over pre-war appropriations.

In addition to appropriations for the Navy and War Departments and the interest on the public debt, the President's budget calls for expenditures of more than 17½ billion dollars ($17,-500,000,000.00). This is about three times as much as was spent for all such purposes before the war. This 17½ billion dollars for "ordinary" expenses of the Federal Government is almost as much as was spent for all federal purposes during the peak of expenditures during World War I. It is equal to more than the entire national debt in 1930 (16½ billion dollars). The sum of 17½ billion dollars is equal to the combined value of all farm production in the United States in 1939 and 1940. It is equal to 15 times the value of all farm products produced in Illinois in 1945.

In addition to the maintenance of War and Navy Departments and for the payment of interest on the national debt, the principal uses for federal funds are to pay contractors to purchase materials and to pay salaries and wages. At the latest available report (May, 1946) there were 2,848,000 civilians on federal pay rolls. This is an increase of approximately 180 per cent over 1940. As compared with 1930, the number of federal employes has increased by 500 per cent.

It is difficult to measure the productivity of 2,848,000 federal employes. A few contribute services, the value of which is beyond measure. A substantial number provide services more or less equal to the amount paid them in wages and salary. A great many, however, contribute little or nothing of use or value to farmers or other citizens.

(*Continued on page* 21)

SHE HAD SO MANY CHILDREN, PAPA DIDN'T KNOW WHAT TO DO . . .

By L. H. SIMERL
IAA Director, Research and Taxation

Let's Go to the Sports Festival!

MARK two days in red on your calendar, folks, Aug. 29 and 30. These are the dates for the seventh annual Illinois Farm Sports Festival to be held on the University of Illinois campus.

Revived after a four year war lapse, the Sports Festival, sponsored by the Illinois Agricultural Association, County Farm and Home Bureaus, University of Illinois, Agricultural Extension Service, WDZ, WMBD, WLS-Prairie Farmer, and others cooperating, will feature top competition this year. County committees already are holding contests to pick entrants for the state contest.

Champaign, DeKalb and Whiteside, the three district winners of the 1941 Sports Festival in which 73 counties and 3351 individuals competed, have made plans to defend their championships, Otto Steffey, IAA board member, Henderson county, chairman of the Festival, reports.

Competition will be keen in the women's events — chair quoits, table tennis, knot tying, shuffle board, clock golf, dart throwing and horseshoes — according to reports from Mrs. Emile Rediger, Illinois Home Bureau Federation representative, Lexington, and Miss Irene L. Brandt, home adviser, Knox county, representative of Illinois Home Advisers Association, both on the state Sports Festival administration committee.

District winners of the Farm Bureau Baseball League, around which the Sports Festival was originally built, will compete for the state championship on Friday, Aug. 30, second day of the Festival.

The Thursday evening Aug. 29 program in the University of Illinois Memorial stadium under the direction of E. H. ("Duke") Regnier will feature selected groups from the music and folk dance contest, WLS and other radio talent, the Illinois Rural Chorus of 200 or more voices directed by James Van Slyke of the University, and, it is hoped, the University band.

A square dance jamboree directed by Guy Colby, WLS, and Ralph McKenzie, Kane county, as well as a swing festival, with music by a popular dance orchestra, will follow the evening program.

Farm Bureau members should see good hard ball games at the Festival, as 19 counties are playing this summer, more teams than in any of the last three pre-war years in which the hard ball league operated.

Interest in softball will be high as indicated by counties already in action. Whiteside now has ten 4-H clubs playing ball and has formed a Rural Youth inter-county league with Ogle, Lee, Carroll, Bureau, Henry and Whiteside counties playing. Sangamon has 20 and Champaign 14 4-H teams and several counties are planning tournaments to be held at county picnic or sports days.

Tazewell county has already re-organized its popular folk and square dance groups and they hope to maintain their "A" rating held throughout Sport Festival history. Home Bureau members in Jasper county have announced plans to enter a "kitchen band" of 11 members. Many other folk festival groups are active.

The 4-H Physical Fitness event, based on the state 4-H project, includes the 60-yard dash, agility run, chins, broad jump and breath holding. More than 30 counties in the state are carrying out this project and it is expected that all these counties, and perhaps others, will compete at the Sports Festival.

Volley ball has been added to the Festival because this was the event most men in the armed forces played. Other additions are Rural Youth softball for both boys and girls and ping pong and knot tying for women.

Entry blanks are now available at County Farm Bureau and Home Bureau offices. Deadlines for entries at the IAA office, 608 South Dearborn Street, Chicago 5, are set at Aug. 17 for softball teams and Aug. 26 for other entries.

Eligibility lists of softball players must be postmarked not later than midnight, Aug. 23, and a $5 entry fee for all softball teams entered must be forwarded not later than Aug. 17.

Room reservations will be handled through local county committees and a $1 room deposit is asked for each person desiring a reservation.

To compete in the Festival, contestants must be from Farm Bureau or Home Bureau families, or 4-H clubs or Rural Youth members, and at least one-half of the participants in square dance, folk dance, choral groups, square dance bands and novelty bands, must be from Farm Bureau or Home Bureau families or 4-H or Rural Youth members.

In the folk festival, each county may make one entry in each division or subdivision. It is recommended, however, that counties hold folk festival elimination contests to select winners for the State Festival.

---

19 TEAMS COMPETE

The Farm Bureau Baseball League with 19 county team members is deep in its summer run-off schedule to determine district winners who will compete for state championship at the Illinois Sports Festival to be held Aug. 29 and 30 at Urbana. Here are a few reports received up to July 9.

In early season games Tazewell defeated McLean 12-2, with Tazewell scoring six runs in the fifth inning to win. Tazewell also won over Woodford 9-6 with Baurer, Tazewell county short stop, hitting the first reported home run of the season.

Marshall-Putnam won over Bureau 7-6, with Shuman and Condit, winning pitchers, yielding only four hits and striking out 12 batters.

Henderson beat Warren 19-0, scoring 12 runs in the fourth inning. Glen Kern, Henderson short stop, at bat five times, pegged four safe hits, with Gail Kern, center fielder, at bat three times with three safe hits.

In another game Henry defeated Lee 12-1.

Counties competing are organized into districts as follows: District 1, Boone and Stephenson; 2, DeKalb, Kendall and Will; 3, Lee, Henry, Bureau and Marshall-Putnam; 4, Warren and Henderson; 5, Woodford, McLean, Tazewell and Cass; 6, Ford, Macon and Coles; 7, Saline.

From the edge of an oat field on the farm of Frank Brett in Macon county, H. L. Wascher, assistant chief in soil surveys at the University of Illinois, describes the soil to men who ventured an estimate of the farm's per acre value during appraisal clinic.

FARM CLINICS WARN OF

"BOOM and BUST"

VISIONS of the "boom and bust" days that followed World War I were brought into sharp focus at a series of farm appraisal clinics held recently throughout the state.

Warned by farm leaders and farmers who remember the days when corn slumped from near $2 a bushel in 1920 to 35 cents in 1921, prospective land buyers were repeatedly reminded to be cautious.

The farm appraisal clinics, conducted by agricultural economists and agronomists from the University of Illinois, and farm appraisers from the Federal Land Bank of St. Louis, shook a warning finger at the folly of trying to pay off the cost of an over-evaluated farm out of future income.

Meeting on the 240-acre farm of Frank Brett in Macon county late in June, a group of 90 persons studied the farm's 15-year-old production records, and examined the soil and buildings before estimating its per acre value.

With J. B. Cunningham, farm management specialist, C. L. Stewart, chief in land economics, and H. L. Wascher, assistant chief in soil surveys, all of the University of Illinois, explaining the make-up of the farm in some detail, the appraisers set an average valuation of $179 per acre on the farm.

Estimated at $175 an Acre

Wascher took the group over the fields, explaining the type, makeup, and productivity of the land, now and then pausing to drill into the soil for a sample which he placed in the hands of the men planning to estimate the value of the farm.

The average estimate by the group was $4 more than the $175 per acre value set on the property by Clair Hay, land bank appraiser.

Appraisals were based on normal values, past income, and typical management in the community. Hay considered the Brett place an exceptionally good farm. When Brett was asked if he would take $175-$180 an acre for the farm, he laughingly answered that farms in his community were selling for "well over $200 an acre."

Sales in Macon county indicate that farms comparable to the Brett place are selling from 60 per cent to 80 per cent higher than the group who attended the meeting think they are worth if they must be paid out of expected future earnings.

The 240-acre Brett farm, appraised at $175 an acre, and exceptionally good in the words of the land bank appraiser might well be held up in comparison with the 240-acre Schertz estate near Minonk in Woodford county which recently was sold for $416.67 an acre.

Figuring a return of four per cent on the money invested in the Schertz farm, the land will have to bring in $16.67 an acre net before the man who runs it makes a penny for his labor.

Add $2 an acre taxes and you have a fixed charge of $18.67. Average net income per acre on record-keeping farms in central Illinois during the depression was $2.58. During the period 1938-41 it was $7.33, and during 1942-44 it rose to $18.75.

Prof. Cunningham said that there was no reason to doubt that history would repeat itself and that there will be sharp reductions in prices sometime in the next few years.

"Peak prices have been associated with wars," Cunningham said, "and net earnings have decreased drastically during postwar periods."

C. L. Stewart (right), chief in land economics at the University of Illinois, offers soil sample for examination at Macon county appraisal clinic.

J. R. Gilkey, Macon county farm adviser, cautioned farm buyers to consider all factors affecting value, and because most purchasers are inexperienced in estimating farm values, he recommended that the buyer employ a competent appraiser to protect his interest. "This may save many financial headaches later on," Gilkey said.

FARM BUREAU DAY AT STATE FAIR IS AUG. 16

When you're at the Illinois State Fair, Aug. 9-18, plan to stop at the tent provided for your use by the Illinois Agricultural Association and your county Farm Bureau.

Plans now provide for the tent to be located in its old location just north of the administration and service building in the center of the fairgrounds.

The tent offers free checking service, ice water, tables, chairs and a meeting place for Farm Bureau members, their friends and relatives.

Farm Bureau Day has been designated as Friday, Aug. 16, and many of the officials and staff members of the IAA and associated companies will be present at the tent to greet you.

Homemaker's institute this year will be dedicated to young war brides who will be given a course in home making, cooking and sewing for 10 days.

Fair officials have designated in addition to Farm Bureau Day, other days as follows: Aug. 9, Children's Day; 10, Youth Day; 11, Veteran's Day; 12, Army; 13, Navy; 14, Democratic; 15, Governor's Day; 17, Auto Race Day, and 18, Motorcycle Race Day.

FARM BUREAU GROWS IN STRENGTH

Midwest States Report All-Time Record Gains in Membership

FARM BUREAU is on the march toward even greater membership gains as organization-minded farmers rally under the banner of a united agriculture.

As leaders met for the Midwest Farm Bureau Training School in Kansas City June 23 to 26, state after state reported new highs. While Illinois maintained its lead with a membership of more than 128,000, other midwest states also showed high percentage gains.

Moving into a challenging position for top membership honors is Iowa Farm Bureau with 105,000. Indiana reported an all-time high figure of 68,303; Kansas has 40,000, Ohio, 50,000, Michigan, 58,000, and so on down the roll call of the 11 states represented at the Training School.

Service to members coupled with the contribution of volunteer organization workers were cited at the Farm Bureau presidents' open forum by IAA President Charles B. Shuman as reasons for the growth of Farm Bureau membership in Illinois.

While organization workers recognized the steady progress being made by Farm Bureau, they also were aware of the big job ahead for organized agriculture.

Participating in the open forum at the Midwest Farm Bureau conference which featured state Farm Bureau presidents and secretaries as panel members are left to right: IAA President Charles B. Shuman, Curtis Hatch, Wisconsin Farm Bureau president, and H. E. Slusher, Missouri Farm Bureau president.

Among the points stressed in the organization conferences were these two: the need for a large membership that truly speaks for American agriculture, and the ability to mobilize support effectively and quickly in crucial periods.

The tremendous power of labor organizations and industries prove beyond a doubt the need for agriculture to achieve such united representation so that farmers will be on a par with other groups.

Editor, IAA Record

Illinois Leads Membership with 128,000; Iowa Second with 105,000

At the informal livestock conference held during the Training School, reports were made by midwest states on livestock programs that were being developed. Otto Steffey, IAA director, reported on the Illinois plan for coordinating cooperative livestock marketing agencies.

It was the considered opinion of the group that the decentralization of the livestock industry was near at hand. The trend, it was agreed, appears to be away from the central markets and in favor of local points. This trend, particularly in marketing hogs, started before the war, and wartime marketing conditions and OPA regulations gave it further impetus. Many believe that the trend will continue even during normal times. Others expressed interest in the possibility of cooperative packing plants. All state representatives declared that livestock producers could best achieve their objectives at the national council tables through the American Farm Bureau Federation.

Organized agriculture's position in world affairs was also brought to the

This is a general view of the dinner session of the Midwest Farm Bureau Training School held in Kansas City, Mo., June 23-26.

attention of leaders at the Training School by Allan B. Kline, president of the Iowa Farm Bureau Federation, and vice-president of the AFBF.

Kline recently returned from London where he and other AFBF representatives met with farm organization leaders from 13 nations. At this meeting, farm organization leaders voted to set up an International Federation of Agricultural Producers. Constitution of this new organization will be recommended to the farm organizations of the various countries for approval or amendment this year.

Must Avert Disaster

Farmers the world over are ready to accept the challenge of expanded production to meet food needs, Kline said, but he also warned that some plans have to be made for the time when economic demands are outrun by supplies.

We must find the answer to this problem, Kline declared, or we will be faced with the same conditions that spelled disaster after the first World War.

We must decide what we can do as a community of nations to bring about stability of commodity prices, he added. This is one of the main reasons, Kline said, for the formation of a world organization of agricultural producers.

"The condition that will arise from doing nothing will not be to your liking," Kline advised. "It will be worse than World War I because the maladjustments were greater in World War II."

Have World by Tail

Kline vividly described the picture of starvation in Europe and emphasized how difficult it was for non-Europeans to visualize the plight of starving people.

He said that his impression of the United States upon his return was that we lived in a country that "had the world by the tail, if we could only appreciate it." He stressed the fact that the United States occupies a unique position in which it can demonstrate its ability as a world leader.

One of the entertaining and educational features of the Training School was the "Supreme Court" set up during one of the sessions to hear "charges" against state Farm Bureaus. Among those seated on the august bench as a judge was IAA Field Secretary George E. Metzger, while IAA Organization Director O. D. Brissenden served as defense attorney.

The IAA was charged with "failure to make membership the most important Farm Bureau project." Brissenden ably defended the IAA by citing

Illinois Agricultural Association stands on trial "charged" with failure to make membership the most important Farm Bureau project. At left IAA Organization Director O. D. Brissenden, defense attorney, ponders his arguments as T. C. Peterson, Wisconsin Farm Bureau organization director, makes a statement as prosecuting attorney. Seated at the right in the defendant's chair is IAA Vice-President F. E. Morris.

the low cancellation of membership of 5.92 per cent over the past five years, and the membership of 128,220 on June 1, 1946.

Brissenden also appeared as one of the main speakers at the concluding session. He declared that our greatest reconversion problem is that of maintenance and restoration of the soil. Four steps are needed to meet the problem, he added. First, through organization, education and understanding, farmers must be instilled with the love of the land and the determination to rebuild and maintain the soil. Second, they must have the "know how." Third, they must be in a position to buy plant food at a fair and reasonable figure. Fourth, they must have a fair price for their products. Those who talk of a cheap food policy for America talk and advocate the future ruination and starvation of America.

FIRST COMPANY EMPLOYES MOVE INTO IAA's NEW 12-STORY BUILDING

Saturday, August 3, is moving day for the first office personnel to occupy the IAA's new 12-story home at the corner of East Ohio street and Wabash avenue. They will move from the organization's present headquarters at 608 South Dearborn street.

By Monday, August 5, Manager C. E. Strand and his staff of 11 from the Illinois Agricultural Auditing Association will be on the job in the new quarters on the third floor of the former American Bankers Building.

The Illinois Agricultural Auditing Association, one of the first of the IAA's associated commercial companies, has occupied quarters at 608 South Dearborn street since its organization in 1924.

The new IAA home has 82,000 square feet of rentable floor space and will be occupied gradually by other organization departments and associated companies as leases of the present tenants expire and the office space becomes available.

The Illinois Agricultural Auditing Association is one of the smaller of the IAA's 14 associated companies in Chicago office personnel. It has 456 member clients.

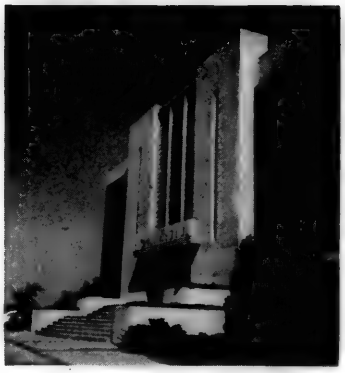
In addition, the IAA has 16 departments, which with the remaining 13 associated companies, comprise personnel totaling more than 400 remaining to be shifted to the new location. The shift of all employes is expected to be completed in a year or less.

The business of farming in the United States employs 25 million men, women and children.

A "Supreme Court" sits in judgment at the Midwest Farm Bureau conference to hear "charges" brought against state Farm Bureaus. Left to right are Charles Marshall, president, Nebraska Farm Bureau; Larry Brandon, Secretary, Indiana Farm Bureau, chief justice; H. W. Culbreth, Ohio Farm Bureau organization director; Jack Yaeger, ass't. executive secretary, Michigan Farm Bureau; J. S. Jones, secretary, Minnesota Farm Bureau, and George E. Metzger, IAA field secretary.

INVEST IN YOUTH WITH BETTER SCHOOLS

By JIM THOMSON
Assistant Editor, IAA Record



Entrance to High School gymnasium.

Rochelle Township High School.

Charlotte Hollingsworth takes dictation from transcribing machine.

Doris Watson uses device to measure skirt length of Gloria Ohlinger.

DOWN through the heart of Illinois, past lush farm lands with fat cattle, cities and villages with their churches, schools and fine homes, past state parks, mines, oil fields and factories runs the state's longest thoroughfare.

From Rockford on the northern end to Cairo at the confluence of the Mississippi and Ohio rivers, Highway 51 sweeps across prairie lands studded with everything that Illinois holds dear.

The people of Illinois are proud of many things. They are particularly proud of fine schools scattered the length and breadth of the state.

And perhaps nowhere along that lengthy road is there a high school which more nearly meets the needs of a community and the standards of educators than the Rochelle Township High School in Ogle county.

Blessed with fruitful soil from which most of the wealth of the community springs, Rochelle can afford to offer a diverse educational program amid pleasant surroundings.

Of particular interest to rural boys and girls are the courses in vocational agriculture and farm mechanics and homemaking. The classes teaching efficiency in home management also have a strong lure for city girls.

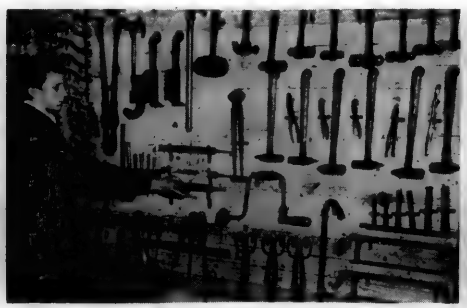
Aware of the value of vocational education to the student and the community, Principal C. A. Hills has fostered its growth and development in a program which has instilled some interesting ideas in the minds of the pupils.

The agriculture student is impressed by the knowledge that farming is a scientific occupation and that there are definite reasons why individual farmers succeed or fail. Vocational agriculture promotes pride in farm skills the student has learned in the field and farm mechanics shop.

The home economics student is captivated by the modern equipment in the Rochelle classroom kitchens and the ease, efficiency and economy of modern methods of homemaking. A Rochelle sophomore summed up her impressions of the course in home economics by saying: "You get to know so much you can even teach your mother."

The students learn to purchase with the shrewdness of good housekeepers by buying in local stores and then laying out the purchases before their classmates who criticize price, choice and merchandise.

The girls also learn to judge quality in materials, how to operate home machines, decorate the home, keep a budget, do craft work, can food, set a table correctly, care for children, care for the sick, and numerous other home skills which will help immeasurably to make the girls successful homemakers.



Left: A fine assortment of tools is available to students. Conrad Schabotker reaches for file. Right: Melvin Zios grinds valve on machine lathe.

Left: Instructor Dorothy Catlin (foreground) supervises as girls prepare meal in model school kitchen.

Right: Rosemary McCaslin (left) and Evelyn Brink learn how to wash clothes properly in a modern machine.

In sewing classes the students learn to make, by hand and machine, attractive, serviceable clothes designed for the individual's figure and personality. Knowing so many of these home skills gives the average Rochelle high school girl the poise and assurance of girls many years older.

Asked what they liked about home economics,

Freshman Chris Stone said: "I have learned how to do things quicker and easier."

Sophomore Norma Holmes: "Our home economics teacher explains so many more different things than you could learn at home."

Junior Helen Van Kirk: "I have learned to cook, care for the home and children, budget income and plan things I just wouldn't have taken the time to learn at home."

Senior Ruth Keele: "I have learned to sew and cook much better, how to save time and money by planning and budgeting. The methods are more advanced and modern than you could learn at home."

Under the direction of K. E. Wehner, vocational agriculture instructor, farm youth planning to remain on the farm are taught the scientific bases for successful farming practices. Like the girls in home economics, they learn by doing.

The farm mechanics machine and woodworking shops are equipped with a splendid array of tools, engines, machines and other equipment. In the farm mechanics course alone, at least 100 separate tasks must be performed. They range from the hanging of a gate to the pouring of bearing babbitt.

Work includes gas and electric welding, forge training, repair of farm equipment including automobiles and trucks, sheet metal training, care of tools, use of concrete and metals, paints and woods.

The girl, too, who has little enthusiasm for the quantity theory of money or the economic and social significance of the industrial revolution can bend her energies elsewhere. Besides learning how to run a home efficiently, she can prepare for a business career by learning how to operate office machines.

Well-equipped with business machines, the Rochelle high school's thoughtfully planned commercial classes train the student to the point where she can step into the average

CASE BILL VETO SUSTAINED . . .

HOW DID YOUR CONGRESSMAN *Vote?*

FARM Bureau members have been furnished a good opportunity in recent weeks to observe their Congressmen in action on such highly important legislation as the Case bill and OPA extension.

The Case bill was supported by the Illinois Agricultural Association and the American Farm Bureau Federation.

Stated objectives of the Case bill were to encourage settlement of disputes between labor and management by collective bargaining and by conciliation, mediation, and voluntary arbitration, thereby reducing industrial strife, strikes and lockouts.

It was first introduced in the House last January and was passed Feb. 7 by a vote of 258 to 155. The Senate labor committee then took the "teeth" out of the bill, but the Senate restored them May 25 by a series of Farm Bureau-supported amendments.

The measure in amended form passed the Senate by a vote of 49 to 29 and on May 29 the House passed the bill by a vote of 230 to 106. After studying the bill, the President vetoed it June 11.

Following the presendential veto, the House sought to override his action, but failed by a slim margin of five votes. The vote was 255 to override the veto and 135 to sustain it. It would have required a two-thirds majority, or 260 votes, to pass the bill over the veto.

The voting record of Illinois Congressmen and Senators on the Case bill is printed here as it was taken from the Congressional Record.

While the Case bill failed to become law, another piece of labor legislation known as the Hobbs bill, supported by the Farm Bureau, was signed by the President July 3 and became law. The Hobbs bill was passed by a voice vote in the Senate June 21. This bill had been passed by the House on April 9, 1943, and again on Dec. 12, 1945.

The Hobbs bill is important to agricultural producers because it provides fines and imprisonment for interference with the movement of goods (including farm products) in interstate commerce.

As the RECORD goes to press the OPA extension bill is still being debated so that it is not possible to present a complete voting record on this legislation. Voting records on this legislation will be carried in later issues of the RECORD.

	Case Anti-Strike Bill	Vote to Override President's Veto of Case Bill
Senator Lucas	Yea	No Senate
Senator Brooks	Yea	Vote

The abbreviation "N.V." means not voting; and the abbreviation "P.F." means paired for,, that is, in support of the measure.

PLAN CONSTRUCTION OF HAVANA RIVER CO-OP'S 70,000 BUSHEL ELEVATOR

Construction of a new river grain elevator at Havana for the Havana River Grain Company was scheduled to begin by July 15, according to J. Howard Stone, president of the new cooperative.

This construction is the latest development in the grain merchandising program of the Farm Bureau in Illinois. The Havana cooperative is a member of the Illinois Grain Terminals Company, recently organized affiliate of the Illinois Agricultural Association.

The Havana River Grain Company by purchase recently took over all property of the Havana Cooperative Grain Company, including approximately 500 feet of river frontage, an elevator and office.

The new elevator will be located west of the existing elevator, and will be of concrete and steel construction. The total height of the elevator will be 114 feet and will have a capacity of 70,000 bushels.

Barge loading facilities will consist of an endless conveyor enclosed and supported by steel framework. All machinery in the new structure will be of the most modern high speed type.

Havana River Grain Company will serve producers in Fulton, Schuyler, McDonough, Mason, Menard, Cass and Logan counties.

Connections between the old and new elevators will permit moving grain from either elevator to be loaded on river barges or on the railroad.

Permit for construction of the new elevator was granted by the Civilian Production Administration and the first load of steel has been delivered to the building site.

Oscar Athey, former manager of the Havana Cooperative Grain Company, was employed by the new corporation as temporary manager at a board meeting July 2.

First load of grain shipped by the new company, a car of wheat, moved early in July.

Western Illinois Grain has purchased elevators at three points with the following capacities: McCall, 40,000 bushels; Ferris, 15,000 bushels, and Adrian, 10,000 bushels. Headquarters of Western Grain are at Dallas City where it has a 45,000 bushel elevator.

Bureau County Grain Company, a subsidiary of the Bureau County Farm Bureau, which will tie in its operations with Prairie Grain Company, has taken over operations of the Larson Seed Company grain and coal business. These facilities include a 25,000 bushel elevator.

Shorts in the News

Dr. W. E. Carroll, head of the department of animal husbandry, has been appointed acting dean of the University of Illinois College of Agriculture. He will serve in the absence of Dean H. P. Rusk, who has been granted a six-months' leave of absence because of illness. Dean Rusk is now recovering from a major operation. Carroll is recognized as an authority on the breeding and feeding of swine. He is a former dean of the College of Agriculture at Utah State college.

An unknown pilot in a small plane recently helped Grover Pool of Brown county save a horse which was badly tangled in barbed wire. Attracted by the plane buzzing over his head and circling a bottom field on his farm, Pool investigated and found the horse. A veterinarian was able to mend the deep cuts in the animal's legs.

George E. Kemp, Knox county, has been named assistant Farm adviser and county organization director for Peoria county. A graduate of the University of Illinois College of Agriculture in 1942, Kemp served in the navy and recently was discharged with the rank of lieutenant, junior grade.

When the farmer counted his cash at the end of the year he didn't always come out with as much as he did the year before. That's what F. J. Reiss and O. B. Brown say. Reiss and Brown are economists at the University of Illinois College of Agriculture.

The University cooperated with more than three thousand farmers in the state in keeping records of their businesses. Reiss and Brown say that crop yields were seven percent above the average for the last 10 years — and that the farmers received more money for their crops and livestock.

But labor costs rose about 10 percent, and power and machinery costs went up 10 to 15 percent from 1943 to 1945. In general, farmers in southern Illinois didn't make as much profit last year as the year before, but in the northern two-thirds of the state the farmer did come out ahead of 1944.

Of course there were exceptions. In the west and northwest sections of the state, where the corn yield wasn't too good, earnings were lower. They were lower, too, around the St. Louis dairy and wheat area and in the claypan section. On the other hand, income was higher in the Wabash Valley and on southern Illinois fruit and vegetable lands.

John E. McCue is the new farm adviser at Edwards county. He succeeds J. L. Diamond, now Peoria county farm adviser. McCue was graduated from the University of Illinois College of Agriculture in 1939 and taught vocational agriculture at Ridgway, Ill., and Poseyville, Ind., before entering the armed services in 1943.

The Woodlot Owners' Cooperative of Peoria has appointed Jean Fisher its forester-manager. Fisher assumed his duties July 1. The cooperative extends an invitation to farmers and woodlot owners of central Illinois to discuss utilization of their woodlands with Fisher at the Farm Bureau office in Peoria. Fisher is a 1941 graduate of the University of Idaho School of Forestry and recently was discharged by the navy.

Assistant state supervisor on the farm labor staff at Urbana is George B. Whitman, Henderson county farm adviser from 1934-38 and Adams farm adviser from 1938-44. More recently he has been working for private business. Whitman graduated from the University of Illinois College of Agriculture in 1920.

Laurence McLachlan, 17, (right) of Earlville, La Salle county, is interviewed on the radio after taking all the first prizes in the Chicago Junior Market and Lamb sale. He won firsts for single lamb and for pens of three, five and ten lambs. Left is Ralph Eddy, WGN assistant farm director.

The new farm adviser at Kankakee county is Lloyd D. Graham, former lieutenant colonel in the army quartermaster corps. Graham was born and reared on a Peoria county farm and was graduated from the University of Illinois College of Agriculture in 1931. He taught vocational agriculture at Lovington until 1936 when he became assistant farm adviser at Peoria. He was called for army service in 1942. Graham is married and has two sons, aged four and eight.

A summary of the effects of soil treatment on soil productivity during 58 years of experimental work by the University of Illinois College of Agriculture is available in a new bulletin. The publication states that "the crop-producing efficiency of most Illinois soils can be improved." Bulletin 516 was authored by eight members of the department of agronomy.

Roy Burrus, Cass county, was elected president of the Illinois Crop Improvement Association at its annual meeting in Urbana in June. He succeeds Lawrence Lowe of Kankakee county. Other officers include Vice President Hugh R. Morrison, Bureau county, and Secretary-Treasurer J. L. Trisler, Vermilion county. Trisler succeeds IAA President Charles B. Shuman.

Four meetings with country grain elevator and feed business managers and owners over the state were held recently to outline on-the-job training for World War II veterans in management of elevators.

The training program for the first year provides for three-day sessions in Chicago Aug. 21-23; Peoria, Nov. 4-6; University of Illinois, Jan. 22-24; Chicago, March 3-5; Springfield, May 5-7; and University of Illinois May 26-28. This training supplements the on-the-job experience of veterans working at elevators.

The program is to be administered jointly by the Illinois State Board for Vocational Education and a committee known as the Illinois Country Grain and Feed Institute. The Institute is composed of representatives from the Illinois Agricultural Association, Illinois Grain Dealers' Association, Farmers' Grain Dealers Association, Illinois Feed Association, Bank for Cooperatives, St. Louis, and the Agricultural Extension Service, University of Illinois. L. F. Stice, extension marketing specialist, U. of I. College of Agriculture, is secretary of the Institute.

A RE-STATEMENT OF POLICY WITH REGARD TO PRICES

YOUR Farm Bureau Service Company and the Illinois Farm Supply Company naturally view the present situation in commodity prices through the eyes of their farmer patron owners.

When OPA became inoperative on July 1st we passed from the war-time era of controlled prices to free markets and free prices. Every one of you is familiar with what has taken place. Some comparisons are in order:

COMMODITY	JULY 15, 1946	APRIL 15, 1946
Corn	$2.27	$1.16
Oats	.92	.82
Wheat	2.10	1.76
Hogs (cwt.)	19.00	14.75
Cattle (cwt.)	23.75	18.00
Gasoline (Reg., per gal.)	.165	.162
Blue Seal Motor Oil (55 gal. drums, per gal.)	.635	.635 incl.fed.tax
Blue Seal Tires (6.00 x 16)	16.07*	15.57
Soyoil No. 5 White House Paint	3.25	3.25
Blue Seal Poultry Balancer	5.00	3.95

It is evident that your Farm Bureau Service Company has not changed its prices on fuels, oils, tires,* paints. Blue Seal feeds, on the other hand, have been influenced by the terrific upsurge of the prices of soybean and linseed meals, grains, and other ingredients. Our handling margins, however, on Blue Seal feeds have remained about the same as pre-war rates.

Here are some things that you want to know:

1) Farm Bureau member patrons in Illinois are spending approximately $100,000.00 every day for fuels, oils, greases, plant foods, feeds, and other supplies. This is at an annual rate of $30,000,000.00. You can readily see that every 10% increase in price, therefore, would cost our patrons $3,000,000.00 annually.

2) Your Service Company organization is not going out in the markets where products are scarce and prices skyrocketing to buy just to keep "business rolling." On the contrary, we are going about our business, doing as we have been doing for the past months and years. We have no designs on trying to corner a market nor to pile up a lot of profits. We will gamble in **NO** market. Nor will we load any member up with high-priced merchandise. If prices on some items "go out of sight" we reserve the right to discontinue handling such products until such time as prices return to reason.

3) During this period of seesawing and uncertainty, Farm Bureau Service Companies are exerting their influence to hold the line on prices. This policy is pressing handling margins down because raw material prices have been going up. This may ultimately have a marked effect on Service Company earnings at the year end. We believe, however, that you will agree that this holding the line policy is sound from your standpoint.

4) Obviously, when raw materials and labor costs go to higher levels we will have no alternative but to raise prices accordingly, but when we do, our customary handling margin rates will not be increased. Furthermore, it is our intention to exert our influence wherever possible through greater efficiency in distribution.

Farm Bureau as an organization has traditionally stood for fair prices. Fair prices in the market place for things farmers produce — fair prices in supplies which farmers need in farm production. Parity and equality have become synonymous and have been the key word of the Farm Bureau struggle for the past 25 years. The present situation is dangerous, but it is here. It is real. No single person is responsible for it. No one person can relieve it, but as a group of 128,000 Farm Bureau members owning 81 Service Companies, doing $30,000,000.00 business here in Illinois, we can exert a tremendous influence.

***A 50c increase per tire was allowed by the OPA effective June 17, 1946. This increase was general in the tire industry.**

FARM BUREAU FOLKS IN PICTURES

IAA Director Charles Lauritzen, Livingston county, recaptures his youth for a moment on his grandson's bicycle. Granddaughter (right) looks on.

Life could be beautiful if neighbors were as friendly as these. Girl is Brown county farm adviser Eldon D. Powel's daughter Eva. Lad is Eddie Howard.

$5 ↑ This unusual picture of 20-foot long hairlike roots taken from a well wins Asa Howell (left), DeWitt county, the $5 award of the month. Right is neighbor James Arthur.

Reflection appears as clear as the original in this picture of Shirley Roll, daughter of Greene County Farm Adviser Ray Roll, taken in Mexico City.

Mrs. Frank Piller of Bureau county knows a chic fashion when she sees one. She sends in this shot of Cousin Alice modeling Easter basket as hat.

Betty Brockett of White county sends in this unposed photo of her mother Mrs. N. M. Brockett feeding her pet pig, one of a litter of 15.

Accompanied by her attendants, Doris Sager of Richland county, rides in style as May Day Queen at Noble Community High School. Doris is prominent in 4-H Club work.

REA EXPANSION PROGRAM SLOWED BY SHORTAGES

CONFRONTING the manager of a central Illinois rural electric co-op recently, a farmer asked why the co-op hadn't yet started the power line out his way.

"The war's over," he said. "What are we waiting for?"

Natural impatience and irritation at delays and shortages darted from each of his words. His attitude could be recognized as a painful eagerness to electrify his farm despite all obstacles, an attitude shared by thousands of Illinois farmers.

But his wishes had become more insistent during the past few years. And who could blame him. The war had made great demands on his energies and even now the demand for food continued to appear limitless. Besides the help situation seemed no better.

Yes, he knew what electricity meant. Too well, he knew. Hadn't he seen what it could do on his neighbors' farms? Wasn't he pretty well convinced it was about equivalent to another man on the place.

But the manager was sorry. No, he couldn't order his men to get a line to the farm right now. No, he couldn't promise it would be done next year. Well, perhaps in 1948. But he made no promises.

The manager invited the farmer to sit down for a few moments. He had something he wanted to explain.

What did the manager have to say? Well, we asked Manager A. E. Becker of the Menard Electric Co-operative at Petersburg just how he would explain the snail's pace in REA expansion in spite of the fact that thousands of potential consumers are clamoring for service.

"First of all," Becker said, "farmers waiting patiently for service should know that their co-ops and the state association of managers of electric co-operatives have done their utmost to expand their facilities in order to serve as many farm families as possible."

Present applications in Illinois, he explained, call for a $10,000,000 expansion program, but the greatest obstacle to speedy fulfillment of this program is lack of materials. The painful bottleneck in poles is now being broken, but even so, dealers taking orders for poles in lots are not promising delivery in less than one year.

The general strike situation also has brought about a severe shortage of transformers and insulators to the point where it appears that very little will be accomplished in 1946, he said.

High costs also give us cause to ponder and proceed cautiously, Becker said. For instance, in the last seven months we have let 14 contracts but only four have been approved because of the high figures given in the bids.

As a result, the state electric co-ops have set up committees to meet with contractors and labor organizations in an attempt to thresh out some of the differences and complaints on high bids.

Electrical service furnished to this farm by a Rural Electrification Administration co-operative eliminates most of the drudgery at milking time.

"As for the poles and other equipment some of our co-ops have on hand at the present time," Becker explained, "most of it is earmarked for maintenance. During the war much of our normal maintenance was deferred. We must take care of it as soon as possible. No one will deny that our first duty is to protect the service to our old members."

Like the Menard co-op, Becker said, many are undergoing adjustment with the installation of transformers to handle the added load caused by expansion. Lack of materials for this installation is also causing some headaches.

Virtually all of the dozen or more Illinois electric co-op managers asked were as glum about the near future as Becker. A few thought they might be able to accomplish considerable work in the next year or two, but most said it would take at least three years to catch up with present applications and some believed it would take as many as five years.

REA construction and maintenance men are doing their best with what materials they have available to maintain and expand electrical service to as many Illinois farms as possible.

ILLINOIS ELECTRIC CO-OPS TO MEET IN SPRINGFIELD SEPT. 4-6

The fifth annual meeting of the Association of Illinois Electric Cooperatives will be held Sept. 4-5-6 at the Hotel Abraham Lincoln in Springfield.

An open meeting is being planned for Sept. 5 to which all Farm Bureau directors and leaders, farm and home advisers will be invited.

Among the speakers scheduled to address the meeting are IAA President Charles B. Shuman, REA Administrator Claude Wickard, and Illinois Director of Agriculture Arnold P. Benson.

In areas of mixed grain farming and livestock farming, as well as in the more strictly livestock areas, livestock farms with well-handled livestock always earn more than the average farms.

LETTERS TO THE EDITOR

PING PONG AND THE OPA

I have read with pleasure and definite understanding your article "Ping Pong, Plows and the OPA" published in the June issue of the Illinois Agricultural Association Record, the state Farm Bureau publication.

You are to be congratulated upon your article in that it not only gives facts but they are given in a language that all can understand.

We need more of such articles so that our people may know better just what is being done and what the results will be and on whom to place the responsibility for our failures in coming out from under unnecessary control.

—Dr. Charles O. Casey
Decatur, Illinois

We join Dr. Casey in handing Larry Simerl, IAA director of research and taxation, a bouquet for a cleverly understandable article on the OPA. Do we hear any objections to what Simerl had to say in the June RECORD? Do you favor letting the OPA die?

TO SPRAY OR NOT TO SPRAY

Have been looking at your "What's Wrong With This Picture?" in the June issue of the RECORD and want to call your attention to one item on it. I note that on the last page in answer to #53 that one of the things that is supposed to be wrong is that the trees are being sprayed after they have borne fruit.

That hurts my professional pride a bit as we spend considerable time in the Fruit Exchange encouraging growers to do a more efficient job of spraying right up until harvest time. The man who made up the picture had a good idea, but he needs to be razzed a bit about this one.

Certainly there is nothing wrong with spraying trees even though there is fruit on them. It's done "in the best circles".

L. L. Colvis, Gen. Mgr.
Illinois Fruit Growers Exchange

We're willing to take Larry Colvis' word for this one since he spends most of his waking hours helping farmers produce and market the best possible fruit crops.

WE STAND CORRECTED

In reading the page entitled, "Shorts in the News," in the June issue, I noticed that in the article telling of Edwin H. Henderson's appointment as assistant farm adviser of Fulton county it was stated that Mr. Henderson was from Lake county. Mr. Henderson is a native of Fulton county. I would appreciate it if a correction to this effect could be made.

J. E. Watt, Farm Adviser
Fulton County

We understood Mr. Henderson had spent some time in Lake county but are glad to make it clear that he was born and reared in Fulton county.

AGAINST CONTROL PLAN

Referring to your report on Army Flood Control in the June RECORD.

I heartily approve the IAA position in opposition to the Army plan, but the farmers at Springfield have been making such a big noise about this project, that everybody seems to be overlooking a simple and perfect solution to the whole problem.

(Editor's Note: The Illinois Agricultural Association board of directors has expressed opposition to the provisions of the flood control plan calling for the acquisition of farm lands for reservoirs pending adoption of an official position of the membership at the IAA annual meeting in November.)

It is really the comic strip of the entire affair. The Army proposes in one breath to make reservoirs on normally good farming land in an attempt to prevent the flooding of the natural flood plains of the Illinois River. And then on top of that the Army plan proposes to further straighten and deepen, the Kankakee and Iroquois Rivers, partly in Indiana and partly in Illinois, and thereby create accelerated run off and floods to neutralize what even they hope to accomplish by construction of highland reservoirs. Rube Goldberg should draw a picture of the Army Plan.

But getting back to cold hard facts. The Kankakee River was straightened and deepened 30 years ago, and that has formed a continuing source of flood water ever since, and sad to relate, the land in Indiana, along the Kankakee River is fast becoming a sandy desert as it loses its moisture. They had raised a little corn here and there, and those farmers are all for making big dikes to keep the water off their sandy farms, but the damage done in Illinois each year far outweighs the value of Indiana crops that resulted from the tragic error made so many years ago.

When this upriver flood producing plan was presented to the public back in 1939, I spent a lot of time studying the situation, and presented my brief at the hearing held at Momence August 15, 1939. The war stopped the project for a time, but here it is again proposing bigger and better floods.

One man's ideas have no weight with the Army, and I always felt that my brief and appearance at the hearing was just time wasted, but in view of the interest that you have shown in opposition to this wasteful plan, I enclose herewith two articles that I wrote back in 1939, which served as the basis for my more formal brief.

As the directors of the IAA are opposed to the reservoirs on good land in central Illinois, I suggest that they explore the idea of restoring the Kankakee marshes as a prime water storage basin, at the expense of a few submarginal farms, and make the marshes the playground of Illinois and Indiana instead of the blow sand desert that the army is trying to create.

—W. R. Sanborn, President,
Lehigh Stone Company
Kankakee, Illinois

We are sorry lack of space prevents us from including Mr. Sanborn's articles written for the hearing at Momence in 1939. In effect, the articles advocated flood control for the benefit of all the people, pointed out that flood control doesn't always provide the benefits it is supposed to provide, and that the best flood control methods are provided by nature, i.e., mashlands and natural flood plains with their valuable game preserves.

SUGGESTS FARM STRIKE

The article that you printed about the farmers having five main faults according to a poll of the city people is all wet in no uncertain terms. I have never seen a farmer with these faults in my life. And I know what I'm talking about because I have lived around farmers all my life and I happen to be a farmer's daughter.

I have never heard farmers complain about how hard they work. If there is any complaining to be done, they should do it. The farmer is one of the lowest paid persons in the country. The city jake goes to work at 8 or 8:30 in the morning and gets off at 5 or 6 in the evening. But, the farmer has to go to work at 6 or earlier in the morning and doesn't come in until around 10 at night. Some nights it is later than that.

Poor managers, my eye. They ruin the soil, phooey. They won't learn new methods, a lot of baloney. There may be a few poor managers among the farmers, but that doesn't mean that they all are. I have seen around two poor managers out of 50 farmers. They ruin the soil. I'd like to see one of the farms on which the soil has been totally ruined.

'You can't tell a farmer anything.' If some city jake came out who didn't know a thing about farming and tried to tell you something that you know is wrong, what would you do, go ahead and do as he says? Well, I wouldn't. But if they have a point, try to explain it. A farmer is willing to listen to anything as long as it is a good proposition. If it isn't, there isn't any sense in wasting his good time that he could use in the field on so trivial a matter.

'The farmer gets too much money for what he raises.' That is an overstatement if I ever heard one. Here in the country, all the coal mines and everything are striking for higher wages. They get twice as much as the average farmer makes after his expenses are taken out. Instead of demanding higher prices for the products that they raise, the farmers go around and weep on each other's shoulders because they don't get them. I say that they should demand more. If they don't get it, strike like the city people and see how long the dear little city people could last without the farmer's products coming in to them each day. Let's see them swallow that one.

As for the narrow and provincial part, I have never seen a person like that before in my life.

Our city people don't know a farmer. They wouldn't care to come out to the country to get their dear little hands dirty if they had to. This letter might hit on a soft spot, but the one that it hits the hardest is the one that it is meant for. If it wasn't for the farmers, the city people would starve and I'm not jest a bumping my gums neither, chum. The city people should never complain about the farmer. There are a lot of faults of their own that they could correct.

Miss Ethel May Boggs
Sangamon County

MEMBERSHIP total in the state as of June 30, 1946, stood at 128,940 compared with a total of 128,220 at the end of the previous month.

Illinois was represented by 120 members at the annual Farm Bureau Midwest Training School, held June 23-26 at Kansas City. The total attendance at the successful meeting was over 750. Forty-five Illinois counties had at least one member present. Thirty-one were county organization directors, 30 were ladies, and 38 were members other than COD's. LaSalle and Will counties, with nine each, and Champaign, with eight, led the list.

It is interesting to note that this is a year of large gains in membership not only in Illinois, but in other states. The Iowa representatives revealed that their state has now passed the 105,000 mark. Kansas, which had 23,693 members last year, has attained a total of 40,000 so far this year. And so it went around the Middle West.

Add these to your list of county organization directors who have attained the 105 percent dues income quota. They are May qualifiers: A. C. Everingham, Cumberland county; C. A. Markman, Bureau county; E. E. Sandall, Kendall; Earl J. Hayes, LaSalle, and Edward Sutter, Woodford.

. . . "AS FARMERS FORWARD GO"

ORGANIZATION NOTES

By O. D. Brissenden

LaSalle county's total of 3518 at the end of May, 1946, was a new high figure for county Farm Bureau membership in Illinois. 618 new members signed up to that time is the largest numerically in the state this year, and second highest in percentage terms. Earl J. Hayes, county organization director, deserves recognition, along with his splendid force of fellow-employees and volunteer workers.

L. C. Greenwald, Menard county COD, can gracefully bow as he takes recognition for signing the highest percentage of the new member quota. The Menard total is 171 new members at May 31, representing 417 percent of quota.

George E. Kemp, Galesburg, is the new Peoria county organization director, succeeding Harold Neal, now a special agent in Vermilion county. Edwin H. Henderson is new COD in Fulton county, succeeding Kenneth L. Flake, now Henry county's farm adviser.

One of Williamson county's best drives, netting 70 new members, concluded recently, according to word from Herbert Borum, COD.

T. R. Lovett, Livingston COD, is planning special drive to strengthen membership in two townships that are below the county percentage of 77.7 percent membership. Special selection of workers, assignment to definite prospects, a special "pep" meeting, a followup campaign and special follow-through on services highlight the program.

During July all county Farm Bureaus will receive their allotment of the handbook for new members and directors, entitled "Serving More than 100,000 Farm Families." This is a revision of the employee handbook of the same name, and contains 96 pages of information and pictures. 40,000 copies were in the edition authorized by the IAA Board of Directors.

Forty new COD's, those employed during the last two years, or recently returned after extensive service in the armed forces, were scheduled to attend conferences on their work during the week of July 8-13 inclusive. Meetings were set for Mt. Vernon, Jacksonville, and Ottawa.

Some interesting remarks at the Midwest Training School:

(1) "We are breeding another war, and anyone who thinks we can stand another world conflict is foolish. Our first responsibility is to relieve millions of starving people in Europe."—Allen B. Kline of Iowa, AFBF vice-president.

(2) "The most expensive thing we are paying for today isn't food or rent or clothing. It's our freedom."—Dale Carnegie.

(3) "Membership is truly the most important Farm Bureau project. It's time we went fully into action on it."—O. D. Brissenden.

This is an aerial view of the 40-room mansion and part of the 6,185 acres in Piatt county which Robert Allerton, Monticello, has given to the University of Illinois. The bequest provides for the establishment of a park area of 1,685 acres including approximately 100 acres deeded as a site for the Illinois 4-H Club Memorial Camp. Income from the remaining 4,500 acres, of which 80 per cent is rich tillable land, will be used to develop and maintain the park.

4-H Clubs Get 100 Acres
FOR STATE MEMORIAL CAMP

THE state war memorial camp honoring Illinois 4-H Club members who died in World War II will be built on the site of the 100-acre tract given to Illinois 4-H Clubs by Robert Allerton of Monticello.

Allerton deeded approximately 6,000 acres of his Piatt county estate to the University of Illinois.

The 100-acre tract is part of the land known locally as "The Farms" and is situated near Monticello within an area to be set aside by the University as a public park.

The state-wide project for the benefit of Illinois' 37,000 4-H Club boys and girls was conceived in 1942 and a year ago a drive was started to raise $100,000 to buy a tract of land, develop and equip it.

Although the site is being received without charge, the $100,000 goal still stands and all money raised will be used to develop and equip the camp. At last report, approximately $30,000 had been raised.

First expenditure of these funds will be for the construction of a headquarters building. Dining hall, kitchen, cabins and related buildings to be built for year-around use will be added as soon as funds, and availability of labor and materials permit.

The new state memorial camp will not hinder the development of the northern and southern district camps nor the numerous county camps which are springing up throughout the state.

Preliminary work is now underway on the northern district 4-H Club camp of 50 acres along Rock Creek near its juncture with the Kankakee river in Kankakee county. The site was given by a public utility company and is being used this summer as a tent camp.

When permanent facilities are installed, the northern district camp is expected to accommodate 300 boys and girls at one time.

A similar district camp is to be located in southern Illinois as soon as an appropriate site can be found. For 14 years the southern district camp has been held at Dixon Springs, but this area recently was purchased by the state for a state park. State authorities have, however, leased the site this year so the southern Illinois 4-H'ers can hold their camps again this summer.

JO DAVIESS MAN JOINS IAA PUBLICITY STAFF

LEWIS A. REISNER, formerly of Jo Daviess county, and recently discharged from the navy, has been hired as field editor of the ILLINOIS AGRICULTURAL ASSOCIATION RECORD and assistant in the IAA publicity department.

A graduate in the class of 1938 of the College of Agriculture, University of Wisconsin, at Madison, Reisner worked on the staff of the Department of Technical Journalism at Iowa State College, Ames, and helped edit the weekly news bulletin "Better Iowa."

L. A. Reisner

While attending the University of Wisconsin, Reisner worked on the staff of the Wisconsin Country Magazine, agricultural student publication, and in his senior year acted as business manager.

From 1939 until January, 1942, he farmed with his father on the family homestead. Entering the armed forces in January of 1942, Reisner served aboard the battleship Washington, during the Guadalcanal invasions.

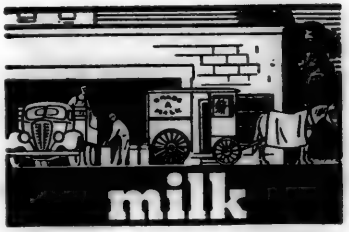
Upon receiving his commission as ensign while aboard the Washington, Reisner was assigned duty on a small, wooden-hulled submarine chaser, the SC1037, on which he eventually served as commanding officer.

When released from active duty in November, 1945, he worked in the Great Lakes Division of the Army Engineers as manager of the 50,000 acres of the War Department-controlled, government-owned lands at ordnance plants, airfields and army camps in Illinois, Wisconsin and Michigan.

His father L. A. Reisner, now retired and living at Warren, has farmed most of his life on his livestock and grain farm three miles west of town on state highway 78, and now serves as president of the Warren Fair Association.

Reisner is a former 4-H club member, having won all-county awards three times. His 4-H projects covered garden, sheep, hogs and poultry.

Addition of Reisner to the IAA publicity staff brings it up to pre-war strength. Creston Foster is director of the department and James C. Thomson is assistant in the department and assistant editor of the IAA RECORD.



The following are the blended prices received by producers supplying the respective Illinois markets. All are May prices for 3.5% milk f.o.b. dealers' platforms (except Chicago) and are for milk meeting the respective city milk ordinances:

Bloomington	$2.64
Canton	2.70
Champaign	2.75
Chicago	3.19
Danville	2.503
Decatur	2.74
DeKalb	2.75
Freeport	2.90
Galesburg	2.65
Harrisburg	2.50
Jacksonville	2.85
Kewanee	2.75
LaSalle-Peru	2.67
Moline	2.99
Peoria	2.89
Pontiac	2.406
Quincy	2.64
Rockford	3.085
Springfield	2.85
St. Louis	3.39
Streator	2.66

The following are the gross blended prices paid to producers for milk in the following named cities throughout the United States, and are quoted on a 3.5% butterfat basis, delivered f.o.b. dealers' platforms (with exceptions noted), as reported by the respective milk cooperatives. These prices are for May unless otherwise noted:

Akron, Ohio (April)	$3.45
Baltimore, Md. (April)	3.85
Boston, Mass. (April)	3.84
Chicago (70-mile zone)	3.19
Cleveland, Ohio (April)	3.45
Denver, Colo.	3.01
Indianapolis	3.28
Kansas City, Mo. (April)	3.46
Knoxville, Tenn.	3.55
Louisville, Ky.	3.01
Madison, Wis. (April)	2.97
New York City (April)	4.00
Pittsburgh (April)	3.56
Seattle, Wash. (April)	3.55
Sioux City, Ia.	3.42
St. Louis, Mo.	3.39
St. Paul-Minneapolis	3.13
Washington, D. C. (April)	4.08

Sent to America to study soybean production which they hope to promote as a major crop in their homeland, two Australian directors of agriculture, H. A. Mullet of Victoria and C. J. McKeon of Queensland, were impressed by the large-scale production in Illinois during a three-weeks' stay at the University of Illinois. Last year the Aussies experimented with American soybean seeds and were surprised at the fruitful results obtained under Australian conditions.

EDITOR'S NOTE: Picture page entries should be addressed to Picture Editor, Illinois Agricultural Association, 608 South Dearborn Street, Chicago 5, Ill. If you wish picture returned, enclose self-addressed stamped envelope. Entries are judged on originality, clearness, and interest. Avoid shots of persons merely looking toward camera. Best picture receives $5. Others published receive $1.

ALL-TIME RECORD CORN CROP EXPECTED IN 1946

An all-time record corn crop of 3,341,646,000 bushels was estimated for 1946 by the U. S. Department of Agriculture in early July. Highest previous record was 3,288,000,000 bushels in 1944. The corn crop last year amounted to 3,018,410,000 bushels.

The government report said the outlook for this year's crop "has seldom been surpassed."

The wheat crop was indicated at 1,090,092,000 bushels, a near record. Oats also will hit a near-record peak with production estimated at 1,471,026,000 bushels. Production of hay is expected to drop below the last four years and the oil crops — soybeans and peanuts — are expected to be below high wartime levels.

CAMPAIGN TO BUY FARM FOR VET NEAR HALF-WAY MARK

Henderson county's campaign to raise $10,000 to buy a small farm home for Dale Johnson, a young farmer who lost his eyesight in battle, was near the half way mark according to a report July 15th. The fund is being raised by a group of Henderson county citizens interested in the welfare of the youth who was blinded in the Philippines by a Jap sniper bullet. The drive has the full support of the Henderson County Farm Bureau.

In offering a substantial contribution, a young farmer said, "I was of draft age, but I was left on the farm with my family when other fellows my age had to go and this fellow certainly made a sacrifice. It shouldn't be too hard for a man who can see to earn this back. I think that's the least I can do."

Contributions to the fund are welcome from other parts of the state. Address the Dale Johnson Fund, Henderson County Farm Bureau, Stronghurst, Illinois.

In plowing one acre six inches deep, the farmer turns over 900 tons of soil.

YOU ARE WORKING ONE DAY OUT OF FOUR FOR THE FEDERAL GOVERNMENT

(Continued from page 5)

If 2,848,000 capable persons were employed in agriculture, they could operate all of the farms in Illinois, Indiana, Ohio, Wisconsin, Iowa, Missouri and nineteen other states. The same number of persons could more than replace all the hired farm workers in the United States.

If the federal civilian payrolls continue to increase at the same rate as they have grown since 1930, **every able-bodied person in the United States will be working for the Government within 25 years.**

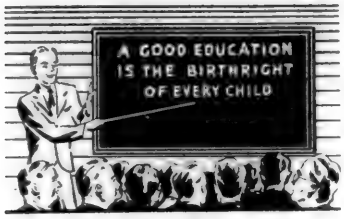
Federal payrolls will continue to grow so long as citizens run to Washington every time they want something they are unwilling to pay for. Of course, citizens really have to pay heavily for everything they get from Washington, but many people do not realize this and think that grants from Washington are free. They fail to connect their demands for federal aids and subsidies with the ever-increasing burden of federal taxes.

If American farmers, laboring men and businessmen have reached the point where they wish to work more for themselves and less for the Federal Government, they should tell their Senators and Representatives in Congress to cut all but the most vital appropriations. Even more important, all of us — laboring people, businessmen and farmers — should stop asking for or accepting subsidies, grants, and bonuses and all non-essential federal spending projects.

ADDITIONAL STOCK OFFERED ON COLD STORAGE BUILDING

Additional stock to provide funds needed to complete the $125,000 cold storage locker building at Carbondale has been offered in $25 denominations to Farm Bureau members only. The additional stock — Class A Preferred — was authorized at the annual meeting of the Illinois Fruit Growers Exchange and pays six per cent interest. The issue is limited to $3,000 per person. Additional finances for the building will come from organization reserves and stock sold to the Illinois Agricultural Association.

One 80-acre farm in Vermilion county, south of Danville, was found to have 30 different species of trees.



By JOHN COX
IAA Director of Rural School Relations

Dedicated to the improvement of rural education, this column will include varied items of possible interest to parents and patrons of our rural schools.

Our leaders: Are they city or country bred?

Most rural people and those who were born and reared in rural communities have been inclined to think that more of our national leaders come from the farms than from urban communities. Dr. Albert Edward Wiggam in his syndicated feature, "Let's Explore Your Mind" appearing in many papers throughout the country on May 24, 1946, made this statement:

"Three times as many eminent men of America have been born in cities as have been born in the country. About this proportion have been city born throughout the history of the world." Since this statement was in variance with our own opinion, we wrote to one of the newspapers which carried that feature and asked them to put us in touch with some information which might substantiate that statement. We received this information from John F. Dille, President of the National Newspaper Service:

"Dr. Wiggam advises that the support for this was first developed by Dr. Frederick Adams Woods in 1906. His method was to record the birth places of the leaders of the country as they appeared in 'Who's Who in America.'

"Later E. L. Thorndike, Columbia University, reached the same result as you may find in a magazine entitled THE SCIENTIFIC MONTHLY under the 'Origins of Great Men.' This article appeared about five years ago and should be available in most public libraries or university libraries.

"Dr. Ellsworth Huntington, Yale University, published an article in the AMERICAN MAGAZINE some time this year reaching the same conclusions. The article was entitled 'Where Do Great Men Come From?'

"These authorities in a general way seem to conclude that about three leaders — in Science, Art, Politics, Philosophy, Business, etc. — are born in cities of 10,000 population or larger to one born in smaller communities."

This is what they say about the unit district.

Illinois has reached a place in school reorganization where it is confronted with the question, "What school organization is the most efficient for this state? The following statements will indicate the position of most of the leading organizations in regard to the unit district:

National Education Association — Illinois is one of only three states in the U. S. where the dual system is widely used.

Illinois Education Association — "Evidence points to the superiority of large 12-grade districts over the poorly coordinated dual system of separate elementary and secondary school districts."

Small High School Problems in Ill., I.E.A., April 1943.

The Illinois Association of School Boards — They advocate, "the consolidation of community educational programs under one board of education, empowered to establish a single administration of the school system with unified business control, budgetary practice, taxing authority, and with one set of rules and regulations governing educational practices as they relate to children, parents and taxpayers of the community."

Part of resolution adopted, I.A.S.B., October 23, 1944.

The State Advisory Commission on School Reorganization — "An administrative unit should comprise one or more attendance areas, (preferably two or more) offering educational facilities at least through the twelfth grade. . . . The reorganization of school districts does not always involve the abandonment of the smaller units of school administration. Indeed, the major purpose of such reorganization often is to enlarge the tax area and to effect cooperative relationships in the business and personal activities of the district affected."

Manual for County School Survey Committees. Pages 18, 19.

The Committee on Services of the Illinois Post War Planning Commission — "One important phase of reorganization is that of realigning dual elementary and secondary districts into unit districts. The best organization educationally and financially is one in which the grades below the twelfth or fourteenth are under a single board of education. Yet only approximately 100 of these desirable districts remain in the state of Illinois.

Report of Committee on Services, Ill. Post War Planning Commission.

The Illinois Agricultural Association — "For many purposes districts may be enlarged also by combining elementary and high school districts so that a single board has the administration of all levels of the educational system from grades 1 to 12 inclusive . . . . Formerly there were many more 12-grade districts but during recent years an unwise state law has caused many communities to give up this efficient type of organization." This unwise law has since been amended to place the unit district on the same footing financially as the dual system districts. Later the Report continues, "Positive steps should be taken to prevent further division of 12-grade districts and to encourage the organization of new ones."

Illinois Agricultural Ass'n School Report, Page 61.

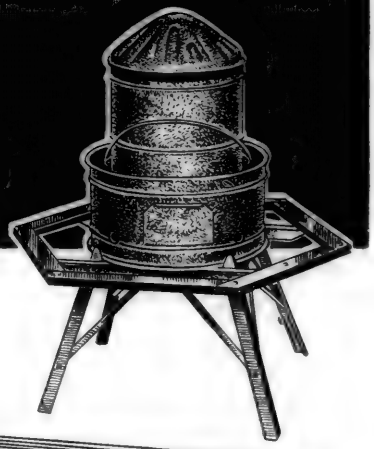
Other organizations whose policies are not so definitely stated favor the unit district. For further explanation of unit district see Unit District article, "The RECORD" April 1946. Many counties are considering the widespread establishment of unit districts.

PRAIRIE GRAIN BUYS SITES

Prairie Grain Company, subsidiary of the Illinois Agricultural Association's Grain Terminals Company, has closed deals for the purchase of elevator sites at Lacon and Hennepin.

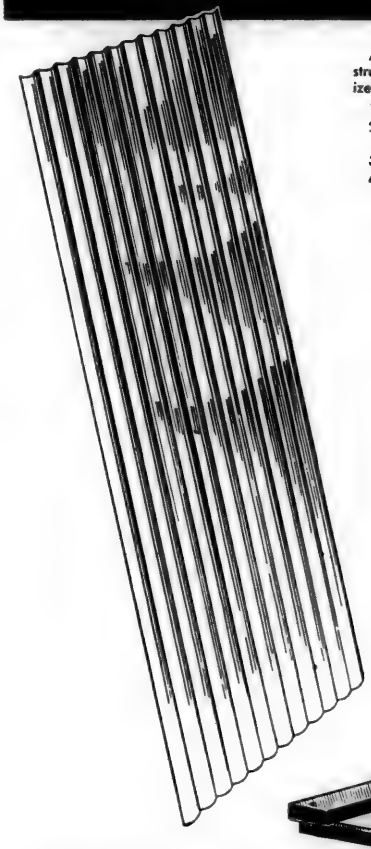
The company, which will market grain cooperatively along the Illinois River valley from Morris to Peoria, plans to build as soon as labor and materials make it possible.

STEEL EQUIPMENT

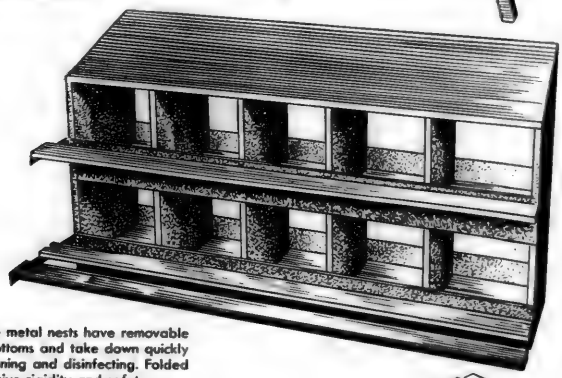


A sturdy five-gallon flock fountain constructed from 26-gauge heavy galvanized iron. Check these features:

1. Double walls with vacuum seal.
2. Cone-shaped top to prevent roosting.
3. Wide, deep drinking pan.
4. Handles on both tanks.



These sheets are made from good quality steel and have a certified zinc coating of 2 ounces per square foot. They will outlast the ordinary galvanized sheet. Supplies are not adequate, but production is improving.



These metal nests have removable steel bottoms and take down quickly for cleaning and disinfecting. Folded edges give rigidity and safety. Easily installed on laying house wall.

Pullet and hen flock feeder holds good quantity of feed. Has built-in anti-waste lip for preventing feed waste. Built with strong perches, heavy body, and well designed grill.

ILLINOIS FARM SUPPLY CO.

ILLINOIS FARM SERVICE SUPPLY COMPANY

By JOHN COX
IAA Director of Rural School Relations

Dedicated to the improvement of rural education, this column will include varied items of possible interest to parents and patrons of our rural schools.

Our leaders: Are they city or country bred?

Most rural people and those who were born and reared in rural communities have been inclined to think that more of our national leaders come from the farms than from urban communities. Dr. Albert Edward Wiggam in his syndicated feature, "Let's Explore Your Mind" appearing in many papers throughout the country on May 24, 1946, made this statement

"Three times as many eminent men of America have been born in cities as have been born in the country. About this proportion have been city born throughout the history of the world." Since this statement was in variance with our own opinion, we wrote to one of the newspapers which carried that feature and asked them to put us in touch with some information which might substantiate that statement. We received this information from John F. Dille, President of the National Newspaper Service:

"Dr. Wiggam advises that the support for this was first developed by Dr. Frederick Adams Woods in 1906. His method was to record the birth places of the leaders of the country as they appeared in 'Who's Who in America.'

"Later E. L. Thorndike, Columbia University, reached the same result as you may find in a magazine entitled THE SCIENTIFIC MONTHLY under the 'Origins of Great Men.' This article appeared about five years ago and should be available in most public libraries or university libraries.

"Dr. Ellsworth Huntington, Yale University, published an article in the AMERICAN MAGAZINE some time this year reaching the same conclusions. The article was entitled 'Where Do Great Men Come From?'

"These authorities in a general way seem to conclude that about three leaders — in Science, Art, Politics, Philosophy, Business, etc. — are born in cities of 10,000 population or larger to one born in smaller communities."

This is what they say about the unit district.

Illinois has reached a place in school reorganization where it is confronted with the question, "What school organization is the most efficient for this state?" The following statements will indicate the position of most of the leading organizations in regard to the unit district.

National Education Association — Illinois is one of only three states in the U. S. where the dual system is widely used.

Illinois Education Association — "Evidence points to the superiority of large 12-grade districts over the poorly coordinated dual system of separate elementary and secondary school districts."

Small High School Problems in Ill., I.E.A., April 1943.

The Illinois Association of School Boards — They advocate, "the consolidation of community educational programs under one board of education, empowered to establish a single administration of the school system with unified business control, budgetary practice, taxing authority, and with one set of rules and regulations governing educational practices as they relate to children, parents and taxpayers of the community."

NEWS and VIEWS

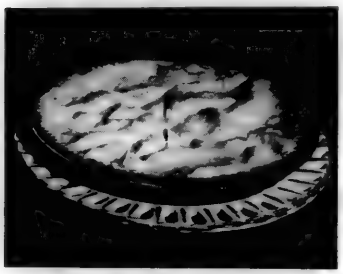
Processing of Frozen Pastries is Described After Experiments by U. of I. Food Specialist

MASS food production is entering our homes with the deep-freeze unit. Imagine being able to bake cakes and pies for future use whenever you happen to have the time!

Or preparing several meals to serve months later when you are expecting visitors or when four or five hungry men will be sitting at your table.

Food research specialists in the home economics department of the University of Illinois College of Agriculture headed by Dr. Frances Van Duyne have experimented successfully with the freezing of angel and butter cakes, yeast rolls, and fruit pies. They've found that these as well as baked beans, beef stew, chicken ala king, Spanish rice, and meat balls and spaghetti can be frozen for a tasty meal to be served weeks later.

As for any ordinary food, frozen foods are best when prepared by good standard recipes and when top-quality ingredients are used. Freezing is intended merely to preserve the product



This apple pie is baked and ready to serve. Before being placed in the oven it was frozen and stored as an unbaked pie.

as it is — not to improve it. So smart cooks will spare no effort in making the original food as good as possible with their best recipes and by using choice foodstuffs when they are plentiful.

Bake a Cake for Next Week

Angel foods can be frozen while eggs are most abundant and stowed away until the time when eggs become too scarce or expensive for a dozen per cake.

Miss Royane Frantz, assistant in home economics at the University of Illinois, packages an angel cake for freezer storage. It is wrapped in moisture and vapor-proof paper, sealed with a warm electric curling iron, placed in the cake box and tied securely.

Angel cake was baked in the laboratory just as it would have been for immediate serving, was allowed to cool, and then wrapped for freezing with a moisture and vapor proof paper which can be sealed with tape or heat and placed in a cardboard box.

When this cake was removed from the freezer and thawed in its wrapping at room temperature, it turned out tasty enough for the most meticulous gourmet.

If you want to serve baked products warm or piping hot, all that's necessary is to slip them into the oven right in their wrappers. When thawing is complete, the food is ready for the table. This is a particularly good time-saver for yeast rolls.

There's nothing like a first-rate apple pie for pleasing the men — and women, too. So when the days of food prosperity return, why not make up a number of apples pies when orchards are well laden and freeze them for future reference? Heavy cardboard pie plates are good containers for the pies which you prepare up to the baking stage. Top them with inverted pie plates, tie in place, wrap, and seal. They're ready for the freezer.

When you want to use the pies, the wrappings and lid are taken off and the pies put right into the oven and baked — 15 minutes longer than usual to allow for thawing time.

Freezing a One-dish Meal

Turkey or chicken a la king is prepared according to any standard recipe, packed into moisture-vapor-proof containers and frozen. Cellophane lined, pint size, cardboard containers are recommended. Dr. Van Duyne reports excellent results with this all-American favorite.

Baked beans and salt pork made according to your best recipe can be frozen if the salt pork is removed before the freezing. All fats have a tendency to become rancid when frozen. Bits of browned bacon can be added to the beans just before serving, if you like.

A caution for freezing beef stew is that the vegetables not be overcooked. When they are off the critical list, you may even prefer to use rice or barley in place of potatoes which become "mushy" rather easily. Thickening the gravy would best be left until serving time because the more liquid a frozen food contains, the more desirable the finished product is likely to be.

The same is true with meatballs in tomato sauce. An extra amount of tomato juice will keep the food in best possible form for an appetizing main dish.

For the defrosting of these one-dish meals, a double boiler works to perfection. With a minimum amount of stirring, which of course means a better appearance for the finished product, about 25 or 30 minutes should be allowed for each pint.

These freezing experiments will be continued by the University food research specialists as soon as there are sufficient fats, flour, and sugar. It's hard to tell what new surprises we'll be able to put into these freezers next. How about a crepe suzette, Dr. Van Duyne?

for HOMEMAKERS

KNIT TRUNKS FOR THE WATER BABY

It takes only sunshine and a garden hose to keep a water baby happy. He'll romp through an active summer in this pair of sturdy knit trunks. These feather-weight wool shorts are simple to make. For free instructions send self-addressed stamped envelope to WOMEN'S EDITOR, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

FREEZE PEACHES THIS WAY

Almost any time now, Illinois homemakers will start storing away peaches in their home freezers. Results of tests with frozen peaches conducted in the food research laboratory of the University of Illinois College of Agriculture will be of interest to these homemakers, says Miss Jean Chase of the food research staff.

At first, peaches were blanched to loosen the skins, but it was found that even a very quick blanch darkened the outer edges of the fruit. Peaches peeled without blanching and sliced into cold sugar sirup at once darkened very little. Laboratory workers have also found that adding ascorbic acid to the carton of fruit helps prevent discoloration. Further work is being conducted to determine the exact amount of ascorbic acid which will protect the fruit.

For frozen peaches with natural flavor and good appearance, Miss Chase recommends peeling the fruit without blanching and slicing directly into cartons containing cold fifty or sixty percent sugar sirup. Then seal and freeze as quickly as possible.

SHOO FLY PIE, AND

¾ c. flour	3 T. butter
½ c. brown sugar	1½ t. baking soda
⅛ t. nutmeg	¾ c. hot water
⅛ t. ginger	½ c. molasses
⅛ t. cloves	1 egg yolk, beaten
½ t. cinnamon	flaky pastry
¾ t. salt	

Line a 9" pie plate with pastry. Set in refrigerator to chill. Meanwhile, mix together all dry ingredients. Then with back of spoon, rub butter into dry ingredients to form crumbs. Dissolve baking soda in hot water. Combine liquid ingredients. Sprinkle a layer of crumbs in pie plate. Spoon in enough of the liquid ingredients to form a layer, repeat forming layers of crumbs and molasses until ingredients are all used up, ending with a layer of crumbs on top. Bake in hot oven of 450 degrees F. for 10 minutes. Reduce heat to 350° F. and bake 20 minutes.

Illinois' delegates to the national 4-H Club camp at Washington, D. C. in June are shown before leaving Chicago by plane. Back row, left to right: Calvin Meyer, Will county; J. B. Barnard, McLean county, and E. I. Pilchard of the University of Illinois 4-H Club staff; front row: Ruth Jaques, Peoria county; Marian Healy, Kankakee county, and Mrs. M. O. Hubbard, also of the state university's 4-H Club staff.

Canning sugar stamps 9 and 10 are good through Oct. 31. The next stamp for table sugar will become valid Sept. 1. Spare stamp 49 will expire Aug. 31.

Rita Sullivan, former home economics teacher at Saunemin high school, started July 1 as Henry county home adviser. She was graduated from the University of Illinois and was reared in Knox county.

APPLE PAN DOWDY

2 qts. quartered apples	½ C. shortening
2⅔ C. pastry flour	1⅓ C. milk
½ t. salt	⅔ C. brown sugar
1½ t. baking powder	1 T. butter
	½ t. nutmeg
	sweetened cream

Take off crust and cut into thin slices. To the apples, add the sugar, nutmeg and butter.

Put into a mold or pudding dish, alternate layers of apples and crust. Pack down carefully and let set over night. Unmold and cut into slices and serve with whipped or plain cream.

Place the pared and quartered apples in a well greased pudding dish. Mix and sift flour, salt and baking powder. Blend in shortening well. Add enough milk to make a stiff dough. Roll out to fit pudding dish and cut a few gashes in the dough. Place on top of the apples, being sure to tuck in well. Bake at 350° F. for 2 hours or until well browned. Take out and cool slightly.

CARROLL GETS NEW ADVISER

Miss Dorothy Footit of Jo Daviess county is the new Carroll county home adviser. For the past eight years she has been home adviser in Moultrie county. She received her master's degree from the University of Illinois in 1934.

COOL TABLE SETTING FOR SUMMER

So lovely to look at, so easy to launder, so inexpensive to make — that's why the particular homemaker choses lacy place mats for light summer meals. They are attractive in pastel colors matching the china. For free instructions send self-addressed stamped envelope to WOMEN'S EDITOR, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

Rural Youth

By
ELLSWORTH D. LYON

In the summer a Rural Youther's fancy turns to soil conservation. **Edgar's** field tours in June and July to observe the results of soil conservation climaxed studies made during winter and spring on "My Future Home." Strawberries from Fred Anderson's farm, a picnic supper in Chester Boland's woods, and a boat ride on Twin Lakes were enjoyable features of these tours. Adding facts proven by farmers gives assurance that soil conservation pays.

Other educational features of interest: **Wayne** — "History of Wayne County;" **Edwards** — "Tour of Albion Buick Plant;" **Lawrence** — "Appearance and Health;" **Livingston and McLean** — "State Parks in Illinois;" **Knox** — "Two Family Farm;" and **Kankakee** — "Aviation, Present and Future."

Hayrides! Hayrides! **Montgomery,** starting from home of Carl Niehaus; **Ogle,** with White Pines State park as the goal; **Clark,** members and friends meeting at the home of president Burton Cline; **Jefferson,** from the home of John Kent and returning for a wiener roast; **Mason,** hayride, plus a watermelon "bust;" and **Edwards,** hayride in the environs of Albion.

Radio's "thin fingers" reached out to **Morgan** from WLDS, Jacksonville, and to **Montgomery** from WDZ, Tuscola. **Knox** will broadcast from the county fair grounds at Knoxville daily during the Fair dated for Aug. 6, 7, 8, 9.

Moonlight and boat rides provide "sweet memories of you." If not, why the big plans for such events? **Christian** scheduled the S. S. Admiral at St. Louis for July 14 to include also **Jefferson, Wayne, McHenry, Morgan** and all others interested. **Washington** began summer activities with a cruise on the S. S. Admiral. **La Salle** and **Champaign** are each looking forward to Lake Michigan cruises in August. **Kendall** and **McHenry** turned to Lake Geneva and **Lee** to the Palisades for these enjoyable summer activities.

It is good to hear from you, Clinton, so soon after reorganizing, especially about your picnic July 29, at the Carlyle fish hatchery. **Jefferson** is matching all other reactivated counties by accompanying **Christian** in the trip on the S. S. Admiral. But who can match reactivated **Vermilion** which signed up 100 per cent of the 55 present at an organization meeting in June? **Ogle,** which has been sponsoring three strong Rural Youth groups — Polo, Mt. Morris, and Forreston — began county meetings in June and elected officers.

It's an annual, enjoyable July event for Peoria. You always find them in Detwiller park about the second Sunday of the month with well-filled picnic baskets. Not even hot weather can stop our Rural Youth men in **Peoria, Knox, Fulton, Tazewell,** and **Woodford,** as they participate in the afternoon softball tournament. Bet the girls have to do with planning such big events!

Logan mermaids may suffer from sunburn but they can still ride the boat or roller skates in Decatur's Nelson park or a bus to St. Louis to spend a week-end. They are planning to run a stand at the county fair and are determined to have representatives at state camp. **La Salle,** always well-represented at East Bay, is planning a snack bar for the county agricultural show, Aug. 26-27.

Limber up those rheumatic joints and practice your favorite sport. There's a big State Sport's Festival coming up in Urbana on Aug. 29-30. Many county and district festivals are being held this summer, all pointing toward Urbana. One of the largest is the annual district festival scheduled for Aug. 14 at White Pines State park in which a number of surrounding counties will participate. **Richland** sends a representative to county educational council meetings which related recently to a new school.

How are you coming, St. Clair in the special public speaking classes? We expect great interest from you in the district talkfest. Thank you South **Cook** for stating an aim so well for us all in your statement in a recent issue of the "Ruralite": "The aim of the South Cook County Rural Youth shall be to develop an educational, social, and recreational program which will be an inspiration for better living."

It's a good idea, **Randolph** County Rural Youth member! Let's have more interest in hobbies. Glad you mentioned this subject in "Randolph Ramblings." You are rendering a service, **Morgan,** by including directions for games in your "Rambler." **Whiteside** has a bloodhound out trailing down new member prospects.

Now we know why there are so many weddings in Rural Youth circles. Brown has been teaching "Handkerchief Flirtation" in the columns of "Little Brindle Breeze." Knots tied: Annabell Plumley of Wyanet and Joe Morris of Tiskilwa; Gladys M. Anderson of Ohio and Richard Malm of Princeton; Bob Linden and Helen Fyer; **Mason** — Walter Grimm and Jean Kingen. One recent semi-formal dance was reported. **DeKalb** with a large crowd and a happy event for all in attendance.

Indiana Farm Bureau men attending the Midwest Training School at Kansas City in June have a soft spot in their hearts for Illinois farm folk. Needing a tire after some blowouts, the Hoosiers were put on the right track by the L. S. Collins family of Atwood, Illinois Farm Bureau members. Handing daughter Joan Collins a Hoosier Farmer, official publication of the Indiana Farm Bureau, Publicity Director Glenn Sample took this picture of Joan and her mother preparing chickens for freezing.

INVEST IN YOUTH TO ENRICH YOUR COMMUNITY

(*Continued from page* 11)

office and do a capable job as stenographer or secretary.

Doris Howell, Commercial teacher, encourages activities helping to bridge the gap between the school training and the post-graduate period. Employers are invited to talk to the students to explain the requirements for good office workers, and general office procedures are studied in tours of city offices and in trips to offices in Chicago. Girls also are encouraged to take summer office jobs.

Training includes shorthand and typing and bookkeeping. The latter is not required, however. Dictation must be fast and accurate and letters, above all else, must be mailable. A smattering of procedures of a variety of offices also is given including the preparation of bills of lading, invoices, book posting, ditto work, etc.

Farm girls seem to be particularly interested in office work if their interest is judged by their presence in a Rochelle high school shorthand class. Of 15 students questioned, 8 said they were from farms and 7 said they lived in town. This would seem to indicate an unfulfilled need in many rural areas for good schools with such training as is available at Rochelle.

Asked why they took commercial training at high school, two of the girls who said they were from rural areas said:

Maxine Busse — "The courses have given me everything I will need to get a good job. Commercial training has given me confidence in myself."

Ruby Grover — "I may go to college, but if I don't, this training should help me get a job that pays a good salary."

The community of Rochelle may well be proud of its high school. Without touching on the school's well-balanced training in liberal arts, which has in no way been sacrificed to the advancing vocational education program, Principal Hills and the school board have guided their actions by what they believe is best for the welfare of the student and the community.

The results are commendable. Vocational education is often expensive, but in rural communities where farm youth takes advantage of its opportunities, it pays off in greater returns from the soil thereby enriching the community with efficient, productive workmen and happy, healthy farm families.

About 10 per cent of the state of Illinois is covered with forests.

"BILL'S NEVER STOPPED SAYING

"Little Bill is having a great time at summer camp — swimming, fishing, meals outdoors. We miss his Dad a little less for all these things — little Bill's summer camp, my neat, white cottage here in this little town.

"But all these things help us remember, how much Big Bill thought of us and our future. For all these things he insured for us, from a farmer's income, with a Country Life Insurance policy.

"Bill had always said that only the wealthy could afford *not* to buy life insurance. And little Bill and I know now how right he was."

Illinois
AGRICULTURAL
ASSOCIATION
AND 99 COUNTY FARM BUREAUS

FARM NEIGHBORS ARE THE BEST IN THE WORLD

Come fire, accident, sickness, loss . . . . and a farmer's neighbors are on the spot ready to lend a helping hand. And that close interest farmers have in one another extends beyond neighborhood, county or even state lines.

This is one reason why the Farm Bureau has made such tremendous growth. It is a farmer's way of doing things . . . . working together, thinking together for a common interest.

If you have a neighbor who does not belong, invite him to join now. We need his extra help and he needs ours.

Picture OF A MAN WHO BROKE THE LAW ...AND ONE WHO Didn't!

When you reach 65, out of 100 of your friends the same age, 85 will be dependent on their friends and families for a living. Ten will still have to work, and only 5 will be able to live off their savings. Thus, the law of averages says you have only one chance in twenty of retiring independently at age sixty-five. BUT — you can break that *law*, and here's how:

See your Country Life agent today about an economical, safe Country Life policy — a policy that will assure you of happy, carefree "fishing days" after sixty-five, when less wise friends will be still "in the harness," or dependent on friends and family. See your Country Life agent today. That "one out of twenty" law is one law it'll pay you to break.

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

TO THOSE WHO SERVE

By President Charles B. Shuman

A PROMINENT Chicago business executive recently asked me an interesting question. "How many members of your organization are actively serving the local and state Farm Bureau organizations and their associated cooperatives through membership on boards of directors or actual working committees?" He was astonished when I informed him the number would probably be in excess of 4,000 people and, furthermore, these folks were giving of their time and influence with no thought of monetary reward. He wanted to know how much it would cost for him to obtain that kind of cooperation for his organization!

There are things beyond price. The loyalty and cooperation of the thousands of Farm Bureau leaders and workers in Illinois and the nation is one of those priceless assets that money cannot obtain.

Agriculture has come a long way indeed since the day twenty-seven years ago when the Illinois Agricultural Association in its present form was organized. It is not by chance that these great strides in technical progress and improvements in standards of living have been made. These were jobs that had to be done — jobs that business and government advisers said were impossible of accomplishment because there was not enough money available to pay the costs. County Farm Bureaus had to be organized, a great state organization was to be built, 130,000 farmers had to be called upon again and again. A cooperative elevator and a livestock marketing cooperative were needed; higher quality supplies for a machine age were imperative, so a county service company and an Illinois Farm Supply Company were the answer; margins were excessive and prices low, thus a milk marketing association and a Prairie Farms Creameries were other "must" programs; farming became a business and as such needed to have insurance adapted to its needs — there were jobs to do and they were done!

As the years have come and gone, the demands for new services have increased. The American people have officially, through the Congress, recognized the handicaps facing Agriculture and have approved much of the legislative program of the Farm Bureau. Great action programs such as the Farm Credit Administration, Agricultural Adjustment Act and Rural Electrification Administration were launched by the Federal Government. How were these programs carried into every community and to individual farmers? We all know the answer. — It was done by these same Farm Bureau members doing the job that had to be done.

Nothing I, or anyone else, can say will in any measure repay these unselfish leaders and members who have given so much to make the farm a better place to live and to help all farmers lift Agriculture to a higher level. Their reward, as is the case of all who serve, must come from within. I once asked a friend of mine why he had repeatedly taken of his own time to call upon a neighbor for whom he had a mild personal dislike, to secure his Farm Bureau membership and to sell him on the advantages of REA. His reply was, "I will not live as a neighbor of John's for long, but my soul and conscience will be with me forever."

These are the people who are putting the Golden Rule into practice. The world today needs more of this spirit and more of these people.

The Illinois Agricultural Association RECORD is published monthly except August by the Illinois Agricultural Association at 1501 W. Washington Road, Mendota, Ill. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Mendota, Ill., Sept. 11, 1936. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1935. Address all communications for publication to Editorial Offices. Illinois Agricultural Association RECORD, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmaster: Send notices on Form 3579. Undeliverable copies returned under Form 3579 to editorial offices, 608 So. Dearborn St., Chicago, Ill.

Picture OF A MAN WHO BROKE THE LAW ...AND ONE WHO Didn't!

When you reach 65, out of 100 of your friends the same age, 85 will be dependent on their friends and families for a living. Ten will still have to work, and only 5 will be able to live off their savings. Thus, the law of averages says you have only one chance in twenty of retiring independently at age sixty-five. BUT — you can break that *law*, and here's how:

See your Country Life agent today about an economical, safe Country Life policy — a policy that will assure you of happy, carefree "fishing days" after sixty-five, when less wise friends will be still "in the harness," or dependent on friends and family. See your Country Life agent today. That "one out of twenty" law is one law it'll pay you to break.

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

TO THOSE WHO SERVE

By President Charles B. Shuman

A PROMINENT Chicago business executive recently asked me an interesting question. "How many members of your organization are actively serving the local and state Farm Bureau organizations and their associated cooperatives through membership on boards of directors or actual working committees?" He was astonished when I informed him the number would probably be in excess of 4,000 people and, furthermore, these folks were giving of their time and influence with no thought of monetary reward. He wanted to know how much it would cost for him to obtain that kind of cooperation for his organization!

There are things beyond price. The loyalty and cooperation of the thousands of Farm Bureau leaders and workers in Illinois and the nation is one of those priceless assets that money cannot obtain.

Agriculture has come a long way indeed since the day twenty-seven years ago when the Illinois Agricultural Association in its present form was organized. It is not by chance that these great strides in technical progress and improvements in standards of living have been made. These were jobs that had to be done — jobs that business and government advisers said were impossible of accomplishment because there was not enough money available to pay the costs. County Farm Bureaus had to be organized, a great state organization was to be built, 130,000 farmers had to be called upon again and again. A cooperative elevator and a livestock marketing cooperative were needed; higher quality supplies for a machine age were imperative, so a county service company and an Illinois Farm Supply Company were the answer; margins were excessive and prices low, thus a milk marketing association and a Prairie Farms Creameries were other "must" programs; farming became a business and as such needed to have insurance adapted to its needs — there were jobs to do and they were done!

As the years have come and gone, the demands for new services have increased. The American people have officially, through the Congress, recognized the handicaps facing Agriculture and have approved much of the legislative program of the Farm Bureau. Great action programs such as the Farm Credit Administration, Agricultural Adjustment Act and Rural Electrification Administration were launched by the Federal Government. How were these programs carried into every community and to individual farmers? We all know the answer. — It was done by these same Farm Bureau members doing the job that had to be done.

Nothing I, or anyone else, can say will in any measure repay these unselfish leaders and members who have given so much to make the farm a better place to live and to help all farmers lift Agriculture to a higher level. Their reward, as is the case of all who serve, must come from within. I once asked a friend of mine why he had repeatedly taken of his own time to call upon a neighbor for whom he had a mild personal dislike, to secure his Farm Bureau membership and to sell him on the advantages of REA. His reply was, "I will not live as a neighbor of John's for long, but my soul and conscience will be with me forever.

These are the people who are putting the Golden Rule into practice. The world today needs more of this spirit and more of these people.

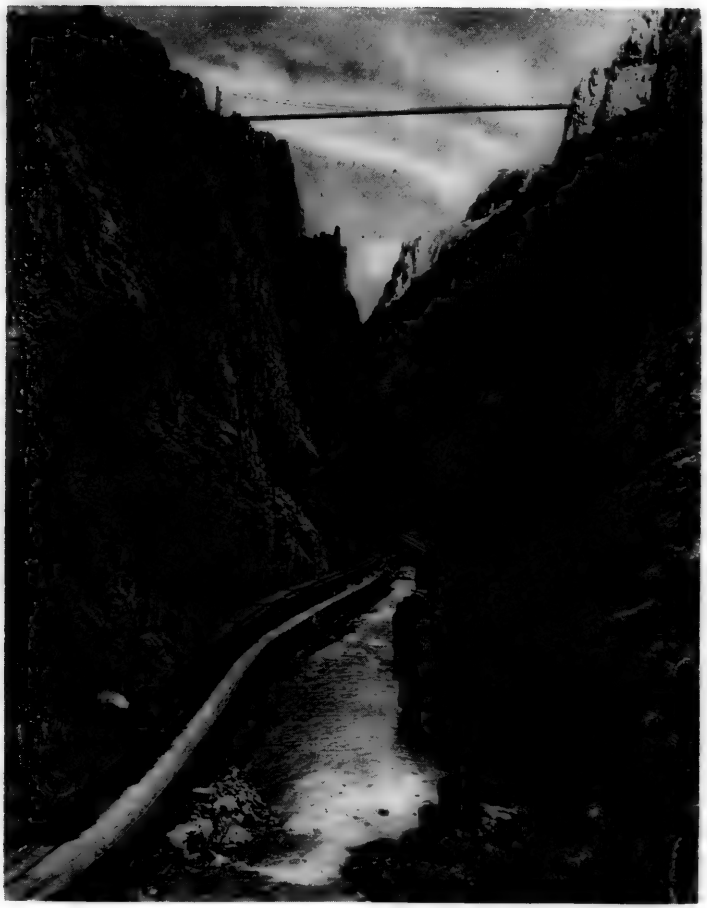
ALL A



This is the Royal Gorge which you will see when the IAA caravan stops in the Colorado Rockies on route from Salt Lake City to Denver.

IT'S been a long, weary time since you've had a chance to toss troubles aside and turn early morning chores over to the junior partner.

Here's one chance to forget your worries and get on with a bit of business, too.

It's a two-week's trip through the vast southwest to California combined with the American Farm Bureau convention at San Francisco Dec. 8-12.

A special train will carry Illinois farmers and their families to the convention with stops on the way at New Orleans, San Antonio, El Paso and points west.

Round-trip rail fare from home city to San Francisco and return will vary a little but the cost figures at just about $200. Costs are listed in adjoining table.

This includes about everything in way of expense, too — tips, sightseeing junkets, most meals. Only items not included are: incidentals, a few meals, and hotel rooms and food during the convention.

The special train will start on its 6000 mile run from the Illinois Central station at Chicago on Dec. 1 and will make downstate stops for convention passengers.

It returns 15 days later to Chicago on the northern route from Reno and Denver across the Colorado Rockies.

If you've been thinking of making a trip and have decided on this one here's all you have to do to get started:

1. Fill out reservation blank for Pullman and hotel rooms printed on these pages and send to address indicated.

2. Buy railroad ticket not later than Nov. 15 directly from the Illinois Central.

If you have not made your own hotel reservations for the convention, the IAA will make them for you and advise you by letter of the space reserved. This will be done if you check the "hotel accommodations" desired on this reservation blank.

After the IAA receives your reservation request your name will be forwarded to the Illinois Central Railroad and their agent will contact you directly, and you will be able to buy and pay them for the round trip ticket from your home town.

Advance deposit is not required but the trip must be paid for in full by

Roy P. Johnson
Illinois Agricultural Association
608 S. Dearborn Street, Chicago, Illinois

RESERVATION REQUEST

Dear Sir:

I am sending in my request for reservations on the IAA caravan train. I am making reservations for the following number of persons: .....

I want my reservation for the following type of Pullman car: (check type desired)

(a) Intermediate Pullman car: ..... (b) Standard Pullman car: .....
(Standard Pullman cars are newer and more expensive but both types of cars provide the same travel comforts.)

I wish the following type of berth:

(a) lower for one: .....
(b) upper for one: .....
(c) lower for two: .....
(d) compartment for three: .....
(e) drawing room for three: .....
(f) drawing room for four: .....

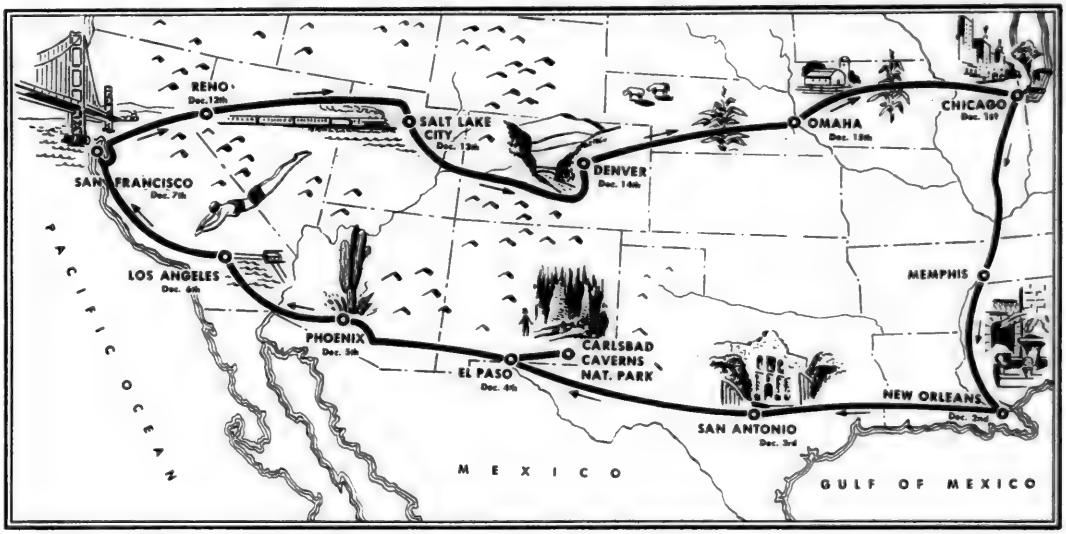
I wish to reserve hotel reservations while at San Francisco for the following number of persons: ..... Following are names and addresses of Members of my Party:

Name: ..... Address: .....
Name: ..... Address: .....
RFD or St. City State RFD or St. City State

.....
Name

.....
Address

ABOARD for 'FRISCO!



Nov. 15 with checks made payable to the Illinois Central Railroad.

Printed itinerary is being prepared and may be picked up from your County Farm Bureau or by writing the IAA.

Added information can be had by writing Charles P. McEvilly, city passenger agent, Illinois Central Railroad, 208 S. LaSalle street, Chicago 4.

The annual American Farm Bureau Federation convention will highlight the trip, but there's plenty to see along the way.

Here's some of the high-lights on the 400 miles of side trips planned at the stops indicated on the travel map. Dec. 1—Train pulls out of Chicago at 2 p.m. on first leg of journey south through downstate Illinois, making stops for passengers at Champaign, Mattoon, Centralia and Carbondale.

Dec. 2—After breakfast in the diner you'll arrive in New Orleans in the morning. A motor tour of the city follows, with a get acquainted supper at a famous French restaurant. Caravan leaves at night on Southern Pacific route.

Dec. 3—At the end of a night's travel by train you'll pull into San Antonio with a five hour stop-over that includes a trip to the Alamo,

INTERMEDIATE SLEEPING CAR ACCOMMODATIONS

***Joining Party at Chicago and Leaving Party at Chicago**

	One in Lower	One in Upper	Two in Lower, each person
Chicago	$201.62	$193.51	$184.34
Dixon	202.82	194.71	185.54
DeKalb	201.62	193.51	184.34
Galesburg	205.83	197.72	188.55
Ottawa	203.55	195.45	186.27
Madison, Wis.	201.62	193.51	184.34

*Cost includes rail fare from home city indicated to San Francisco and back to that home city.

Joining party downstate and leaving party at Chicago

	One in Lower	One in Upper	Two in Lower, each person
Bloomington at Champaign	$200.12	$192.01	$182.84
Champaign	200.12	192.01	182.84
Centralia	199.69	191.58	182.41
Cairo	199.04	190.93	181.76
Decatur at Champaign	200.12	192.01	182.84
Effingham	200.12	192.01	182.84
Gilman	200.12	192.01	182.84
Mattoon	200.12	192.01	182.84
Peoria at Champaign	201.09	192.98	183.81
Rockford Lv. at Rockford	199.87	191.76	182.59
Springfield at Carbondale	199.69	191.58	182.41

STANDARD SLEEPING CAR ACCOMMODATIONS

	One in Lower	One in Upper	Two in Lower, each person
Chicago	$239.58	$227.27	$213.65
Champaign	238.08	225.77	212.15
	Three in Compt., each	Three in Drawingroom, each	Four in Drawingroom, each
Chicago	$236.43	$248.21	$233.09
Champaign	234.93	246.71	231.59

Standard sleeping car costs from other cities listed will be quoted on application. Fares from Chicago and Champaign will give the approximate difference in cost.

VOTE YES ON THE GATEWAY AMENDMENT!

X	YES	**For the proposed amendment to Section 2 of Article XIV of the Constitution**
	NO	

FARM Bureau members of Illinois face a great responsibiilty in the Nov. 5 election. So do all citizens.

It is to get the GATEWAY AMENDMENT to the state constitution adopted.

For all practical purposes, Illinois has a constitution which is difficult if not impossible to amend under the present law. Good government demands that it be possible to amend it where needed.

The GATEWAY AMENDMENT would do two good things:

1. Provide that the General Assembly may submit amendments to the voters on as many as three articles of the constitution instead of one as at present.

2. Provide that an amendment would be adopted if it secured a "yes" vote from two-thirds of THOSE VOTING ON THE AMENDMENT, instead of a majority of all those voting in the election in Illinois.

Farm Bureau has consistently supported this GATEWAY AMENDMENT. It is the best judgment of members, reflected in official Illinois Agricultural Association resolutions, that it should be ADOPTED.

There seems little or no organized opposition to this amendment. Everyone seems to agree it would be a good thing.

YET IT IS LIABLE TO BE DEFEATED. WHY?

Because, like any other amendment to the constitution, it must receive the favorable vote of a majority of *all who vote at the election!*

Remember: a failure to vote on the amendment, in a separate column on the ballot, is JUST THE SAME AS IF YOU VOTED "NO".

For example in 1942 an amendment was presented to the voters to remove the sales tax from food. There were 979,000 who voted "yes" on this question, and 346,000 who voted "no." Thus the count on those who actually voted on the amendment was almost 3 to 1 in favor of its passage.

BUT THE AMENDMENT DIDN'T PASS. WHY?

Because there were 1,723,000 other persons who cast ballots in that general election, but who did not vote on the sales tax amendment.

THESE VOTES WERE COUNTED AGAINST THE AMENDMENT, and when added to the 346,000 who voted "no", resulted in DEFEAT OF THE AMENDMENT BY A MARGIN OF 2 to 1.

As far as farmers are concerned, there are several important changes that need to be made in our state constitution.

One of these is an amendment to the revenue article of the state constitution to permit the General Assembly to improve our tax system. This does not mean that the IAA is seeking a state income tax. Federal income taxes now are so high that they preempt the field of income taxes.

There is a need, however, for a classification of property for tax purposes. For example, as the state constitution now stands, land newly planted to timber is taxed on the same basis as other land, even though the timber may not be harvested for many years. This is unfortunate because it tends to discourage farmers from planting trees even on lands which are not suited to any other use.

Change in constitutional tax law is needed to encourage proper land use and good soil conservation practices. Much of our soil erosion and flood damage could be corrected over a period of years if our tax laws encouraged farmers to plant trees on low-yielding and rough land.

Lack of classification of property for tax purposes also makes technical lawbreakers of a great many basically honest citizens. Under the present constitution, savings, bonds, stocks, etc., are supposed to be taxed on the same basis as tangible property. If the present constitution were followed to the letter, the tax on such property would be greater than the income from it. This part of the constitution is generally ignored and appears to be unenforceable. This is unfortunate because disregard for a bad law tends to promote disrespect for good laws.

WHAT CAN FARM BUREAU MEMBERS DO?

If they believe the GATEWAY AMENDMENT should be adopted, the first thing they can do is TO BE SURE TO VOTE "YES" ON IT.

The SECOND thing they can do is to tell their neighbors, and members of their families, how important it is to VOTE IN THE GATEWAY AMENDMENT column.

The THIRD thing they can do is to discuss it at every opportunity with others, why it is a good thing, and why it is necessary to VOTE IN THE GATEWAY column, as well as for the candidate of their choice.

The GATEWAY AMENDMENT can clear the way for a steady improvement of Illinois' constitution; and thus for steady improvement in our state government.

The GATEWAY AMENDMENT vote can easily be the most important civic act of the year, so far as you are concerned.

Be sure to VOTE on the GATEWAY AMENDMENT and urge others to do likewise. Remember, failure to mark that ballot is the same as a "NO" vote. Don't let it lose by default!

Decontrol Board Restores Ceilings On Soybeans, Live Stock

AS the RECORD goes to press, the federal decontrol board has just announced its order restoring ceilings on meats and soybeans and exempting most grains and dairy products from price ceilings.

On the items ordered back under controls, new ceilings were scheduled to be determined by OPA and the Agricultural Department and made effective Aug. 23.

The price decontrol board also ordered revival of the livestock subsidy payments which were in effect last June 29.

Commenting on the action of the decontrol board, President Charles B. Shuman of the Illinois Agricultural Association, said: "We believe that the board acted wisely in preventing the restoration of price ceilings on milk, butter, and other dairy products and grains. . . .

"On the other hand, the decontrol board appears to have stepped into a trap in restoring price ceilings on livestock and meat.

"Restoration of low meat prices will result in excessive consumer demand and at the same time low prices will discourage livestock production and delay marketing. This will mean less meat and a return of the black market and a loss of valuable by-products."

President Shuman also pointed out that livestock feeding operations will be further discouraged with grains being free from control and meats under price ceilings.

"We also believe," President Shuman said, "that soybeans should have remained free from price control for the same reason that other grains were exempted. Supplies are large, and the price of soybeans had not advanced unreasonably since price controls became inoperative on June 30."

The Illinois Agricultural Association filed statements with the federal price decontrol board early in August urging that farm products remain free of price control after Aug. 20. Statements also were made by the American Farm Bureau Federation recommending similar action.

August 20 was the date set by Congress after which price controls were to be reinstated on certain consumer items at the discretion of the federal price decontrol board.

The IAA pointed out that with the record grain crops in prospect and large numbers of meat animals on the nation's farms, prices, which cannot now be considered unreasonable, will tend to drop lower.

The Price Control Extension law directed the price decontrol board not to regulate prices after August 20 unless (a) prices have increased unreasonably, and (b) the commodity is in short supply, and (c) its regulation is impracticable and unenforceable, and (d) such regulation is in the public interest.

Presenting the cases on grain, livestock, soybeans, and dairy products separately, the IAA cited facts and figures to prove that in general (a) prices have not increased unreasonably, that (b) none of the commodities will be in short supply especially in view of predicted bountiful harvests this year, that (c) price regulations on the farm products named are impracticable and unenforceable, and that (d) such regulation with its attendant evils — black market lawlessness and waste — and subsidization which the federal government can ill afford at this time are not in the public interest.

Biggest Crowds in History Attend Revived Illinois State Fair at Springfield

Ready for a little fun and relaxation after weary war years, Illinois farm families, in greater numbers than ever before, flocked by the tens of thousands to the Illinois State Fair at Springfield in early August. Left, (top) — At IAA courtesy tent, Farm Bureau folks rest, eat, visit with friends, and watch the crowds; (bottom) — General view of IAA tent. Center — Machinery always attracts farm men. (Top) — Exhibit shows tractor cover to keep out wind and cold during bad weather; (bottom) — a hay baler gets a good going over. Right — farmers jam the stock pavilion to watch judges pick the best; (top) — Judging Angus calves; (bottom) — Show mules leaving the stock pavilion after judges declared winners and awarded ribbons.

Shelling corn for his chickens.

Feeding his hungry spring pigs.

Operating pasteurizer at dairy.

TOMORROW'S ILLINOIS FARMER

"FARM BUREAU isn't mentioned very often at our meetings, but in the last couple of years we have been talking and thinking about farm cooperatives. But you ask if we discuss Farm Bureau. No, I don't believe we think too much about it."

J. Glyndon Stuff, the 20-year-old Ogle county youth who heads the nation's 200,000 members of Future Farmers of America, knitted his brows in a puzzled frown then smiled as he said: "Dad's a member of the Farm Bureau and Mother belongs to the Home Bureau. Guess we just take the Farm Bureau for granted.

"Young farmers like me," the pale, slender youth continued, "would like to know more about our Farm Bureau. We need to know more about the business and service end of our farm organization.

"Future Farmers would like to be of some service to Farm Bureau and I would like to see closer relations between the two organizations."

Young men like Stuff are tomorrow's progressive, successful farmers — an asset to their communities and to the nation's economy. Enlightened in all that Farm Bureau stands for, they would no doubt become numbered among its most formidable champions.

Studying vocational agriculture at Polo high school, Stuff rose rapidly in FFA. He worked hard on local committees and became local president. In 1943-44 he served as vice president of Section One of Illinois, was elected Illinois state president in 1944-45 and is now serving as national president until the annual convention in Kansas City next fall.

Retiring from office at that time, he plans to continue his education at a college of agriculture. He intends to study general agriculture first then specialize.

The FFA president leads a busy life. When he is not attending meetings in many parts of the country, he is working diligently on his father's 100-acre farm north of Dixon. For the past few years he has worked as a pasteurizer in a nearby dairy.

Afternoons he devotes to the farm, helping to take care of 12 Guernsey and Shorthorn cows and the 30 lambs and 125 hogs the family raises annually. Corn, oats, hay and red clover are the farm's principal crops. The Stuffs are also wise to the use of grassed waterways, contouring and the intelligent use of plant foods.

Unlike most farmers, the Stuffs can get all the limestone they need for their soil from a small limestone hill near the farmhouse.

President Stuff pointed out that Future Farmers of America has performed a fine service in developing leadership among farm boys and in keeping them interested in farming.

His own farm life is a good example of aggressiveness and achievement ever since the day he joined a 4-H Club more than eight years ago. Since that time he has won a number of honors culminating in a top honor at the National 4-H Club Congress last December when he received a $200 educational scholarship for his egg production and chick-brooding project.

He raised 750 baby chicks and 409 White Leghorn hens in his laying flock, earning a net income of $645. Other projects he has carried include swine, sheep, farm accounting and planning, victory service, erosion control and home grounds beautification.

Stuff is completely sold on the importance, dignity and destiny of agriculture, and recognizes the value of his heritage as a farmer. He has all the ingredients for a happy and useful future.

J. Glyndon Stuff, Ogle county farm youth, (third from right) visits President Truman in Washington shortly after his election as national president of Future Farmers of America last fall. With him are other national officers of FFA. Left to right: Virgil Gotto, Fallon, Nev.; Eugene Starkey, Orland, Calif.; President Truman; Stuff; Joseph E. Espey, Maryville, Mo.; and Marion Baumgardner, Wellington, Tex.

Prairie Farms Creameries Manager Resigns

J. B. COUNTISS, manager of Prairie Farms Creameries, Illinois Agricultural Association affiliate with 10 downstate Illinois member creameries, has offered his resignation to take effect Oct. 1.

He will become sales manager for Pfister Associated Growers, hybrid corn producers and distributors with headquarters at El Paso, Ill.

Countiss has been employed by the IAA since 1930. As sales manager he will direct sales for the organization's 25 associated companies with 2800 salesmen scattered throughout the Midwest and Canada.

Under Countiss, the IAA started cooperative creameries for farmers in 1933. Since then the organization has grown to include plants at Moline, Bloomington, Peoria, Champaign, Olney, Carbondale, Mt. Sterling, Galesburg, Carlinville, Mt. Carroll and Henry with buildings and equipment today worth an estimated $2,000,000, all owned and controlled by Illinois farmers.

Countiss was born at Cookeville, Tenn., Oct. 27, 1898 and served a short time in the army during World War I before coming to Illinois in the early 1920's. He was graduated from the University of Illinois College of Agriculture in 1925 and worked for the Peoria Creamery Company before coming to the IAA.

He took charge of the fluid milk marketing department in 1930 and helped organize milk producer dairies at Danville, Peoria, Jacksonville and Harrisburg, and milk associations at Moline and Rockford.

Later he helped organize the creameries during the depression and since then their operations have increased steadily and profitably to their present proportions where every dollar invested is now worth $1.48.

To the creameries patrons, 89 cents have been returned on each dollar in the form of preferred stock dividends and patronage refunds.

He will continue to make his home in Hinsdale with his wife and three children, Chad, 15, Marynan, 13, and Eileen, 11.

At installation of Illinois Bell Telephone's two-millionth phone in farm home of Harry Cronister, 12 miles northwest of Springfield, Lt. Gov. Hugh W. Cross (center) takes phone from Illinois Bell President A. H. Mellinger to put in first call to IAA President Charles B. Shuman in Chicago. Mrs. Cronister looks on. At left, President Shuman talks from IAA office with Lt. Gov. Cross.

Country Life in Midst of $12,000,000 Campaign

COUNTRY LIFE'S 450 agents are in the midst of a campaign to write $12,000,000 in new business during August and September.

If your Country Life agent gets in touch with you, you will know he is out trying to get his county's share of that $12 million.

In terms of volume of new business, this $12 million will represent an outstanding accomplishment. But far more important are the many personal problems that the new business will solve.

Life insurance is today's best investment. Country Life Insurance Company belongs to the farmers of Illinois. Therefore, every Farm Bureau member and members of his family should have an opportunity to purchase a Country Life policy.

Among the many services being offered to Farm Bureau members by the Illinois Agricultural Association and its subsidiary organizations, none is more important than the service of Country Life Insurance Company.

This Company has been operating since 1929 for the special benefit of Illinois farm people and has been recognized for outstanding achievement each year since its inception. It is owned and controlled by the Farm Bureau membership of this State.

The Company issues regular, standard policies so that any financial problem of an individual, requiring the use of life insurance, can be solved. Since 1929 the growth of the Company has exceeded all previous records made in the life insurance business. The total business in force as of Aug. 1, 1946 exceeded $268,000,000 on the lives of approximately 145,000 people.

Since this Company is a subsidiary of the IAA, operating as a part of the Farm Bureau service program, its operating cost is held to a minimum. Statistics show the life expectancy of rural people is about six years longer than the average. For this reason the mortality experience of Country Life Insurance Company has always been extremely low. The savings from operating expense and low mortality reflects a low net cost to Country Life policyowners.

When you consider that life insurance can be used to guarantee the education of children, to furnish a sure source of income for widows, and that it is the most economical way to provide retirement income and the only certain method of providing ready cash to pay for the cost of transferring an estate at death, you begin to realize how many people need to be thinking seriously about the purchase of additional insurance.

THE CONSUMER SETS THE

By L. H. SIMERL

DID you ever see a small boy hit his thumb with a hammer and then blame the hammer for the accident?

Sometimes men do the same thing, although they may use somewhat stronger language to express themselves. Of course it is foolish to blame the hammer.

In recent months some people have been acting and talking just as foolishly about wages and costs of living. These persons claim to represent consumers, and undoubtedly they do influence much consumer opinion. They say that consumers' pocketbooks are being hard hit by the high cost of food. This is not much more sensible than the boy complaining about the hammer hitting his thumb, because it is consumers themselves who determine prices of butter, meat, eggs, potatoes and similar foods.

Many consumers doubt this statement, because they know that the action of one housewife alone has no visible influence on prices. What they fail to recognize is that the combined buying activities of 140,000,000 consumers can and do set prices on foods.

Consumer demand has increased 130 per cent since 1935-1939. For each ten dollar bill in Saturday pay envelopes in those years, there are now *two tens and three ones*. Six of these dollars have been added since the original OPA price ceilings were established in 1942. When this larger amount of money is spent at food counters, it forces prices upward.

To be sure, the quantity of food offered for sale has some influence on prices, but supplies of food in the United States change very little from year to year. Therefore, most of the changes in food prices are due to changes in consumer demand.

Take butter for example. Before the days of OPA price fixing, butter production was remarkably steady. Cows did not go on strike, but worked seven days each week, as did the farmers who owned them. Butter production averaged from 16 to 18 pounds per person each year. Consumers bought this butter at their own prices.

At the beginning of World War I (1914), butter brought 34 cents a pound. By 1920 consumers had a lot more money, and paid 66 cents for their butter. Consumer incomes then declined for two years, and butter prices dropped to 45 cents a pound. With more money in their pockets again in 1929, consumers bid up butter prices to 53 cents. Three years later consumers were willing to pay only 26 cents for butter, and they obtained normal quantities at that price. In 1942 consumers were still thinking in terms of depression prices, and they bought butter for 45 cents.

At the end of June, 1946, butter price ceilings were around 62 to 64 cents a pound. When these ceilings expired on the first of July, some dealers asked 80 cents a pound. Many consumers refused to buy at this price, and this consumer action brought prices down to about 70 cents at the end of the month. This price was about six cents less than the previous OPA ceiling plus the 14 cent subsidy.

For 45 years hog producers have supplied between 60 and 75 pounds of pork per person per year. Pork cannot be stored in large quantities, nor for long periods of time. It must be sold to consumers at prices they are willing to pay. The following table shows how consumers have changed pork prices from year to year.

Year	Average Retail Price of Pork
1914	17c
1919	36c
1922	25c
1929	27c
1933	14c
1942	26c
July 31, 1946, estimated	38c

Beef also goes to consumers at their own prices. For 25 years beef production has been about 50 to 60 pounds per person per year. It is always sold at prices which consumers are willing to pay for it. The high's and low's of these prices are shown in the following table:

Year	Average Retail Price of Beef
1913	20c
1920	33c
1922	27c
1929	38c
1933	21c
1942	34c
July 31, 1946, estimated	52c

Farmers have always provided an adequate supply of potatoes, usually about 130 pounds per person per year, for the last 20 years. Before World War I, consumers bought potatoes at 1½ to 2 cents a pound. In 1920 consumers had a great deal more money, so they paid 6.4 cents a pound. A year

later they bought "spuds" at 3.1 cents a pound. A similar price prevailed until 1932 when the price fell below 2 cents a pound. During World War II consumers' pockets again were filled with money, and they paid 4.4 cents a pound for potatoes in 1943. At the end of July, 1946, consumers were paying 5 to 6 cents a pound.

Egg prices, too, are set by consumers. For the last 35 years, farmers have produced and offered to each consumer about a half dozen eggs a week. The table below shows how egg prices have varied in response to changes in consumer demand.

Year	Average Retail Price of Eggs
1913	30c
1920	66c
1922	40c
1929	46c
1933	21c
1943	51c
July 31, 1946, estimated	49c

PRICE

Consumers' *total* expenditures for food is *also* very largely under consumer control. In 1913 a grocery bill for a typical family of three was $264. When more money was available in 1920, the family spent $568 for the same groceries. Through most of the 1920's, the bill averaged between $420 and $450 a year. After 1929, consumer incomes declined, and in 1933 the typical family of three obtained the same foods for $276. With better incomes in 1937, they paid $367. With even higher incomes in 1943, they paid $458 for the same groceries. For the first half of 1946 the comparable figure was around $470, or one-fifth less than in 1920.

In each year farmers furnished approximately the same amounts of food. Thus, the consumer obtained practically the same food in 1933 for $276 as he did five years earlier for $425. The principal difference was that consumers were not willing to spend as much money in 1933 as in 1928.

During and since the war, labor has asked for and received large wage increases. Labor (consumers) spent a part of these large increases for food. When this caused prices to rise, labor leaders professed great surprise and indignation.

Now some labor leaders are asking for further wage increases. Additional wage increases at this time will certainly bring more immediate price increases.

Unless offset by changes in labor productivity, the cost of living follows wages like a shadow. Labor leaders would do well to recognize this fact.

It also would be well for consumers in general to recognize that their own action is the best possible food price control.

AFBF PUSHES FIGHT ON FERTILIZER PLAN

Like a boxer riding a punch, the American Farm Bureau Federation rolled back on its heels in July when a House vote defeated its proposed pilot phosphate fertilizer plant at Mobile, Ala.

Today the AFBF is back in the fight full of determination to get a national fertilizer program established during the 80th Congress.

Defeat of the proposal to get the high-analysis phosphate fertilizer pilot plant — which is one small item in the AFBF's broad fertilizer program — "shows the farmer as nothing else could," said AFBF President Edward A. O'Neal, "the wealthy, powerful and determined opposition lined up against them."

Leading the fight to assure American farmers a plentiful, high-quality supply of plant foods at reasonable cost, President O'Neal has called for the support of Farm Bureau membership in the struggle ahead.

"At the nation's grass roots," President O'Neal said, "they are realizing they must get busy in the interest of long-range programs that will benefit agriculture in the years ahead.

"Many issues have been overlooked during the all-out effort to meet wartime goals. But the opposition hasn't been resting and, as a result, farmers find themselves facing more legislative battles. We've just begun to fight.

"Get into your local Farm Bureau activities and help fight in one of the most effective ways for the welfare of yourself, your children and our nation."

SOIL DISTRICTS GAIN

Organized soil conservation districts in Illinois include 19,003,890 acres and 132,022 owners, according to a report by W. F. Purnell, assistant extension soil conservationist at the University of Illinois. His report shows that the organization of 62 districts including part or all of 64 counties has been completed. Most recent additions to the list are Brown and Massac counties.

Shorts in the News

Paul V. Dean, Bureau county farm adviser for the past 16 years, has turned in his resignation and plans to move to a farm near Columbia, Mo., in September. He has been in ill health. Dean graduated from the University of Illinois College of Agriculture in 1925 and taught vocational agriculture in high schools until 1930 when he went to Bureau county as associate adviser and served until 1932 when he was made adviser.

Illinois farm advisers and home advisers will receive salary increases on the part of their salaries which comes from federal funds, according to J. C. Spitler, state leader of farm advisers. Since federal funds are allotted equally to farm advisers throughout the state, the increase will be uniform. The increase for farm advisers is from $2,000 to $2,160 and for home advisers from $2,000 to $2,280. Each county supplies additional funds to supplement advisers' salaries.

Manager L. L. Colvis of the Illinois Fruit Growers Exchange reports that the main structure of the new cold storage building at Carbondale is completed and that work was being rushed on the storage section to install refrigeration and insulation in order to get ready for the fall apple crop.

The Flying Farmers, a group of farm operators who fly their own planes, will hold their next annual meeting at the University of Illinois airport. Six hundred planes from Illinois, Indiana, Wisconsin and Michigan flew to Lafayette, Ind., recently for the 1946 meeting. The organization has 1,000 pilots and expects to fly 1,000 planes to the university airport next year.

The suggested wheat acreage to be planted by Illinois farmers for harvest in 1947 has been set at 1,600,000 acres. This acreage is similar to the goal set in 1946 although only 1,367,000 acres were planted.

O. L. Welsh, McLean county farm adviser for the past five years, has asked to be relieved of his duties by Dec. 1. Welsh offered his resignation in order to go into private business in Bloomington. He will head a fuel and lumber company handling farm supplies, machinery, fencing, lumber and coal.

B. H. "Barney" Heide, general manager of the International Live Stock Exposition, died at his home in Chicago, Aug. 3. He will be missed by countless stockmen from the U. S. and Canada. Mr. Heide had been associated with the International since the first one in 1900. William E. Ogilvie, assistant to Mr. Heide, has been named acting manager of the 1946 exposition.

Guy H. Husted, farm adviser for the past 26 years, has resigned after serving in Cass county since 1925. Husted graduated from the University of Illinois College of Agriculture in 1915 and taught two years before farming. In 1920 he went to Scott county as farm adviser serving there for five years before going to Cass county.

G. Tupper Swaim, former Kankakee county farm adviser, is up to his neck in work organizing and directing Camp Shaw-waw-nas-see, the new 50-acre northern Illinois district 4-H camp along Rock creek in Kanakakee county which already has served as the summer camp grounds for many northern Illinois 4-H groups.

A crew of 40 cleared trees, built roads, leveled space for a softball diamond during a work week held in August at Livingston county's new 4-H club park three and one-half miles northwest of Pontiac. Local townships donated trucks for hauling dirt and gravel. Under construction is a building for rest rooms, park's first permanent structure.

Farm Bureau membership in Illinois at the end of July was 129,723, according to the report of Organization Director O. D. Brissenden. Membership at the end of June was 128,940. Membership at present is assumed to be over the 130,000 mark.

A grasshopper outbreak in the western and southwestern areas of Illinois is reported by H. B. Petty, extension entomologist at the University of Illinois. The outbreak is serious and may damage crops as far north as Monmouth. Poison bait is available at your county Farm Bureau, Petty said.

Jo Daviess County Farm Adviser Wayne Churchill will become Will county farm adviser this month. He succeeds John H. Brock, who resigned to become business manager of the Northern Illinois Dairy Cattle Breeders' Association at Dundee. Churchill is a graduate of the University of Illinois College of Agriculture. He taught at Bardolph high school and was assistant farm adviser in Sangamon county for seven years.

Organic matter can be added to the soil by plowing under legumes and residues of other crops.

Norman McCoy (center) of Macon county, was reelected president of the Flying Farmers at their recent meeting in Lafayette, Ind. He is shown with William Renshaw (left) and Arthur Moore of Prairie Farmer.

"FRUIT EXCHANGE IS BEST MARKET"

BY LEWIS A. REISNER
Field Editor, IAA RECORD

A GOOD sized crop of peaches—but not a record breaker—moved orderly from southern Illinois orchards to market through the Illinois Fruit Growers Exchange at Carbondale during early August harvest season.

With a wind storm lashing through orchards in midst of peach harvest causing loss through windfall and limb-rub, estimates were lowered from the early season 1 million bushel forecast, and the 1946 peach crop was placed at 800,000 by growers and buyers.

This meant a total harvest of about half last year's record crop of 1,600,000 bushels.

Most housewives at such markets as Danville, Decatur and Rockford were buying peaches hauled from orchards by trucks, as about half the crop moved to market in this fashion.

Remainder of the crop was shipped to the large terminal markets, like Chicago, in pre-cooled, refrigerator cars and sold to distant city buyers.

Growers were able to bring in the harvest with local help as evidenced by neighbors helping Raymond "Buck" Moniger at his packing plant next to an orchard on his 400 acre farm south and west of Carbondale near Murphysboro.

It was 9 at night. Lights were burning. Packing crews were finishing a long, hard day.

There was a thread of good natured joking, not a little at the expense of the boss himself, big, easy going, good natured Moniger, as the crew packed his 6000 bushel peach crop.

"This is the sight we wait all year to see. We don't mind the long hours during the packing season," he said,

Pickers, mostly local help, work long hours in hot orchards, earn good wages, work by hour or bushels picked. They pluck golden-red peaches from tree, place them in canvas bags.

"because these few days are the reward for a season's work, expense and worry."

He explained the packing process. The peaches pass on roller belts through a defuzzing machine that rubs the fuzz from the fruit and at the same time dusting them with a mild preservative powder.

Peaches then move slowly up an incline where defectives are picked out as well as the average sized peach for the particular pack being crated.

The peaches then pass over spaced rollers, the smaller, undersized ones dropping through.

Since Moniger's were packing two-inch, No. 1 peaches at the time, the rollers were set at a distance of two inches—hence the name of the grade—No. 1, two-inch.

Buck is enthusiastic about the Exchange. "We joined when they first moved to Carbondale. About ten or eleven years ago.

"They sell all our peaches. It's the best market we've found and we've tried them all."

He buys all his supplies directly or indirectly from the Exchange Supply Company and shares in the patronage dividends.

They've made good money during the last five or six years but they're not forgetting that peaches dipped to 27c a bushel in the grim early '30's.

They certainly would not recommend the wave of speculation that followed the last war.

"Everyone rushed in. Doctors, lawyers, everyone," one grower recollected. "And just offhand, they lost their shirts."

Present experienced growers may be setting out new orchards, but only to replace old ones, or to give a son a start.

Few are overly optimistic, just hoping for a fair, steady market, with a gradual decline from today's high level.

Emile Vancil, Exchange secretary, checks receipts with platform salesman Lowell O'Neal. Peaches are sold from loading platform by bushel or truck-load lots. Sales were brisk.

Thomas brothers rest after bringing in wagon load of peaches from field to packing shed on father's farm. They're partners with father, C. J. Thomas, successful Carbondale orchardist.

Packers sort, remove defective peaches. Fruit moves by belt and roller through defuzzing machine, over sorting rollers, into market basket. Last job is to ring-top, deliver to market.

WORRIED ABOUT PRICES?

Your Farm Bureau Service Company can save you money and assure you of a supply of quality oil and greases.

EXAMPLE:

Right now your company is in the midst of a great motor oil booking program. Your winter and spring oil supply should be arranged for now.

Orders placed now will be protected on *price*, and in addition, will receive a special *Future Order Discount* of 3c per gallon. Payment will not become due until delivery is made.

CONCLUSION:

ORDER YOUR MOTOR OIL AND GREASE NOW!

ILLINOIS FARM SUPPLY COMPANY SERVICE

WHAT ARE YOUR LUBRICATION NEEDS?

See your salesman about your requirements. He has the authoritative Blue Seal Service Guide for correct lubrication of cars, trucks and tractors.

MOTOR OILS

ILLINI A premium grade motor oil that keeps clean motors clean. Ideal for cars, trucks or tractors.

BLUE SEAL A pure paraffin base oil known in the industry as "regular."

PENN BOND Another good versatile oil made from Pennsylvania grade crude and blended for use in farm motors.

I.F.S. HEAVY DUTY An Oil made especially for heavy duty work in diesel motors in trucks and tractors.

GREASES

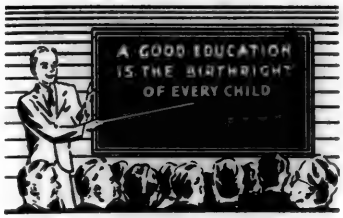
LUCO LUBE A high quality grease that "stays put" and defies heat and water.

HARVESTER GUN A cold weather grease for combines and corn pickers.

ALUMINATE GUN A clear color grease that survives melting.

ANTI-RUST a wonderful machinery protector. Prevents rust for a year.

ILLINOIS FARM SUPPLY COMPANY, Chicago, Ill.



By JOHN COX
IAA Director of Rural School Relations

Dedicated to the improvement of rural education, this column will include varied items of possible interest to parents and patrons of our rural schools.

E. H. Lukenbill, county superintendent of schools in Logan county, on June 6 reported on the first four votes on reorganization in that county. They were all favorable by from 2 to 1 to 10 to 1 majorities. He said the enrollments in the four schools ranged from 100 to 257 pupils and the assessed valuation from $1,488,000 to $3,918,000 in the largest district. A more recent report states that five out of seven proposals for consolidation in that county were acceptable to the people.

Also early in the summer a letter came from Clem Garton, a Farm Bureau leader for many years in Logan county and now chairman of their County School Survey Committee. The letter, though expressing a slightly different opinion from that held by leaders in several other counties with reference to the unit district, is full of common sense and describes one type of approach to school reorganization.

"My dear friend:

"I feel the time is opportune to write you about our progress on school survey reorganization of schools in Logan county and also some of the fixed ideals of the members of the survey committee as evolved from meetings and contact with the rural people.

"As you see, we have about one-third of the rural schools of Logan county consolidated into administrative units. Besides there will be elections held soon in Hartsburg and country-side, also Emden and country-side for two more units.

"Committees have been chosen at meetings held in West Lincoln township and New Holland community to proceed in action for consolidation.

"We have meetings scheduled to be held in the near future at Broadwell, Elkhart, Cornland, and Middletown. When these are held, we have canvassed the entire county on our initial program of reorganization of rural schools. What high school problems we may have, also non-high school territory, we shall tackle this winter when the days are short and the nights long. We find at these meetings, it is midnight or 1:00 a.m. when we get home. This is hard on weary farmers. However, I must say as chairman, I have a wide-awake enthusiastic board to cooperate with and our secretary, Mr. Lukenbill. There is none better.

"Here are our fundamental precepts in rural school reorganization in Logan county.

"We wish to establish districts of some two million dollars assessed valuation (old rate) as much as we can, so that the tax rate need not be exorbitant and yet have modern educational facilities.

"We wish our district to be large enough financially, yet small enough that pupils can be quickly transported to school without spending too much time on the bus.

"We strive for a four-teacher staff and around 100 pupils as our minimum. That is a teacher for every two grades. Of course, in towns like Mt. Pulaski and Atlanta, there will be more teachers and in a limited few at present there may be less than four teachers.

"We advise the teaching of music both vocal and instrumental in our consolidated schools. Two school units may arrange the employment of a music teacher when they really get functioning with a centralized school. We are also looking forward to a county wide system of motion pictures — visual education — in the years to come.

"We take the viewpoint, that our small urban towns of Logan county are logical rural community centers, the place where rural people trade and go to church and therefore, make ideal centers for rural schools. In this way, we can preserve the rural environment, social contact, and farmer domination of our rural schools.

"By preaching this kind of gospel, coupled with the fact, that with consolidation pupils will have competition in class, we can offer distinct advantages to rural people. Also with a teacher for every two grades each teacher will have fewer classes and more time to give for recitation and study periods than is found today in so many of our one-room schools where a teacher may actually be teaching all grades, first to eighth, involving 25 to 30 classes a day with a 10 minute period for recitation.

"We are taking this survey to the people, and when these facts are so forcibly presented by actual charts on enrollment and financial resources, the reaction is an awakening of our rural folks.

"We do not advocate at present time the unit system in Logan county. We think it is impractical and the people are not ready for it and will not accept it.

"Our high school districts were laid out in a frenzied grab for territory. We cannot make our rural grade consolidation conform with high school boundaries. Nor can we vice versa, cut off high school boundaries to conform with rural community centers. However, in matters of transportation there can and will be mutual cooperation between high and grade school departments of education.

"In summary, we feel the rural people of Logan county want better educational opportunities for their children, yet they are practical, hard headed farmers with their feet on the ground and are not prone to listen to any impractical, visionary, theoretical schemes of consolidation of schools.

"We appreciate the interest you have taken in the movement for the reorganization of the schools and the assistance that you have rendered to us in Logan county."

Very truly yours,
Clem Garton

Alfalfa hay cured in sunlight lost more carotene than that cured in darkness or in the shade, according to Kansas Station tests. Windrowing alfalfa soon after cutting aids in retaining carotene, they found. High moisture and high root reserves were found essential to good seed production with alfalfa.

Poultry range studies by New Jersey Station researchers reveal that range-reared flocks show a considerable feed saving, especially in mash, over birds in confinement. Although chickens are said to be without sense of taste, these birds manifestly preferred redtop to red clover.

INTERNATIONAL SHOW PROMISES TO BE LARGEST IN YEARS

PRIZE lists increased by approximately 100 per cent over the 1941 show will be offered on many of the breeds that will be featured at the 1946 International Live Stock Exposition to be held Nov. 30 to Dec. 7 at the Chicago Stock Yards, ac-

A prize list of $6,000 for each of the three major beef cattle breeds — Aberdeen-Angus, Shorthorn, and Hereford — will be offered. A $2,000 classification will be given for Polled Shorthorns, same as in 1941.

Carlot feeder cattle will be dropped this year from the International's competition. In their place, a show featuring feeder cattle only in carlots will be held at the Chicago Stock Yards, Oct. 28-29, 1946.

Premiums totaling $5,320 will be offered in the October feeder cattle show. The cattle will be shown in four classes — steer and heifer calves and yearling steers and heifers in carlots of 20 head each, then judged and sold at auction.

With the admission of Hereford hogs to the competition, a new breed of swine will be added. Yorkshire swine are being reinstated.

The International also will include the junior livestock feeding contest, the collegiate and junior livestock judging contests and the spectacular horse show. Plans are under way for the return of the International Grain and Hay Show, world's largest crop show, which has been one of the important features of the exposition.

LONG-LIVED TIRE

HOW would you like to get 78,642 miles on your next set of tries? It takes a little more care than the average motorist bothers to take, but it can be done.

A well-worn Blue Seal Master tire is on display at the Illinois Farm Supply Company office to prove it. And it is not too far gone that you couldn't get another 15,000 or 20,000 miles out of it.

R. O. Almgreen, director of accounting statistics in the Chicago office of Farm Supply Company, kept track of the hardy Blue Seal casing.

Its record, according to Almgreen, includes 78,642 actual miles on the road, including 59,500 on the original tread and 19,242 on a Farm Supply re-cap. And the four-ply 6.50x16 tire still retains about two-thirds of the non-skid design of the re-cap.

LETTERS TO THE EDITOR

ON TO SAN FRANCISCO

We have been hearing considerable about the trip to the American Farm Bureau Federation convention at San Francisco, Calif., in December and were wondering about room and train reservations and their cost. Please let us know if there is any chance of us going.

We will be married 40 years in December and thought it would be a fine opportunity for us to celebrate our anniversary. If there is a chance for us to be included in the Illinois tour to San Francisco, we would like to go.

Thought it would be a good idea to get our reservations in as soon as possible because I suppose there will be a large crowd going from Illinois.

Mr. and Mrs. Frank L. Rathbun
Mercer County

You can bet your boots Illinois will be well represented at San Francisco. Finding housing for all will be a problem so the Rathbuns are smart in inquiring early. Answers to all your questions will be given in the September and October IAA RECORDS. See Pages 4 & 5.—Editor.

YOU CAN'T EAT DOLLAR BILLS

The longest assembly line on earth
Stretches from coast to coast.
Six million farmers ply their skill,
That you may have some toast.

Your T-bone steak comes off this line
But, them "dogies" have to grow.
It takes three years from the planning stage
On the range in New Mexico.

The corn belt farmer does his stuff,
He's proud of the moving chain.
With worn out tools he struggles on,
Against drouth or excessive rain.

His tractors purr from dawn till dusk
Here "slow down" is a crime.
There's been no "walk outs" on this line
And none draw double time.

No steel! No coal! No tools, produced.
No meat! No butter! they whine.
They strike again for increased pay,
And wreck their own food line.

When will our city cousins learn,
They can't eat dollar bills?
If they'd produce, as farmers do
Plenty would cure our ills.

Ol' Long Green

ILLINOIS HOGS TO CUBA

Last week I completed the sale of two carloads of purebred Poland China boars and gilts to the government of Cuba. They will be used to improve the breed of the country which at present has few Poland Chinas. This is the first shipment of the breed to be sent to Cuba in recent years and the only one to be purchased by the Cuban government this year.

Recently Dr. Juan Comple Leona, agent for the Cuban government made the trip with interpreter Roberto Azpiazo to Winchester, Ill., to close the deal.

The hogs were shipped July 31 in two specially equipped railroad cars and were accompanied to Miami by my father, Charles W. Jones. At Miami they were shipped aboard a boat and were in charge of Guillermo Padilla.

Because I lacked some gilts to fill my order I purchased 38 head from Austin and Clyde Patterson of Jacksonville to fill out the shipment.

LaVern Jones
Scott county

We're not surprised that the Cuban government came to Illinois for choice hogs after seeing the splendid animals on display at the Illinois State Fair in Springfield.—Editor.

PEOPLE ARE FUNNY

The manufacturer of whisky puts his grain thru a distillery, called a still. It comes out as firewater. The consumer pays $4 to $6 a quart, or 25-50c a drink for it, puts his glass on the bar and says, "Gimme another."

The farmer puts his grain thru a distillery, called a cow, and the consumer pays 12-20c for it, takes a drink and sets his glass on the table, and says, "Go easy on the milk, folks, the price is 'way up."

—Shawano (Wis.) County Journal

IAA FIGHTS INCREASE IN RURAL TELEPHONE RATES

Increased telephone rates sought by the Illinois Commercial Telephone Company in an application filed with the Illinois Commerce Commission are being opposed actively by the Illinois Agricultural Association.

The proposed rates would increase the annual telephone bills of the company's 86,000 subscribers in 181 communities by more than $880,000 annually.

More than 17,378 are rural subscribers. In addition there are more than 5,000 subscribers of farmer-owned lines switched by the Illinois Commercial Telephone Company.

G. W. Baxter, director of the IAA transportation department, has appeared at three hearings before the Illinois Commerce Commission on behalf of Farm Bureau members from the areas involved. Hearings will be resumed Sept. 17 at Springfield.

Long-time records show that for each bushel of corn that a farm produces above the average per-acre yield, the productive value of the whole farm is increased by about $4 per acre.

ON TO 'FRISCO!

(*Continued from page 5*)

Spanish missions and Brackenridge Park.

Dec. 4—Train arrives at El Paso after crossing central and western Texas at night. It's here you'll see the weird beauty of the Carlsbad Caverns, sure to be the highlight of the trip for many.

A trip across the Rio Grande into Old Mexico to the Spanish-Indian city of Juarez will be included if time permits.

Dec. 5—Phoenix. A 50-mile sightseeing trip that includes the Salt River Valley Irrigation Project.

Dec. 6.—Los Angeles. Trip by car through city and suburbs.

Dec. 7—San Francisco. Destination. A motor trip is planned over Golden Gate Bridge to see the Giant Redwood trees in Muir Woods.

The Illinois party will be in San Francisco six days and five nights. During this time convention officials will have additional entertainment.

Convention over, the Illinois delegates will leave San Francisco during the afternoon of Dec. 12.

The train will delay in Salt Lake City the following day for travelers to visit the Mormon Temple and hear an organ recital in the Tabernacle.

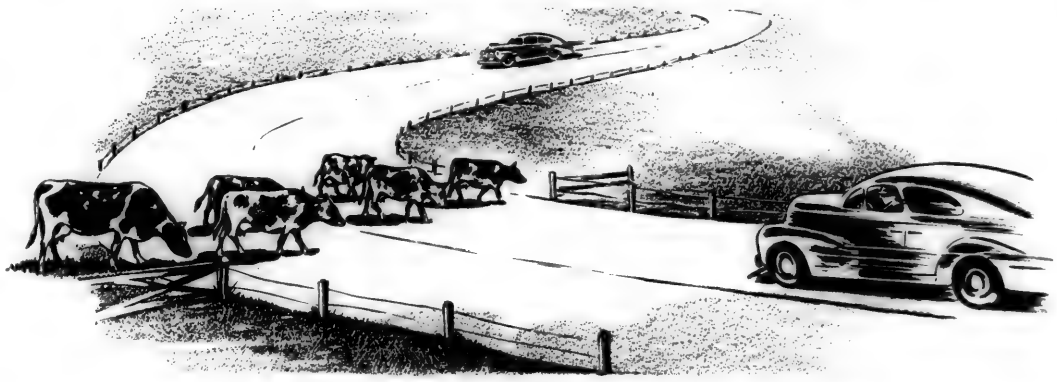
On Dec. 14 the train arrives in Denver after a 200 mile trip over the Colorado Rocky Mountains with a stop in the Royal Gorge.

The caravan arrives back home in Illinois on Dec. 15 when the train enters the Illinois Central Station in Chicago at 6 p.m.

For every billion pounds of corncobs burned, 16 million pounds of ash or mineral constituents are lost that should have been returned to the soil. Also 10,000 pounds of nitrogen are lost completely.

Employes of the Illinois Agricultural Auditing Association are first to move into the IAA's new 12th story home at Wabash and Ohio streets, Chicago. Watching Jim Callahan scrape off the name of the former occupant are: left to right, Dorothy Mogren, Verna Gridley, Clair Schneider, and Joseph Gough.

JURIES FIND
TWO FARMERS LIABLE FOR
LIVESTOCK ON HIGHWAY



Two policyholders in Country Mutual Casualty Company will testify as to the need for insurance as the result of verdicts against them in two lawsuits growing out of injuries sustained by motorists when their automobiles collided with livestock out on the highway. These verdicts were recently returned by Illinois juries in these cases:

CASE A (Eastern Illinois County)

Jury awarded motorist $4000 for injuries received in collision with horse which broke through barbed-wire fence and walked out on highway.

CASE B (Northern Illinois County)

Jury awarded passenger in truck $7,500 for back injuries suffered when truck collided with hog which got loose and was on highway.

These farmers were fortunate to have a Farmers General and Employers Liability policy in this Company. This policy covers accidents such as those described above and also provides protection for claims from injured employees.

See Your Insurance Representative at the Farm Bureau for Full Particulars.

COUNTRY MUTUAL CASUALTY COMPANY

608 South Dearborn Street **Chicago 5, Illinois**

BEWARE OF SEPTEMBER

By Walter W. Whitlock

Director, IAA Safety Department

SEPTEMBER is a dangerous month. And here's why.

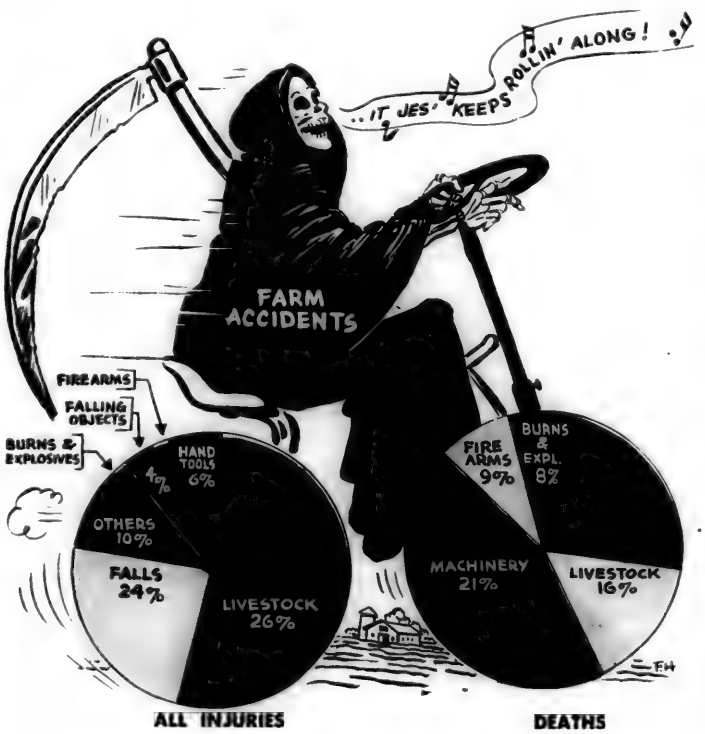
As this 30-day period passes into history, nine of you Illinois farm people will have been put out of action every day by serious farm accidents and two of you will have been killed every third day.

It isn't a pleasant prospect to think that you might be one of the victims. You probably won't be if you are careful. It's the fellow who takes chances that winds up as a statistic in the accident records.

What sort of accidents do you get involved in on the farm in September? Let's take a look at the statistics compiled by the IAA Safety Department's study of September farm accidents in Illinois as reported in newspapers from 1940 through 1943.

But before we look at the records, we would like to remind you folks with children that you have a double responsibility. You have to be careful yourself and you have to teach your kids to be wary of accidents.

Why? Because at least one Illinois farm child is killed or injured every day in September! Once a week a child is killed! It would be silly of me to ask if you want anything like that to happen to your children. Of course you don't!



SEPTEMBER

FARM HOME AND WORK ACCIDENTS IN ILLINOIS

But you will want to keep in mind the principal causes of deaths and accidents on the farm in September. First of all farm machinery and livestock take their usual high toll as the most hazardous things on the farm to fool around with. Together, they cause five serious accidents daily.

Half of the 280 machinery accidents during the Septembers, 1940 through 1943, were attributed to the tractor. Refueling hazards, falling off, turning over, suffering crank kicks — these are still sources of grievous tractor troubles that can be avoided.

Remaining machinery mishaps involved mowers, spreaders, combines, corn machines and others.

Among Illinois farm children between the ages of six months and 15 years, machinery causes about one-third of all the accidents in September which averages about 35 deaths and accidents. Of the 10 accidents involving machinery during a recent 30-day period, three injuries and one death are attributed to the tractor. Other machines injuring children were the rotary hoe, spreader, cornsheller, truck, feed grinder and mower.

Of all the 280 September accidents with livestock, "Old Dobbin" took more than two-thirds of his share, while Bossy was a worse offender than the highly vaunted male.

Falls ranged from toppling from farm buildings to falls during work. Barn and hay-mow falls were high.

The use of hand tools accounted for 63 of our total, but encouragingly no deaths.

Four per cent of the total is caused by falling objects. Farmers still get in the way of falling trees. They still allow everything from timothy to tractors to fall on them.

September opens the hunting season on some game — and with it two per cent of the deaths and injuries from firearms. Watch your newspapers this month — they will carry the usual stories of the "gun that wasn't loaded," the fellow who dragged the gun through the fence behind him, and the hunter who strayed away from the hunting party later to be mistaken for some sort of game.

Burns and explosions account for two per cent of accidents in this month, but don't let that lull you into a false sense of security. This same cause accounts for 13 per cent on the yearly basis. Right now is the time to get your heating apparatus ready for winter.

(*Continued on page 23*)

Bert Vandervliet Rejoins IAA Staff

Bert Vandervliet, since 1942 representative and research consultant of the Taxpayers Federation of Illinois, has been hired for work on rural taxation problems for the Illinois Agricultural Association.

B. Vandervliet

Expert on practical tax problems, Vandervliet is familiar to Farm Bureau members, having served as assistant director of the department of Taxation and Statistics for the Illinois Agricultural Association during 1937-1942.

He left the IAA to work for the Taxpayers' Federation of Illinois and in 1946, on leave of absence, served as executive secretary of the civic federation of Madison and St. Clair counties.

Born and reared at Danforth, Iroquois county, Vandervliet received degrees from Colorado College and the University of Cincinnati.

Before he first joined the IAA staff in 1937, Vandervliet worked as research assistant for the Illinois Commerce Commission.

Prior to that he worked on a survey for the Tennessee Valley Authority and served as executive secretary for the Cincinnati Regional Crime Commission.

Bernard Hicks, Farm Bureau member from Jo Daviess county and owner with brother, John, of Evergreen Airport on farm south of Warren, polishes 4-seated monoplane as Bob Hubner, center, and onlooker help. Next morning Hicks flew plane with wife and neighboring couple to Flying Farmers field-day at Purdue in July.

FARM LABOR RELIEF MAY BE IN SIGHT

Farm labor is hard to get but for the first time in three years relief seems in sight, reports George B. Whitman, assistant state supervisor of the University of Illinois extension farm labor program.

More married men now want jobs on farms than can be placed, due in large part to returning veterans who can find no housing, he says.

Wages for married men, as reported from DeKalb county, are set at $125-$140, and for single workers are $90-$110. For counties south and away from congested industrial areas wages are from $25 to $50 less.

Smallpox vaccination makes one a carrier of cow-pox virus, and a vaccinated person can pass on the disease to a cow.

R. W. Armstrong Joins Illinois Grain Staff

Russell W. Armstrong, 41, of Jacksonville has been employed as field representative for Illinois Grain Corporation, Illinois Agricultural Association grain brokerage affiliate.

R. W. Armstrong

Armstrong will travel throughout the state contacting elevators and the organization's offices at Mendota, Peoria, Bloomington, St. Louis, Champaign, and Jacksonville. He also will solicit new elevator membership and business.

The new field man was born in Hardin county, Kentucky, and moved with his parents as a small child to Illinois where he was reared on a farm in Warren county. He attended Kirkwood schools and later took a business course.

His entire working career has been devoted to selling and promotion and he has spent 15 years on the road in Wisconsin, Michigan and chiefly Illinois.

After working for an oil company at Monmouth, Armstrong did sales and promotion work for flour and feed companies. For the past several years he has been a salesman for the Nebraska Consolidated Mills of Omaha.

Junior 4-H Club Leaders Hold Annual Training Camp at Lake Bloomington

Junior leaders at 4-H training camp held July 23-27 at East Bay cross trestle bridge over Lake Bloomington, form evening chow line, are busy making new friends. They've spent day in organization-leadership talks aimed at making them better leaders on return to local clubs.

At morning flag raising ceremony on commons near lookout cabin members stand at attention while Gene Bischoff, Nancy Stuckey and Cletus Schertz unfurl flag. Later in day during group talks they agree on toughest membership hurdle — uncooperative parents.

Highlight in day comes when groups swim, ride paddle-wheeler on twilight cruise. Boys help sing spirituals, girls giggle at wettings from fresh-water spray, both banter with youth assistant leaders. Delegates are chosen on merit by local committees.

Rural Youth

By
ELLSWORTH D. LYON

Camp life was popular again this summer. Elizabeth Hardy, Morgan, reports, "Morgan revived county camp, Aug. 31 to Sept. 1 at MacMurray Cabin on Lake Mauvaisterre." They've done it before and they did it again! Stephenson sponsored a successful county camp at Krape Park, Freeport. District camps reported to date are Shaw-Waw-Nas-See, July 13 and 14; Meron, Ind., Aug. 30 to Sept. 2; and Eastman, Sept. 7 and 8. These camps with the state camp at East Bay gave a large number of Rural Youthers a pleasant summer camp experience.

Edwards county Rural Youthers tour a brickyard as part of their educational program, "Know Your County."

Borrowing an idea from Bill Smith's and Clareta Walker's talk with Rural Youth "Over the Back Fence," learning can be fun — even in summer. Wabash enjoyed a study of safety led by Rose Knust. South Cook heard a talk on "Camera Technique." Massac discussed insurance led by general agent, C. Williams. Will heard a talk and saw pictures upon life in the Hawaiian Islands. Both were presented by veteran Bob Wallace. Whiteside's Newton Notions and Prophetstown's Tampico Warriors studied etiquette while the Morrison Merrymakers and the Twin City Ripples discussed citizenship. Edgar, led by Farm Adviser L. E. McKenzie, Home Adviser Helen Turner, and Youth Assistant H. B. Deffenbaugh, participated in a home grounds planning tour.

Rural Youthers have been providing service to their communities on hot days and at the same time replenishing their treasuries by running refreshment stands at county fairs, 4-H shows, sports festivals and Farm Bureau picnics. Among the counties engaging in this activity are Lawrence, Marshall-Putnam, Macoupin, Champaign, LaSalle, and Logan.

Hank Imig, Dick Stone, and John Schaefer were the responsible leaders in the now famous Mason County annual hayrack ride and watermelon bust. Flora Conant's home was the honored place for the Pulaski-Alexander group featuring square dancing and a watermelon party. DeKalb planned a hayride and weiner roast for their "bang up time" in August. Maxine Baughman reports that Clark held a hayride and watermelon feast. What you can't do with a watermelon! Warren held one meeting in the form of a hayrack party. No watermelons are mentioned in the report.

Carlos Reichert, youth assistant in Iroquois county, took 50 of his group by bus to Ideal Beach, Ind., for their big summer picnic. Montgomery held its annual all-day picnic at Lake Hillsboro. The girls furnished the fried chicken and the boys the soft drinks. About 65 attended the Rural Youth picnic supper at the Sparta Country Club late in July. Carroll combined a picnic supper with its county sports festival in Old Mill park, Savanna. Champaign and LaSalle took the boat from Chicago to Benton Harbor, Mich.

St. Louis became the more popular center of picnics, boat excursions and other summer activities for many counties during July and August. Wabash went by chartered bus for a picnic in Forest Park and later to see "Robin Hood" by the Municipal Opera. Pike went to Highland Park but added a double header ball game at Sportsman's park to its picnic; and in the evening a boat excursion. Schuyler concentrated on Forest Park and the Zoo. Rayetta Morgan hopes this will not be the last of such trips although the first for several years. Jackson, with 47 in the party, spent an enjoyable day on the S. S. Admiral. The Logan group "sailed" on the S. S. Admiral but scattered for various other activities.

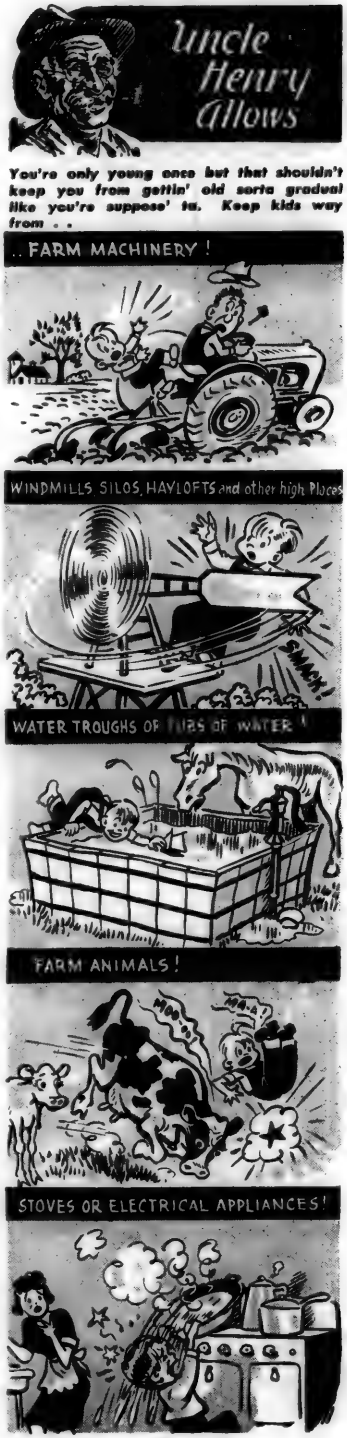
Rural Youthers engaged in active forms of recreation even in summer. Ogle danced at a county-wide party on the outdoor pavilion at the Pines. Wayne included square dancing as part of its annual peach festival. Brown, Schuyler, and Morgan converged upon Nichols park, Jacksonville, where a number of Rural Youthers warmed up in a hot softball game while others relaxed in a cool swim. Stephenson's second annual overnight camp at Krape Park, Freeport, had among other activities, such recreation as square dancing, boat riding, and tennis. At the later meeting they put on the rollers for a big skating party.

Kane county, divided into two groups to save gas during the war, has united again. Don McClay is the new president and Don Stoxen is the reporter.

While a number of counties have planned county Talk Fests, we are happy to know that Clinton, a newly organized county, is on the list also.

Wedding Bells — Miss Audrey Ryan, daughter of Mr. and Mrs. G. B. Ryan of Owaneco, Ill., and LeRoy Martin, son of Mr. and Mrs. Chas. Martin of Witt, Ill., were united in marriage on July 21. Audrey is a former member of Christian County Rural Youth, and LeRoy is former vice-president of Montgomery County. Mary Jane Reitzel and Bob Heller of Whiteside were married on July 3. We don't know about Bob but Mary has been an active member in Rural Youth. They reside at 505 Lincolnway, East Morrison.

Sumner Johnson, "live wire" president of Knox is leading his group to new heights. A twenty-two passenger plane chartered to transport part of the membership to the State Fair, Aug. 13, is evidence. A refreshment stand and the selling of racing programs at the Knox County Fair brought $300 net to the treasury of Rural Youth.



FOR NOVEMBER PRODUCTION

Although present egg prices are not very favorable, a month or two will doubtless improve the situation.

The experienced poultryman will start NOW to build his pullet flock, so that by November he will be able to cash in on the seasonably higher prices.

"FREE CHOICE" FEEDING

During recent years this program has become very popular because of its convenience and the economy it effects in time and labor.

"Free Choice" is a method of feeding BLUE SEAL POULTRY BALANCER with farm grains. This allows the pullets to balance their own rations according to their individual requirements.

"Free Choice" eliminates grinding and mixing or purchasing a lay mash if farm grains are available.

"MASH and GRAIN" FEEDING

This program is widely used and well-adapted in grain-deficient areas. The "mash and grain" method consists of feeding Blue Seal Lay Mash along with whole farm grains.

Where supplies of farm grains are adequate, an economical lay mash can be made by mixing ground grain with Blue Seal Poultry Supplement according to directions on the tag.

BLUE SEAL

Begin NOW on one of these systems!

Careful planning and feeding will get your pullets into top production for the higher November egg market.

Ex - GI is Cook County's 3500th Member

Richard Nesler, center, ex-serviceman and Cook county's 3500th Farm Bureau member, shakes hands with IAA President Charles B. Shuman. C. H. Mills, Cook COD, left, looks on.

"I'M MORE convinced than ever that the farmer needs to be organized. That's why I joined the Farm Bureau when I returned from service."

These are the words of Cook County Farm Bureau's 3500th member who recently signed a membership contract. He is Richard Nesler, who is farming a 130-acre dairy farm with his father, Fred, five miles northeast of Elgin.

Richard returned to farming this year after nearly five years in the army. Most of the time was spent in New Guinea and the Philippines.

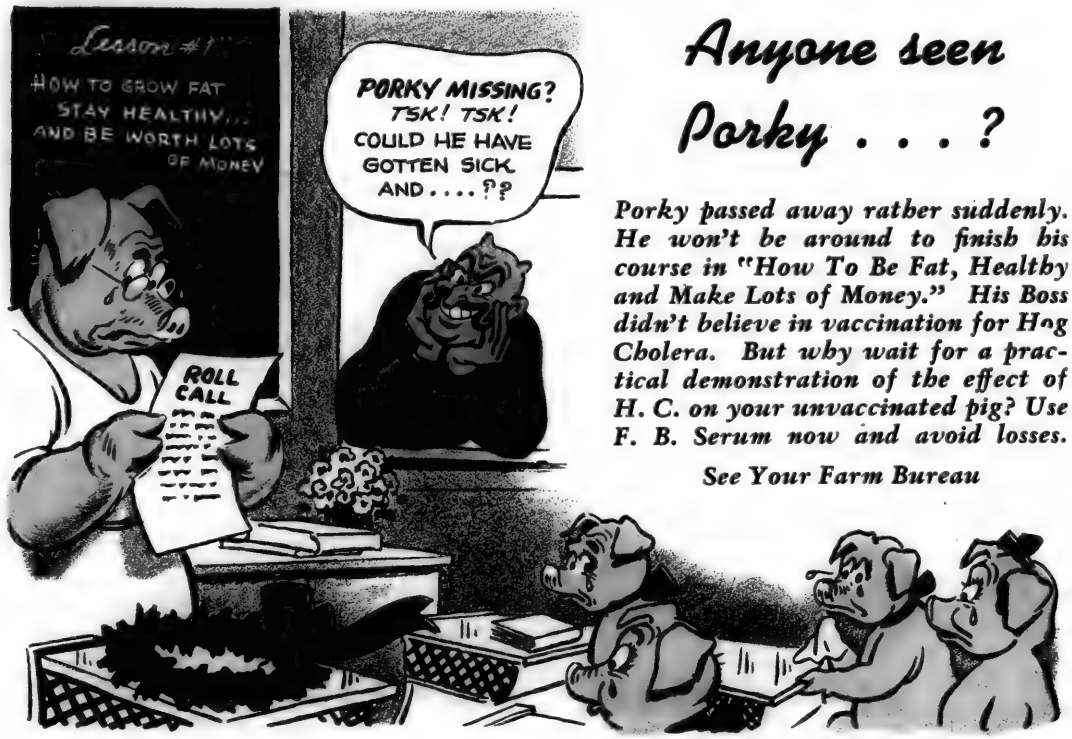
"I figure young farmers should pitch in and join the Farm Bureau and help build the organization," Richard said. "My Dad has been a Farm Bureau member for 20 years, but I figured it was pretty near time when I went on my own and had a membership too."

C. H. Mills, Cook county organization director, considers it prophetic that the 3500th member should be a young man returning from overseas duty to take his place in the life of the community. One of the first things Richard did when he returned was to enter into a partnership with his father in operating the home farm. The next step was to identify himself with an organization working for a better farm life—the Farm Bureau.

"Just as this young man had joined," Mills said, "so are thousands of young farmers entering the Farm Bureau, and by so doing helping to restore the nation to normalcy. As has always been the case, the hope of the future lies in our young men stepping out and taking their proper place in the business world."

Signing the 3500th member in the Cook County Farm Bureau marks the achievement of another goal. It doesn't seem quite possible that back in 1927, Cook county had less than 200 members. At that time there was some suggestion that perhaps there wasn't enough agriculture in Cook county to maintain an organization. The leaders thought differently and as a result the Cook County Farm Bureau has moved ahead steadily. In 1940, the 2000-member goal was reached. Three years later, the 2500-mark was passed, and in 1944, membership had climbed to 3000.

With the 3500-mark attained, Cook County Farm Bureau is ready to move to new highs.



Anyone seen Porky . . . ?

Porky passed away rather suddenly. He won't be around to finish his course in "How To Be Fat, Healthy and Make Lots of Money." His Boss didn't believe in vaccination for Hog Cholera. But why wait for a practical demonstration of the effect of H. C. on your unvaccinated pig? Use F. B. Serum now and avoid losses.

See Your Farm Bureau

BEWARE OF SEPTEMBER

(*Continued from page* 18)

1090 accidents. But watch 'em. These miscellaneous things are killers just the same. They include that penny behind the fuse, the old rusty barbed wire fence, the lightning that couldn't strike twice in the same place, and the saving of a few cents by home cleaning with naphtha or gasoline.

Among accidents to farm children during our recent 30-day check, falls of all sorts added seven more to the total. One of these was a two-year-old child who fell on a broken fruit jar and was killed when the glass entered the heart. Three small children were drowned during the month.

Other causes, including farm animals, lightning and electricity, round out the total number of farm accidents averaging about a child-a-day seriously injured or killed on Illinois farms.

September IS a dangerous month! Let's be more careful this September!

NEW BILL MERGES FARM CREDIT AGENCIES

During the last session of Congress a bill was passed and signed by President Truman authorizing the Farmers' Home Corporation, designed to streamline the administration of the government's agricultural credit and related activities.

The purpose, as explained by the bill's sponsor, Rep. Cooley (Dem.-N.C.), is "to give only one agency the power to make direct loans to farmers, and to limit those loans to farmers who cannot get credit anywhere else."

The bill will abolish the Farm Security administration, some activities of the Farm Credit administration, and all activities of the National Housing agency which pertain to property and other assets formerly managed by the FSA. The bill likewise requires the liquidation of all subsistence loans made by the FCA. It contained a number of American Farm Bureau Federation recommendations.

PRE-COOLED PEACHES

Pre-cooled peaches hold up two to three days longer than those refrigerated under old methods causing less shipping loss. By this method peaches lose their field heat in a matter of a few hours.

Farm records show that in cash-grain areas year-to-year earnings tend to be higher where less than 15 per cent of the tillable land is maintained in clovers and alfalfa than where more land is kept in those crops.

"Let's pull together"

during the coming fall and winter months by storing plant foods on the farm. It appears that the supply by next spring's crop season time will not be sufficient to fill the need of Illinois farmers. It promises to be more plentiful, however, during the "off-season" fall and winter months.

Your Blue Seal Distributor will secure a major portion of the supply for your county during these months, but it is obvious that he can order no more than can be stored.

Give a hand **— by storing next season's needs on your farm — your supply will be assured, the handling expense will be less, and your savings will be increased.**

Blue Seal Plant Foods are of high quality and can be stored safely during winter.

FARM STORAGE HINTS

1. **Keep fertilizer dry from the car to your barn.**
2. **Store it in a weather tight building. (Tight roof and sides and a good floor.)**
3. **Pile away from walls since they collect moisture in cold weather.**
4. **Pile on a wooden floor, or better yet, on a platform several inches off the floor.**
5. **Limit piles to 5 or 6 high, if possible, certainly not over 10 high. Greater weight increases tendency to harden.**
6. **Pile the bags loosely, leaving a space between piles for free air circulation.**

ILLINOIS FARM SUPPLY COMPANY

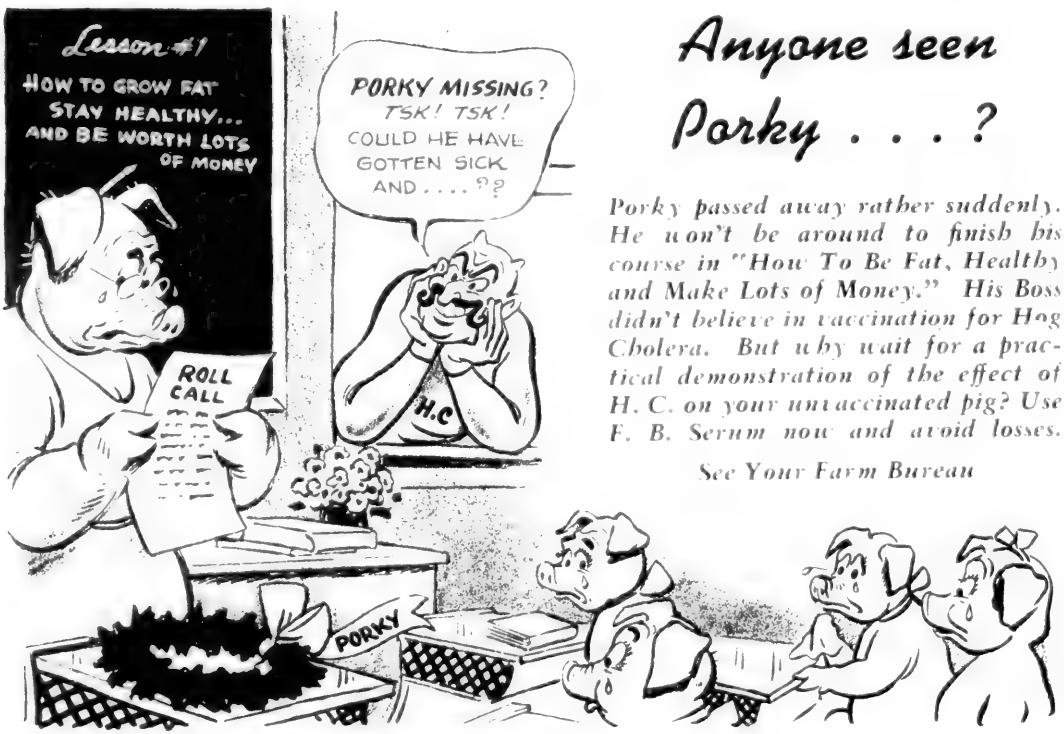
Ex - GI is Cook County's 3500th Member

Richard Nesler, center, ex-serviceman and Cook county's 3500th Farm Bureau member, shakes hands with IAA President Charles B. Shuman. C. H. Mills, Cook COD, left, looks on.



Anyone seen Porky . . . ?

Porky passed away rather suddenly. He won't be around to finish his course in "How To Be Fat, Healthy and Make Lots of Money." His Boss didn't believe in vaccination for Hog Cholera. But why wait for a practical demonstration of the effect of H. C. on your unvaccinated pig? Use F. B. Serum now and avoid losses.

NEWS and VIEWS

HOME BUREAU ASKED TO HELP FOREIGN YOUNGSTERS

CHILDREN in war-torn countries are not as fortunate as our boys and girls here. At the Jacksonville conference it was suggested that the Home Bureau units send a package or packages for these youngsters.

If you would like to have your package arrive for Christmas, mail it before *October 1.*

Packages are sent to the Children's Fellowship and Gift Association and this organization distributes the packages to the needy children.

If you are planning to send a Christmas box, or any box, please follow the directions as listed to insure the safe arrival of your package.

1. Check with your local postmaster as to size of package and list of items that may be included and come within specified rules. (Regulations change frequently.)

2. Enclose individual's name and address, or name of unit and the unit president's name and address.

3. Send record of mailing to Mrs. L. J. Killey (chairman of the Illinois Home Bureau Federation committee on ACWW), Monmouth, Illinois.

4. Address package to — Children's Friendship and Gift Association, 28 Victoria Street, London S. W. 1, England, and label "Unsolicited Gifts" and either "Used Materials" or "Materials of no Value," according to contents. Since the packages are gifts, payment of duty will not be required if marked as suggested.

5. Suggested items: small toys, tins of milk, cod liver oil (tabloids) comb, writing paper and pencils, toothbrush, needle, thread, and buttons, (these are very scarce) handkerchiefs, hard candies, children's clean clothing, pieces of material, cocoa.

6. Wrap contents of package in a children's clean garment, piece of material, or tea towel before wrapping in heavy paper. This gives extra protection to contents and adds another article to the package.

7. List contents of package on the outside.

Home Bureau Federation officers at Jacksonville conference. Front row, left to right: Mrs. Stanley Castle, immediate past president, chairman legislative committee; Miss Myra Robinson, treasurer; Mrs. James C. Graham, secretary; Mrs. E. D. McGuire, director southeast district; Miss Pearl E. Barnes, president; Mrs. W. M. Kimmelshue, director northeast district; Mrs. Frank Garwood, director southwest district; Mrs. Emile Rediger, recreation chairman. Back row, left to right: Mrs. Elsie Mies, past president and member organization committee; Mrs. W. R. Goby, health chairman; Mrs. Dale Huffman, chairman organization committee; Mrs. John Clifton, chairman organization committee; Mrs. D. M. Ames, director east-central district; Mrs. Loren Johnston, director west-central district; Mrs. Kathryn Van Aken Burns, state leader; Miss Nora Bare, home adviser association; Mrs. R. E. Milligan, music chairman.

Home Bureau Holds Organization Conference at Jacksonville

MEMBERSHIP in Illinois Home Bureau was reported as 35,036 at the Organization and Citizenship conference held at MacMurray College in Jacksonville in July.

The new figure shows an increase of 5,971 during the year or nearly double the goal set at last year's conference. The goal for 1946-47 was set at 40,000.

During the year, Franklin county was added with its 363 Home Bureau members. County making the greatest numerical gain was McLean with 182 new members. Cook county showed a gain of 169 and Jackson-Perry, 136.

Throughout the four-day session, attended by 172 delegates, training for leadership and civic responsibilities was stressed.

One of the most important aspects of rural life considered was that of the state of Illinois' rural schools and education. Leading the discussions on this topic were John K. Cox, Illinois Agricultural Association director of rural school relations, and Hans C. Olsen of Eastern Illinois State Teachers College.

Other topics discussed by the delegates included rural living, rural health, world relations, child care, leadership and organization.

Foreign Brides Get Free Home Bureau Membership

Girls of foreign lands who married G. I. Joes from Madison county are lucky. To assist these brides in getting acquainted with us and to learn our American way of life, the Madison County Home Bureau offers a year's membership in the Home Bureau without charge . . . . from Mrs. Stanley Castle, Alton, immediate past president of the Illinois Home Bureau Federation.

for HOMEMAKERS

HOMEMAKERS ASKED TO KEEP SAVING FATS

The great need for fat salvage is no secret — the United States wants fat for soap and other manufactured products, and foreign countries need it for food. Yet only 62 percent of America's homemakers are actually saving and using all the fats that come into their kitchens, says Miss Frances Cook, foods specialist, University of Illinois College of Agriculture.

It is estimated by the Consumers News Digest that 500 million pounds of fat could be salvaged each year, but one-half of this potential goes down the drain. During 1945 salvaged fats were used for nearly one-half the toilet soap produced, all of the laundry bar soap and about 25 percent of the heavy-duty packaged laundry soap.

Now additional demands are being made upon the fat supply to help improve the meager food stocks abroad. "With this urgent need for food, it seems inhuman for any one of America's homemakers to waste fat," states Miss Cook. "Yet one-third of them do. And this third is without question continuing to buy its share of the available soap.

BUFFET SET TO SAVE TABLES

Crocheted in light and dark cotton, this pattern is adaptable to many runner needs. Shown here is set of three pieces for buffet. Attractive for table, vanity and bureaus. Saves furniture too. For free instructions send enclosed self-addressed envelope to Women's Editor, Illinois Agricultural Association Record, 608 S. Dearborn Street, Chicago 5, Ill.

FRONTS FOR FALL SUITS

Here's a chance to pep up your suit with a brave new front. The checkerboard dickey is swell for tailored wear, for sports try the plaid gingham, and for the completely feminine the organdie dickey. For free instructions send a self-addressed stamped envelop to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

Hancock Serves Lunch

Mrs. Emmett Dunham, Plymouth, president of Hancock Home Bureau, reports that Hancock Home Bureau members had a stand at the Hancock County Junior Fair and served plate lunches (a balanced diet) at 55 cents.

"The concession which our organization had at the County Fair proved to be a financial success and a beautiful job of cooperation among the Home Bureau members," writes Mrs. Dunham.

Swine Show, Sept. 16

Midwest 4-H and vocational agricultural members will enter an estimated 700 to 900 barrows they have fed and fitted at a swine show featuring market hogs at the Chicago stock yards, Monday, Sept. 16.

Edgar county has scheduled Vee Powell, Chicago, hat designer, for September 6, in Paris.

HERE'S HOW TO MAKE YOUR GARDEN LILY POOL

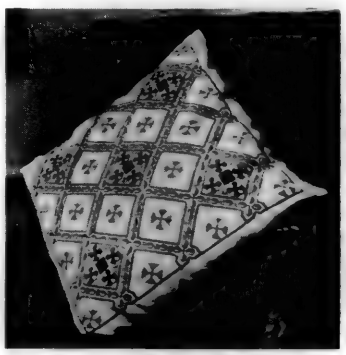
Many persons who would like the attractive, cool appearance of a lily pool in their garden hesitate to attempt it because it is considered too expensive. But according to S. W. Hall, floriculturist, University of Illinois College of Agriculture, it is possible to build an inexpensive pool, too.

A small, reinforced concrete pool can be constructed by the home owner himself at a very moderate cost, and a less permanent pool can even be made of a wooden washtub or a halved wooden barrel at still less expense.

Supplying the pool with running water will of course increase the water bill, but so long as the water is changed occasionally, running water is not essential. The water can be siphoned out or, better still, a drain can be provided.

"If your water-garden is to grow successfully, it must be placed where it will receive full sunshine," says Mr. Hall. Then, too, it would be well to consider the rest of the garden when deciding on the location. The pool should be a definite part of the garden — not a feature that has strayed away and become lost.

PATTERN FOR PILLOW SLIP



Here's a stylized embroidery pattern with all-over design combining myrtle green, red and blue. Embroidery is worked on linen-like fabric of regular weave. Makes attractive pillow top or handsome card table cloth. For free instructions enclose self-addressed envelope to Women's Editor, Illinois Agricultural Association Record, 608 S. Dearborn Street, Chicago 5, Ill.

Don't put it off any longer!

Paint up with SOYOIL!

Recondition that roof with

I. F. S. ROOF COATING

and

SOY-ZINC

I.F.S. ROOF COATING is an asphalt and asbestos compound which seals cracks and worn places in old roofs.

It is easily applied and gives added years to the life of your roof.

For metal roofs, gutters, and downspouts, we recommend SOY-ZINC. It is a primer for rusted metals and makes an excellent foundation for aluminum or metal paints. It can also be used as a finish coat.

For a good barn paint, you can't beat No. 90 SOYOIL Red Barn Paint! Thousands of farmers in Illinois have proved its superiority. It is specially prepared for use in this climate.

You will be pleased with its rich color, its long-lasting qualities, and with its mildew-resisting properties. Here's a barn paint made for barns!

INTERIOR PAINTS

Now is a good time to re-decorate the interior of the house, too. A variety of colors and tints is available in the SOYOIL line. A choice array of pastel shades can be had in SOYLITE casein paints. Use of SOYNAMEL, in pleasing colors, is a quick, easy way to beautify kitchen and bathroom walls and woodwork.

OPPORTUNITY AND RESPONSIBILITY

By President Charles B. Shuman

TALK is cheap! Most of us have been free to express our determination that our democratic form of government shall be preserved against its many enemies, both from within and outside our nation. The time for action is at hand! We can do something more effective than talk on November 5.

No Congressional election in the history of our nation has been of any more importance than this; the first opportunity for the farmers to register their calm, deliberate judgement, unprejudiced by the influence of war.

The continued strength of our democracy depends upon the active participation of all citizens of voting age in affairs of government. There is more danger that democracy may fail by default than by conquest. Every non-voter in November is actually casting a ballot against our form of government.

Unlike many other organizations, the Illinois Agricultural Association has never attempted to tell its members how to vote on partisan issues. Rather, we have attempted to give the farmers all the facts concerning issues and past voting records of the candidates. This trust in farmers' ability to think for themselves and vote their honest convictions has not been misplaced.

The respect and power which your organization has in legislative halls is due largely to the fact that farmers have supported their friends at the polls. Elsewhere in this issue of the RECORD you will find an analysis of some of the principal agricultural issues together with the voting record of your members of Congress on these issues. This issue of the IAA RECORD also carries the voting record of the members of the State Leglislature. Study this information, then vote your honest convictions.

In Illinois this coming election is doubly important. For years farmers have been fighting for some badly needed constitutional reforms. At the last session of the State Legislature the IAA sponsored and helped secure passage of the Gateway Amendment proposal which would make these reforms possible and which is to be submitted to the voters at the election November 5. Every farmer should read the article in this issue of the RECORD explaining the importance of securing a favorable vote on this amendment.

The Gateway Amendment proposal is printed on the same ballot with the list of candidates and must receive a majority of all votes cast in the election for adoption. In other words, failure to mark the Gateway ballot is the same as a vote against the proposition. Be sure to mark your ballot for this amendment.

As farmers and good citizens our most important opportunity and responsibility on Tuesday, November 5, is to go to the polls first to support our proven friends in the election, and secondly to vote for the Gateway Amendment.

FUN AT THE SPORTS FESTIVAL

IN A thrill packed two days marked with the zest and spirit of hard play Vermilion won first place among 70 contending counties at the seventh Illinois Farm Sports Festival held Aug. 29-30 at Champaign-Urbana.

Farm men, women, boys and girls — some 3141 — competed in 40 contests during the Festival. Attendance was estimated at from 18,000 to 20,000.

The thousands of farm families, friends and neighbors who attended praised the warmth, spirit and clean,

1. Dancing Baton Twirler Beth Puresh, Henry, struts her stuff.
2. Over the bar goes Gwen Lawler of Kane county to win high jump for girls 16 and over.
3. Sharon Wilson, Champaign, tries 4-H physical fitness chinning bar.
4. Agnes Layden, Vermilion, leaps 12 feet 2 inches, wins broad jump.
5. Mrs. Ola Harshbarger, Piatt, tosses a deadly horseshoe to win title.
6. Champaign county's tug o' war team strains in vain.
7. Mrs. Roscoe Smith, Kane, hammers her way to runner-up in nail-driving contest.
8. Colorful version of the Swedish Doll Dance earns Tazewell county "A" rating.

sharp play that marked this great rural sports pageant.

Vermilion with the high score of 2120 points took first place in district I. DeKalb placed first in district II with 2025 points. Henry was district III winner with a score of 1270.

Will county won the Farm Bureau Baseball league state championship by defeating Macon county 2-1 in a hard-fought 11 inning game.

Will won its way to the finals by de-

(Continued on page 24)

9. Champaign makes music with kitchen utensils and accordion.

10. King of Illinois hog callers is Alfred DeCap, Whiteside county.

11. University acrobats present dazzling show during afternoon.

12. Trapshoot playoff is won by J. T. Kensil, Shelby, after tie.

13. First in fancy diving, Lona Martin, Champaign, starts a swan dive.

14. Robin Hood of Farm Bureau archery is John Livengood, Piatt.

15. Memorial Stadium attracted many youths for the track events.

16. The grunt and groan boys show latest in wrestling.

17. Vice President F. E. Morris, Sangamon, speaks for the IAA.

18. Up to bat is Peoria Rural Youth, third place winner.

19. Checker Champion Glen Schall (right), Macon, downs Ernest Turner, Champaign.

Voting Records of Illinois Issues Affecting Farmers..

IN ACCORDANCE with action taken by the voting delegates of Illinois Agricultural Association at an annual meeting several years ago, the Board of Directors has authorized and directed the publication of the following statement, together with the records of the members of the General Assembly as determined by their votes and general attitude on matters of important legislation directly affecting farmers, as supported or opposed by the Illinois Agricultural Association. There are numerous measures of considerable interest to agriculture in the 1945 session upon which the Association took a position. However, the Association regarded the bills for the assessment of property at its full value (which the I.A.A. opposed), the Gateway Amendment to the Constitution and the companion party circle bills and the bills making an appropriation for farm-to-highway roads as the most important legislation affecting farmers. The voting record of downstate legislators on these measures was given in the September, 1945, issue of the RECORD. In view of the fundamental importance of these measures, this report is weighted heavily by the vote and attitude of members of the legislature on these issues.

Basis of Report

This report is based entirely upon the legislator's record and attitude as observed in Springfield. The Association has not given and obviously cannot be aware of, or give consideration to, the rec-

Illinois Congressmen's Vote on Vital Issues

TWO of the most important domestic issues considered by the second session of the 79th Congress were the extension of price control beyond June 30, 1946, and the Case and Hobbs labor bills.

Position of the Illinois Agricultural Association on price control as set forth in its policy resolutions at the 31st annual meeting consisted of three major points; controls should be applied equitably to industrial prices, farm commodities and wages; all controls should be revoked as rapidly as supplies come into reasonable normal balance with demand, and consumer subsidies should be removed as rapidly as possible, and price ceilings should be adjusted accordingly.

The IAA board of directors on April 19, in support of this policy resolution, issued a statement calling for the elimination of consumer food subsidies rapidly and according to a definite schedule terminating not later than Dec. 31, 1946, adjustment of retail price ceilings to offset the subsidy removal, removal of all OPA controls, except possibly rent and a very few scarce items, by March 30, 1947, and adjustment in ceilings to reflect increased costs of production.

Wolcott Amendment

This position of the IAA on price control was embodied in several of the amendments presented in the House during the debate on the extension of OPA beyond June 30, 1947. One of these amendments was that introduced by Representative Wolcott. It provided for the liquidation of consumer subsidies on a definite schedule and provided that adjustment be made in ceiling prices in lieu of such subsidy payments. The amendment also provided the ceiling prices would reflect all increases in cost of production to producers incurred since Jan. 1, 1941. The vote of Illinois representatives on this amendment is printed in the next column. This amendment was adopted by a vote of 245 to 150.

When the new OPA bill was being debated in July, 1946, in the Senate, the IAA urged Illinois senators to support the Reed amendment for the removal of grain price controls and the Wherry amendment for the removal of livestock price controls. The vote on these two amendments by the Illinois Senators are printed below.

Case Bill

Another important piece of legislation supported by the IAA was the Case bill. Stated objectives of this bill were to encourage settlement of disputes between labor and management by collective bargaining and by conciliation, mediation and voluntary arbitration, thereby reducing strife, strikes, and lockouts. It also was aimed at making labor unions as responsible in fulfilling contracts as industry. The measure passed the Senate by a vote of 49 to 20 and the House by a vote of 230 to 106. It was vetoed by the President June 11, and the House failed to override his veto by a slim margin of five votes. The voting record on passage of the Case bill is presented below.

While the Case bill failed to pass, the Hobbs bill, supported by the IAA was signed by the President July 3 and became law. It was passed by a voice vote in the Senate June 21, and had been passed by the House on Dec. 12, 1945. The Hobbs bill extends the Federal Anti-Racketeering Act to intimidating practices of labor unions, which previously had been exempt.

Another important measure which the IAA supported, but which was defeated

VOTE NOVEMBER 5!

By action of the IAA board of directors, the RECORD is herewith reprinting the voting records of members of Congress and the Illinois General Assembly, which were originally carried in the March issue. The voting record of Congressmen is confined to broad legislation of direct interest to agriculture and does not reflect their position on the important issues relating to international policies and relationships.

Many of these members of Congress and the General Assembly are candidates for reelection on November 5. The Association urges its members to study carefully the information published in this issue of the RECORD and to actively support for election those candidates who, by their records, have proved themselves worthy of the confidence of farmers.

Farm people represent only a minority of the population. Only through their united action at the polls, wherein they place the interests of agriculture above parties and personalities, can they hope to maintain fair representation in lawmaking bodies.

VOTING RECORDS OF STATE LEGISLATORS

(*Continued from page 6*)

ord or attitude upon local problems which may affect the voters' decision.

The first column of the report tabulated on page 6 lists the number of regular sessions of the General Assembly during which the respective members have served. The second column carries the legislative record of the legislators as determined by their votes on agricultural legislation during the last regular session, together with their general attitude on legislation supported or opposed by the Illinois Agricultural Association throughout their terms of service.

Ratings Used

A member, to receive a rating of "Excellent" must not only have a satisfactory voting record, but his general attitude in recent legislative sessions must have been generally recognized as actively supporting the Illinois Agricultural Association's legislative program. To achieve an "Excellent" record a member must also have served more than one two-year legislative period and must have taken a favorable position on highly controversial legislative proposals.

First term members, to secure a "Very Good" rating, must have a satisfactory voting record and must have actively supported the Illinois Agricultural Association's legislative program. This rating is the highest given any first term member.

In accordance with the directions given by the delegates of the Illinois Agricultural Association, members of the Association are advised that all members of the present General Assembly seeking reelection who are rated as "Excellent" or "Very Good" are entitled to support by all members and friends of the Illinois Agricultural Association in the coming primary and general election.

The records of members rated as "Good" are worthy of careful consideration in comparison with the qualifications of new candidates seeking office.

in the House by a vote of 204 to 126, called for an appropriation of $3,000,000 for TVA to begin construction of a pilot phosphate fertilizer plant in the Mobile, Ala., area.

The proposal to get a high-analysis phosphate fertilizer pilot plant was only one item in the Farm Bureau's broad fertilizer program. The proposal was introduced after it appeared that no action would be secured during the sessions on the Farm Bureau's main fertilizer program covered in Senate bill 882 and House bill 2922. These two bills will be reintroduced in the 80th Congress. Voting record on the phosphate plant proposal by Illinois Congressmen is shown on opposite page.

Another bill which was not enacted, but which was supported by the Association was the Flannagan Farm Credit Bill. As introduced the bill would:

(1) Provide an independent Agricultural Credit Agency with powers, functions and duties of FCA and FSA; (2) Create a national bi-partisan board within the agency to carry out policy of bill in handling all types of farm credit, and

(3) Authorize federal farm appraisers to make appraisals public.

Voting record on this bill is furnished on page 8.

IAA ECONOMIC STUDY COMMITTEE FORMED

ORGANIZATION of a statewide committee of farmers to study present and proposed farm and economic programs was completed Sept. 6 in the offices of the Illinois Agricultural Association in Chicago.

The group which will be known as the IAA Economic Study Committee was authorized by the IAA board of directors and is made up of one farmer from each of the Illinois downstate congressional districts and chairmen of the five standing committees of the IAA board.

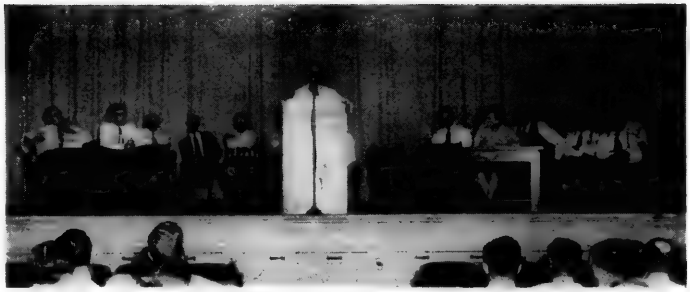
At the first meeting the committee named F. E. Morris, IAA vice-president, Sangamon county, as chairman, and Ernest D. Lawrence, McLean county, as secretary.

The IAA Economic Study Committee will function and operate similarly to the statewide committee that was organized three years ago to study rural school problems in Illinois.

The second meeting of the committee was scheduled for late September at which Earl C. Smith, former IAA president, was scheduled to appeal.

COMMITTEE NAMED TO STUDY FARM PROGRAMS

Members of the IAA Economic Study Committee assemble in Chicago for their first meeting. Left to right, standing: Leslie Mathers, Mason City; W. A. Dennis, Paris; Alfred Rister, Omaha; Russell Hayes, Sparta; B. C. Fulling, Palestine; F. E. Morris, Buffalo; front row: K. T. Smith, Greenfield; Gerald Waters, Edinburg; John Hanna Sr., Geneseo; Ernest D. Lawrence, Danvers; J. S. Bumgarner, McNabb; Otto Steffey, Stronghurst; E. E. Houghtby, Shabbona; Lee Knox, Morrison, and Stanley Castle, Alton. G. O. Fairweather, Barrington, and Lyman Bunting, Ellery, were not present when picture was taken.



From platform IAA board and officers discuss organization policy with state Farm Bureau leaders. At rostrum is Otto Steffey, Henderson county.

FARM BUREAU ON TEST IN GATEWAY VOTE

THE Farm Bureau in Illinois will be on test in the vote on the Gateway Amendment at the general elections Nov. 5!

That's the challenge as it was placed before some 850 Farm Bureau leaders at the regular fall meeting Sept. 16 at Springfield.

Since the Illinois Agricultural Association sponsored the Gateway Amendment at the last session of the General Assembly and mustered enough votes to have it placed before the people at the general elections, the proposition is pretty well identified over the state as an IAA-Farm Bureau project.

A heavy vote for the Gateway Amendment in rural areas will sustain the Farm Bureau's reputation as a potent force in Illinois. Failure of the amendment to receive such a vote in rural areas certainly will be damaging to Farm Bureau prestige.

Paul Mathias, IAA secretary, warned Farm Bureau leaders at the Springfield meeting that the "job is in the precincts." He recommended that every County Farm Bureau see to it that two representatives be stationed at every rural precinct on election day to inform voters on the Gateway Amendment.

The campaign, he said, will be supported on the state level by the IAA through every possible means — publicity, literature, pamphlets and overall direction and assistance to the County Farm Bureaus. But the determining factor in the success or failure of the Gateway Amendment will be at the precinct level.

Both IAA President Charles B. Shuman and former president Earl C. Smith further emphasized the need for concerted local action in securing adoption of the Gateway Amendment.

Other state problems discussed at the Springfield meeting included the township roads program, rural school reorganization and license fees for tractors.

Mathias pointed out that the Farm Bureau has a definite responsibility in the roads program to see that the 15 million appropriation secured by efforts of the IAA at the last General Assembly is properly spent. He cited the need for further study in the organization of road districts and indicated that further discussion will be held on this matter at the IAA annual meeting.

On rural school reorganization, Mathias advised that county survey committees use caution to avoid establishing districts that might prove to be too small at some later date when better transportation facilities are available. He also noted that too often rural districts were being absorbed by large urban districts with the result that rural people lose a voice in school affairs. This trend was also noted by several of the local Farm Bureau leaders who offered comments in the discussion.

George E. Metzger, IAA field secretary, in discussing license fees for tractors, reported that there is likely to be agitation for legislation requiring motor vehicle licenses and the payment of a fee for farm tractors used on the highway. He indicated this matter will be given further consideration at the IAA annual meeting by the delegates.

Donald Kirkpatrick, IAA legal counsel who has devoted considerable time and study over the past few years to the Farm Bureau's national fertilizer program, gave a progress report on this project and stressed the need for the national deposits of potash and phosphorus being held in trust by the government for the welfare of agriculture. He cited the fertilizer industry's inability to supply agriculture with sufficient materials for the rebuilding of soils mined during recent years.

Other matters discussed at the Springfield meeting included the Farm Bureau's position on soil conservation which was outlined by President Shuman; the 4-H memorial camp, reported by K. T. Smith, chairman of the IAA public relations committee; progress report on livestock marketing by Homer Curtiss, chairman of the IAA marketing committee; change in membership agreement by Otto Steffey, chairman of the IAA organization-information committee; economic trends and problems by IAA Vice-President F. E. Morris who is chairman of the newly organized IAA committee for economic study, and a review of the IAA management board and its functions by President Shuman.

Former IAA president Earl C. Smith, who is a member of the state commission on secondary roads, discussed the need for more local action on the rural roads program. He also stressed the need for rural people to get out and vote at the Nov. 5 elections. "We can never overemphasize," he said, "the importance of a sustained agriculture to the welfare of the nation. We need large production in both industry and agriculture, but we cannot have that unless there is a fair exchange value between the products of industry and agriculture."

State Farm Bureau leaders jam Knights of Columbus hall in Springfield to question and hear IAA leaders discuss organization policy.

ILLINOIS TO BALLOT NOV. 5 ON STATE SOLDIERS' BONUS

VOTERS in the Nov. 5 Illinois general elections will be asked to accept or reject the proposed $385,000,000 state bond issue to finance an Illinois soldier's bonus. After World War I a state bond issue of $55,000,000 was voted to provide soldiers' bonuses.

If the bond issue is approved, all World War II veterans who served in the armed forces at any time between Sept. 16, 1940, and Sept. 3, 1945, will be eligible for a state bonus of not less than $50 nor more than $900. This compares with a maximum of $300 provided in the Illinois state bonus voted for veterans after the first World War.

The state debt to be contracted for the payment of a state bonus to World War II veterans is to be paid by taxes from these sources:

1. Cigarettes. One cent on each package sold in the state.

2. Racetracks. Four per cent on all money wagered plus one-half the "breaks" at licensed horse racing tracks in the state.

3. Property. Direct levy on real and personal property to meet any deficiency from other sources.

This means that after the tax on cigarettes and race track bets have been collected any added funds that may be needed to retire the principal and interest on these bonds will, unless funds are made available from other sources, be raised by a direct levy on real and personal property.

If the bond issue is approved each person eligible will be paid $10 per month for active domestic service and $15 per month for active foreign service during the period Sept. 16, 1940 to Sept. 3, 1945.

Bonds for this $385,000,000 bonus are to be made payable within 25 years from date of issuance and are to bear not more than 2 per cent interest, payable annually.

If approved, the state bonus will supplement the benefits already available to the veteran.

Here are some of the benefits veterans are now receiving.

In Illinois during the first week in September 75,114 veterans were drawing an average of $19.88 in federal unemployment compensation. Maximum allowable is $20 a week for 52 weeks.

Veterans may receive up to four years of institutional or two years of on-the-job training grants of $65 per month for single and $90 per month for married men.

At time of discharge veterans are eligible for mustering out pay of $200 for domestic and $300 for overseas duty.

Terminal leave pay is now available to enlisted men as well as officers. Cost of this reimbursement is placed at $2,431,708,000 for this year.

Widows, children and dependent parents of veterans are also eligible for pensions. Various pensions and readjustment benefits are expected to cost $5,400,000,000 annually and probably will decrease little during the next five years.

Veterans requiring hospital care for service incurred injuries, diseases, and dental treatment, as well as those unable to pay, will be cared for without cost. This is estimated at $147,000,000 with an added bill of $441,250,000 for hospital construction.

Loans for purchases of homes, farms and business property are guaranteed and the first year's interest paid by the federal government.

Aids extended to the veteran by the federal government are varied and extensive. The cost of these and other benefits are expected to exceed $9,000,000,000, or more than one-fifth of the total federal budget for this current fiscal year.

FIRE PREVENTION WEEK

October 6-12 is National Fire Prevention Week and everyone can do his share toward fire prevention by one simple method — Check homes for fire hazards. The IAA is sending out fire hazard check lists to Farm Bureaus for distribution in rural areas. Ask your Farm Bureau for your copy.

Dr. Boland Returns To Country Life

Dr. J. E. Boland, Country Life Insurance Company medical director on leave of absence with the U. S. Army, returned to assume his duties September 1.

Dr. J. E. Boland

He has been discharged from active duty as a colonel and is now on terminal leave. Dr. Boland, who has been medical director for Country Life since 1929, received his army training with the 7th Armored Division at Camp Polk, Louisiana. He also received desert training in California, and additional training at Fort Benning, Georgia.

Following his arrival in England in June, 1944, his unit entered combat in August via Omaha Beach, spearheading General Patton's armored drive. He was with the British 2nd Army in Holland and the American 9th Army and took part in the battle of the Belgian Bulge when his division held off nine German panzer divisions for five days. He remained in Germany with occupational troops until October, 1945, when he returned to the United States.

OUR COVER

This month's RECORD *cover shows Turner Mayfield of Adams county chopping through an eight-inch white oak log in slightly less than a minute to win Sports Festival woodchopping contest.*

HANDLE WITH CARE

If you value your life, and limbs, use these simple precautions while operating your picker this year:

1. Tie trouser legs snugly around the ankle and then avoid all contact with the power take-off.

2. Keep all clothes snug fitting and do *not* wear worn and torn gloves, or mittens with extra thumb stall.

3. Never under any circumstances attempt to clean, oil, or adjust the picker while it is in operation.

Shorts in the News

J. E. Harris, veteran Champaign county farm adviser, has resigned to head the Iowa sales force of a phosphate company. Before coming to Champaign in 1934 he served eight years as farm adviser in Mercer county. Graduate of the University of Illinois College of Agriculture, he taught vocational agriculture at Washington two years before acting as assistant Farm Adviser in Tazewell county.

Nye F. Bouslog, 26, of Edgar county has been hired as assistant farm adviser and organization director for McDonough county. He replaces Carroll Lewis who will work for an Adams county seed corn firm. Reared on a farm near Paris, Bouslog was active in 4-H work, graduated from the University of Illinois College of Agriculture in 1943 and since that time served in the army until his discharge in August as a first lieutenant.

William E. Riegel, 62, pioneer soybean grower and former president of Champaign county Farm Bureau, died suddenly this month. Honored nationally as an outstanding farm manager, he helped organize the American Soybean association and had been a president of the Illinois and board member of the International Crop Improvement association.

The Bond county Farm Bureau recently bought a building to house their expanding activities and expected to move in by Sept. 15. Considered temporary quarters, they plan to build later.

The U. S. Department of Agriculture estimated the 1946 corn crop at 3,371,707,000 bushels in September for the highest crop on record. This is below the optimistic estimate the department made in August that the corn crop would total 3,496,820,000 bushels.

Ray T. Nicholas, Lake county farm adviser, got a pleasant surprise the other day and it wasn't wholly unexpected. The James F. Lincoln Arc Welding foundation awarded him $2,643.15 for his paper on agricultural application of arc welding. Four scholarships for $250 each at the University of Illinois also have been named for him. Ray says the money will help him pay off a loan on his home and of course, Mrs. Nicholas could use a nice new coat.

University of Illinois tests of winter wheat varieties find Marmin and Wisconsin 2 best suited for northern Illinois. Pawnee was choice hard wheat and Prairie and Fairfield leading soft varieties for central Illinois. For southern Illinois Fulcaster is most popular but will likely be supplanted by Newcaster when seed is available.

Sunflower growers in Piatt county may start developing their own inbreds and hybrids, says A. C. Kamm, Piatt farm adviser. Major variety for 1947 plantings will be Jupiter, developed at Saskatoon university and grown extensively in Canada. Commercial scale plantings in Piatt county have not yet been attempted.

Research in growth regulating plant hormone sprays has brought new ways to kill weeds, regulate flowering, prevent preharvest drop of apples says W. A. Ruth, University of Illinois Horticulturist. These harvest sprays are now on the market.

LETTERS TO THE EDITOR

CITY BIDDERS

Yesterday I went to a farm sale with the idea of bidding but I didn't have a chance. Two men from nearby towns and one from a city 30 miles away ran the farm up to $210 an acre. I knew from experience it wasn't worth more than $150.

The city man got it. He had money, he said, and wanted a place to invest. He didn't have to figure on repairing the house because he wasn't going to live in it.

For 24 years I've been a hired man or tenant and often the work I've done has been pretty close to slaving. Now with my boys half grown and with a little money ahead I'd like a place of my own.

But city people are coming out and bidding land out of sight. Two out of three of my neighbors are tenants like myself and it looks like they'll be tenants the rest of their lives.

Land should belong to the men who farm it. He does the work. Owners outside the community should be forced to sell. If they love the soil like I do they'd move back on it.

My tenant neighbors are beginning to feel like I do. We're being driven off the land as farms get bigger and prices higher. Some day we'll get smart and organize. There's plenty about a tenant's life that could stand changing.

C.R.B.
Stephenson County

Stopping in to say Hello to Talmage Defrees at his farm near Smithboro, we found the former IAA vice president hard at work cleaning out his barn (left) and loading firewood. In his spare time, Mr. Talmage enjoys speaking before Farm Bureau gatherings and is generally available on short notice. He can be reached by phone at his home in Greenville or at his farm near Smithboro.

IAA's 32nd Annual Meeting to Be Held Nov. 18-21 in Chicago

THE 32nd annual meeting of the Illinois Agricultural Association and associated companies will be held Nov. 18-21 at the Hotel Sherman in Chicago, scene of last year's meeting.

Housing accommodations are somewhat improved over the war years but hotel rooms are still difficult to get. Those planning to attend the annual meeting are urged to secure room reservations as soon as possible. Roy P. Johnson, IAA director of special services, is in charge of arrangements.

As in the past years, the associated companies will hold their annual meetings during the first two days of the meeting, Monday and Tuesday, Nov. 18-19.

Farm Bureau presidents and farm advisers will meet at noon Nov. 18 for their annual luncheon and the Farm Bureau presidents will meet late in the afternoon for their annual conference.

The annual Talkfest sponsored by Rural Youth will be held Tuesday and the general entertainment program will be presented the same evening.

Illinois Agricultural Association meetings will be held Nov. 20-21. Officers' reports and the annual address of the IAA president will be given the morning of Wednesday, Nov. 20.

Two prominent speakers are to be invited to address the meeting on the Wednesday night program.

In addition, one or two speakers will be on the Friday morning business session during which the resolutions committee will offer its report to the delegates and the election of officers for the ensuing year will be conducted.

RESTUDY FLOOD CONTROL

Two principle restudies on certain sections of the Illinois River flood control plan will be placed before the U. S. board of army engineers for rivers and harbors when it meets Oct. 6 in Washington.

One study dealing with proposed reservoirs in Sangamon county compares the productive value of the farm lands to be impounded at Petersburg against the value of downstream lands to be protected from floods by the reservoirs.

A second study considers the objections raised by the Springfield sanitary district against the flood control plan.

Under the direction of Instructor Thomas H. Papworth (standing), Illinois state grain inspector, a group of former G.I.'s study grain grading at a recent school of instruction held at the Chicago Board of Trade. Left to right: Eugene W. Morrison, Livingston county; and Leon Miller and Jack Skelton, both of Moultrie county.

Mason Named Dairy Marketing Assistant

JUDSON P. MASON, 32, has been named IAA assistant director of dairy marketing. He took over his new job Sept. 23.

J. P. Mason

Since June, 1945, he has been employed as an economist with the dairy branch of the U.S. Department of Agriculture in Washington.

Mason was born on a dairy farm near Elgin and was graduated from the University of Illinois College of Agriculture. Following graduation, he worked five years for the McLean County Milk Producers and the Prairie Farms Creamery of Bloomington.

In 1942, he was employed as a statistician for the milk market administrator in St. Louis before going to Washington.

Mason took graduate work in agricultural economics at the University of Illinois, St. Louis University, and the graduate school of the U.S. Department of Agriculture.

His wife, Marian, was reared in St. Louis. The Masons are the parents of an eight-months-old daughter, Judith Ellen.

Dave Mieher Leaves Country Life to Head Southern Life

DAVE C. MIEHER, manager of Country Life Insurance Company and sales director of IAA Insurance Service, has resigned to become manager of Southern Farm Bureau Life Insurance Company. His resignation will take effect Dec. 1.

D. C. Mieher

Mieher will become the first manager of the recently-organized farm bureau insurance company which will concentrate its efforts among farmers of Mississippi, Arkansas, Alabama, Kentucky and Texas.

The outgoing Country Life manager is well-known throughout the country in Farm Bureau insurance circles because of his thorough knowledge of Farm Bureau insurance organization.

He has been called for advice by a number of states and has helped with the organization of the Southern Farm Bureau Life company which he will head.

Mieher was born and reared in Macoupin county and was graduated from the University of Illinois College of Agriculture. He was general agent for the IAA in Macoupin county from 1929 until 1931 when he became sales supervisor for the IAA Insurance Service until 1937.

In 1937 he became sales manager for Country Life and sales director for the IAA Insurance Service and in February, 1941, was named manager of Country Life.

Mieher is expected to set a record for yearly sales during the 1946 fiscal year ending Sept. 30 when his agents are expected to sell approximately $36 million in life insurance.

A record of $12 million for August and September also is expected.

When Mieher became sales director in 1937 Country Life had $102 million in life insurance in force. By the end of the fiscal year, Sept. 30, insurance in force was expected to reach $273 million.

Mr. and Mrs. Mieher and their family of two daughters and a son will make their home in Jackson, Miss., headquarters of Southern Farm Bureau Life Insurance Company.

California here we Come!

"CALIFORNIA, here we come!" will be a loud and lusty cry throughout Illinois Dec. 1 judging from the widespread interest in the IAA caravan trip to the American Farm Bureau Federation convention in San Francisco, Dec. 8-12.

Reservations for the trains leaving Chicago Dec. 1 and returning Dec. 15 are coming in at a satisfactory rate, according to Roy P. Johnson, IAA director of special services.

Champaign county, Johnson reports, was first to ask for a block of reservations numbering 35. The widespread interest is apparent in requests for reservations from Carbondale, Sycamore, Jerseyville, Joliet, Edwardsville, Salem, Quincy, Normal, Clare, Sparland and numerous other localities.

The IAA is making plans for San Francisco hotel accommodations for 500 caravan members. Indications are that all the accommodations will soon be spoken for so Farm Bureau folks planning to make the trip are urged to get their reservations as soon as possible. Indiana has already been swamped with more than 1,000 requests for reservations.

Requests should be made to Roy P. Johnson, Illinois Agricultural Association, 608 South Dearborn Street, Chicago 5, Ill., telling clearly what you wish and how many. If you have any questions about the trip you are urged to send them with your letter to avoid last minute misunderstandings.

This is a view of the Carlsbad Caverns in southern New Mexico which you will see on one of the stops the IAA caravan will make on route to San Francisco.

The pullman classification "Two in Lower," actually means two persons occupying one lower berth.

Members of the IAA caravan are urged to travel as lightly as possible. One or two bags per person is recommended. The weather is expected to be mild to warm on the way out and cool on the return trip. A top coat is recommended.

Because of an adjustment in adding an extra meal, the cost of the trip from any point outside of Chicago will be $1.50 more than the prices quoted in last month's issue of the IAA RECORD. See new prices in table.

The trip figures around $200 and that includes just about everything — sightseeing, most meals, and tips. It does not include food and lodging during the convention in San Francisco.

Further information will be available soon in printed folder form at your county Farm Bureau office.

Leaving the I.C. station in Chicago at 2 p.m., Dec. 1, stops will be made at Champaign, Mattoon, Centralia and Carbondale.

Enroute to San Francisco, tours will be made of New Orleans, the Alamo in Texas, Carlsbad Caverns in New Mexico, the Mexican city of Juarez, Phoenix and Los Angeles.

Coming back stops will be made at Salt Lake City, Denver, and the Royal Gorge in the Rockies.

INTERMEDIATE SLEEPING CAR ACCOMMODATIONS

*Joining Party at Chicago and Leaving Party at Chicago

	One in Lower	One in Upper	Two in Lower; each person
Chicago	$201.62	$193.51	$184.34
Galesburg	207.33	199.22	190.05
Ottawa	205.05	196.95	187.77

*Cost includes rail fare from home city indicated to San Francisco and back to that home city.

Joining party downstate and leaving party at Chicago

	One in Lower	One in Upper	Two in Lower, each person
Champaign	$201.62	$193.51	$184.34

Cairo	200.54	192.43	183.26

STANDARD SLEEPING CAR ACCOMMODATIONS

	One in Lower	One in Upper	Two in Lower, each person
Chicago	$239.58	$227.27	$213.65
Champaign	239.58	227.27	213.65
	Three in Compt., each	Drawingroom, Three in each	Drawingroom, Four in each
Chicago	$236.43	$248.21	$233.09
Champaign	236.43	248.21	233.09

Standard sleeping car costs from other cities listed will be quoted on application. Fares from Chicago and Champaign will give the approximate difference in cost.

10 *Reasons*

FOR VOTING YES ON THE *Gateway Amendment*

ILLINOIS Farm Bureau members have an important job to do on Nov. 5. That responsibility is to vote on the Gateway Amendment to the state constitution and to acquaint their city friends with the importance of voting on the proposition.

Adoption of the Gateway Amendment will be difficult to secure, not because of any organized opposition to it, but because of lack of information. Adoption also will require a favorable vote of a MAJORITY OF ALL THOSE VOTING IN THE ELECTION. This means that if a person casts a ballot in the general elections, but fails to mark his ballot on the Gateway Amendment, the ballot virtually counts as a vote against the amendment.

There are at least 10 good reasons for voting "Yes" on the Gateway Amendment. Here they are:

1. To make it possible to improve our State Constitution. Only two amendments have been adopted since 1891.

2. To allow a two-thirds majority of those voting on an amendment to adopt it. The Gateway Amendment proposal submitted in 1932 received an 80% "Yes" vote, but failed to carry because 2,110,000 did not vote on the proposal.

3. To make possible needed changes in our State Constitution in an orderly way, one, two or three at a time, thus avoiding the turmoil, uncertainty and expense of a constitutional convention. Only a few changes are needed.

4. To require that votes upon any change in our basic law be cast directly upon the proposition and to keep constitutional changes out of partisan politics.

5. To make possible a modernization of our state tax system.

6. To make possible legislative reapportionment in Illinois fair to both rural and urban areas.

7. To make possible greater home rule for metropolitan areas.

8. To let voters who take the pains to vote upon a proposition decide basic issues.

9. To bring our state and local governments up-to-date.

10. To make amendment of our State constitution possible but not easy.

Those are the reasons for voting "yes" on the Gateway Amendment. Now what does this amendment do?

Here's what it does.

The Gateway Amendment affects only the procedure of amending the State Constitution. It does not change any basic provisions of the Constitution. The Gateway Amendment provides these changes:

1. Now, constitutional amendments must receive a majority of all votes cast in the election in order to be adopted.

Under the Gateway Amendment, a proposal would be adopted if it received the favorable vote of two-thirds of those voting on the proposition.

Now, an amendment of only one article of the Constitution may be submitted by the same session of the legislature.

Under the Gateway Amendment changes in one, two or three articles might be submitted to the voters at the same session.

3. Now the party circle method of voting upon constitutional amendments could be authorized.

The Gateway Amendment would bar the use of the party circle method and require that the votes be cast directly upon the proposition.

The Gateway Amendment is supported by both major political parties and by many statewide civic organizations.

The Gateway Amendment vote can easily be the most important civic act of the year, so far as you are concerned.

Be sure to vote on the Gateway Amendment and urge others to do likewise. Remember, failure to mark that ballot is the same as a "No" vote. Don't let it lose by default!

NEW SALES MANAGER NAMED FOR PRAIRIE FARMS

DAVE HENRY, a former fieldman for Prairie Farms Creameries who has been in the Army since March 19, 1941, will become sales manager of the company effective Oct. 1.

Henry will succeed J. B. Countiss who is resigning to become sales manager for Pfister Associated Growers, hybrid corn producers and distributors.

Entering the Army in 1941 as a second lieutenant, Henry was granted a leave of absence by Prairie Farms creameries where he had supervised the butter laboratory in the Chicago cutting plant and directed campaigns to boost butter quality.

While in the Army Henry was first stationed at the subsistence research laboratory of the U. S. Army Quartermaster depot, Chicago, where he instructed other officers in methods of inspecting dairy products and processing plants.

In March, 1942, he was assigned duty in Australia and later in New Guinea. He later returned to Australia and then moved on with the U. S. forces in their campaigns to recapture the Philippines.

At the time of his discharge Henry held the rank of lieutenant colonel. During a good share of his duty in the Pacific Henry was working with food supplies.

He joined the IAA staff in 1940 and worked as fieldman in quality supervision of butter.

Henry is a graduate of South Dakota State College and Ohio State University in dairy manufacturing and dairy technology. He has worked in several creameries in South Dakota.

Of the 8,000,000 head of slaughter livestock marketed from Illinois farms and feedlots in 1945 more than 20 percent were sold through cooperative sales agencies says R. C. Ashby, University of Illinois chief in livestock marketing.

James Lager, who has served the Clinton County Farm Bureau as bookkeeper for some time, has taken up the duties of county organization director, effective Sept. 1, 1946. He succeeds Herman Bruns, who died in July.

"CALIFORNIA, here we come!" will be a loud and lusty cry throughout Illinois Dec. 1 judging from the widespread interest in the IAA caravan trip to the American Farm Bureau Federation convention in San Francisco, Dec. 8-12.

Reservations for the trains leaving Chicago Dec. 1 and returning Dec. 15 are coming in at a satisfactory rate, according to Roy P. Johnson, IAA director of special services.

Of the 8,000,000 head of slaughter livestock marketed from Illinois farms and feedlots in 1945 more than 20 percent were sold through cooperative sales agencies says R. C. Ashby, University of Illinois chief in livestock marketing.

James Lager, who has served the Clinton County Farm Bureau as bookkeeper for some time, has taken up the duties of county organization director effective Sept. 1, 1946. He succeeds Herman Bruns, who died in July.

Three of the principal speakers at the Association of Illinois Electric Cooperatives (REA) convention in Springfield in September discuss rural electrification. Left to right: Charles B. Shuman, Illinois Agricultural Association president; Claude R. Wickard, administrator, rural electrification administration; and Arnold P. Benson, director of the Illinois department of agriculture.

NEED NATIONAL FARM PROGRAM

SHUMAN TELLS REA LEADERS

"ESTABLISHMENT of a national program for agriculture," President Charles B. Shuman of the Illinois Agricultural Association told a group of Illinois REA officers, delegates and managers, "is the Number One factor in the furtherance of the welfare of the program of rural electrification.

Speaking at the annual convention of the Association of Illinois Electric Cooperatives in Springfield, Sept. 5, President Shuman called for a fair price for farm products in the years ahead because of the importance of the farmer's standard of living to the national welfare.

He cited the significance of rural health, education, electrification and soil conservation and their close tie with farm prices.

Other speakers included Administrator Claude R. Wickard of the Rural Electrification Administration and Director Arnold P. Benson of the Illinois State Department of Agriculture.

"Rural electric cooperatives," Wickard said, "must plan to make more power available to rural areas at lower rates.

"They must first overcome any inadequacies of their existing systems," he said, "and they must work incessantly to see that plenty of power is always available for REA consumers.

"They must work incessantly," he continued, "for rates that will encourage maximum benefits from the use of electrical energy."

President Shuman joined Wickard in asking REA leaders to see that all possible farmers get electricity at low rates but Shuman cautioned them to watch the business end of their organizations. Co-ops have gone on the rocks, he said, because of poor management in not preparing for less prosperous days.

Shuman, a former president of the Coles-Moultrie REA co-op, urged the REA people to "defend, protect, and improve" their electric co-ops.

Pointing out the importance of a strong organization among farmers and citing the need for closer cooperation between farmers and other groups, he emphasized the need with the quote: "Weakness cannot cooperate with anything; only strength can cooperate."

Concurring with the requests of President Shuman and Administrator Wickard for better service and cheaper electricity for more farmers, State Director of Agriculture Benson said: "To do a good job of farming today, Illinois farmers must take advantage of the most efficient and most modern methods; that requires electricity."

The 300 representatives of 27 Illinois REA co-ops meeting in the Abraham Lincoln hotel for the three-day session heard talks on finances and budgeting, safety, job training, publicity, labor and business relations, maintenance, insurance and pensions, management and use of power.

IAA WILL HONOR ILLINOIS 4-H CLUBS WITH BANQUET

A banquet honoring 300 Illinois delegates to the National 4-H Club congress and 4-H Club exhibitors at the International Livestock show will be given by the Illinois Agricultural Association during the week of the International.

The dinner will be held Tuesday evening, Dec. 3, in the Bal Tabarin room of the Sherman hotel in Chicago.

Since the International and the national 4-H Club congress are to be held during the same week, club members from both the show and congress will be able to attend.

Those eligible to attend the banquet will be:

1. Illinois delegates to the National 4-H Club congress.
2. Bona-fide 4-H club exhibitors at the National Livestock show.
3. Outstanding county members selected by the State 4-H Club office.
4. Farm and Home Advisers or other persons in charge of 4-H Club delegations.

Presidents of Illinois REA Co-ops are shown at their state convention in Springfield. Left to right, front: Reuben Young, Tri-County, Mt. Vernon; W. H. Koonce, Southwestern, Greenville; Lloyd A. Dickson, Western Illinois, Carthage; J. W. Barth, Wayne-White, Fairfield; Walter Risser, Corn Belt, Bloomington; second row: G. Montgomery Points Way In School Reorganization

By JOHN K. COX

IAA Director of Rural School Relations

AFTER several months of deliberate study of school conditions in Montgomery county, the School Survey committee of that county unanimously voted to propose plans which, if adopted, will in the opinion of the committee, correct the many inequalities of school financing and educational opportunities now existing within that county.

What the Committee Found

In reviewing school conditions as they now exist, the committee discovered many facts including the following:

Seventy-seven out of 124 one-room schools could not raise enough money without additional referendums to support themselves by local taxation. Only 47 of these schools could be considered to have ample local financial support.

Many of the 124 schools will receive no state aid due to an enrollment of fewer than 7 pupils in average daily attendance.

By July 15, only 42 of these 124 rural schools had been able to employ teachers for the 1946-1947 school term.

No school is operated in 24 districts.

One school, not a one-room school, is $28,000 behind on outstanding teachers' orders alone. Last year this school paid almost $1700 in interest on teachers' orders. This same school was paying their grade school teachers $765 per year.

Per capita costs in the high schools of Montgomery county varied from $159.80 to $471.28 for the 1944-1945 term.

Only 3 of the 11 high schools have an enrollment of 100 pupils and 4 out of 11 teach vocational agriculture, home economics and commercial courses.

As a result of this study the Montgomery County School committee voted on April 11 to recommend unit districts to the voters. Taking into consideration assessed valuations, student populations, and community centers, the committee voted unanimously on Aug. 8 to propose four such districts.

The boundary lines of these four districts have not as yet been definitely established and will be one of the main topics of discussion in a series of meetings to be held throughout the county during the next ten weeks. It will be necessary to discuss boundary lines with several neighboring counties since every effort will be made to hold communities together so that normal business and social relationships in the community will be uninterrupted.

Why Unit Districts?

The unit district combines all grades 1 through 12 under one administration and tax rate, thereby, eliminating multiple taxing bodies, overhead costs, and the duplication of personnel, equipment, and facilities.

Each unit district, if adopted, will be administered by a board of education elected by the people of the district. Financially these districts will be in a position to provide the type of program needed throughout the entire district.

The committee is of the opinion that this type of program as administered by its own school board is the most flexible arrangement possible. They think that it allows a greater measure of self control than could be had in a district with a narrow tax base and very limited possibilities.

"Offers Best Opportunity"

This proposal does not mean, according to Hugh Rowden, chairman of the committee, that attendance units will be eliminated immediately but as roads and other conditions improve, larger and better attendance units can be established.

Jesse Hill, farmer member of the committee, states, "This plan would provide the same educational opportunities for every child in the district, regardless of which school he attends. Bad roads would, therefore, not be a handicap to this type of school reorganization. Special teachers hired and special equipment purchased by the district would serve all the schools in the district."

The Montgomery County School Survey committee had other reasons for favoring the unit district, among which are the following:

With only 12.4% of teachers in training schools in Illinois last year taking training to teach in the elementary school and over twice as many elementary teachers as high school teachers needed, something needs to be done for the elementary schools. The unit district offers the best opportunity to balance the emphasis on all 12 grades.

Omer Poos, Hillsboro attorney and member of the committee, states the following, "The unit district provides the means of placing additional emphasis upon the elementary school without causing friction between the grade and high schools. Also there seems to be strong evidence that many boys and girls get into high school without being able to read intelligently or write a complete sentence.

"Such deficiencies are the fault generally of weaknesses in the grade school program both rural and urban. The unit district would enable the super-

County Superintendent of Schools Ray Nettleship and IAA Director of Rural School Relations John K. Cox are shown with the Montgomery County School Survey Committee. Left to right: back row, Nettleship, Olin Snyder, Cox, Gus Sammons, Stewart Thomas, Hugh Rowden, chairman, and Omer Poos; front row, Jesse Hill, Ed Priddle, and John Williamson. Hugh Allen was absent when picture was taken.

MONTGOMERY POINTS WAY

(*Continued from page 17*)

intendent to discover the cause of such deficiencies, and also to make recommendations to the board for their correction."

It was the opinion of the committee that the unit district provided the fairest proposal from the standpoint of costs to the tax payer since it leveled out the cost over a broader area.

In the words of Ed Priddle, another farmer member of the committee, "Education is the responsibility of everyone and each should pay his fair share of this expense."

It was also recognized by the committee that the state legislature had favored the unit district in the tax bills of 1945 by requiring only three-fourths as much local tax effort from the unit district to qualify for special state aid as is required of grade school and high school when operated separately.

The saving on pupil transportation under the unit district seemed to be worthy of special consideration the committee thought. It is understood, of course, that transportation will be provided by the new district. Under the unit district the per capita transportation costs have been less than half the per pupil transportation costs in Illinois. The larger district should be able to provide a better transportation system with less expense.

Recommendations of Others

In proposing these plans the county committee was guided somewhat by the experiences and recommendations of other states and groups within this state. In fact, 45 of the 48 states make a practice of combining grades 1 to 12 in the same administrative unit. Also this type of program is approved by the following organizations: National Educational Association, Illinois Educational Association, Illinois Association of School Boards, Committee on Services of the Illinois Post War Planning Commission, Illinois Agricultural Association, and the State Advisory Commission on School Reorganization.

The latter commission on pages 18 and 19 of their manual has stated: "An administrative unit should comprise one or more attendance areas, (preferably two or more) offering educational facilities at least through the twelfth grade . . . . The reorganization of school districts does not always involve the abandonment of the smaller units of school administration. Indeed, the major purpose of such reorganization often is to enlarge the tax area and to effect cooperative relationships in the business and personal activities of the district affected."

NOTICE OF ANNUAL MEETING ILLINOIS WOOL MARKETING ASSOCIATION

Notice is hereby given that the annual meeting of the shareholders and members of Illinois Wool Marketing Association will be held on Tuesday, the 19th day of November, 1946, at the hour of 9:30 A.M. in the Sherman Hotel, Chicago, Illinois, to elect directors for the succeeding year; to receive and if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending September 30, 1946; to consider and if approved, ratify and confirm all of the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the shareholders and members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

S. F. Russell,
Secretary

NOTICE OF ANNUAL MEETING
ILLINOIS AGRICULTURAL ASSOCIATION

Notice is hereby given that the annual meeting of the members of Illinois Agricultural Association will be held in the Sherman Hotel, Chicago, Illinois, on the 20th day of November, 1946, at 9:15 o'clock A.M. for the following purposes:

To receive, consider and if approved, to ratify and confirm the reports of the officers and the acts and proceedings of the Board of Directors and officers in furtherance of the matters therein set forth since the last annual meeting of members of the Association;

To approve, ratify and confirm the several purchases heretofore made by this Association of stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein;

To secure consent and authorization to acquire on behalf of the Association by purchase certain stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein;

To elect eight (8) members of the Board of Directors to serve for a term of two years;

To elect a President and Vice-President who shall also serve as directors for a term of one year;

To consider and act upon such proposed amendments of the Articles of Incorporation or of the By-Laws of Illinois Agricultural Association as may be properly submitted;

For the transaction of such other business as may properly come before the meeting.

PAUL E. MATHIAS,
Secretary

NOTICE OF ANNUAL MEETING
COUNTRY MUTUAL CASUALTY COMPANY

Notice is hereby given that the annual meeting of the members of Country Mutual Casualty Company (formerly Illinois Agricultural Mutual Insurance Company) will be held in the Sherman Hotel, Chicago, Illinois, on Tuesday, the 19th day of November, 1946, at 1:00 P.M. to receive, consider and if approved, confirm and ratify the reports of the officers and of the Board of Directors and the acts and proceedings of the Board of Directors of the Company for the fiscal year ending September 30, 1946; to elect directors for the coming year and for the transaction of such further and other business as may properly come before the meeting.

OTTO STEFFEY,
Secretary.

G. C. PLANTFOOD NEEDS WINTER ACCOMMODATIONS

"Let's Cooperate"

during the coming fall and winter months by storing plant foods on the farm. It appears that the supply by next spring's crop season time will not be sufficient to fill the need of Illinois farmers. It promises to be more plentiful, however, during the "off-season" fall and winter months.

Your Blue Seal Distributor will secure a major portion of the supply for your county during these months, but it is obvious that he can order no more than can be stored.

Give a hand—by storing next season's needs on your farm—your supply will be assured, the handling expense will be less, and your savings will be increased.

Blue Seal Plant Foods are of high quality and can be stored safely during winter.

FARM STORAGE HINTS

1. Keep fertilizer dry from the car to your barn.
2. Store it in a weather tight building. (Tight roof and sides and a good floor.)
3. Pile away from walls since they collect moisture in cold weather.
4. Pile on a wooden floor, or better yet, on a platform several inches off the floor.
5. Limit piles to 5 or 6 high, if possible, certainly not over 10 high. Greater weight increases tendency to harden.
6. Pile the bags loosely, leaving a space between piles for free air circulation.

I.A.A. DIRECTOR HAS MANY-SIDED CAREER

While granddaughter Helen looks on, Eggerding prepares a policy for the Horse Prairie Mutual Fire Insurance Company.

By Jim Thomson

Ass't Editor, IAA RECORD

Editor's Note: This is the first of a series of articles to further acquaint you with the men who represent you on the Illinois Agricultural Association board of directors.

"IT WAS just an accident that put me on the IAA board back in 1937," good-natured August G. Eggerding said with a laugh as he recently reviewed some of the highlights in his colorful career.

Eggerding, who represents the 25th district comprising Randolph, Perry, Jackson, Franklin, Williamson, Union, Alexander and Pulaski counties, said the most likely man for the board at the 1937 IAA convention was ineligible because he had a government job, so he (Eggerding) was chosen instead.

But the explanation isn't that simple. Eggerding's career of community service in banking, insurance, agriculture, industry, local government, civic and church affairs prior to his election to the IAA board made him appear to be the logical man for the job. His record since proves it.

Family of Pioneers

The wave of German migration that swept across the Midwest about the middle of the 19th century brought God-fearing, frugal, industrious German farmers to Randolph county. Among them was Eggerding's grandfather who settled east of Red Bud where he ripped open the untilled prairie with his plow and built a log cabin.

Red Bud is still a community of predominant German stock. After three generations you can still detect a slight German inflection in their speech.

Passing from father to son, the 200-acre Eggerding farm is now being tilled by Wilbert Eggerding, 31, of the fourth generation of the family.

August is still active around the farm but has left the management to his son, Wilbert. Recently Mr. and Mrs. Eggerding moved across the road to a new home from the original homestead when he retired. But he can't quite give up operating on his own and still finds time to raise about two dozen pigs on a two-acre tract.

Eggerding's list of offices reads like a biography from Who's Who. He has been associated with the First National Bank of Red Bud for 36 years, serving as president for the past 30 years during which the bank's deposits quadrupled.

Shaded area on map is 26th congressional district which August Eggerding represents on IAA board of directors.

Retired from full-time job of farming, IAA Director August Eggerding raises about two dozen pigs which he is shown feeding.

He was president of the Horse Prairie Mutual Fire Insurance Company from 1918 to 1941 and secretary since then, and is secretary of the Horse Prairie Township District Mutual Tornado Insurance Company after having served as president for 14 years. He helped organize and is president of his rural fire department.

The town board has been headed by Eggerding for the past 25 years. He was president of the Red Bud Quarry Company for 18 years before the organization liquidated its holdings, chairman of rural resettlement in Randolph county for four years, and before coming to the IAA board served four years as chairman of the local soil conservation board.

Eggerding is a charter member of the Randolph County Farm Bureau and was on the organizing board of the Randolph County Service Company, serving as president of the board for five years.

Devoted to Church

He is deeply devoted to his rural Lutheran church, has been a voting member since 1904, an elder for a 3 year term, and is a former president of the church congregation. He has served on the national board of support and pensions of the Lutheran church.

The Eggerdings were married in 1904. Mrs. Eggerding is the former Amanda Liefer. They are the parents of three sons and two daughters — Edwin of Red Bud, an oil truck salesman; Wilbert, who operates the home farm; Mrs. Adelia Wiedman of Waterloo, Ia., a former school teacher, and Mrs. Dorothy Spier, who lives on a farm in Baldwin.

A son, Oliver, died in 1938 at the age of 27 of pneumonia two years after he had been ordained a Lutheran minister. The Eggerdings also have nine grandchildren.

Like many Randolph county farmers prior to 1932, Eggerding considered him-

HOUSE THEM EARLY for EARLY EGGS

Now is the time to bring them in from the RANGE to the

LAYING HOUSE

TIMELY HOUSING TIPS

- **CULL PULLETS RIGIDLY**

  House only the larger, fully developed birds. These have the best chance of laying a lot of large eggs. Cull the lower 10 to 20 per cent of the flock.

- **KEEP PULLETS SEPARATE FROM OLD STOCK**

  Avoid contamination of new flock by last year's hens. Some old birds may be carriers of disease which will infect the new flock. Either dispose of the old ones two weeks before housing the pullets or keep the two flocks separated.

- **PROVIDE ADEQUATE SPACE AND PROPER EQUIPMENT FOR WATER, FEED AND NESTS**

  Don't crowd the flock into a small house. Give them room to exercise. Modern steel equipment is the most practical and sanitary for feeding, watering and nesting.

- **GIVE THEM FRESH AIR**

  On range they've had lots of air. Don't stifle them when you bring them inside. Keep plenty of windows open. You'll have trouble if pullets get overheated.

Feed them RIGHT for top production

Begin NOW on one of these systems:

FREE CHOICE FEEDING

"Free Choice" is a method of feeding BLUE SEAL POULTRY BALANCER with farm grains. This allows the pullets to balance their own rations according to their individual requirements. **"Free Choice"** eliminates grinding and mixing or purchasing a lay mash if farm grains are available.

MASH and GRAIN FEEDING

The **"Mash and Grain"** method consists of feeding BLUE SEAL LAY MASH along with whole farm grains.

Where supplies of farm grains are adequate, an economical LAY MASH can be made by mixing ground grain with BLUE SEAL POULTRY SUPPLEMENT according to directions on the tag.

See Your Blue Seal Feed Salesman

Illinois Farm Supply Company, Chicago

FARM SUPPLY BUYS MATTOON ELEVATOR

TO MEET its need for corn drying facilities and corn storage, the Illinois Farm Supply Company has purchased the Big Four elevator at Mattoon from C. C. Turner.

Ownership of the elevator, which has corn-drying equipment and storage capacity for 60,000 bushels of corn, was taken over September 15.

Actual operation of the elevator will be undertaken by the Farmers Grain Company of Doran which has entered into a working agreement with the Illinois Farm Supply Company.

Farmers Grain operates two elevators at Doran, four miles north of Mattoon, and is one of the older and more successful cooperative farmers elevators in the state. It is a member of the Illinois Grain Corporation, grain brokerage affiliate of the Illinois Agricultural Association.

Chief reason for the purchase of the Big Four elevator, according to J. J. Lanter, Illinois Farm Supply Company feed division director, is to provide needed storage for the Benton feed mill which will begin operations in the near future.

The elevator also will be used as a source of supply of good quality corn for member feed distributors in the southern Illinois corn deficit areas who wish to make the corn available to feeder patrons.

"It is ideally located for this purpose," Lanter said, "because it is situated at the end of the northern Illinois surplus corn area and has good rail and highway connections to southern Illinois."

Farmers Grain Company of Doran has been a distributor of Blue Seal Feeds for many years and on April 1, 1945, became a Farm Bureau Type cooperative.

Addition of this elevator, under the management of Andrew Homan, will make cooperative grain marketing available to a greater number of Farm Bureau members in Coles county. It will also make possible full cooperative handling of corn from farmer producer to farmer consumer.

HESSIAN FLY THREAT

Hessian fly infestation may be as bad or worse next year in Illinois wheat fields because mid-summer rain-fall sprouted volunteer wheat to serve as host for the bug this fall, warns J. H. Bigger, Illinois Natural History Survey entomologist.

NOTICE
Illinois Agricultural Association Election of Delegates

Notice is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of October and November, at the hour and place to be determined by the Board of Directors of each County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association, shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting, or any special meeting of the association, including the election of officers and directors, as provided for in the By-Laws of the Association.

During October, annual meetings will be held in Adams, Fayette, Hamilton, Hancock, JoDaviess, Madison, Menard, Montgomery, Peoria, Pike, Pulaski-Alexander, Scott, Washington, White and Pope-Hardin Counties.

During November, annual meetings will be held in Bond, Brown, Clinton, Cumberland, Franklin, Gallatin, Henry, Lawrence, Logan, Macoupin, Massac, Schuyler, Shelby, St. Clair, Warren, Williamson and Richland Counties.

Paul E. Mathias, Secretary
September 18, 1946

..."AS FARMERS FORWARD GO"

ORGANIZATION NOTES
By O. D. Bissenden

FARM Bureau membership in Illinois hit a new high of 130,409 as of Aug. 31, 1946. This represents a total of 21,109 new members for the first 11 months of the current fiscal year.

Seventy-two volunteer workers attended an organization supper meeting in Christian county Sept. 9. Three days later they came back to a report meeting with a total of 130 new members. This is the first big county-wide membership drive held this fall, and is indicative of the progress that we may expect in many other counties during the fall and winter drives. Other County Farm Bureaus staging membership drives during the month of September are Edwards, Union, Greene, Gallatin, Iroquois, Douglas and Lake county.

Temple R. Lovett, county organization director from Livingston county, reports a most successful drive in two townships in that county, where effort was concentrated to better acquaint both non-members and members with the Farm Bureau program.

Employee training meetings are going forward in every section of the state with splendid participation. The new film strip, "Hold That Membership", is now ready for distribution and will be shown at many of these meetings this fall and winter.

The second annual Farm Bureau Institute held during the last of August at the University of Illinois attracted 151 Farm Bureau employees from 35 states. Ten county organization directors from Illinois, plus another new Farm Bureau employee attended the Institute.

Leo Lybarger, past president of the Clay County Farm Bureau, and more recently employed as county organization director for Douglas County Farm Bureau, became county organization director for his home county on Oct. 1, 1946. Walter Specht having resigned as COD so that he might spend more time on the insurance program.

IAA DIRECTOR HAS MANY-SIDED CAREER

(*Continued from page 20*)

self somewhat of a wheat farmer. Since then wheat acreage has been cut and livestock raising increased. Today, the home farm — he also owns a 200-acre farm south of Baldwin — raises about 50 acres of wheat, 30-40 of corn, 20-25 of oats and 8-10 of alfalfa, some pigs, and maintains a herd of 16 Holsteins.

He started liming in 1914 and has limed the place twice since that time and expects to begin using Raw rock phosphate in the near future.

Son Wilbert hands his Dad a window shutter as they work together repainting and hanging shutters on Eggerding homestead.

During his tenure on the IAA board, Farm Bureau membership has increased from 54,000 to 130,000 members. He believes that the Farm Bureau and the Illinois Agricultural Association is in a strong position and will continue to increase its membership to still greater numbers as well as its services rendered.

FUN AT THE FARM SPORTS FESTIVAL

(*Continued from page* 5)

feating Henderson 10 to 0 and Henry by 7 to 1. Macon defeated Boone 8-2 and Tazewell 15-4 before meeting Will. Will won the state title in 1941 and 1942. Macon won in 1940. This was the first season of play since 1940.

Some 105 teams and 1500 players competed in the seven divisional tournaments for softball state titles.

At the Thursday evening program in Memorial stadium Dr. George D. Stoddard, president of the University of Illinois, told the farm audience he could think of nothing finer (than the festival) in this disorganized world.

"It does our hearts good to see you out there on our campus having a good time. We want you back and we shall look forward to it," Stoddard said.

Other speakers who welcomed the farm visitors were F. E. Morris, of Buffalo, vice president of the Illinois Agricultural Association, George E. Metzger, IAA field secretary, and Dr. W. E. Carroll, acting dean of the College of Agriculture.

The Shelby county square dance teams and the Jasper county kitchen band were two of the acts from the folk festival that appeared on the evening program. Radio artists from WLS and WDZ were also featured.

After a program spectators attended a swing and square dance jamboree held at Huff gym.

President George Stoddard of the University of Illinois welcomes farm folks to the campus for the Sports Festival.

SUMMARIES

SOFTBALL

Adult County League Division—6 teams played, St. Clair won. Round 1: McLean 12, Champaign 1; St. Clair 24, Winnebago 1. Semi-finals: McLean 5, Edgar 1; St. Clair 3, Vermilion 1. **Finals:** St. Clair 17, McLean 1. **Consolation:** Edgar 15, Vermilion 3.

All County Softball Division—23 teams played, DeKalb won. **Round 1:** McLean 16, Vermilion 3; Moultrie 15, Macoupin 2; Peoria 9, Effingham 0; Champaign 10, Randolph 5; Kankakee 17, Tazewell 3; Iroquois 7, Macon 1; Whiteside 14, Kane 8. **Round 2:** McLean 5, St. Clair 2; Henry 5, Moultrie 4; Edgar 9, Marshall-Putnam 1; Ford 5, Peoria 4; Champaign 11, Jasper 5; DeKalb 5, Kankakee 1; Sangamon 10, Iroquois 7; Whiteside 8, Winnebago 6. **Round 3:** McLean 9, Henry 1; Ford 8, Edgar 7; DeKalb 8, Champaign 4; Whiteside 4, Sangamon 0. **Semi-finals:** McLean 5, Ford 4; DeKalb 4, Whiteside 1. **Finals:** DeKalb 17, McLean 0. **Consolation:** Ford 10, Whiteside 4.

Sandford Resigns to Become College Professor

W. P. SANDFORD, director of sales service for the Illinois Agricultural Association since June, 1941, resigned Sept. 15 to accept a professorship at St. Louis University. In addition to his work on the University staff, Sandford will be licensee for the Dale Carnegie course in St. Louis.

W. P. Sandford

During his service on the IAA staff, Sandford conducted some 125 sales training and public speaking meetings over the state for Farm Bureau empoyees with a total attendance of some 6000 per year. He also held 180 meetings on membership maintenance during the last several years in cooperation with IAA organization fieldmen. He also edited two film strips, "Selling Farm Bureau Membership" and "Hold That Membership" in cooperation with the IAA publicity department, and two editions of two booklets.

We'll book a barrel of oil!
Roll out the barrels
Tractors are tilling the soil!

ORDER MOTOR OIL *NOW!*

FUTURE ORDERS GET PRICE PROTECTION and DISCOUNT

Right now your company is in the midst of a great motor oil booking program. Your winter and spring oil supply should be arranged for **NOW!**

Orders placed now will be protected on *price*, and in addition, will receive a special *Future Order Discount*. Payment will not become due until delivery is made.

ILLINI MOTOR OIL
A premium grade motor oil that keeps clean motors clean. Ideal for cars, trucks or tractors.

BLUE SEAL MOTOR OIL
A pure paraffin base oil known in the industry as "regular."

PENN BOND MOTOR OIL
Another good versatile oil made from Pennsylvania grade crude and blended for use in farm motors.

I.F.S. HEAVY DUTY MOTOR OIL
An oil made especially for heavy duty work in diesel motors in trucks and tractors.

LUCO LUBE
A high quality grease that "stays put" and defies heat and water.

HARVESTER GUN GREASE
A cold weather grease for combines and corn pickers.

ALUMINATE GUN GREASE
A clear color grease that survives melting.

ANTI-RUST
A wonderful machinery protector. Prevents rust for a year.

Prepare for
COLD WEATHER
Order your
ANTI-FREEZE

Now is the time to estimate your anti-freeze needs for the winter. Supplies are short, so order enough to see you through. We have two excellent products which we recommend.

PERMA-TYPE

Blue Seal Perma-Type Anti-Freeze will not boil away and will not corrode metal parts. One fill lasts all winter. Gives good protection.

WINTERMASTER

Blue Seal Wintermaster is a methanol type material which will give good protection and will not corrode metal parts.

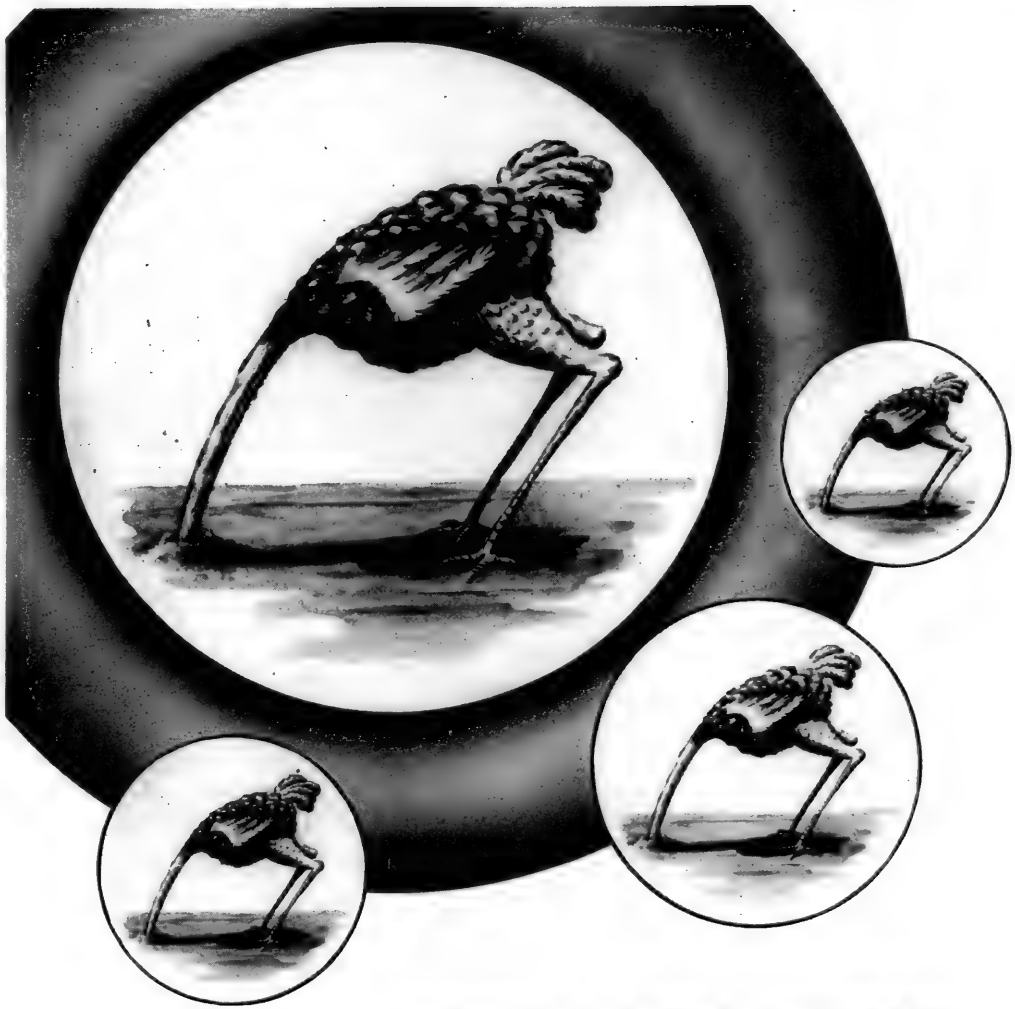
BLUE SEAL



THERE'S A LITTLE "OSTRICH" IN EVERY ONE OF US—

COUNTRY *Mutual* **FIRE** *Company*

We are all tempted to *forget* — when skies are clear — that tornados do strike, or that fire could level our farmstead in a few hours. But to ignore these ever-present threats is simply to play "ostrich," and we all think the ostrich is silly for hiding his head in the sand.

The only *safe* way to ignore wind and fire is to be fully insured against them. You get dollar for dollar value and complete coverage when you buy a Country Mutual Fire policy. See your agent today.

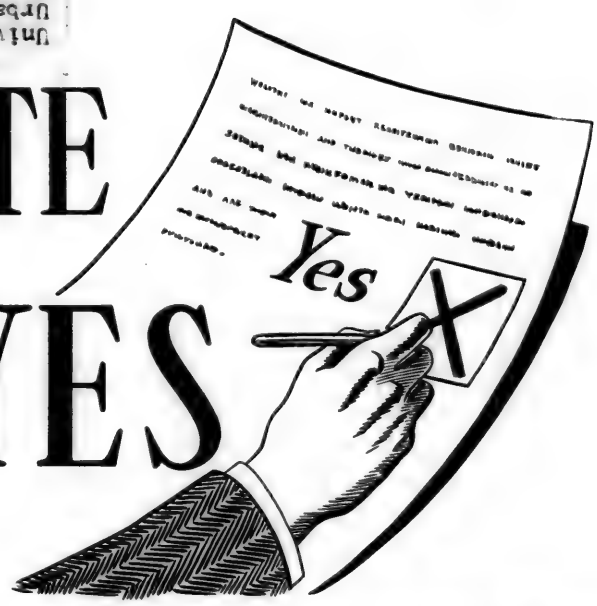
VOTE YES



ON THE *GATEWAY AMENDMENT*

TEN REASONS WHY YOU SHOULD VOTE "YES" ON THE GATEWAY AMENDMENT

1. To make it possible to improve our State constitution. Of 13 submitted only two amendments have been adopted since 1891.

2. To allow a two-thirds majority of those voting on an amendment to adopt it. The Gateway Amendment proposal submitted in 1932 received an 80% "Yes" vote, but failed to carry because 2,110,000 did not vote on the proposal.

3. To make possible needed changes in our State constitution in an orderly way, one, two or three at a time, thus avoiding the turmoil, uncertainty and expense of a constitutional convention. Only a few changes are needed.

4. To require that votes upon any change in our basic law be cast directly upon the proposition so as to keep constitutional changes out of partisan politics.

5. To make possible a modernization of our State tax system.

6. To make possible legislative reapportionment in Illinois fair to both rural and urban areas.

7. To make possible greater home rule for metropolitan areas.

8. To let voters who take the pains to vote upon a proposition decide basic issues.

9. To bring our state and local governments up-to-date.

10. To make amendment of our State constitution possible but not easy.

Mark Your Ballot

REMEMBER: Your failure to vote on the amendment, in a separate column on the ballot, would be JUST THE SAME AS IF YOU VOTED, "NO". So vote YOURSELF and tell your FRIENDS to vote ON THIS AMENDMENT.

DON'T LET IT LOSE BY DEFAULT!

Despite the fact that everyone agrees that this legislation is GOOD, it could lose by simple OVERSIGHT — by simple neglect to vote on it. It MUST receive a favorable vote of the MAJORITY of ALL who vote. GET OUT THE VOTE on the GATEWAY AMENDMENT.

Remember: You MUST VOTE To Have Your Opinion Count!

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

MR. CHAIRMAN:

By President Charles B. Shuman

THERE are many kinds of annual meetings. They all have one thing in common. The success or failure of an annual meeting of members of a farm organization measures in a large degree the amount of membership interest and activity in the organization. It is, therefore, important as we enter this season of annual meetings that we think of ways to improve these important events.

What do you like about your own county annual meeting? What about it displeases you? As members of cooperatives and various organizations it is our duty to participate in the annual meeting and also to discuss frankly ways of improvement with the officers and directors of the organization. As officers, directors and employees, it is our duty to welcome constructive criticism and conscientiously strive to make our own annual meeting the best in the history of the organization.

The annual meeting is the one event of the year that all of us as members of cooperative organizations should want to attend. Yes, I know some of the common reasons why you sometimes stay at home. The meeting doesn't start on time and it drags on too late! The five minute reports take thirty minutes and the main speaker is too long winded! Elections sometimes appear to be "railroaded" and members may not be encouraged to participate. Too many politicians may be introduced and the dinner may not be the kind you like. However, it is *your* annual meeting and it is *your* responsibility as a member to participate and see that it is improved!

I want to urge that you attend your local annual meetings. In the interest of preserving our democratic institutions, your presence and active participation is imperative. As far as accommodations permit, I hope a large number of our members will attend the annual meetings of the Illinois Agricultural Association and Associated Companies in Chicago, November 18 to 21, and the American Farm Bureau Federation convention in San Francisco in December. A well earned vacation can be combined with an opportunity for you to make an important contribution towards the solution of some of our many problems.

BENEFITS

SECTION A—*For Bodily Injury*

A The loss resulting from reasonable and necessary expense actually incurred within six months from the date of accident for ambulance, medical, surgical, dental, hospital or registered nurse services or medical supplies, not to exceed the sum of Three Hundred Dollars ($300.00) for each such injured person. (Insured also included.)

SECTION B—*For Death*

B If such bodily injury shall result in death within six months from the date of accident, the sum of Five Hundred Dollars ($500.00) less all amounts paid under Section A on behalf of such person, and, if such person is the "Named Insured" under the policy, an additional sum of Five Hundred Dollars ($500.00).

Limits

The maximum aggregate benefits payable on account of any one accident for bodily injury to or death of other persons than Named Insured are $1500. The maximum benefits payable on account of any one accident for bodily injury to or death of the Insured are $1000. Total — $2,500.

U. of I. PRESIDENT TO Address IAA Annual Meeting

PREPARING to face a new year charged with numerous problems of readjustment for agriculture, Illinois Farm Bureau members will gather Nov. 18-21 at the Hotel Sherman in Chicago for the 32nd annual meeting of the Illinois Agricultural Association and Associated Companies.

Principal speaker during the four-day session will be George Dinsmore Stoddard, president of the University of Illinois and one of the most prominent educators in the Midwest. Dr. Stoddard will address the Wednesday night, Nov. 20, session on "Education as a Basic Resource."

Other speeches on the program include addresses by President Edward A. O'Neal of the American Farm Bureau Federation, Earl C. Smith, former president of the Illinois Agricultural Association, and President Charles B. Shuman of the IAA, who will deliver the president's annual report.

Assembling for their second meeting since the end of the war, Illinois farmers are aware that the end of limitless farm markets are in sight. Adjustments, they know are to be expected in the coming year. At the annual meeting, Farm Bureau leaders will discuss thoroughly IAA policy for the coming year.

Other questions which are expected to be of unusual interest this year are rural schools and rural roads. Delegates are expected to decide the IAA's position on the federal flood control plan for Illinois.

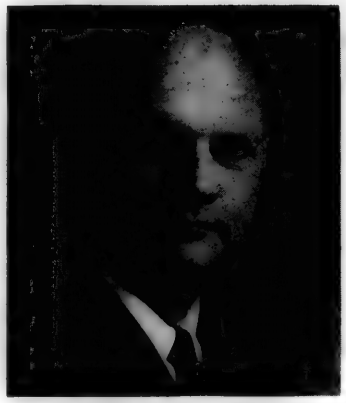
For the first time in several years, the Illinois Home Bureau Federation will hold a conference in conjunction with the IAA convention. Home Bureau will open its meeting Tuesday morning.

As in past years, the associated companies will hold their annual meetings during the first two days of the convention, Monday and Tuesday, Nov. 18 and 19. A general program of entertainment is being planned for Tuesday night starting at 7:30.

The Tuesday evening program of entertainment will include a four-piece orchestra; The Five Leonards, an all-girl tumbling act; Gregory and Cherie, a comical musical act; Al Dault and his comedy table-rocking act; George Goebel, guitar-playing singer and yodeler and Master of Ceremonies Roy Davis, who made quite a hit with Farm Bureau folks two years ago with his comedy and mimicking.

BULLETIN

Shortly after THE RECORD went to press, it was learned that President Stoddard will be unable to address the IAA convention as he has been appointed a member to the U. S. Delegation to the First General Conference of United Nations Educational, Scientific, and Cultural Organizations meeting to be held in Paris during November.



George D. Stoddard

Rural Youth will hold the state finals of its annual Talk Fest starting Tuesday morning.

Former IAA President Earl C. Smith will speak to the convention. And President O'Neal of the AFBF will speak Thursday morning.

Dr. Stoddard was born in Carbondale, Pa., Oct. 8, 1897 and is married to the former Margaret Trautwein. They have five children, Philip,

Annual Meeting Program

MONDAY, NOVEMBER 18

A.M.
11:00 Presidents' and Farm Advisers' Conference.
12:15 Presidents' and Farm Advisers' Luncheon.

P.M.
3:30 Farm Bureau Presidents' Conference.
Farm Advisers' Conference.
7:00 Illinois Cooperative Locker Service.
Illinois Grain Corporation.
Illinois Agricultural Auditing Association.
7:30 Illinois Farm Bureau Serum Association.

TUESDAY, NOVEMBER 19

A.M.
9:30 Illinois Agricultural Holding Company.
Illinois Wool Marketing Association.
Illinois Milk Producers Association.
Rural Youth.
10:00 Country Mutual Fire Company.
Illinois Farm Supply Company.
Illinois Home Bureau Federation Conference.

P.M.
1:00 Illinois Livestock Marketing Association, Country Mutual Casualty Company.
Prairie Farms Creameries.
1:15 Rural Youth Conference.
2:45 General Insurance Conference.
7:30 General Entertainment.

WEDNESDAY, NOVEMBER 20

A.M.
7:30 Rural Youth Delegate Conference.
9:15 IAA General Session.
Reports of Officers and President Shuman's Address.

P.M.
1:30 Group Conferences:
Public Relations.
Organization and Publicity.
Schools.
Soil Improvement.
Marketing.
4:00 District Conferences and Caucuses.
7:30 IAA General Session.
Address: George D. Stoddard, President, University of Illinois.
Address: Earl C. Smith, former President, IAA.

THURSDAY, NOVEMBER 21

A.M.
9:30 IAA Business Session.
Address: Edward A. O'Neal, President, American Farm Bureau Federation.
Address: Farm Bureau leader from nearby state.
Business session.

Top shows part of the crowd of 2,000 which watched the Will County Farm Bureau team, Illinois champions, defeat the Palo Alto Farm Bureau team, Iowa titleholders, 4-3 and 3-1, at Legion Park, Emmetsburg, Ia. Bottom shows Will county man scoring at home plate.

Illinois Baseball Champs Defeat Iowa Nine In Interstate Series

IN THE championship style that sent them to the top rung of the Farm Bureau baseball ladder in Illinois, the Will County Farm Bureau team defeated the Iowa champions at Emmetsburg, Ia., Sept. 29, 4-3 and 3-1.

Palo Alto County Farm Bureau, Iowa titleholders, held the Illinois team to seven hits in the first game and rallied in the ninth inning to score twice but were unable to overtake the three-run lead held by Will county. Result: Illinois, 4; Iowa, 3.

In the second game, Palo Alto took the lead in the first inning but were held scoreless the rest of the game. Hurler Bob Bormet of Will county held the Iowans to three hits while his buddies managed to get nine hits and three scattered runs. Result: Illinois, 3, Iowa, 1.

The first game of the scheduled three-game interstate contest was planned for Saturday but was held over until the following morning. By taking both games in a row, the Will county team ended the series after the second game.

Both teams won their state Farm Bureau titles by defeating all competition at their state farm sports festivals.

For the Will county team and its coach, Bob Seeley of Manhattan, the interstate victory was the high spot of the season in a victory-studded record that would be the envy of any baseball team.

Will county won the state title at the Illinois State Farm Sports Festival at Champaign-Urbana Aug. 29-30 by defeating Henderson, Henry and Macon county teams. Before going into the state playoff, Will won its district by downing LaSalle, Kendall and DeKalb counties.

This year Will county has played 42 games, winning 39 and losing 3, and in two out-of-league games defeated the Chicago Cub Juniors, 6-1 and 5-0.

Arnold Landeck, who pitched Illinois' first win over Iowa, leads Will county batters with close to a .400 average. Leading Will pitchers are Bormet, 19 wins, no losses, Landeck, 15 wins, one loss, and Paul Schultz, three wins, no losses.

Organized in 1931, the Will county team has been managed for 16 years by veteran coach Seeley. Two team veterans, Vernon Drecksler and Richard McHugh have been with the team since it was first organized. McHugh started as a batboy.

This is a view of California street in downtown San Francisco where the cable cars still climb the hilly streets. In the distance is the San Francisco-Oakland Bay bridge.

AT THE GOLDEN GATE ON DECEMBER 8

MORE than 500 Illinois Farm Bureau folks will be knocking on the Golden Gate Dec. 8 according to the number of requests for reservations received thus far at the IAA offices in Chicago.

Illinois farmers leaving for the annual meeting of the American Farm Bureau Federation in San Francisco will be going along on one of the most colorful business-pleasure trips ever sponsored by the IAA.

The trip includes views of America's picturesque West — deserts, mountains and the Pacific ocean. Side trips will be made in New Orleans with breakfast in a French restaurant, at San Antonio where a five-hour stopover will include a visit to the historic Alamo, at El Paso for a jaunt to the Carlsbad Caverns, at Juarez in Mexico, and at Phoenix and Los Angeles for views of the most outstanding parts of the cities.

Reservations for the trains leaving Chicago Dec. 1 and returning to Chicago Dec. 15 are coming in at such a rate, according to Roy P. Johnson, IAA Director of Special Services who is in charge of arrangements for the trip, that hotel accommodations for 500 persons have been made in San Francisco.

Johnson said that accommodations would be assigned just as soon as possible. Those on the IAA tour will be assigned to hotels by counties as much as possible.

Although the OPA recently lifted ceilings from the price of meals served in railway dining cars, as the RECORD goes to press it is understood that the price of the trip will remain essentially the same as originally quoted. The price of the trip averages around $200 per person.

E. E. HOUGHTBY NAMED DAIRY DEPARTMENT HEAD

E. E. Houghtby, DeKalb county dairy farmer and a member of the IAA board of directors from 1934 to 1943 has been employed as director of the dairy marketing department of the Illinois Agricultural Association.

E. E. Houghtby

Houghtby succeeds Wilfred Shaw who resigned to become dairy marketing director for the American Farm Bureau Federation.

For the past three years Houghtby has served as manager of the War Hemp Industries, Inc., processing plant at Shabbona.

Active in Farm Bureau, civic and cooperative affairs for many years, Houghtby was awarded a Master Farmer medal by Prairie Farmer in 1931.

He has been president of the DeKalb County Farm Bureau for the past 14 years and served as treasurer of Pure Milk association from 1935 to 1942.

From 1919-29 he served as secretary of the Shabbona community high school. While on the IAA board he served as chairman of the business service committee and secretary of Country Life Insurance Company and the Illinois Agricultural Holding Company.

Graduating from Illinois State Teachers' College in 1913, Mr. Houghtby taught school for five years, acting as superintendent of high schools at Ohio and Neponset.

For two years he taught mathematics at the Rock Island high school. In 1919 he began farming near Shabbona.

Mr. and Mrs. Houghtby have one daughter Joan Elizabeth, 18, who is attending William Woods College, Fulton, Mo.

Mr. Houghtby has served as a member of the boards of the Kishwaukee Service Company, DeKalb Locker Service, Inc., and DeKalb County Producers Supply Company.

Crossbred cattle produced by combinations of both two and three breeds yielded slightly more beef and profit per animal than comparable purebred stock, the U. S. Department of Agriculture found in experiments conducted at its range livestock station in Montana. The studies covered several years.

Team boards plane for flight home to Champaign from Des Moines, Ia. E. C. Harriott, president of the Champaign County Farm Bureau, holds gold championship trophy.

Champaign 35ers Beat Iowa For Corn Belt Title

CHAMPAIGN county's men-over-35 softball team won a Corn Belt championship recently, by defeating Iowa's state winners 16-2 at a post-sports festival interstate contest held at Indianola, Ia.

The amazing thing, the Illinois team contended, was not so much in the lop-sided score as the way they flew to Des Moines in a converted, commercial C-47.

The entire squad, along with 20 supporters, took off from Champaign at 7:30 a.m., ate dinner in Iowa, played two ball games, and were home in time for supper with their families.

The ball game itself was pretty well in the bag during the first inning when Burdette Griffith, Champaign county team captain, hit a home run with bases loaded to drive in four runs.

Reinhold Baileschki pitched a seven hitter against the Iowa team and was never in very serious trouble.

E. C. Harriott, Champaign county Farm Bureau president and Griffith, team captain, brought home the handsome gold trophy pictured here, a substitute for the engraved scoop shovel which earlier had been billed as the prize for the winner.

This scoop shovel had been awarded to the Iowa team when it defeated the Illinois champions, Vermilion county, in 1936.

Both teams were winners in their respective state rural sports festivals. Many of the Illinois players could not have attended if a plane had not been chartered since the trip would take two days by car.

As soon as the plane was chartered many requests for the trip were turned down.

Halsey Miles, Crawford county farm adviser, has been named Bureau county farm adviser, the post vacated by Paul V. Dean who resigned because of poor health. Mr. Miles taught vocational agriculture at Rock Island for five years before moving to Robinson where he served as Crawford county farm adviser for six years. He grew up on a farm in Knox county near Galesburg.

James Davies of Henry county, a 1943 graduate of the University of Illinois College of Agriculture, has been engaged as a second assistant farm adviser in LaSalle county. Davies will take over part of the work done by Assistant Farm Adviser George Trull who will now give all of his time to soil conservation. Davies served in Europe with the army. Farm Adviser Fred A. Painter said Davies would take over his new job about Nov. 15.

E. V. Stadel, new Jo Daviess county farm adviser, until recently had been county organization director in Winnebago county since his discharge from the army. Before entering the army in 1942, Stadel servel as 4-H club leader in Winnebago county for three years and acted as 4-H club leader and organization director in Marshall-Putnam county during 1936-39. He has worked for AAA (1935-36) and as DHIA tester in Brown county (1934). Stadel is a graduate of the University of Illinois College of Agriculture.

Robert Allerton (right) of Monticello admires the plaque presented to him by the 4-H Club division of extension service. The presentation was made by Dr. W. E. Carroll, acting dean of the University of Illinois College of Agriculture, in appreciation of his generous gift of the site of the Illinois State 4-H Club Memorial Camp in Piatt county.

Sports in the News

W. W. Holmes resigned Oct. 1 as Kankakee county organization director. During the four years he served as organization director membership grew in the county from 896 to 1600. Mr. Holmes resigned because of poor health.

OUR COVER

This month's RECORD cover is a panoramic view of a stretch of California's Pacific coast between Los Angeles and San Francisco which will be seen on the IAA's caravan tour to the AFBF convention in December.

Farm co-op membership last year increased by more than one-quarter million and volume of business was up by nearly 50 million dollars. Of the total co-op volume in 1945 of $5,645,000,000 dairy, grain, and fruit and vegetable marketing accounted for nearly 70 per cent of the co-op activity.

Whatever the assets of the nation's co-ops at present, they are overshadowed by the 43 giant U. S. Corporations, each with assets of more than a billion dollars. These corporations own one-fourth of all the nation's industrial, banking and insurance wealth, the United Press reports.

In Illinois Farm Bureau members expect to spend some $1.5 million on co-op locker plants as soon as building materials are available. By the end of 1946 some 100 co-op plants are expected to be serving members with a total of 40,000 individual lockers. And that's pretty big business, too.

Many Clinton oats fields, Bureau county reports, grew shirt pocket high on straw thick as an ordinary cigarette. Blackbirds and starlings could alight on the straw to picks off the plump grains. Seldom is an oat straw stiff enough to support the weight of a blackbird, they said.

Donald Kirkpatrick, general counsel for the Illinois Agricultural Association and the American Farm Bureau Federation, and Larry Brandon, DeKalb county farmer and vice-president of the DeKalb County Farm Bureau, will speak at the 28th annual convention of the Indiana Farm Bureau at Indianapolis Nov. 13-15.

A 1947 spring pig goal of 58 million pigs has been announced by the U.S.D.A., up 11 per cent from the 52.3 million produced in 1946. It will take an estimated 9,170,000 sows to farrow this pig crop, an increase of 13 per cent from this year's 8,087,000. A greater percentage of sows will be needed to boost pig numbers, the U.S.D.A. believes, because the pigs saved per litter this year was unusually high.

Hail storms seem to hit DeWitt county whenever hail falls in Illinois and hail hit again this year. Insurance claims indicate from 2 to 50 per cent damage on fields where hail storms struck.

Price of Clinton seed oats varies a little throughout the state but growers are asking about $2.25 a bushel for cleaned, bagged and tagged certified seed. Considered resistant to Helminthosporium blight disease, this new high yielding oat variety is available now in limited supply for 1947 plantings.

The Morrow Plots on the campus of the University of Illinois, Urbana, are America's oldest soil experiment field. They were established in 1876.

Ray T. Nicholas, Lake county farm adviser, smiles with the pleasure anyone would have on winning $2,643.15 for a paper written on the agricultural application of arc welding. Here he holds the check he received from the Lincoln Arc Welding Foundation which awarded the prize.

MORE STUDY FOR ILLINOIS FLOOD CONTROL PLAN

Rumors that the $90,000,000 Illinois river flood control plan has been sent back to the district office of army engineers in Chicago have been branded as "absolutely incorrect" by spokesmen from the Chicago office.

The Washington board of army engineers for rivers and harbors is reviewing the plan and studying the testimony submitted at the May 31 Springfield hearing since it convened on Oct. 6, this local authority said.

When and if any revisions are requested in the basic flood control plan, the district engineer offices in Chicago and St. Louis, Mo., would be among the first informed since they would do the necessary field work.

The Chicago office of the district engineers has on their own initiative gone into certain details of the program, but in a limited way, the authority stated.

The details being revalued were listed as concerning the objections raised by the Springfield sanitary district and also a revised study of the comparison of the land in the Illinois river basin to be flooded against that to be protected from flood.

Due to the gigantic scope of the plan and the volume of testimony submitted at the Springfield hearing it was suggested that the Washington board would be slow in submitting its recommendations to the chief of engineers.

The following letter to the IAA RECORD *was written in tribute to the farmers of America by James Forrestal, Secretary of the Navy:*

TO THE FARMERS OF AMERICA:

In September, 1945, the Japanese surrendered. I regard it as significant that they surrendered during the harvest month, for, no less than the guns and the spirit of our men and women, it was the food which came from the great farming areas of this country that brought us to victory.

The Navy still remembers the heroic work of the farmers, who, although it is more than a year since the fighting ended, have not lessened their efforts to feed the nation and the starving peoples of the world. On Navy Day, October 27, 1946, I wish to thank the farmers of America.

James Forrestal

JAMES FORRESTAL

TREAT CORN PICKER WITH RESPECT — IT'S DANGEROUS

Nope! You can't "fence the corn-picker in" as was suggested by a leading safety engineer of a large railroad company when he first saw this "finger-pickin'", "corn-pickin'", labor savin' device. He viewed it with horror and indicated that if the railroad company had anything like that in their shops they'd build a high fence around it, put up safety signs, and warn workers to "keep their distince".

We can't and wouldn't furnish this bit of advice, as the corn-picker is a very useful apparatus — but it is also one of the most deadly machines on Illinois farms. What we *can* do is to treat the corn picker for what it is, and save our legs and arms and lives to pick corn again next year.

Almost half the folks that get themselves tangled up with these things will come out either permanently injured or disabled — or dead, according to our 1942 Illinois newspaper tabulations. Some 236 corn-picking accidents in that year show the same two main causes as in other years: the operator became entangled in the power take-off, or he tried to remove trash from the husking or snapping rolls while the machinery was in motion.

WHERE'S THE DINNER BELL?

Shedding an editorial tear the *Wallace's Farmer* asks its readers — where is the old dinner bell? There aren't so many these days, the paper finds. In the old days the dinner bell . . . told the men folks when to quit work and start for the house. Rung out of season, when no meals were ready, it meant "Come quick!" Where is the old bell? Hidden? Broken? Lost? We wonder too. Perhaps our readers could tell *us*.

BIGGAR TO JUDGE STEER CLASSES AT INTERNATIONAL

Walter Biggar, of Dalbeattie, Scotland, known internationally as a stockman and judge, will act as judge of the steer classes at the International Live Stock Show to be held at the Chicago Stock Yards Nov. 30 to Dec. 7.

The Scotsman's first judging duties will fall on the first day of the show, Nov. 30, when he reviews the Junior entries, a showing of beeves by boys and girls aged 10 to 20.

Biggar will also judge the open class of fat cattle on Dec. 2 of the International and on Dec. 3 will pick the grand champion steer of the show.

A judge of steer classes at the International 12 times since 1920, Biggar in 1928 chose for the grand champion the first steer to receive this prize shown by a boy, Clarence Goecke, a 12 year old Iowa farm lad.

Noting the excellent results farm boys and girls had in feeding and showing stock at the International, Biggar started a similar movement in Scotland and in recent years has been active in promoting club work.

Entries, heaviest in the show's history, will be accepted to Nov. 1 for individual classes and until Nov. 23 for carload lots of fat cattle, sheep and swine.

Letters to the Editor are welcomed from readers on any subject related to agriculture. Writers should sign letters with name and address. Names may be withheld if desired. Address *Letters to the Editor, Illinois Agricultural Association Record, 608 South Dearborn, Chicago 5, Ill.*

SEEK 4-H CAMP FUNDS

Mrs. Mildred M. Hanley, Illinois Home Bureau 4-H Club Chairman, makes a plea for every Home Bureau unit to make some contribution to the 4-H Club Memorial Camp. There are over 1,437 Home Bureau units in the state. If each unit gave $1.00 that would be $1,437.00 . . . . . but if each unit gave $10.00 that would mean $14,370.00 . . . how much is your unit going to give?

Evenings seem more enjoyable at the Colby home because of electricity. Mrs. Colby tunes in a favorite radio program while Dad and sons Arthur (left) and Wayne read with the benefit of good lighting. Daughter Shirley, 9, plays with her kitten.

REA Makes Life For The Colbys Far More • Enjoyable •

"IT WAS pitiful trying to get things done on the farm without electricity," Mrs. Henry B. Colby of Menard county replied when asked about the "good old days" before the REA.

Accustomed to electric power on the farm they recently had left, the Colby family, including three boys and two girls, settled on their new place near Pleasant Plains without much enthusiasm.

It didn't have electricity. And for a farmer to be without electricity after he has become accustomed to it is like a wealthy man trying to adjust himself to a hobo's standard of living.

Mrs. Colby shook her head as she told of cleaning and trimming kerosene lamps, pumping water and hauling it indoors, heating flat irons on the old coal stove, emptying water from the icebox, and washing and churning without benefit of electricity.

Fortunate was Mrs. Colby and numerous other neighboring farm women that her husband, Henry, was numbered among those farmers who know they can get things done by banding together and presenting a united front.

A Menard County Farm Bureau member since 1921, Colby set out in 1937 to see what could be done to get a power line strung out to his place. Acquiring the utility himself, and anxious to help his neighbors get it too, Colby found himself president of the Menard County Electric Cooperative two years later.

Opponents of the Rural Electrification Administration would have a difficult time convincing Mrs. Colby that REA is a hindrance to the American way of life.

The American way of life, as she sees it, includes easier and better ways of doing things on the farm. It means more leisure and more time to devote to home and family.

Life on the Colby farm is far more pleasant today. Why? In answer, Mrs. Colby points to her pressure water system, her bathroom and her electrical equipment — washing machine, refrigerator, stove, mangle, food mixer, vacuum sweeper, toaster, waffle iron, clock, fans, radios, and last, but not least, the lighting system.

Besides, the food seems to taste better because of the food-preparing equipment, the modern stove and the refrigeration. Meals are more nourishing and appetizing. Wayne talked in glowing terms of his mother's ice cream and Mr. Colby added: "You ought to see the boys drink milk now that it is chilled."

None of the Colby boys, Arthur, 22, Ralph, 18, and Wayne, 15, is anxious to leave the farm. An enthusiastic advocate of farm life, Wayne asked: "What do city people have that we don't have right here?"

With sons, Wayne (left) and Arthur, Mr. Colby shows A. E. Becker, manager of the Menard Electric Cooperative, and L. W. Chalcraft (right), Menard county farm adviser, his portable motor and gear box arrangement for operating farm equipment by electricity.

The Colbys sit down to lunch on tasty foods kept fresh by electrical refrigeration. Radio (on refrigerator) helps make kitchen work more pleasant. Left to right: Wayne, Shirley, Mrs. and Mr. Colby and Arthur. They plan to get a deep-freeze unit when available.

Cooking is a pleasure since the Colbys got electricity and this modern electric stove. Even Daughter Shirley (right) doesn't have to be urged to lend a hand.

Mr. Colby gives the REA and its trouble-free power service a great deal of the credit for keeping the boys interested in farming. For in spite of the electrically-powered motors which operate much of the farm equipment, there still remains plenty of work to be done.

The Colbys feed an assortment of 75 Shorthorn, Hereford and Angus beef cattle and raise an average of about 400 hogs annually.

Asked about the comparative cost of the old system and the new, Colby calculated that power from a gasoline engine that costs 30 cents would cost about 10 cents when delivered by an electric motor.

As for the savings in time throughout the farm as a result of REA-serviced electricity, the Colbys thought it wellnigh incalculable.

Mr. Colby said, for example, that they saved a half hour daily alone pumping water, and Mrs. Colby, after some rapid offhand calculation, estimated she saved a day and a half each week because of electricity.

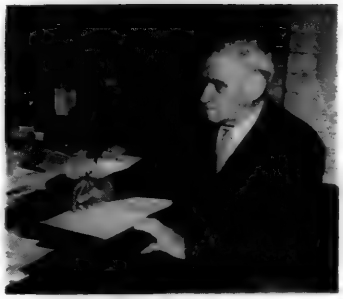
For instance, she said churning used to take three-quarters of an hour. Today it takes three minutes.

The Colbys know what it means to be without electric power on the farm and they know, too, what a blessing it is to be able to accomplish so much with the flip of a switch. And that's why probably no one is more aware of the importance of getting more farms electrified than Henry Colby. As president of the local REA organization, he is devoted to that task.

As the serious shortages of materials ease, the Menard Electric Cooperative is expected to expand rapidly. Manager A. E. Becker and President Colby will see to that.

AT 78, CHARLEY STILL BREAKS RECORDS

★ ★ ★



Charles E. Carrier, 78, a veteran of 26 years in farm organizations in Illinois works at his desk in the Farm Bureau office in Decatur.

CHARLES E. CARRIER, 78, veteran Illinois county organization director, gave his Macon county members a very, very satisfactory report this fall on the strength of their Farm Bureau membership.

Affable, hearty Charley Carrier has been giving these reports in one county or another throughout the state for most of the 26 years since he started in 1921 enlisting Illinois farm families in Farm Bureau.

And this year Carrier, spear-heading Macon's membership drives, broke just about any record listed in Macon county's book.

Membership now stands at 2125, Carrier reported, which means their new membership quota has been exceeded more than 300 per cent.

But boosting membership and lending a hand here and there is so much a part of Carrier's life he doesn't think it worth more than honorable mention.

Carrier's record, however, has long been the subject of admiration from organization men who have worked closely with him. Charley Carrier, his friends say, has probably signed more members in Farm Bureau than any other person in the state.

After 26 years of service, he's still as energetic and youthful in his thoughts and actions as any man half his age. Farmers still respond readily to his open, friendly talks. He makes twice as many contacts as the average man, his associates say.

"I began working for IAA in 1921 during the horse and buggy days when it was not very popular to be a Farm Bureau member," Carrier recalled.

"There were many times when we had to stand out by a fence where the wind would strike and take the criticism of a farmer whom we came to help," he said.

"This was generally after the member had signed for three years and was promised everything good, but the organization was young and could give little in return for the farmer's $45. So the farmer who was not used to looking ahead resented us and he had some reason to do so." he admitted.

Soon after he was hired, George Metzger, now IAA field secretary, sent him to McHenry county where the then revolutionary cattle tuberculosis testing program brought membership down to little more than 100 members.

"I was the fifth man sent there. All others got discouraged and quit. After a time we got members and at the end of four months built back to 400.

"I have often wished," Carrier said recently, "that I had kept a record of the number of members I've signed."

He recalls, he says, only approximate figures on work covering a full year. At Bureau county in 1926, he started in the spring with membership of 660. Averaging 20 new members a week he finished with 1100 farmers signed in the Farm Bureau.

He was then sent to DuPage county. There in one year he helped increase the roll from 282 to 842 members. From DuPage he went to Cook. Again the hard persistent work of Charley Carrier showed in his results.

Cook county had only 283 members and grew to 848 during his stay. Later he returned to work in Cook county and saw their membership grow to 1300.

Later he worked in Edgar, Warren, Massac and Clay counties at about the time or soon after they became affiliated with the IAA.

He left the IAA in 1933 and for two years worked for the Sanitary Milk Association, covering the St. Louis milk shed in Illinois and Missouri.

In 1935 Carrier returned to his first love, Farm Bureau membership work, working in Macon county as organization director, the position he now holds.

Rural Youth

By
ELLSWORTH D. LYON

For the past several weeks talkfesting has been a part of county and district programs of Rural Youth. We now look toward the state Talk Fest to be held in the Sherman Hotel, Chicago, Nov. 19. This activity, emphasizing whole-hearted participation in the spirit of good sportsmanship, has always stimulated clear thinking and top-notch speaking. The same high quality of past years is anticipated for the state Talk Fest this year. The state committee has planned also for a Rural Youth conference to be held on Tuesday afternoon following the Talk Fest which will be held in the forenoon and the second conference for Wednesday morning. The Talk Fest and the conferences with planned recreation should make the youth section of the annual meeting of the IAA helpful to Rural Youthers throughout the state. So Rural Youthers, to Chicago!

The big project in Rural Youth over the state is raising money for the State 4-H Memorial Camp near Monticello in **Piatt** county. **Richland** was possibly the first county in the state to sponsor a money-raising activity among Rural Youth for this camp. Although carrying the name of "4-H Memorial" the camp will be used by Rural Youthers and other organized groups in Illinois as well as by 4-H.

Franklin began a good fall program with mixers, singing, consideration of ways of raising money for the 4-H State Memorial Camp in **Piatt** county, rehearsals for the county Talk Fests, and purchases of Rural Youth pins and necklaces.

White Rural Youthers are joining with Home Bureau in raising funds for the State 4-H Memorial Camp.

Stephenson got into the swing from summer to fall activities by holding a "school day" session during the last week of September.

Wabash held its county Talk Fest in "Back to School" fashion with Charles Newkirk as the teacher.

Clark's "school days" meeting was held Sept. 11 with "schoolmarm," Sue Magill, as teacher. This group gave $25 to the State 4-H Memorial Camp.

Macoupin demonstrated a number of program ideas through dramatic sketches at the October meeting.

Logan, with a great increase in membership is now sponsoring a new membership drive. Congratulations **Logan — You're on** the beam!

Will County is planning a big Rural Youth dance for Wednesday night, Nov. 13, according to secretary, Edna Mae Schmidt. For its September meeting the young men and young women divided into separate groups. The young women heard Miss Lucille Gingerich, home adviser, speak on the theme, "Color In The Home," and the young men heard Mr. Bonesta speak upon the theme, "Electrical Equipment for the Farm."

Nice going Ogle! According to Secretary Harriett Schnulle, $50 was realized from the sale of soft drinks at the Farm and Home Bureau and 4-H picnic held this fall.

Montgomery is making plans for a basketball team. A donation of $35 has been given toward the 4-H State Memorial Camp.

Edgar joined with the Paris Chamber of Commerce in sponsoring a Fall Festival in Paris on Oct. 29, 30, and 31 by giving a square dance demonstration and assisting in leading the street dancing.

There may be a shortage of meat but **DeKalb, Kankakee, and St. Clair** each sponsored a successful banquet to "kick-off" the fall program.

Plans are already under way for **La Salle's** Christmas Formal Dance to be held Dec. 28. Luceille Gleim and **Vince Werner are** co-chairmen for the event.

Whiteside's new county officers are: president, Joe Beese; vice president, Lois Carlson; secretary, Jean Martin; treasurer, Mary Slaymaker; Athletic Directors — Corliss Cobb and Allan Wilson.

Livingston's president, Christine Ryerson, was married to the Rural Youth treasurer, Kenneth Falkers. Mike Kieswetter is the new president and Virgil Sancken is the new treasurer.

Best wishes to Hazel Grimm, Bonnie Jean Switzer and Mary Parks of McDonough who were married recently. Sorry we do not know the names of the bridegrooms.

Miss Margie Wollmer of Rushville and Karl Luthy who were married late in the summer are now residing in Sugar Grove.

Edgar reports the following weddings: Jean Keefer and Joe Ewing, Alta Brenneman and Geo. Brown, Pat Krabel and Joe Brooks, Betty Wallace and Joe McGinness, Jack Sturgeon and Pat Griffin, Hester Black and Alden McDaniel.

The board of directors of the McLean County Farm Bureau is to be commended for its practice of including a representative of the county's Rural Youth organization on the board of each of Farm Bureau's organization to familiarize them with board procedure. Wayne Lage (second from right, front row) sits in with the Farm Bureau board. Left to right, standing: Assistant Farm Adviser E. O. Mossbacher, C. B. Kaighin, George Staley, Charles Richardson, A. B. Culp, C. Ray Ward, Frank Kraft, James Smith, Farm Adviser O. Lloyd Welsh. Seated: Chris Warsaw, Ernest Schirch, Clarence R. Ropp, Lage and L. Parke Kerbaugh.

LETTERS TO THE EDITOR

PROUD TO BE FARMERS

Just picked up the Record and saw some answers to the faults city cousins find in farmers. Just glad that I'm a farmer's wife and have more to do than to sit around and think up faults of our city people. They may think they're better than we are, but let them prove it. I don't know why city people look down on farmers. We couldn't get along without the city people, and how long could they get along without us? You would think by the way they treat a farmer and the way they talk about them that they could get along just as well if all farmers were banished from the earth.

I say just let them talk. We are proud to be farmers. I much prefer to rear my two boys, two and four, out here on the farm where young people don't sleep till noon and come home at two and three o'clock in the morning. I had a friend say to me one time, "Well, what is it to farm? Anybody can farm, but you have to know something to barber!" Her husband is a barber. If you ask me the farmer knows a lot more than a barber. If he didn't, I pity the farm and the city folk.

Let the city people talk while we produce. We have broad shoulders and can take it. Give a man enough rope and he will hang himself.

—Mrs. L. J. Eaton
Moultrie county

Farmers produced 35 per cent more in 1944 than in the period 1935-39, and 50 per cent more than in the prosperous years of 1909-14.

The Illinois Farm Supply Company truck is a regular caller at the Warren farm. During a recent call, Warren talks for a moment with truck salesman Carlisle Davis.

IAA Director Inherits Loyalty to Farm Bureau Tradition

By Jim Thomson

Ass't Editor, IAA RECORD

Editor's Note: This is the second of a series of articles to further acquaint you with the men who represent you on the Illinois Agricultural Association board of directors.

BESIDES devotion to Farm Bureau acquired through the years, IAA Director Milton W. Warren, of Mansfield in Piatt county inherits a tradition of loyalty from his father, Thomas H. Warren, a charter member of the Piatt County Farm Bureau when it was founded in 1918.

And when Charles B. Shuman of Moultrie county was elected IAA president last fall, Milton Warren appeared to be the logical man to take his place as IAA director from the 19th congressional district representing Moultrie, Piatt, Champaign, DeWitt, Macon, Shelby, Coles, and Douglas counties.

Amos Clow, hired man driving mule team, chats with Warren in back yard. Warren says he is still old-fashioned enough to own a team of mules and a team of horses.

Behind him is a long record of service to his county Farm Bureau. For eight years he was a member of the board of directors followed by 11 more years, ending in 1946, as president. During the depression Piatt county had a low of 250 members. When Warren left to take up his duties as IAA director, the county had 1150 members.

The roots of the Warren family go deep into the soil and reach back more than 80 years to the time Milton's grandfather arrived in the Mansfield community from England and started farming 80 acres. Since that time the farm has grown until it is now 440 acres.

Warren grew up on the land and graduated from Mansfield high school in 1916. In 1921 he earned his degree in animal husbandry at the University of Illinois College of Agriculture. Following his graduation, he joined his father on the farm and carried a joint Farm Bureau membership with him until 1923.

He soon took a deep interest in Farm Bureau and community affairs resulting in his election to the board of the Farm Bureau. Later he served on the Production Credit Association board of directors at Champaign for six years. on the county AAA committee for seven years, and for several years on the Mansfield Cooperative Locker board of directors.

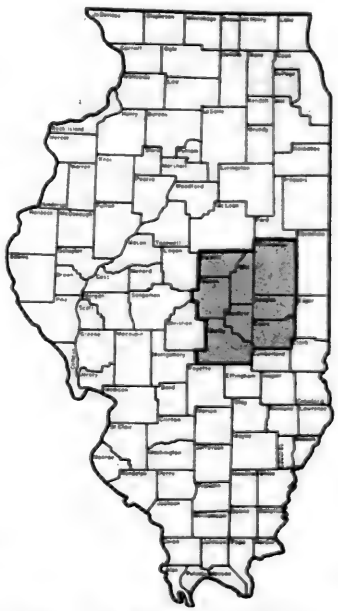
As a member of the Mansfield community high school board of directors he had strong convictions on the educational needs of the community. During his nine-year tenure of office — he is board president now — the community built a new school. He was firmly behind the move which put vocational agriculture and home economics on the curriculum.

Following his marriage to the former Claradine Dickson, Warren settled down to a career of general farming. He owns a small herd of about 25 purebred Aberdeen Angus cattle and a milking herd of 10 Guernseys. He has raised as many as 300 hogs a year but now averages about 150 Durocs.

Mrs. Warren is as deeply interested in farming and Farm Bureau as her husband. Gardening is her hobby and she has taken part in a number of nearby gladiolus shows besides serving as president of the local garden club. Her father, brother and brother-in-law are all members of the Piatt County Farm Bureau.

She is especially interested in their Angus cattle and Hyline hybrid chickens which are turning in unusual pro-

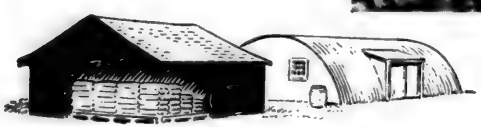
(*Continued on page 20*)



Shaded area is the 19th congressional district which Milton W. Warren of Piatt county represents on the IAA board of directors.

IT'S GOOD BUSINESS
to store plant foods on the farm this winter

TO INSURE YOUR PLANT FOOD NEEDS NEXT SPRING ACCEPT DELIVERY NOW



Provide Farm Storage and insure your crop needs for plant food

Indications point to a continued shortage of the plant foods needed by Illinois farmers for spring crop plantings.

The supply promises to be more plentiful during the "off-season" fall and winter months. In fact, your BLUE SEAL PLANT FOOD DISTRIBUTOR will receive the major portion of his mixed fertilizers within the next few months—and his storage space is limited.

By accepting delivery of plant foods now and providing farm storage over the winter, the total supply available for crop needs will be increased and a savings will be effected.

NITRATES!

By LEWIS A. REISNER
Field Editor, IAA RECORD

By sprinkling nitrogen on an old bluegrass pasture a giant N was spelled out this spring on this Whiteside county hillside by Farm Adviser F. E. Shuman, shown in foreground.

FARMERS in Whiteside county have been treated to a variety of experiments in the use of plant foods but none have been more dramatic than those involving nitrates.

This spring, for example, a giant N was spelled out on a hillside near Morrison by the simple method of sprinkling nitrogen on an old blue grass pasture.

This visible lesson in the growing-power of nitrates applied to grasses was not lost on those who passed the field. "Farmers came in to see about buying nitrates but there just wasn't enough to go around," says Lyle Everist, manager for the Whiteside Service Company.

Few should be more anxious to lay in a store of nitrates this fall than Pierce Tilton who lives north of Morrison on a rolling 427 acre grain farm.

During an inspection trip out to his 40 acre corn field, Tilton pointed to a wide strip where nitrates had been plowed under this spring.

"The corn here will go 65 bushels per acre," he said. "But where we stopped spreading nitrates the corn will not yield over 35 bushels."

It was the 200 pounds of ammonium nitrate that made the difference between 65 bushels and nubbins, Everist concluded. The nitrate cost $4.50 an acre to apply.

The corn was growing on soil that once was highly fertile but the field has been cropped hard and has seen no clover or manure for 30 years.

The field had been tested in the spring and was treated, as recommended by results from the Whiteside soil testing laboratory, with 150 pounds of potash. In addition 200 pounds of ammonium nitrate per acre were plowed under, Tilton said.

A second test of large field application of ammonium nitrate was witnessed by neighbors of Alney Hargraves, operator of a Wilder Estate farm near Erie.

Instead of the eroded slopes seen on the Tilton farm, here the soil was a black, heavy gumbo — deep bottom land.

One of the farmers present recollected that the test field had been in corn and oats for 50-75 years. This means that soil fertility banks had been depleted to astonishingly low levels.

The field was second year corn ground and Hargraves said he had plowed under this spring 150 pounds of potash and 200 pounds of ammonium nitrate per acre. On the two acre test plot potash — but not ammonium nitrate — had been added.

This test plot, located some 15 rods from the edge of the field, was easy to spot when the men on the tour crossed over to it. The ears and stalks were stunted and yellow. Bottom leaves were cooked an ashen brown.

The farmers, some 21 were present, estimated the yields. Their results: 35 for the untreated, 75 for the nitrogen treated corn. A difference of 40 bushels an acre.

The answer? Nitrogen starvation on the two acre test plot cut the yield by 40 bushels an acre.

Based on these two and literally dozens of other smaller-scaled experiments, Frank H. Shuman, Whiteside county farm adviser, can pass on to growers some well grounded plant food facts.

Corn or oats. For corn or oats planted on very sandy or badly eroded soils, or where land is starving for plant food, nitrates, phosphorus and potash

(*Continued on page* 21)

You can see the difference nitrogen made in this corn field on the Tilden farm. In back of Farm Adviser Shuman grows the dark-green, nitrogen-fertilized corn. The yellow, stunted plants in foreground received no nitrogen.

IAA Director of Rural School Relations

Key to School Reorganization

The high school seems to be the key to an adequate school reorganization program on both high and grade school level. Many County School Survey Committees, while doing a good job generally in providing plans for reorganization on the elementary level, have shown a reluctance to tackle non-high and high school problems. It was certainly the intent of the legislators who passed the Survey Act that high school problems be included in the study.

Many leaders think that the easiest, simplest, and most logical approach to a comprehensive reorganization program is to consider the high school first. They would set up on paper a high school district that would meet minimum standards. The area should not be so large, in most cases, that all of the high school pupils could not be given satisfactory bus transportation to a central high school. On the other hand, such district plans should include a minimum of 150 to 300 high school students and provide a broad, adequate tax base so that a good, sound educational program can be provided at reasonable cost. It would most likely include several grade school attendance units, located at strategic points for the convenience of the people.

Larger Districts

Next, these leaders would enlarge the high school district to include all that territory from which it normally gets its high school pupils. It would likely include some non-high territory and perhaps some territory included in a tax protectorate district. If nearby high school districts were too small, such district or districts might be added to the larger district if the people normally belong to that larger community.

Then these leaders would have this larger district with its broader tax base and ample possibilities recommended to the people by the County Survey Committee as one administrative unit embracing all grades, one through 12. This type of district is called the unit district as opposed to the dual system where grade school and high school districts have no legal connections. There are approximately 100 such unit districts in Illinois at the present, the number having been reduced greatly because of an unwise tax limitation on such districts. That tax limitation was withdrawn during the last session of the General Assembly. In fact, the Sixty-fourth General Assembly gave the unit district a tax advantage over the dual system in the matter of qualifying for special state aid.

Greater Flexibility

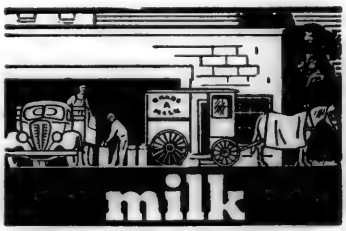
The greater flexibility together with the coordination of the entire school program, activities, facilities, and services possible under the 12-grade system make this type of reorganization very popular when people take the time to study it. Also many people point out that it is adaptable to our present road system, no matter in what condition, and offers an opportunity to improve the school program, even though widespread consolidation of school attendance units is not possible in some areas at present.

In view of the scarcity of population in rural areas and the high overhead costs of maintaining multiple attendance units, the 12-grade or unit district system may prove as popular in rural areas of Illinois as it has in the big per cent of the other states of the union.

The State Advisory Commission has this to say of the 12-grade system: "An administrative unit should comprise one or more attendance areas, (preferably two or more) offering education facilities at least through the twelfth grade . . . . The reorganization of school districts does not always involve the abandonment of the smaller units of school administration. Indeed the major purpose of such reorganization often is to enlarge the tax area and to effect cooperative relationships in the business and personal activities of the district affected."*

*Manual for County School Survey Committees. Pages 18 and 19.

Rural people should be extremely cautious, however, about combining their districts with large urban centers. Any school district reorganization on either a dual or unit basis that includes larger urban centers may deprive rural people of representation on the school board and thus a voice in the control of the pupil transportation and school program. Most of this area is already in large urban centered high school districts. The decision as to whether this rural territory should also be included for elementary purposes will largely depend on the proportion the rural vote bears to the total vote in such proposed district and the record of understanding and cooperation between urban and rural areas in the past.



By JUDSON P. MASON
Asst. Director, Milk Marketing

The annual meeting of the Illinois Milk Producers' Association will be held Tuesday, Nov. 19, 1946, beginning at 9:30 a.m., at the Hotel Sherman in Chicago.

Milo K. Swanton, executive secretary of the Wisconsin Council of Agricultural Cooperatives will speak. Swanton needs no introduction to Illinois dairymen. His message will deal with current problems facing the dairy industry.

The business meeting will consist of a summary of the activities of the I.M.P.A. for the past year and the election of a Board of Directors to serve for the coming year.

The annual meeting of the Illinois Milk Producers' Supply Co. will be held Monday, Nov. 18, 1946, at the Hotel Sherman, beginning at 9:00 p.m., for the purpose of receiving reports of officers relative to operations of the supply company for the past year and to elect a new board of directors. The Illinois Milk Producers' Supply Co. was organized in March, 1944, and has shown a tremendous growth in volume of business handled. The purpose of this organization is to purchase supplies on a cooperative basis for member organizations, and to obtain discounts otherwise not available to individual purchasers.

The ninth annual meeting of the Kewanee Milk Producers' Association was held Oct. 1, in Kewanee. The meeting was well attended and the membership was pleased with the progress made by the organization during the past year.

The annual meeting of the DeKalb Milk Producers' Association was held Oct. 11, at the Masonic Hall at DeKalb. Attendance at the meeting was not large, but those present showed a keen interest in recent developments in the dairy industry. William O'Malley was reelected president of the organization. V. A. Peterson, vice-president, and Thomas O'Connell was reelected to the board of directors. In addition to the regular business meeting, short talks were given by Judson P. Mason, Assistant Director of Dairy Marketing, Illinois Agricultural Association, and Dave Henry, manager of Prairie Farms Creameries, IAA.

A committee of dairymen representing the McLean County Milk Producers' Association and the Prairie Farms Creamery of Bloomington visited the Illinois Agricultural Association office Oct. 9. The committee was accompanied by Dr. R. W. Bartlett of the University of Illinois and Forrest C. Fairchild, Bloomington. They visited the Hawthorn-Mellody Dairy and the bottling plant of the Pure Milk Association in Chicago. This committee is studying the proposed merger of the McLean County Milk Producers' Association and Prairie Farms Creamery of Bloomington.

The production and marketing administration of the United States Department of Agriculture recently announced that they would make dairy production payments to dairymen for July milk if the price received for that month was less than the ceiling price plus announced subsidies. Payments will be made on the basis of milk and cream statements received for July. These must be submitted as evidence that a price less than the old ceiling price plus subsidies was received.

Milk production for the first eight months of 1946 totalled 85 billion pounds, or approximately two billion pounds less than for the corresponding period a year ago, according to recent reports of the Bureau of Agricultural Economics. For the entire year, 1946, milk production on farms is expected to exceed 119 billion pounds. This is between two and three percent below the record high reached in 1945, but 15% above the pre-war (1935-39) average. The number of cows on farms during 1946 will average around four percent below the 1945 number. About half of the effect of this decline in cow numbers will be offset by an increase in the average output per cow. Production per cow this year is the highest on record.

Better feeding of dry cows will mean a much better milk output when they freshen.

Livestock producers should take steps to prevent the poisoning of livestock on frosted forage.

This is an air view of the Enns farm.

Creamery Co-op Pioneer Sees a Dream Come True

By JIM THOMSON

Ass't Editor, IAA RECORD

(Editor's Note: This is the first in a series of sketches on Farm Bureau leaders in Illinois.)

"IF THE young farmer could look back as far as some of us older fellows can, he could easily see how far we have come," Harold Enns, president of the board of directors of Prairie Farms Creameries, replied when asked where Farm Bureau people could see the benefits of selling to their creamery cooperatives.

Enns seated himself comfortably in an easy chair in the large living room of his attractive farm home near Minier as he related the disappointments, heartaches and successes that went into the making of Prairie Farms Creameries, the great Illinois Agricultural Association cooperative organization which during the year ending Sept. 30, 1946, manufactured more than 5 million pounds of butter.

Kansas-born and orphaned at the age of eight, Harold Enns came to Illinois a generation ago for a short visit. He has been an Illinois farmer ever since.

He has never regretted his decision to make his home here and neither has Farm Bureau.

Because during the past 20 years, Harold Enns has been a member of the McLean County Farm Bureau and has been in the forefront on all progressive farm policy and has been particularly outstanding for the part he has played in the building of Prairie Farms Creameries, the statewide IAA cream cooperative composed of 10 member plants.

Interested in his youth in the production of milk, and ever proud of his herd of pure-bred Guernseys, Enns naturally became concerned with marketing problems when surpluses weakened prices. So, resolved to do something about prices and marketing, he soon found himself appointed chairman of the Milk Association of Bloomington, a cooperative milk marketing organization.

Subsequently, in 1933 when the first cooperative creameries were organized, he was elected to the board of directors of the state organization now called Prairie Farms Creameries. In 1936 Enns was elected president, an office he has held ever since.

During World War I, Enns served on a subchaser and was discharged from the service in 1919. Returning to north central Illinois, he rented a farm and was married. About this time he started operating a milk route, transporting milk to the Bloomington market for 10 years.

Quite sensibly, he bought his present farm near Minier during the depression years when prices were low. It also was during the depression years of the early thirties when problems were most acute that Enns' interest in milk marketing was most intense.

Exploring every possibility in order to help farmers market their milk, the Milk Association of Bloomington sent a committee, headed by Enns, to several other states to study their farm cooperatives.

Tall, muscular, 48-year-old Enns recalls that the early cream pools set up throughout the state to accumulate and deliver large quantities of cream to processors did not work very well.

He laughs as he tells the story he once heard of a cream pool in La Salle county which sold to a firm in Chicago. The head of the Chicago firm always showed up for the pool's annual meeting and always inquired regarding its financial status for the year past. And whenever the head of the Chicago firm learned that the pool lost money, he would cover the losses with money from his own pocket. Needless to say, the cream pool producers soon became a little suspicious that they weren't getting all that was coming to them.

Cooperative-minded producers thereupon considered building their own

(*Continued on page* 18)

Creamery Co-op Pioneer Sees Dream Come True

(*Continued from page* 17)

creameries and brought their conclusions to the attention of IAA leaders. Shortly thereafter the first of the Prairie Farms Creameries was purchased at Moline and the purchase and construction of others followed. Thus was established a Farm Bureau cooperative that performed a marketing job clear from the farm to the consumer, and gave cream producers real bargaining power.

Enns sees a bright future for Illinois farmers' creamery cooperatives although he would be the last to overlook the many obstacles that strew the path to success. He doesn't think our creamery cooperatives can operate economically handling farm separated cream only, and therefore sees a trend toward the handling of more and more fluid milk.

When asked if he thought the creamery co-ops should branch out into the production of most dairy products, Enns answered prudently that he believed our creameries should go as far as efficiency and profit dictates.

He admires efficiency and modern methods and believes one of the first steps in this direction is the improvement of rural schools. He has backed a proposal for consolidation in his district and hopes it will come soon enough to benefit his son, Howard, 7.

Enns studies his farm records in dining room of his home. Records are a daily account of efficient and profitable management.

Mr. and Mrs. Enns also have two daughters, Margery, 23, a home economics teacher at Blue Mound, and Mildred, 19, a freshman student at Illinois State Normal University. Both girls have been prominent in 4-H Club work.

For a number of years, Enns kept a splendid set of records of his farm operations and particularly of his fine herd of Guernseys which showed a herd average of 443 pounds of butterfat until he discontinued the records on the cows a few years ago. He is especially proud of a handsome Guernsey bull weighing close to a ton which he bought recently from an artificial insemination association.

Enns admits he is partial to Guernseys. "Have had nothing else all my life," he said, then laughed as he recalled something. "I take that back, I once had a Holstein, but it was given to me."

As methodical in the use of his 160 acres as he is at record-keeping, Enns has his land laid out in four large fields for his four-year crop rotation scheme. On the four fields he raises corn, oats, clover and soybeans, each field carrying each crop in the above named rotation.

He is careful of his soil and keeps a sharp lookout for erosion, building up the fertility with applications of limestone (three tons to the acre) and phosphate (one-half ton to the acre).

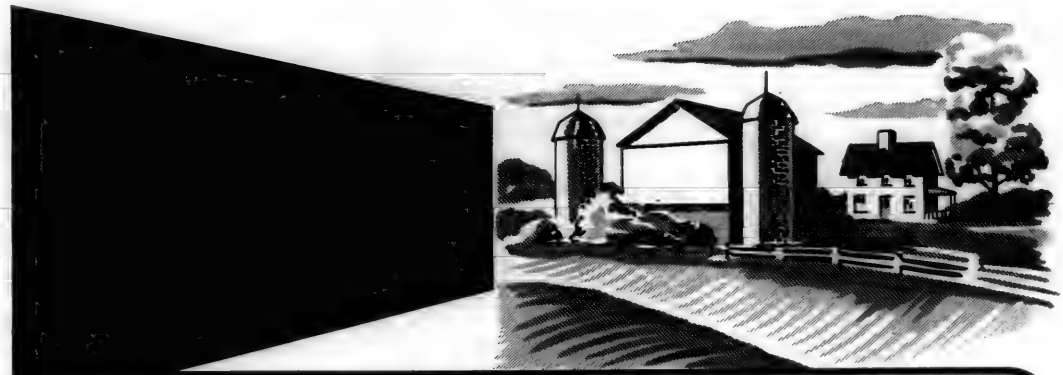
He pointed out that the records show greater financial income to the farmer selling to Praire Farms Creameries, where he is assured of honest weights and tests.

The direct advantages of cooperation — service, higher prices and patronage payments — are more easily understood, he said, and these we will try to maintain or improve for the benefit of all our farm patrons.

MR. GLADD . . . . "I protected all my pigs with Farm Bureau Hog Cholera Serum again this year and didn't lose one. With the present market prices, I can't take chances."

MR. SADD . . . "Well, you see it was this way — I never had any cholera among my pigs and so I thought I'd save a few dollars and skip the vaccinating this year. But-oh my-oh my!

See Your Farm Bureau

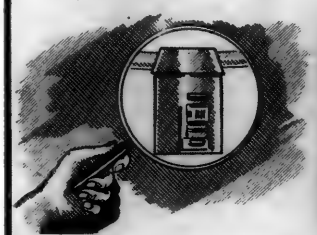


OBSERVE THESE SIMPLE PRECAUTIONS

Space new buildings about 100 to 150 feet from each other at right angles to dwelling. Don't build in cluster.

Be sure flat irons, curling irons, etc., are "cold" before they are put back after use.

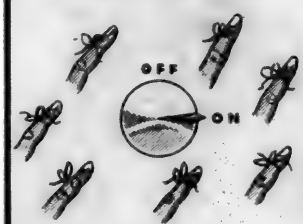
Check electrical cords regularly for exposed wire that might burn rugs or cause shock.



Inspect your heating system regularly. Check flue pipes for leaks. Inspect chimney, especially in attic, for loose bricks or mortar.

Check your lightning rods. Poorly grounded lightning rods are worse than none at all.

Use approved heating apparatus in brooder house and set house well away from other farm buildings.



Check and double check home to make sure all electrical appliances have been turned off.

Gasoline and volatile liquids should be stored at least 75 feet from any building or underground — not in your garage or barn.

Be prepared. Set aside at convenient places fire buckets and water supplies for fighting purposes. Keep fire extinguishers in operating condition.

(*Continued from page* 13)

duction records. When egg prices were rising near 50 cents per dozen, the Warrens' 265 pullets produced 240 eggs one day.

His rotation plan is based on the following six-year scheme: corn, soybeans, corn, soybeans, oats, clover. During the winter he feeds out 40 to 50 steers. Warren is a strong believer in soil conservation although he does admit that the flat lands in his area make it less of a problem than in some areas of Illinois. Already he has applied two tons of limestone and half a ton of phosphate per acre to most of his farm.

Sleeves rolled up and pencil in hand, Warren gets ready to tackle his farm accounts hook.

The great tragedy in the lives of the Warrens was the loss of their only child, a 17-year-old boy who was killed in 1940 in an automobile accident. The Warrens had great plans for the boy's future and were pleased because of his interest in the farm. They had hoped to turn it over in a few years to their son's supervision.

But with a commendable record of accomplishment for agriculture in his own community behind him, Warren is pleased with his new opportunity as a member of the IAA board to do everything he can for the good of Illinois agriculture.

TO MANAGE SERVICE CO.

The recently organized Clinton County Service Company will be managed by John Niebruegge, a veteran of 10 years experience with the Monroe County Service Company. Opening date was set at Nov. 1. Before forming their own company, Clinton was linked with the St. Clair County Supply Company.

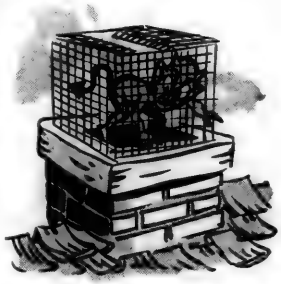
IT'S ONE THING TO KNOW WHAT OUR FAULTS AND DIFFICULTIES ARE — AND, STILL ANOTHER TO DO SOMETHIN' ABOUT 'EM.

Are you sittin' on a powder keg in your own home? Maybe you are and just don't know it.

Too many Illinois farm homes have all kinds of fire hazards which folks either don't know about or just plain and fancy overlook.

I recall back in 1940 and 1941, when the Country Mutual Fire Insurance Company sent out several trained fire inspectors to look over the homes and buildings of some of their policyholders in order to locate fire hazards and tell the folks what they could do to get rid of 'em.

These inspectors looked over between 7,000 and 8,000 homes in 1941. And, one out of every three they looked at had wood shingles — all weathered and curled up — just ready to catch fire from the first spark that hurdled the chimney top. The chimneys on those houses got spark arrestors put on 'em. That's really "cagin' in" the fire demon for you.



These fellows found that one house out of every four had hazardous chimneys above the roof and about the same number were in dangerous condition below the roof.

Every tenth house these fellows visited had an attic they couldn't even get into — not 'countin' the one so chock full of old papers, unused clothes, worn-out toys, and ancient love letters that they couldn't hardly get though 'em.

Many chimneys had bad flue entrances. Just as many homes had over-rated fuses in the electric boxes. Some folks paid no 'tention atall to where they'd store gasoline and kerosene. Many stoves and pipes were in poor condition. And, some houses were just in plain bad shape.

Now two out of three of these houses didn't pass the first inspection, but after these folks knew what was wrong with their homes, all but 9% were made acceptable. These folks actually *did* somethin' to keep their homes from burnin' down. Did you?

I hear that the IAA department of safety sent out a simple farm-fire checklist to Farm Bureaus last month to be used as a guide to check fire hazards on individual farms.

Just a few minutes with this checklist and maybe a coupla hours work will keep you from havin' to sleep in the barn this winter. Is it worth it?

AT THE GOLDEN GATE ON DECEMBER 8

(*Continued from page* 6)

President Walter Hammond of the Texas Farm Bureau has advised the IAA that he will help in any way possible to make the Illinois farm folks' trips in Texas as pleasant as possible.

Following the convention in San Francisco and a motor trip over the Golden Gate bridge to the giant redwood trees in Muir woods, the Illinois party will stop off at Salt Lake City to see the Mormon Temple and after a 200-mile trip through the Colorado Rockies will stop in the Royal Gorge. The train will arrive in Chicago Dec. 15 at 6 p.m.

Further information on the trip may be obtained by writing Roy Johnson, Illinois Agricultural Association, 608 South Dearborn Street, Chicago 5, or by picking up a printed folder on the trip at your County Farm Bureau office.

NITRATES! BOOSTERS FOR TIRED SOILS

(*Continued from page* 15)

will often double yield, Shuman has found.

Old corn ground. Broadcasting 150 pounds of ammonium nitrate (32-0-0) on second or third year corn just befor planting on soils low in nitrogen will give excellent results in most cases.

Pastures. When applied to worn out blue grass, nitrogen may double the protein content and may well more than double grass yields.

Failures. Nitrates may be used when legumes fail and when animal manures are not available.

As a word of caution, Mr. Shuman says, nitrates may serve as real pinch-hitters in plant food programs and are good emergency substitutes but will not supplant the time proven lime-legume-fertilizer program.

He believes, however, that as a way to speed the return of depleted soils to adequate levels of fertility the nitrates are often helpful.

In any case farmers are taking a studied interest in the plant food program throughout the state and well they may. Over 1000 laboratory tests prove that the average Whiteside county farmer has a $500 plant food bill annually on each 160 acres if he is to maintain maximum yields. This is for lime, phosphate and potash alone. Quick cash returns from nitrate may be used as a means of financing a desirable long range fertility program.

Cavities in fruit trees should be screened or plugged as a codling moth control measure.

This is the elevator at Basco in Hancock county which has been purchased by Hancock Grain Company, an Illinois Grain Terminals affiliate. The elevator is one of a number being bought by Hancock Grain to provide grain for river and terminal operations by the parent company.

U. OF I. PRESIDENT TO ADDRESS IAA CONVENTION

(*Continued from page* 4)

17, Arthur, 14, Eleanor, 12, Caroline, 9, and Alfred, 3.

He was educated at Pennsylvania State College, the University of Paris, France, and the University of Iowa. Before going to New York in 1942, he served 17 years on the faculty of the University of Iowa department of psychology and in later years as head of the department.

He is a member of the American Society for the Advancement of Science, the Society for Child Development, the American Psychological Association and the National Educational Association. He is also a member of Sigma Pi, and the following honorary societies: Phi Beta Kappa, Phi Kappa Phi, Delta Sigma Rho, and Sigma Xi and Phi Delta Kappa.

Left: Workmen put in the foundation for the new elevator being constructed at Havana by the Havana River Grain Company, Illinois Grain Terminals Company affiliate. Right: This view shows the new structure in relation to the old elevator.

PRAIRIE GRAIN BUYS RIVER FRONTAGE

Ten acres of river frontage for the construction of an elevator has been purchased by the Prairie Grain Company on the south bank of the Illinois river at Ottawa.

Construction will be started on the elevator as soon as building materials and labor are available. Purchase was made for the company by President H. T. Marshall of Serena and Carl O. Johnson of Varna.

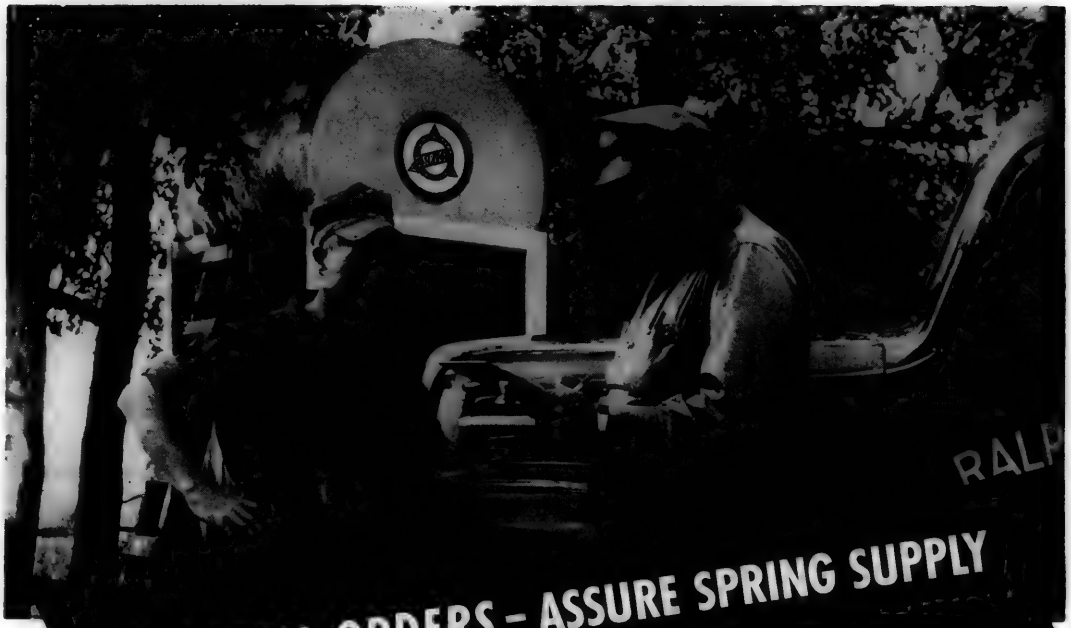
Prairie Grain Company comprises the counties of LaSalle, Lee, Marshall, Putnam, Stark, Peoria, Woodford and Bureau, and is an affiliate of the IAA's Illinois Grain Terminals Company.

Prairie Grain Company is one of the river companies being organized for the purpose of providing grain for cooperative terminal operations by the parent company.

Experiments at the University of Illinois College of Agriculture show that soybean meal prepared from damaged soybeans was equal in feeding value to soybean meal from sound soybeans for growing-fattening pigs in drylot. Damaged beans were 75 to 80 per cent "bin-burned," caused by an excess of moisture.

Yellow corn may not provide enough vitamin A in a drylot ration for beef steers if no other source of vitamin A is available.

Clinton oats is not a hybrid, but a new variety that originated from a hybrid.



EARLY FALL ORDERS – ASSURE SPRING SUPPLY

ORDER MOTOR OIL *NOW!*

FUTURE ORDERS GET PRICE PROTECTION and DISCOUNT

Right now your company is in the midst of a great motor oil booking program. Your winter and spring oil supply should be arranged for **NOW!**

Orders placed now will be protected on *price*, and in addition, will receive a special *Future Order Discount*. Payment will not become due until delivery is made.

ILLINI MOTOR OIL

A premium grade motor oil that keeps clean motors clean. Ideal for cars, trucks or tractors.

BLUE SEAL MOTOR OIL

A pure paraffin base oil known in the industry as "regular."

PENN BOND MOTOR OIL

Another good versatile oil made from Pennsylvania grade crude and blended for use in farm motors.

I.F.S. HEAVY DUTY MOTOR OIL

An oil made especially for heavy duty work in diesel motors in trucks and tractors.

LUCO LUBE

A high quality grease that "stays put" and defies heat and water.

HARVESTER GUN GREASE

A cold weather grease for combines and corn pickers.

ALUMINATE GUN GREASE

A clear color grease that survives melting.

ANTI-RUST

A wonderful machinery protector. Prevents rust for a year.

Prepare for COLD WEATHER Order your ANTI-FREEZE

Now is the time to estimate your anti-freeze needs for the winter. Supplies are short, so order enough to see you through. We have two excellent products which we recommend:

PERMA-TYPE

Blue Seal Perma-Type Anti-Freeze will not boil away and will not corrode metal parts. One fill lasts all winter. Gives good protection.

WINTERMASTER

Blue Seal Wintermaster is a methanol type material which will give good protection and will not corrode metal parts.

BLUE SEAL

FARM BUREAU FOLKS IN PICTURES

$5

For this clear, well-composed study of her brother painting his mail box while his dog stands by patiently, Arlene Teets, Bureau county, wins $5 Picture-of-the-Month award.

Wondering if "He loves me or he loves me not," Emily and Anne Joy, daughters of the Frank Joys of Bond county, puff away at dandelion seeds.

To Bobbie Long (left), her city relative, Beverly Enishausen, Madison county, points out the high spots on a tour of the farm.

Water tastes mighty good to Mary Troendly, Marshall county, after some hard work in the fields. The dogs wonder what they are missing.

Judy Janssen, Whiteside county, finds feeding an orphan lamb easier when it can't back away. Bob Janssen is the helper.

Paulete Tarven, McLean county, tries to solve a problem in mechanics. Her doll is discarded for more important things.

Mrs. Wayne K. Barnes, Fayette county, snapped this picture of her husband fishing the easy way. He recently joined the Farm Bureau.

NEWS and VIEWS

SPORTS FESTIVAL GETS O.K. OF RURAL WOMEN

Your federation publicity chairman with notebook in hand turned inquiring reporter at the Seventh Annual Illinois Farm Sports Festival the second afternoon of the big two-day event.

The question: "What did you think of the Sports Festival this year?" The answers . . . . .

Mrs. Esther Thor, home adviser of Champaign county: "Pretty good for the first year since the war . . . participation fair . . . last night's program very good."

Mrs. Roland Cox, McLean county: "Think it's wonderful . . . every local county should have a Sports Festival for elimination. Ideal for every one . . . I'm soon going to be over 35 and I don't want to quit."

By the way, Mrs. Cox won first in dart throwing first in clock golf, and second in shuffleboard. She left home at 7:30 each morning drove 60 miles to the Sports Festival and went home and helped milk their cows at night.

Mrs. Theodore Mueller, St. Clair county . . . mother of a top notch base ball pitcher of the soft ball league for St. Clair county: "First time to a Sports Festival . . . followed the team. I think it is fine and hope that our women will take a more active part . . . going back home and do some real boosting for the Festival next year."

Mrs. Fred Martin, wife of Fred L. Martin, district manager of Farm Supply with headquarters in DeKalb and living quarters in Shelbyville . . . the housing problem! With Mrs. Martin was her 16 months old son Jeffrey who didn't have much to say, but Mrs. Martin said: "The night program was wonderful. And, her mother-in-law, Mrs. A. Z. Martin, Champaign, said: "I've never missed a one and this was the best ever."

Mrs. Roscoe R. Smith, Kane County, . . the only grandmother that walked off with five ribbons in senior division . . . second in clock golf, shuffleboard. dart throwing, and nail driving, and third place in horseshoes.

When asked about her sport activities . . . . "I just like to play". And when asked Mrs. Smith how much practice she did to win all those ribbons, she answered, "I practiced horsehoes but that is all."

Mrs. Smith feels that the event should be scheduled with more time in between . . . . because she said that she was dizzy from one event to the next. And, she would like to have more material sent before . . . especially the rules.

Mrs. Emilie Rediger, McLean County Illinois Home Bureau Federation chairman, member of the General Administrative comittee for the Sports Festival, feels that there should be more practice in the county. And, to assist women who are anxious to take part in the Sports Festival and for a lot of good fun with the family, Mrs. Rediger will send material about Sports Festival activities in the early spring to all the county recreation chairman.

GINGERBREAD

Homemade Gingerbread Mix

4 c. sifted all purpose flour	1 t. cinnamon
	1 t. salt
1 T. soda	1 c. sugar
1 T. ginger	1 c. lard

Sift flour with remaining dry ingredients. Cut lard into dry ingredients with a pastry blender until mixture is very fine. Store Gingerbread Mix in refrigerator, using from it the desired amount whenever hot gingerbread, gingerbread cup cakes, upsidedown gingerbread and so on are desired. Yields 6 cups.

Gingerbread Cup Cakes

2 c. Homemade Gingerbread Mix	leans molasses
	½ c. buttermilk
⅛ c. pure New Or-	1 egg, well beaten

Beat molasses and buttermilk together and add to Gingerbread Mix. Stir until smooth and then add the egg. Pour into greased muffin pans and bake in a moderately hot oven of 350° F. for 30 minutes. Makes 1 dozen medium muffins

SLIPCOVERING IS AN ART OF DESIGN

Really attractive slipcovering is an art—the same as any other aspect of interior decoration. To do the job well one needs to know something about color and design and to have a sense of appropriateness, according to Miss Marion Kaeser, home furnishings specialist, University of Illinois College of Agriculture.

Ruffles may look very charming in a girl's bedroom, but they certainly would be mismated with a massive overstuffed chair in the library or living room. There are many ways to add decoration to a man's room or to general living quarters without filling the covers with frills.

Pleats, either boxed or inverted, make a more tailored trimming for the bottom of slipcovers, or a straight piece of material with pleated corners could be used. A contrasting color might be added by means of binding or cording.

The sense of appropriateness is important, too, when it comes to seaming up the covers. Seams should come at logical places so that their lines will fit in with the structural lines of the chair. An easy guide is to put them wherever they were located in the original upholstery.

Choice of color depends to some extent, of course, upon the other colors in the room, but its intensity is determined largely by the size of the furniture being covered. Large pieces of furniture require a more grayed or dull hue than smaller pieces. A footstool or small occasional chair, for example, may be covered in a much brighter color than a sofa.

HANCOCK HOME ADVISER

Miss Mildred O. Eaton has been named home adviser for Hancock County effective Oct. 1. Her office will be at Carthage.

Former youth assistant of Madison county, she has been active there as a leader in 4-H club work and Rural Youth activities. She was formerly an instructor in the Highland high school.

for HOMEMAKERS

HOME BUREAU BRIEFS

Recently of the American Red Cross, Miss Lucile Gingerich is now home adviser in Will county. While in Red Cross she served in hospitals in the European war zone.

Miss Mary E. Mescher is new home adviser in Saline county. Graduate of Illinois Normal University, Miss Mescher has two years teaching experience at Equality township high school.

Mrs. Cherlott L. Herron is new home adviser for Kane county. Formerly a teacher of home economics at Oswego high school, she is a graduate of Iowa State College.

As a special project for 1946 in Lake County the rural Home Bureau units will encourage mailbox identification and the urban units will promote the proper use and placement of street numbers in a conspicuous position on the house front. . . . Mrs. Carl Fink, Lake County Home Bureau President reports.

DOUBLE IRISH CHAIN

This gay patchwork quilt adds charm and color to any bedroom. Double Irish chain pattern is ideal with Early American Furniture. The attached dust ruffle covers gap between the edge of quilt and floor. For free instructions enclose self-addressed stamped envelope to Women's Editor, IAA Record, 608 S. Dearborn St., Chicago 5, Ill.

HOME BUREAU BRIEFS

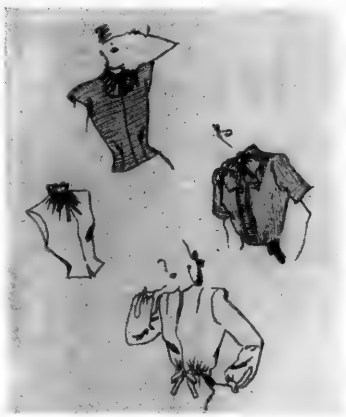
Miss Arvena Holloway is now home adviser for White county. An alumni of Murray State Teachers' College of Kentucky, she has been a high school teacher and defense plant cafeteria manager.

New home adviser in Clinton county is Miss Margaret B. Jones. Experienced in this work, Miss Jones has served as home adviser in Bureau and Macoupin counties. She is a graduate of the University of Illinois and has taken advanced work at Columbia University.

Mrs. Ross Logan, Winnebago county chairman, reports that Winnebago county raised $1,082.00 for the purchase of a new car . . . "which we have and paid cash for!"

"Seventeen out of the 18 units donated around $500.00 and the rest of the money was from the sale of cook books, bonds, etc." she wrote.

FROM SHIRT TO BLOUSE



These smart blouses can be made from husband's discarded shirt. The material is perfect. Dye or tint it your color choice. Styles shown: tucked-front, drawstring, ruffled dickey, cap-sleeved overblouse. For free instructions write Women's Editor, IAA Record, 608 S. Dearborn Street, Chicago 5, Ill. Send self-addressed stamped envelope.

SHELBY HOME BUREAU GIVES ITS MEMBERS SOCIAL PROGRAM

The Past Board Members Association of the Shelby county Home Bureau enjoyed a clever vacation party this summer.

Many of the board members in Shelby county who were no longer active on the board missed the county meetings and felt sort of left out of things. So in December of 1943 they organized the Past Board Members Association.

Purpose of organizing the group was to give members a social program and to help the active board whenever aid is needed. They appoint each year a committee on membership to work with the county vice-chairman during the membership campaign.

The meetings have fallen into more or less of a pattern . . . October tea and social party; February: patriotic or valentine party; May: June wedding party; and August: picnic.

BEST IN VESTS

You'll like the tailored lines, easy feel of this knitted vest. Tri-colored stripes emphasize broad shoulder line. For extra lilt to your costume there's a matching stocking cap with tassel trim. For free instructions write Women's Editor, IAA Record, 608 S. Dearborn Street, Chicago 5, Ill. Enclose self-addressed stamped envelope.

Ready for Work

Your poultry profit, from now on, will depend on good feeding! These pullets are now ready for work and will be carrying the production load this fall and winter.

Select one of the following feeding programs to help them do a *good* job.

FREE CHOICE FEEDING

"Free Choice" is a method of feeding BLUE SEAL POULTRY BALANCER with farm grains. This allows the pullets to balance their own rations according to their individual requirements. **"Free Choice"** eliminates grinding and mixing or purchasing a lay mash if farm grains are available.

MASH *and* GRAIN FEEDING

The **"Mash and Grain"** method consists of feeding BLUE SEAL LAY MASH along with whole farm grains.

Where supplies of farm grains are adequate, an economical LAY MASH can be made by mixing ground grain with BLUE SEAL POULTRY SUPPLEMENT according to directions on the tag.

CHECK THESE HOUSING HINTS

1. Get the pullets housed. Moving later may result in a set-back, maybe a partial moult and cessation of production.
2. Good sanitation is important. Thoroughly clean the house before bringing the pullets in. Remove all old litter. Use a lye solution (one pound to 15 gallons water) and scrub walls, roosts, floors, and equipment.
3. Don't crowd the pullets. Allow 3½ to 4 square feet of floor space for each bird. .
4. Pullets coming off range are susceptible to colds, so watch ventilation. Provide plenty of fresh air. Avoid cold cross-drafts.
5. Don't be stingy about the equipment. Provide at least one 5-gallon water fountain, one 8-foot mash and grain hopper, and one 10-hole nest for each 50 pullets.
6. At least 7 to 10 inches of roost space should be provided each pullet. Keep roost perches 10 to 12 inches apart.
7. Discard culled pullets at housing time. It is rarely profitable to house pullets which have developed slowly, are undersized, or decidedly immature, very thin, or possess any sign of disease.
8. Never house pullets with old hens.

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

Illinois Farm Bureau Members Believe that Now is the Time to Balance the Federal Budget and are Ready to Set an Example

Illinois

By CRESTON FOSTER

Editor, The IAA RECORD

FARMERS are fast losing their patience with the snail-like progress that has marked the conversion of the country's great resources from war to peace. Perhaps many have long since lost all patience with the fumbling of vital issues and the failure of government leaders to solve the pressing problems of the day.

Some confusion and mistakes were expected during the adjustment period. But today, many months after V-J Day, the nation is still groping in a man-made fog. Farmers are still plagued with shortages of machinery, repair parts and labor. Strikes have played havoc with a return to normal business and industrial operations, and conflicting pronouncements, statements and orders have thrown agricultural producers into a dizzy whirl.

As delegates and members gathered for the 32nd annual meeting of the Illinois Agricultural Association and Associated Companies in Chicago Nov. 18-21, the general sentiment seemed to be — it's time to go to work and get this mess straightened out.

One thing is certain: organized agriculture, with more than 130,000 Farm Bureau members in Illinois and a million in the nation, is going to be on the job when the new Congress convenes in January.

What kind of a program did the Illinois Farm Bureau propose at the annual meeting?

First, it's an unselfish program in the interests of all groups in the country. The resolutions adopted by the voting

★ ★ ★

IAA Vice President Floyd E. Morris at the rostrum during a general session.

Farmers Demand Sound National Policy

IAA Annual Convention Asks that Conversion to Peace be Speeded by Elimination of Confusion and Man-Made Fog

delegates, and made a matter of public record, bear out that statement.

Illinois Farm Bureau members believe that it's time for the federal government to balance the budget. They're ready to set the example by cutting expenditures in the U. S. Department of Agriculture through coordination of federal agricultural agencies.

As IAA President Charles B. Shuman pointed out in his annual address, "Now is the time to reduce public debt. A program of real governmental economy coupled with continued high federal taxes would do much to temper the present inflationary spiral."

Since getting back into full production is considered by the most impartial observer to be one of the basic needs in the country, Farm Bureau delegates adopted a resolution calling for legislation to reduce labor-industry strife and friction. They believe that such legislation should not give undue advantage to labor or management and should protect the public. They believe that both labor and management should be made equally responsible for contracts. Organized agriculture recognizes the contribution labor has made to the nation and will support reasonable programs designed to bring about an ever-increasing standard of living for labor, but wage increases cannot alone increase such standards unless there is a corresponding increase in the productivity of our entire economy.

The Illinois Farm Bureau also feels that machinery should be provided for eliminating strikes and handling disputes in industries such as public utilities and other industries which are vital to the well-being of all citizens of the nation.

While the Farm Bureau recognizes the right of labor to organize and bargain collectively, it is against wildcat strikes and jurisdictional disputes, secondary boycotts, closed shop, forced membership, compulsory check-off dues, and foremen's unions. It also feels that the primary considerations in developing a labor-industry program should be the best long-time interest of all citizens.

President Shuman's annual address revealed that "agriculture has demanded and will continue to insist that reasonable regulation be applied to both industrial and labor organizations so that the very economic life of our nation will not be threatened again by bitter strife of the type we have witnessed since V-J Day."

Comedians Gregory and Cherie do a Highland Fling in their musical comedy shenanigans.

The tumbling Leonard girls are shown in one of their formations during convention entertainment program.

Illinois Talk Fest Topnotcher Don Freebairn (right) is congratulated by his parents, Mr. and Mrs. John Freebairn of La Salle county, after he won right to represent Illinois in National Talk Fest in San Francisco, Dec. 9.

Prominent figures in their relations with Illinois agriculture are shown on the speakers' platform during Wednesday evening session.

The resolutions authorized the officers and directors of the IAA to sponsor and promote one or more conferences of leaders of agricultural, industrial, labor and financial organizations in order to establish better understanding and as a means of promoting full production.

As far as national agricultural policy is concerned, the Farm Bureau believes that laws now on the books, which provide some protection to farmers against loss of income due to factors outside their control, is basically sound and must not be abandoned. The Farm Bureau opposes any change in the existing parity formula.

The Farm Bureau favors a continued and increased emphasis on conservation of the soil in all its phases, based on complete coordination of all federal and state soil conservation activities in the county and continued through the cooperation of and as the responsibility of the farmers of each county. It believes that the county program should be built on the basic principles of wise land use and good farming practices. This program should fit into a coordinated state program and insofar as possible should be planned, administered and financed by the cooperating farmers.

Along with a good soil conservation program, the Illinois Farm Bureau urges the adoption of a national soils fertility policy and program to assure farmers greatly increased supplies of high analysis mineral fertilizer, particularly phosphorus and potash. Such a program is needed, it was pointed out, to pay back to the soil the nutrients extracted by crops and erosion, and thus assure the people an abundant supply of nutritious food.

President Shuman also declared that "the nation cannot expect farmers to preserve and build up its soil resources for the use of future generations unless it is willing to give some definite assurance to producers that they will receive adequate prices for their products."

On taxation of cooperatives, the Illinois Farm Bureau believes that the earnings of cooperatives which are retained and not distributed as patronage dividends to members should be subject to the same tax treatment as funds so retained within the corporation structure. Cooperative earnings returned to members as patronage dividends should not be taxed since such income is now subject to tax as the income of the individual member of the cooperative. The Illinois Farm Bureau is ready to support such changes in the internal revenue law so that there will be income tax exemption or deduction from taxable incomes on only that portion of cooperative earnings on member business which is distributed to their members and patrons.

This is the major part of the program of the Illinois Farm Bureau on a national level. Other resolutions on the national level are printed on accompanying pages of this issue of the IAA RECORD. Supplementing the resolutions is President Shuman's annual address which also is printed in full.

On the state level, the Illinois Farm Bureau is committed to sponsorship and support of state legislation necessary to continue to secure state funds for the improvement of farm-to-highway roads and to permit townships and road districts to combine into larger units for road and bridge improvement and maintenance.

The Farm Bureau will sponsor state legislation to clarify and simplify the 100 per cent assessment law and make the tax rate limitation more effective and require local units of government to use uniform budget forms.

In the matter of rural schools, delegates recommended legislation providing that state financial aid be withdrawn from administrative grade school districts with fewer than 10 pupils, and from high schools with fewer than 10 pupils per grade. The resolution on this matter covers other points and deserves careful study by the membership.

Farm Bureau support was promised for a state appropriation for a new home economics building at the U. of I., and legislation will be sought requiring aircraft owners and operators to submit proof of financial responsibility before being allowed to operate an aircraft in Illinois. Another resolution outlined the Farm Bureau's position on the federal Illinois River flood control plan.

Earl C. Smith, past president of the Illinois Agricultural Association, and former vice-president of the American Farm Bureau Federation, delivered as outstanding an address to the convention as he has ever made to a Farm Bureau audience. His address is printed in full in this issue of the IAA RECORD.

President Edward A. O'Neal of the AFBF extended greetings to the convention and said, "If other groups would work as hard and produce as abundantly as farmers do, there would be no need to worry over this country's future."

Romeo Short, president of the Arkansas Farm Bureau, told the convention that "farm organizations have been victims in the great shell game to keep farmers divided, first by states and then by commodities. Farmers know now that they are interdependent."

Many important conferences and associated meetings were held in conjunction with the annual meeting. Members will find these fully covered in other pages of the RECORD.

Dr. Ray Freeman Jenney, minister of the Bryn Mawr Community Church, Chicago, gave a truly inspirational address before the convention. He said that because of the discovery of atomic energy today we stand before the open

Al Dault thrills the audience by climbing to a precarious perch near the ceiling.

The Rev. Ray Freeman Jenney (left) of the Bryn Mawr Community Church, Chicago, addresses the convention. Eighty-six-year-old former IAA President Sam Thompson speaks to the delegates.

doorway to destruction or on the threshold of one of the greatest eras mankind has ever known. Scientists know enough to be afraid, he said, because they are aware of the material and ethical values which are in danger of being obliterated because we fail to put moral mastery over released power.

"It is a truth," he said, "that the world is not in its present perilous plight because it is wanting in action, the world is disintegrating because of want of character, of men and women of inner integrity.

"In a time when the world is becoming smaller day by day geographically, the world must become larger and better politically, economically, morally and spiritually. . . We should never appease any group or nation, but we will ever compromise our differences in the interest and well being of all."

Terms of IAA directors from the odd-numbered districts expired at the 1946 annual meeting. Four new directors were elected: Earl M. Hughes, Woodstock, in the 1st to 11th districts, succeeding Harvey M. Adair, Chicago Heights; Edwin Gumm, Galesburg, in the 15th district, succeeding Ronald Holt, Galva; E. T. Culnan, Lincoln, in the 17th district, succeeding Charles Lauritzen, Reddick, and Albert Webb, Ewing, in the 25th district, succeeding August G. Eggerding, Red Bud.

The four remaining incumbent directors from the odd-numbered districts who were re-elected: Homer Curtiss, Stockton, 13th; Milton Warren, Mansfield, 19th; D. L. Clarke, New Berlin, 21st, and Chester McCord, Newton, 23rd.

These directors are elected for two-year terms. Directors' terms in the even-numbered Congressional districts will expire at the next annual meeting in 1947.

Re-elected for one-year terms were President Charles B. Shuman, Sullivan, and Vice-President F. E. Morris, Buffalo.

Farmers Face Adjustments

WHEN Congress convenes in January, there will be a number of major issues at stake as far as farmers are concerned, speakers at the public relations conference of the 32nd IAA annual meeting reported.

First will be the carrying out of the Steagall amendment which provides for support prices on agricultural commodities of 90 per cent of parity for a two-year period following the official termination of the war. As the RECORD goes to press, the official announcement of the termination of war has not been declared by the President, and the two-year support period starts with the first of the year, after the official pronouncement is made. If the announcement comes after Jan. 1, 1947, the two year period would start on Jan. 1, 1948 and run through 1950.

President Edward O'Neal (right) of the American Farm Bureau Federation is interviewed on station WLS by Art Page during the IAA convention in Chicago.

In maintaining this support program, IAA President Charles B. Shuman pointed out that if market prices drop below the 90 per cent parity figure, the government will be faced with several means of bolstering prices. It is probable that a government purchase and loan program would be used.

Of equal if not greater concern to farmers, President Shuman said, is the adoption by government of a sound, long-term farm program to follow the two-year period of the Steagall amendment.

IAA Past President Earl C. Smith discussed some of the features of a long-term farm program and suggested that a support feature of such a program might be based on 75 per cent of parity. Such a support would allow a free play of supply and demand and could be justified in the public interest. Farmers, of course, would still seek a goal of parity in the market place.

Another important issue due to be discussed in the coming session of Congress is the national fertilizer program proposed by the American Farm Bureau Federation. Donald Kirkpatrick, IAA and AFBF general counsel, stressed the importance to farmers of having increased supplies of high analysis mineral fertilizer, particularly phosphorus and potash.

Farmers are removing from the soils through crops and erosion much greater quantities of soil nutrients than are returned to them. This practice cannot continue. The people of the nation should have assurance that they will always have an abundant supply of nutritious food. Farmers will do this provided they have access to adequate supplies of mineral fertilizers of the proper kind and character and in greatly increased quantities.

Among the problems at the state level

FARMERS DEMAND

Government Economy, Price Stability, Shuman Declares

★ ★ ★

IT IS indeed a privilege and pleasure for me to extend official welcome to you, the delegates, members and guests attending this, the 32nd Annual Meeting of the Illinois Agricultural Association. An annual meeting is a time for retrospection, for looking back upon a year of progress, as well as a time for looking forward to rededicate our efforts to the tasks that lie ahead. We are thankful for this, the first full year of peace following a great world-wide conflagration. While it has been a year of official peace, yet we must recognize that it has been a year of confusion and conflict both within our nation and abroad. Reconstruction and reconversion after such a great struggle are of necessity difficult and painful.

Enlarge IAA Program

Because of these adjustments and the accompanying confusion added to by the unpredictable and changing policies of governmental agencies, the year of 1946 has been a very difficult period in the operation of your Association and its affiliated companies. In addition, there were several circumstances within our own organization that made our task more difficult. The change in administration of the Association was a shock of no small proportions. When you replace an administrator of many years of experience and great influence and ability with one of inexperience, it throws many additional problems upon the remainder of the organization. In addition, the great increase in membership of the Association has made necessary an enlarged service program. This enlarged program of service had of necessity been delayed because of the war period. The fact that these many problems have been taken in stride and that many of them are well on the way to solution is a wonderful tribute to the vitality and effectiveness of the organization which you have so soundly built. It is a tribute to past leadership which built on a firm foundation. It is a tribute to the loyalty, ability and initiative of

President Shuman makes his annual report to the membership.

a wonderful group of people constituting your Board of Directors, the officers, the employees and the members of the Association. I deeply appreciate the fine cooperation which has made it possible to report to you that the year 1946, viewed from any angle, has been one of the most successful years in the history of the Illinois Agricultural Association.

Despite all of these difficulties, here set forth more for the historical record than as an excuse, the operations of all of the directly affiliated and associated cooperatives and associations have been highly successful. We are all justly proud of the record throughout the years of these institutions. The detailed financial reports and major accomplishments of these companies have been reported in their entirety in the various annual meetings and conferences held during this convention. Their written reports are also incorporated in the printed Annual Report, which will be placed in your hands. Only those of their activities that are newly organized or have undergone major changes will be mentioned at this time.

One Voice

The Illinois Agricultural Service Company has continued to act as corporate manager for the ten older business corporations. In addition, the newly organized Illinois Grain Terminals Company and Illinois Cooperative Locker Service have entered into a management contract with the Service Company, and Illinois Milk Producers Supply Company has applied for this service. With very few exceptions, the cooperation of the affiliated associations with the Management Board has been excellent. I do want to re-emphasize the importance of this relationship. In Illinois, our early leaders recognized the importance of a close working relationship between the general farm organization and the cooperative associations serving farmers. The key to continued maintenance of this proven successful relationship is the definite correlation of activity and application of sound business principles made possible by the Illinois Agricultural Service Company. When we speak in Illinois, we speak with one voice — a voice representing the best interests of agriculture in general and not as separate commodity or service groups. This is in sharp contrast to the situation that exists generally in other areas. We have been putting into practice the slogan of "one for all and all for one". Much of the success of our organization and our affiliates has been due to this principle and its application. From time to time this principle has been attacked by those who would emphasize one type of activity. These attacks continue despite the proven value of our type of organization, both in the field of private business and in our cooperative organizations. Farm Bureau members are entitled to insist and will continue to demand that there be a definite correlation of the activities of all the organizations which they have built and which owe their continued existence to Farm Bureau support.

In his annual report one year ago, my distinguished predecessor, Mr. Earl C. Smith, said — "I feel that the enlarged Farm Bureau membership requires some improvement, some expansion and strengthening in at least some of these business operations. Thoughtful people and forward looking institutions are lay-

ing plans so as to better meet some of the acute problems that seem to lie ahead." In line with this thinking, the Board of Directors early in the year authorized the appointment of a committee charged with the responsibility of carefully examining the internal organization and operation of the Association and its affiliates. This study has been a major project during the year. Outside technical advice has been obtained and a partial report presented to and approved by the Board of Directors. This study considered suggestions coming from the county Farm Bureaus and should result in a program of broader service.

The organization and activities of the Association fall quite naturally into several distinct headings.

Organization

One of the most important parts of any successful membership association is an active organization department. I am happy to report that the Association has, and will continue to have, an active, aggressive membership acquisition and maintenance program. I am sure that you are all more than pleased that at the close of the fiscal year the membership of the Association had reached an all time high of 130,825, which is an increase of 15,174 or 13.1% over the previous year. This rapid advance is a tribute to the sound program of service to farmers offered by your organization. It is also a tribute to the ability and loyalty of our organization staff and especially to the thousands of Farm Bureau members who have served as volunteer workers.

The Department of Sales Service has been an integral part of our successful organization program. During the year we were unfortunate in losing the services of the capable director of this department to a broader field of activity. It is hoped that this service may soon be renewed.

The problem of membership maintenance is fully as important as acquisition. It involves many problems of relationship as well as the development of new and expanded fields of service. To the Field Secretary has fallen much of the responsibility of promoting this program. While there is no separate report of the Field Secretary this year to the convention, much of the credit for the effective membership maintenance program and the generally smooth functioning of the organization during the past year is attributable to his untiring efforts.

Treasurer's Department

The Treasurer has already reported on the financial condition of the Association. I need only emphasize that the organization is in excellent financial condition and continues to administer its fiscal affairs in a conservative manner. The duties and responsibilities falling upon the Treasurer's Office have continued to multiply as our operations have grown. We are now faced with the practical necessity of relieving the Treasurer's Office of some of this congestion and responsibility and have plans in the making for that purpose.

Purchase of Building

One of the largest financial undertakings in the history of the Association was authorized by the Board of Directors and approved by the voting delegates during the year just closed. A building to be used as a home for the Association and its affiliated companies was purchased. This step had been contemplated for a number of years and was made increasingly necessary by the very difficult rental situation in Chicago, together with the continued growth and expanded needs of your organization. We hope to be able to move most of our offices into this new home within the next few months. Farmers, in particular, appreciate the security and convenience of the ownership of a home, if it can be accomplished without too greatly increased costs of operation.

Comptroller's Department

The increase in the responsibilities of the Comptroller parallels that of the Treasurer. Here, too, we face the necessity of and are planning improvements in the organization of the Department in line with the growth of the Association. Proper internal auditing and budget control are of primary importance to the membership and to our associated companies. Both the Treasurer's and the Comptroller's office have handled a greatly increased volume of work in a very creditable manner.

Edwin R. Franklin (right) assistant treasurer of Rockford Life Insurance Company receives check from IAA President Charles B. Shuman in full payment for 12-story building north of Chicago's Loop which is to serve as IAA's home in the near future.

Secretary

Keeping abreast of the many corporate requirements of our various organizations, the keeping of proper records, and transmitting the decisions of Boards of Directors into various channels for action are some of the routine duties of the Secretary. A new activity falling under his supervision this year has been the management of the new building and the development of plans for its occupancy. We are trying to plan for maximum efficiency in the layout and use of our new quarters.

One of the most serious problems of the past year has been the difficulty of maintaining an adequate staff of capable office workers. With the end of the war many of our experienced women employees chose to cease working in order to establish their own homes. It has been very hard to find replacements. In order to help solve this problem, we recently established a Personnel Department with an experienced full time director. His services are available to all departments and associated companies.

Legal Department

An institution of our size having such widely divergent activities and having so many different corporate structures presents legal problems of no mean proportions. Present needs, plus almost certain future expansion of activities, will undoubtedly require an early enlargement of our legal staff.

Farm Bureau Services

Many of the departmental activities of the Association have been directed towards giving assistance to the county Farm Bureau organizations with their many local problems. During the year these activities have been further broadened and expanded. The Department of Safety has been reactivated and the Department of Research and Taxation has been divided into a Department of Research and a Department of Property Taxation. A new Department of Road Improvement is also now in operation. These changes and expansions were made necessary by great increases in the need for study and action on local governmental problems.

For several years there has been a growing demand on the part of the county organizations for the establishment of a Department of Veterinary Medical Relations. This department is now a reality. I believe that with the establishment of the new College of Veterinary Medicine at the University of Illinois, the Association can make a real contribution to better understanding and relationships in the whole field of ani-

mal health and hygiene. Certainly we have no intention to provide individual technical or professional advice, but rather to serve in the broad field of general information and relations. The Association also needs, on many subjects and occasions, the services of a professionally trained person in formulating legislative programs. Several of our associated cooperatives also require the part time services of a technically trained man in this field.

Each year your Association has the responsibility of sponsoring and organizing a number of important special events. It was logical, therefore, to establish a Department of Special Services. This department has carried much of the responsibility for such difficult organizational tasks as the Farm Sports Festival, the Farm Bureau Tent at the State Fair, the IAA Annual Meeting and the trip to California for the American Farm Bureau Federation Annual Meeting.

Other departments of the Association have found increased opportunities for service during 1946. School survey committees have become active in most of the counties of the state. The Department of Rural School Relations has been called upon by the County Farm Bureaus to assist them in their work with these official survey committees. This will continue to be an important project as the movement toward voluntary school reorganization gains momentum. As a result of the school survey legislation farmers have an opportunity to organize their rural schools on a community basis into larger units, employing better teachers and offering their children a better educational opportunity. Farmers should, however, consider all proposals carefully as there is danger from hasty action. Some rural areas are permitting themselves to be drawn into districts including a fairly large urban population which would undoubtedly dominate school affairs. Others may be combining on a basis too small for maximum efficiency and economy.

The services of the Departments of Property Taxation and Rural Road Improvement will undoubtedly be in great demand during coming months. The full effect of the change to 100% assessed valuation will rightly result in demands for local tax activity.

The Research Department will be called upon to furnish much of the statistical basis for our anticipated activity in the whole field involving local governmental problems. Research activities in the field of marketing continue to expand as we move into new phases of livestock and grain handling. General economic research for the new Economic Study Committee has already been undertaken.

Marketing Activities

The development of a properly correlated program of cooperative marketing activities continues to be a primary unsolved problem of the Association. However, I am happy to report that substantial progress has been made during the year just closed. In the fields of grain, livestock and dairy marketing there is still much work to be done. There are two fundamental considerations from which we must never allow ourselves to deviate. First, we must always test every proposal as to whether it is in the long time best interests of the farmers of Illinois. All services and institutions must be measured by this standard, "What will in the end bring the highest net returns and the best service to the individual farmer?"

Correlation Necessary

The second fundamental is that we must not permit the great commodity interests to be divided into competing groups. Milk is milk whether sold as fluid milk, or as some processed product. Grain is grain whether marketed through river points or rail stations. Livestock is one commodity whether assembled locally or at the large terminals or processed by cooperative plants. Early action to correlate all cooperative activities for marketing each product is absolutely necessary if we are to eliminate friction and provide maximum returns to farmers.

Despite material and equipment shortages, considerable progress has been made by cooperative marketing and processing organizations of the state in expanding their operations. The new cold storage building of the Illinois Fruit Growers Exchange is nearing completion and will mark a step forward in the cooperative marketing of fruits and vegetables. Several new developments and expansions in the operation of cooperative locker plants and in the plants of the Prairie Farms Creameries were completed during the year. A new creamery plant at Henry began operations during the year.

In addition to this progress, there is yet much to be done. Considerable areas of the state, notably those producing milk for cheese factories and condensaries remain unorganized.

With the organization of Illinois Grain Terminals Company, progress has been made in development of the framework for an enlarged program of grain marketing. A better understanding of ultimate objectives of the Illinois Agricultural Association program of livestock marketing now exists. I feel confident that real progress can be made towards putting this program into action during coming months.

The Association must insist upon the closest possible cooperation on the part of everyone concerned if it is to successfully accomplish its goal of establishing an effective correlated cooperative marketing structure in Illinois.

Other Problems

For a number of years the Association has contemplated the establishment of a Retirement Plan for employees. The

APPOXIMATELY 300 women attended an all-day conference, Nov. 19, as part of the 32nd annual meeting of the Illinois Agricultural Association and Associated Companies in Chicago, Nov. 18 to 21.

Mrs. Englund

A varied program planned by the Illinois Home Bureau Federation included group singing led by Mrs. R. E. Milligan, Music Chairman of the Illinois Home Bureau Federation, several addresses, and a tour of the Antique Galleries at Carson Pirie Scott and Company was enjoyed.

Paul E. Mathias, secretary, Illinois Agricultural Association, in his address "Prospective State Legislation" told the group of the various legislation that is to be a definite benefit to the rural areas in the state of Illinois. He urged that the rural women get behind these bills.

Mathias commended the Illinois Home Bureau Federation for its support of the school re-organization program and its fine support of leadership.

In the discussion of re-organization of schools, Mathias stated that one must also discuss roads and that there should be a re-organization of road districts in many areas so that the same road equipment could be used in larger areas.

Another factor important to the rural communities besides education and roads, is the health program. He discussed the work that had been done upon the hospital survey and the objective of having an adequate hospital within 25 miles of every rural family in the state.

Mathias stated that the Illinois Agricultural Association will join with the Illinois Home Bureau Federation in legislation for the establishment of a much needed Home Economics building on the campus of the University of Illinois. A larger building is needed to adequately handle the increasing enrollment in Home Economics work at the University.

Mrs. Elsie W. Mies, immediate past president of the Associated Women of the American Farm Bureau Federation, spoke on "Women's Share in the World of Today."

She stated that because the women are wives and mothers, they have a tendency to share emotionally in today's problems. We are concerned about our schools because our children attend the schools. We are concerned about business, government, and others because our sons and husbands are engaged in business, government, and others.

The women of the United States share in the economic welfare of the whole world and we are being watched as to our spending patterns at the present time; whether our spending will cause inflation throughout the world or put the world business on a sound, economic basis.

To share in the world of today, we must be organized. Mrs. Mies said: "An organization is a vehicle through which we can best protect our welfare by working with others."

Miss Pearl Barnes, president of the Illinois Home Bureau Federation, was chairman of the morning meeting. Mrs. June Clifton, past president of the Illinois Home Bureau Federation, presided at the afternoon meeting.

Mrs. Helen Nelson Englund, director of the Chicago chapter of the American-Scandinavian Foundation, told of the activities of the women in the building of the peace.

Seventeen women were delegates or alternate delegates to the United Nations conference in London . . . women from all over the world, representing many different nations. At present there are eight women delegates or advisers at the conference in New York. Their viewpoints and opinions are respected and considered.

Mrs. Englund urged the women of the group to make the activities of the United Nations their number one searching interest outside the interest in their homes.

Following Mrs. Englund's talk an interesting discussion was conducted with Mrs. Clifton as leader.

Mrs. Ray Hanley, 4-H chairman of the Illinois Home Bureau Federation, distributed new leaflets concerning the Illinois 4-H Memorial camp to be built on 250 acres of the Allerton estate presented to the 4-H club boys and girls of the state of Illinois.

Gladys Blair, home adviser for WBBM's Country Hour, interviews Miss Pearl Barnes, president of the Illinois Home Bureau Federation, and other Home Bureau members during the IAA annual meeting. You can tune in on the Country Hour at 780 on your dial from 5 to 6 a.m. every day.

Meet YOUR FOUR NEW IAA Directors

FOUR new members were elected to the IAA Board of Directors at the 32nd annual meeting in Chicago. The following are thumb-nail sketches of the new men:

EARL M. HUGHES, 39, Woodstock, McHenry county, was elected to represent the 1st to 11th congressional districts succeeding Harvey W. Adair, Chicago Heights. Districts 1 to 11 include the counties of Cook, Lake, McHenry, Kane, DuPage, and Will.

E. M. Hughes

Hughes operates a farm four miles northwest of Woodstock. He was born and reared in that area and graduated in general agriculture from the University of Illinois in 1929.

Following his graduation he operated a dairy farm for four years then attended Cornell University graduate school where he received his degree as Doctor of Philosophy in agricultural economics in 1938.

He served as an assistant professor of agricultural economics at the University of Illinois until 1941 when he became first field man with the Northeastern Illinois Farm Bureau Farm Management Service.

He resigned in 1943 to devote full time to his farm . . . specializing in livestock and in general dairying.

Hughes has served as secretary of the McHenry County Farm Bureau and secretary of the Service Company. He is a member of the Woodstock Chamber of Commerce and the McHenry School Survey Committee.

The new director was married in 1932 and has three children: Helen, 9, Robert, 7, and Earl, Jr., age 4. He is a member of the Woodstock Methodist Church.

ALBERT W. WEBB, 42, Ewing, Franklin county, was elected to represent the 25th congressional district succeeding August G. Eggerding, Red Bud. Webb is a charter member of the Franklin County Farm Bureau and served as its president from 1934 to 1937.

A. W. Webb

He was born on a farm homesteaded by his great-great-grandfather in 1818. He was graduated from Ewing High School, took a two-year course at Southern Illinois Normal University at Carbondale and graduated from the University of Illinois College of Commerce in 1927. Following his graduation he taught school until 1930. In 1934 he was active in 4-H Club development and in 1935 to 1944 worked in various capacities in rural rehabilitation and farm security.

Since 1944 he has been farming full time with his father, operating about 600 acres. Major farm operations include the maintenance of a herd of 50 registered polled Hereford breeding cattle, a flock of 200 ewes, and feeding out 500 weathers. The farm produces a large acreage of wheat. Some of the Webb farm land is terraced.

Webb was elected chairman of the recently organized Franklin County Conservation District. He is a member of the Benton Lions Club, Industry and Agricultural Committee of Benton, is a board member of the recently consolidated Ewing School System, and a 32nd degree Mason.

The Webbs have two daughters, Anne, 6, and Sue, 4.

EDWARD T. CULNAN, 49, Lincoln, Logan county, was elected to represent the 17th congressional district succeeding Charles Lauritzen, Reddick. The 17th district includes Livingston, Woodstock, Logan, McLean, and Ford counties.

E. T. Culnan

Culnan has been a director of the Logan County Farm Bureau since 1946. His father was a charter member with whom he held a joint membership.

Except for one year he has lived on the same 200 acre farm all his life. He attended rural school and the Lincoln Business College. He is engaged in general grain farming and feeds some livestock.

One of his proudest achievements with the help of another farmer was in arousing the interest of his neighbors to seek rural school consolidation. This occurred before any of the recent school survey committees had been set up.

The new director served as secretary of Logan County Farm Bureau for the past year and has worked on a number of Farm Bureau committees. He has been president of Logan County Producers Supply since its organization in 1939, director of the Illinois Hybrid Seed Producers Company for two years and is the township school treasurer.

He is married to the former Marie F. Plut of Logan county and is a member at Lincoln of St. Mary's Catholic Church, Knights of Columbus, and the Elks lodge.

The Culnans are the parents of three children: Jane, 8, Anita, 6, and Thomas Edward, age 4.

EDWIN J. GUMM, 54, Galesburg, Knox county, was elected to represent the 15th congressional district succeeding Ronald A. Holt of Galva. The 15th congressional district includes Adams, Schuyler, Fulton, Knox, and Henry counties.

Gumm has been president of the Illinois Milk Producers Association for two years. He was born on a farm four miles south of Galesburg, the farm which he now operates, was graduated from Brown's Business College at Galesburg and studied law at the John B. Stetson College, Deland, Florida.

E. J. Gumm

His studies were interrupted when he served in World War I. After his discharge he returned to the home farm and was married to the former Janet Chapman of Galesburg.

The new director is engaged in general farming and has a dairy herd of 60 head, he owns 250 acres but generally operates considerably more. Normally he feeds 100 cattle and 75 hogs.

He has been a member of Knox County Farm Bureau for 25 years, has been on the board 15 years and has served as vice-president for five years. Gumm has been president of the Galesburg Pure Milk Association since its organization 12 years ago. He is president of the Knox-Warren Livestock Shipping Association, vice-president of the Galesburg Chamber of Commerce and is a member of the Galesburg Exchange Club. On his county board of supervisors he serves as chairman of the finance committee.

He is also a member of the Board of Trustees of the local Universalist Church. Mr. and Mrs. Gumm have two children: Dorothy, 19, a junior at MacMurray College, Jacksonville, and Jack, 18, serving in the army in Texas.

THESE FOUR DIRECTORS RETIRE FROM IAA BOARD

FAITHFUL, unrelenting years of long service dating from the early days of the Farm Bureau movement in their local counties mark the careers of the four men who retired from the board of directors of the Illinois Agricultural Association during the 32nd annual meeting in Chicago.

Charles Lauritzen

CHARLES LAURITZEN, Reddick, Livingston county, who retired as director representing the 22nd congressional district, has been active in Farm Bureau work since it was first started in his county.

Joining the Farm Bureau in 1920, Lauritzen served as director, vice-president and president for 17 years. His term as president extended from 1935 to 1938.

Lauritzen acted as member of the finance committee during the four years he served on the IAA board of directors.

Active in the civic affairs of his home community, he has served as president of the Danish Lutheran Church of Dwight for the past 10 years and is on the finance board of his synod.

He lives on a 240-acre dairy and grain farm near Reddick but is no longer active in farming. Married to the former Emelie Vasgaard, he has five daughters and three sons.

HARVEY W. ADAIR, Chicago Heights, Cook county, representing the 1st to 11th districts, also retires as a member of the board of directors.

Harvey Adair

During the four years he served on the state board of directors, Adair has been active on the marketing committee and has given freely of his time and advice in shaping the new livestock marketing plan presented at the annual meeting.

Adair operates a 200-acre farm in Bloom township, Cook county, and is a charter member of the Cook County Farm Bureau on which he served for nine years as president and 22 years as director before being elected as director of the state board.

Long interested and active in civic affairs, Adair served 12 years as member of the board of Cottage Grove school and for 14 years as a member of Bloom township high school board prior to his service as director on the IAA board.

Adair has been active in the work of the State School Board Association and for five years was a member of the executive committee of the Tri-County School Board Association.

AUGUST G. EGGERDING of Red Bud, Randolph county, resigns as director from the 25th congressional district, after representing farmers from southwestern Illinois for a period of 10 years.

A. G. Eggerding

A respected and veteran member of the IAA committee on organization and information, Eggerding was elected to the board of directors of the Illinois Agricultural Association in 1937.

He is a charter member of the Randolph County Farm Bureau and was on the organizing board of the Randolph County Service Company, acting as president of the board for five years.

Eggerding lives on his farm but has passed on the management to his son, Wilber.

A deeply religious man, he has been active in support of his rural Lutheran church as a voting member since 1904, an elder for 3 years, and congregation president. He also has served on the national board of support and pensions of the Lutheran church.

The Eggerdings were married in 1904 and are parents of three sons and two daughters.

He has served as president of the First National Bank of Red Bud for 36 years, has held office since 1918 in the Horse Prairie Mutual Insurance Company, is secretary of the Horse Prairie Township District Mutual Tornado Insurance Company.

Eggerding headed his town board for the past 25 years, was president of the Red Bud quarry for 18 years, chairman of rural resettlement in Randolph county for four years, and served four years as chairman of the local soil conservation board.

RONALD A. HOLT, 48, of Galva in Henry county, retires as director after representing farmers of the 15th congressional district for a period of six years. He was elected at the 25th aniversary meeting at St. Louis in 1941.

Ronald Holt

A hardworking Farm Bureau member for more than 25 years, Holt owns and operates a 220 grain and livestock farm and feeds out about two carloads of steers and 300 hogs each year.

Holt first served as director of the Henry County Farm Bureau in 1927 and again in 1940. He has continued as director of his county Farm Bureau during the years he has been on the board of the Illinois Agricultural Association. He was president of his local Farm Bureau in 1932-34.

Because it is impossible to get sufficient help in his farming operations, Holt felt obligated to resign as director on the state board. This year, Holt said, he missed several board meetings and felt that as a director he should be present at every gathering.

As a member of the IAA marketing committee for six year, Holt has helped develop the marketing program and long range plans described more fully elsewhere in this issue of the IAA RECORD.

Long interested in local civic affairs in his local community, Holt now serves as a trustee of the Galva Congregational church, director of the Production Credit Association, and president of the Galva Farmers Cooperative Elevator.

Holt moved to the farm he now owns when he was four years old and attended Galva high school. He left school at the age of 15, before graduating, because his help was needed at home.

He is married and has one daughter, Sheila, 8 years old.

RESOLUTIONS

ADOPTED BY BOARD OF DELEGATES AT 32ND ANNUAL MEETING IN CHICAGO, NOVEMBER 21, 1946

FOREWORD

TODAY, more than One Hundred and Thirty Thousand farm families are members of the Illinois Agricultural Association. This is the greatest number ever to belong to any State farm organization. The delegate body assembled in annual convention rejoices at this membership achievement. This delegate body is sobered by its responsibility of leadership and by its obligations of trust to these many farmers.

America today, as perhaps never before, cries out for intelligent leadership; for statesman and men of common sense to guide this great country from a morass of confusion and doubt that threatens at times to engulf and destroy the securities and freedoms that have made America great.

The farmers of Illinois believe that it is the time to revive some old ideas of honor, honesty and loyalty as the guiding principles of reconstruction and peace.

We believe it is time to declare the war emergency at an end. We believe it is time to appraise our national problems. We believe it is time for all organized groups to lay aside averice and greed and to honestly and patriotically face the needs of America and of the world in a program that can give to each his own if he will but work and labor for the greatest good of all. It is time to forsake nostrums and palliatives as cures for economic ills. It is time to be diligent rather than expedient.

The ways of agriculture are the ways of production and peace. The ways of America are the ways of production and peace. The farmers of Illinois pledge themselves to work with all honest and true men of this great republic to build, herein and in this world an era of peace, good will and fair return to all who will labor and strive thereto.

There is thanksgiving and gratitude for an abundant harvest. There is thanksgiving and gratitude for the brain and resource that is with our people. Let us lead forward to achievement in peace — to the full measure of gainful bounty that will come from toil and never from dole. America can be as great as we will work to make her great.

I. NATIONAL AGRICULTURE POLICY

Agriculture is the Nation's keystone industry. It provides the food necessary to sustain life and fibers and many other raw materials required by industry. The rural areas of the Nation also produce an excess of young people who migrate to urban areas to man the machines of modern industry and to assume places of leadership in business and public life. A prosperous and wholesome agriculture is therefore essential to the entire nation.

After long and difficult struggles, farmers have obtained national recognition of their problems and legislation which provides some protection against loss of income due to factors outside their control. This legislation is basically sound and must not be abandoned. Some improvements can no doubt be made and will receive our support when we are convinced that they are sound and in the public interest. We oppose any basic change in the existing parity formula. We condemn efforts to raise the general parity level at this time by the inclusion of wage rates in the formula or by other similar means.

We commend the Board of Directors for establishing the I.A.A. Economic Study Committee for the purpose of making a thorough study of the Nation's Agricultural problems and policies and making suggestions for improvements in national agricultural policy. We urge the directors and officers of the Association to aid and assist this committee in every proper manner and to give widespread publicity to their findings and report.

II. COORDINATION OF FEDERAL AGRICULTURAL AGENTS

Over a period of years a number of separate federal agencies have been created to meet specific agricultural problems. In many cases, there has been a marked change in the nature and an increase in the scope of the operations of these agencies. As a consequence, there is now much duplication of activities and unnecessary expense in their operations. There is a great need for coordination of the activities of all government agencies serving farmers.

The activities of government agencies serving Illinois farmers fall into three broad classes; research, education and service functions. In order to reduce expenses and increase benefits to farmers, we recommend that so far as possible, all major activities in each of these fields be coordinated.

III. COORDINATION OF FEDERAL AGRICULTURAL CREDIT AGENCIES

Federal agricultural credit agencies were originally established to meet financial needs of farmers and to enable them to secure adequate and dependable credit with the objective in mind that farmers would eventually own and control their own cooperative credit institutions.

We favor the reorganization of the Farm Credit Administration to bring it under the direction of an independent policy-making board at the national level. We also favor the election by farmers of at least a majority of the members on the Farm Credit Board of Directors at the district level.

IV. ECONOMY IN FEDERAL EXPENDITURES

We are gravely concerned over the enormous growth of the national debt and the inflationary effects of continued heavy spending by the Federal government.

We urge members of Congress, the President of the United States and all other government officials to be very diligent and persistent in seeking ways and means of reducing Federal expenditures to a level well below current revenues. Some revision of the tax structure may be desirable. Reducing taxes is important, but reduction of expeditures is much more fundamental. This is especially important at this time in order to counteract dangerous inflationary trends, reduce the national debt, and insure the future value of government bonds and currency.

V. AGRICULTURE-INDUSTRY-LABOR-FINANCE CONFERENCES

In our modern economic system, each major group, agriculture, labor, and industry, are mutually dependent upon one another. An abundance of food and manufactured products is essential to a high standard of living for labor.

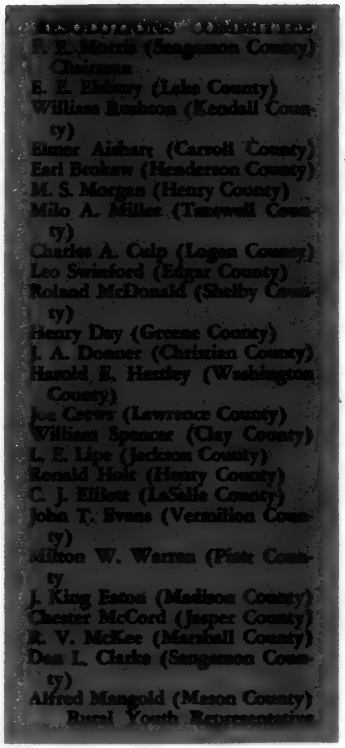
A plentiful supply of efficient labor and agricultural raw materials is required for industrial prosperity. Adequate equipment for the farm and home and good markets for farm products are necessary for agricultural well-being. An adequate monetary and credit system is essential to all. The future welfare of each major economic group depends upon full production by the others. Full production in turn requires that each group understand the problems of all. This understanding can be reached only through a consideration of all basic facts by representatives of each of the major economic groups in the nation.

In order to establish a better understanding between economic groups and to achieve a stable, high level production of agricultural and manufactured products, we authorize the officers and directors of the Association to sponsor and promote one or more conferences of leaders of agricultural, industrial, labor and financial organizations.

VI. NATIONAL SOILS FERTILITY PROGRAM

The Illinois Agricultural Association urges the adoption of a National Soils Fertility policy and program to assure farmers greatly increased supplies of high analysis mineral fertilizer, particularly phosphorus and potash.

We remove from our soils through crops and erosion much greater quantities of soil nutrients than we return to them. This cannot continue. The people of this nation should have assurance that they will always have an abundant supply of nutritious food. The farmers of Illinois will keep their land fertile and produce nutritious crops, provided they have access to adequate supplies of mineral fertilizers of the proper kind and character and in greatly increased quantities.



VII. FLOOD CONTROL

United States Army Engineers have proposed a flood control plan for the Illinois River Basin which contemplates the construction of 15 impounding dams and reservoirs and the improvement of channels, levees and flood walls. More than 140,000 acres of agricultural land would be acquired by the Federal government for these dams and reservoirs. The plan contemplates that in times of flood, the flood waters would be held in these reservoirs and released as the flood recedes. The cost of the proposed plan, including the acquisition of land, estimated upon the basis of 1940 costs and land values, is in excess of $90,000,000. Present day costs would greatly exceed this amount but no accurate estimate based upon present day costs and values is available. The proposed costs do not include severance damages resulting from the taking of only a portion of a farm, damage resulting from injury to drainage, or damage to lower and surrounding areas from seepage and similar items. No monetary value is fixed nor can it be for the loss resulting from the disruption of communities or from removing people in the area acquired from their homes. The claimed ratio of costs to benefits is $1.24 of benefit for each $1.00 of cost over a 50 year period, upon the basis of 1940 costs. When maintenance charges and present day costs and values are taken into consideration, it seems obvious that on a purely monetary basis the cost would exceed the benefits.

The proposal, in effect, would result in taking the property of persons residing upon the upper tributaries of the river for the benefit of persons residing in the river valley. Heretofore private property has been taken by the government in peacetime only when the necessity in the interest of the general welfare and the resulting public benefit was clear. The Board of Directors of

Members of the resolutions committee for the 1946 Illinois Agricultural Association annual convention in Chicago are left to right, seated: Alfred Mangold, Mason County; Milo A. Miller, Tazewell; Russell V. McKee, Marshall-Putnam; J. A. Donner, Christian; Dan Clarke, Sangamon; Ronald Holt, Henry; M. S. Morgan, Henry; Mrs. B. Meagher, office secretary; Floyd E. Morris, Sangamon; Paul E. Mathias, IAA secretary; Roland McDonald, Shelby; L. E. Lipe, Jackson; C. J. Elliott, La Salle; Henry Day, Greene; Joe Crews, Lawrence; William Spencer, Clay; Elmer Airhart, Carroll. Standing: Leo Swinford, Edgar; Charles A. Culp, Logan; Milton W. Warren, Piatt; William Rushton, Kendall; Harold E. Hartley, Washington; John Evans, Vermilion; E. E. Elsbury, Lake, and J. King Eaton, Madison.

ADOPTED BY BOARD OF DELEGATES

AT 32ND ANNUAL MEETING IN CHICAGO, NOVEMBER 21, 1946

FOREWORD

TODAY, more than One Hundred and Thirty Thousand farm families are members of the Illinois Agricultural Association. This is the greatest number ever to belong to any State farm organization. VII. FLOOD CONTROL

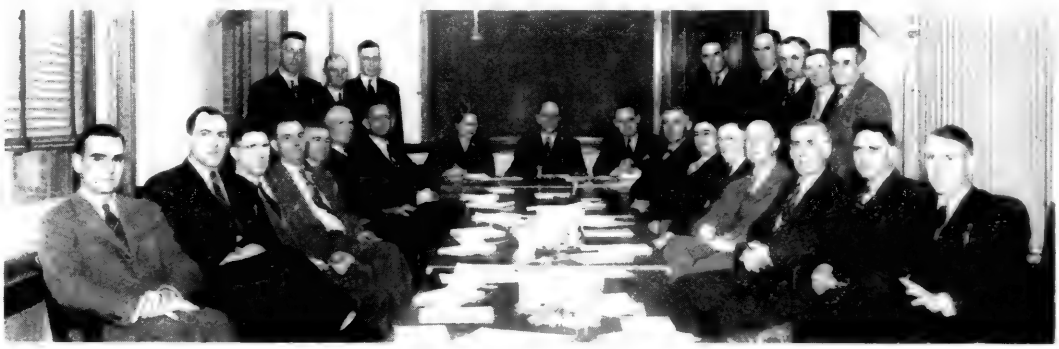
United States Army Engineers have proposed a flood control plan for the Illinois River Basin which contemplates the construction of 15 impounding dams and reservoirs and the improvement of channels, levees and floodwalls. More than 140,000 acres of agricultural land would be acquired by the Federal government for these dams and reservoirs. The plan contemplates that in times of flood, the flood waters would be held in these reservoirs and released as the flood recedes. The cost of the proposed plan, including the acquisition of land, estimated upon the basis of 1940 costs and land values is in excess of $90,000,000. Present day costs would greatly exceed this amount but no accurate estimate based upon present day costs and values is available. The proposed costs do not include severance damages resulting from the taking of only a portion of a farm, damage resulting from injury to drainage or damage to lower and surrounding areas from seepage and similar items. No monetary value is fixed nor can it be for the loss resulting from the disruption of communities or from removing people in the area acquired from their homes. The claimed ratio of costs to benefits is $1.21 of benefit for each $1.00 of cost over a 50 year period upon the basis of 1940 costs. When maintenance charges and present day costs and values are taken into consideration, it seems obvious that on a purely monetary basis the cost would exceed the benefits.

The proposal, in effect, would result in taking the property of persons residing upon the upper tributaries of the river for the benefit of persons residing in the river valley. Heretofore private property has been taken by the government in peacetime only when the necessity in the interest of the general welfare and the resulting public benefit was clear. The Board of Directors of



Members of the resolutions committee for the 1946 Illinois Agricultural Association annual convention in Chicago are left to right, seated: Alfred Mangold, Mason County; Milo A. Miller, Tazewell; Russell V. McKee, Marshall-Putnam; J. A. Donner, Christian; Dan Clarke, Sangamon; Ronald Holt, Henry; M. S. Morgan, Henry; Mrs. B. Meagher, office secretary; Floyd E. Morris, Sangamon; Paul E. Mathias, IAA secretary; Roland McDonald, Shelby; L. E. Lipe, Jackson; C. J. Elliott, La Salle; Henry Day, Greene; Joe Crews, Lawrence; William Spencer, Clay; Elmer Airhart, Carroll. Standing: Leo Swinford, Edgar; Charles A. Culp, Logan; Milton W. Warren, Piatt; William Rushton, Kendall; Harold E. Hartley, Washington; John Evans, Vermilion; E. E. Elsbury, Lake, and J. King Eaton, Madison.

the Association have heretofore taken action opposing the plan insofar as the acquisition of land for the impounding of dams and reservoirs is concerned pending consideration by the voting delegates. We approve the action heretofore taken by the Board of Directors and direct that the Association continue to oppose the proposal for the acquisition of land and the construction of impounding dams and reservoirs until such time as information is available as to the estimated cost and benefits on the basis of present day costs and values, until it is clear, that the monetary benefits resulting are greatly in excess of the cost, and until it is unquestionably clear that the project is justified and necessary to serve the general welfare.

Many informed persons urge that an adequate soil conservation program will prove highly effective in preventing run-off thereby controlling flood waters. Such a program can be put into effect at much less expense than the proposed plan, the cost would largely be borne by land owners and homes and communities would not be disrupted. The possibilities of flood control through an adequate soil conservation program and the cost of such a soil conservation program should be studied and determined. We oppose the undertaking by the Federal government of projects involving such huge expenditures at this time when the government has a very great indebtedness and its expenditures exceed its revenues unless such projects are shown to be essential and necessary for the general welfare and the protection of life and property. The Association should not oppose proposals for channel improvement and for the improvement of levees and flood walls.

VIII. SOIL CONSERVATION

We recognize the importance of soil conservation and the preservation of our basic soil resources. The maintenance of a high level of soil productivity is fundamental to a permanent agriculture and to the continuation of a high and increasing standard of living for the American people. We favor continued and increased emphasis on conservation of the soil in all its phases, based on complete coordination of all federal and state soil conservation activities in the county and continued through the cooperation of and as the responsibility of the farmers of each county. This county program should be built on the basic principle of wise land use and good farming practices. Such a program should aid in the prevention of flood damage. This program should fit into a coordinated state program and insofar as possible should be planned, administered and financed by the cooperating farmers.

IX. TAXATION OF COOPERATIVES

We believe in the private enterprise system and look upon farm cooperatives as part of that system. We recognize that earnings of cooperatives which are retained within the cooperative structure and not distributed as patronage dividends to members should be subject to the same tax treatment as funds so retained within the corporation structure. Cooperative earnings upon member business returned to members as patronage dividends, either in cash or stock, should not be subject to tax. Such income is now subject to tax as the income of the individual members of the cooperative. Patronage dividends represent savings arising from the handling of a particular individual's business. They can be returned to him either through adjusted prices or through patronage dividends. The return of these savings in the form of patronage dividends has certain general advantages which make it desirable to retain the opportunity of so distributing these funds.

We will support such changes in the internal revenue law as may be necessary to require agricultural cooperatives to annually report their operations and earnings, and to provide that there be income tax exemption or deduction from taxable income on only that portion of their earnings on member business which is distributed to their members and patrons.

X. FARM LABOR PLACEMENT SERVICE

The farm labor situation is still very acute and probably will continue to be so for some time. The Extension Service rendered valuable assistance to farmers in recruiting and placing farm labor during and since the war.

We recommend that sufficient funds be made available to the Extension Service for the continuation of this activity for a limited time only and that the entire program be ended as soon as the pressing need ceases to exist.

XI. REGULATION OF ADVERSE LABOR PRACTICES

We believe that the experience of the past year in labor-management relations has been a serious reflection not only upon the parties involved but upon our entire nation. We believe that it is the responsibility of Congress to take steps to correct situations which have brought about strife and conflict between labor and management. Any legislation should be such that undue advantage does not accrue to labor or management and that the public interest is adequately protected.

We feel that the protection of the dignity of labor is one of the fundamental requirements of a democracy. We recognize the contribution that labor has made to the nation and will support reasonable programs designed to bring about an ever-increasing standard of living for labor. We believe, however, that wage increases alone will not increase the standard of living without

At a dinner in Springfield recently honoring Dave Mieher, retiring manager of Country Life Insurance Company, three of the insurance men and their wives are shown in a gay mood. Left to right: Mr. and Mrs. Frank V. Wilcox; he is the new manager of Country Mutual Casualty Company; Mr. and Mrs. A. E. Richardson; he is the new manager of Country Life, and Mr. and Mrs. Mieher.

IAA INSURANCE COVERAGE NOW
More than ¾ Billion Dollars

"THE proof of the pudding is in the eating." So goes the old saying. Likewise the proof of the esteem Illinois farmers have in their own insurance companies is shown in the figures which tell of another year of spectacular gains in IAA insurance sales, according to reports of the operations of the companies for the fiscal year ending September 30.

The figures reveal that farmers have increased insurance in force on their lives and property through Country Life Insurance Company, Country Mutual Fire Company, and Country Mutual Casualty Company to more than three-quarters of a billion dollars.

Country Mutual Casualty Company on Sept. 30 had 164,500 policies and 98 bonds in force. Together, this is an increase of 18,612 over the previous year. Country Mutual Casualty policies cover automobile, cargo and accident risk and employers liability.

During the past year Country Mutual Casualty returned $797,949.60 to policyholders in the form of special dividends, according to the report made by Manager A. E. Richardson. Operations for the year show that the Company had earned premium of $3,560,567.58 which was $501,337.93 higher than in 1945.

Country Life Manager Richardson (left) bids Retiring Manager Mieher goodbye as he leaves for his job with Southern Life at Jackson, Miss.

Total loss payments made during the year amounted to $2,049,747.29. The recent rapid growth of this 19-year-old Farm Bureau insurance cooperative is reflected in the report for the period Oct. 1, 1941 to Oct. 1, 1946 which shows an increase in business of 65.2 per cent.

Country Life Insurance Company continued its steady growth during the year when total volume of business increased $32,451,954 and now stands at $276,066,174.

Dividends paid to policyholders during the past year amounted to $486,919.58. Country Life Insurance Company provides that with the exception of a seven per cent dividend payable on its capital stock, all other surplus earnings available for dividend distribution go back to the policyholders.

J. H. Kelker

Death claim payments amounted to $739,205.14 during the 1946 fiscal year.

During the year, $39,012,421 in new business was sold representing the largest amount sold in any year by Country Life. Manager Dave Mieher attributed the remarkable growth of Country Life to the willingness on the part of farm people to buy from their own company and to keep their policies in force.

Country Mutual Fire Company, also an IAA affiliate, increased insurance in force by $111,878,110 during the fiscal year. This brought total insurance in force at the end of the fiscal year to $514,080,781. Loss claims paid total $1,262,429.22 and refunds to policyholders amounted to $863,331.97.

During the year dividends were paid or credited to members in the following amounts: Fire and extended coverage, $69,738.08; windstorm, $10,991.37 and hail on crops, $782,602.52.

Windstorm claims paid out in 1946 were less than in the two preceding years, according to Manager J. H. Kelker. Fire losses for the company were slightly higher than they were in 1945.

Adjusters and Supervisors on IAA Insurance Claims force. All are adjusters except where named. First row, left to right: James P. Shields, assistant claims supervisor, Springfield; Hal E. Trimble, assistant claims supervisor, Effingham; Richard I. Dodson, Springfield; Willis J. Martin, claims supervisor, Champaign; G. R. Williams, claims supervisor, Belleville; R. J. O'Neill, claims supervisor, Kewanee; Charles H. Stevens, Chicago; Glen L. Ewing, assistant claims supervisor, Oregon; William Jellema, Chicago; Cedric N. Forbes, assistant to claims superintendent, Chicago. Second row, left to right: Lawrence Camp, Springfield; Philip M. Glennon, Galesburg; William H. Munch, Paris; Floyd A. Lobdell, Belvidere; Evan F. Loveless, Edwardsville; J. O. Shryack, Ottawa; Thomas E. Mathews, claims examiner, Chicago; Eugene B. Sears, claims examiner, Chicago; Louis W. Henninger, Champaign; Richard H. Lukens, Aurora; L. L. Truninger, Elizabeth; J. Leslie Logan, Princeton; Lester D. Saxe, Harrisburg; William H. Quinn, Chicago. Third row, left to right: Lyle H. Short, Petersburg; O. W. Anderson, Moline; L. A. Soltwedel, Effingham; James C. Barrow, Belleville; John H. Lusk, Galesburg; Wm. N. Barringer, Greenville; Chester F. Michels, Peoria.

1947 Membership Goal—140,000

A DETERMINATION to reach a membership goal of 140,000 Farm Bureau members in 1947 was expressed at the IAA organization-information conference in Chicago, Nov. 20 by IAA Organization Director O. D. Brissenden.

Chairman Otto Steffey, IAA director from Henderson county, challenged the organization department to raise Illinois Farm Bureau membership to 140,000 by Sept. 30, 1947. Brissenden accepted the challenge on behalf of the organization department.

The conference was held in conjunction with the IAA annual convention at Hotel Sherman.

"The growth in Farm Bureau membership during the past year has been phenomenal," Brissenden said. "It should continue through the present year and the goal thrown out by Mr. Steffey should be attained."

IAA President Charles B. Shuman congratulated the organization department and all those responsible for the membership increase of 15,174 last year to an all time high of 130,825 members.

"This rapid advance," Shuman said, "is a tribute to the sound program of service to farmers offered by your organization. It is also a tribute to the ability and loyalty of our organization staff and especially to the thousands of Farm Bureau members who have served as volunteer workers."

These county organization directors set the pace and won the honors during the past year. Left to right: Claire Gsell, Whiteside; E. E. Sandall, Kendall; Ruis Garrison, Jefferson; Earl J. Hays, La Salle; Carl Orr, Union; and Clarence Kirchofer, Gallatin. Not shown is Castle Jordan who replaced Sandall for the last two months of the fiscal year. (See Story)

Counties and organization directors singled out for special honors for their accomplishments during the year were La Salle county and COD Earl J. Hays, with a net increase of 559 in total membership; Whiteside county and COD Claire Gsell, with a net gain of 521.

Menard county and COD L. C. Greenwald, reported the highest percentage of new member quota attained, 509.7 per cent; Kendall county with E. E. Sandall serving as COD for 10 months and Castle Jordan for the balance of the year, was second on this basis with 473.4 per cent reported; La Salle third with 427.5 per cent; Williamson fourth with 417 per cent, and Whiteside fifth with 407.5 per cent.

On the basis of percentage net gain of total membership for the year, the honors go to Jefferson county, COD Ruis Garrison, who reported a net gain of 45.5 per cent. Gallatin county and Union county with Clarence Kirchofer and Carl Orr as COD's tied for second in this classification with a percentage increase in total membership of 31.7 per cent.

Included among the organization-information conference speakers was IAA Field Secretary George E. Metzger who explained the membership policies that guide the Illinois Agricultural Association. Metzger traced the history of organization policy explaining policy causes and results.

In his talk to the conference audience, Brissenden pointed out that there are enough good, substantial farmers among non-Farm Bureau members to make our goal for 1947 possible if we study our counties carefully.

"Let's seek out these individuals," Brissenden continued, "tell them the story of Farm Bureau and give them a cordial invitation to join with us.

"Now is the time," Brissenden continued, "to strengthen weak membership spots in every county in the state. All have them. It is our job to analyze the membership situation and follow the sensible course of action.

"But to grow in numbers is not enough," he said. "There must be growth within the present membership if we are to be strong in meeting the problems that lie ahead for agriculture. This means greater participation by more members in all parts of the broad Farm Bureau program and a fuller understanding of the objectives of Farm Bureau.

"To carry on an aggressive service program that will attract all Farm Bureau members is a challenge to all leadership and all employes in the Farm Bureau movement."

Charley Carrier, Macon county C.O.D., speaks with gestures before the Organization-Information conference. Others are, left to right: Chairman Otto Steffey, Henderson county; IAA Organization Director O. D. Brissenden, and Ruth Hartman, office secretary.

IMPA Handles

2 Billion Pounds Of Milk

MIDWEST dairymen who do not prepare for a big drop in prices next year or early in 1948 are exposing themselves to a very real danger.

This grave warning was given to dairymen at the annual meeting of the Illinois Milk Producers Association by Milo K. Swantson, executive secretary of the Wisconsin Council of Agricultural Cooperatives.

"Our current milk flow is higher than any longtime consumption warrants at present prices," Swantson said.

"Materials other than food are now reaching the consumer market in increasing volume and they're bidding heavily for the consumer's dollar.

"Also, we can't expect to keep our present foreign market for long. We'll have to sell at home." To insure a post war market for dairy products Swantson urged a program of housewife and general consumer education.

"It's more sensible to educate the buying public to the advantages of finding a normal balance of vitamins through dairy and other farm products than buying them in pills," he said.

"To meet the housewife at the supermarket and corner grocery store we'll have to concentrate on packaging, especially of cheese, and on quality improvement.

"We'll have to improve our milk cleanliness to a point where the public, germ conscious as never before, will not be able to point an accusing finger at us."

E. E. Houghtby, new IAA director of dairy marketing was introduced at the meeting by IMPA President Ed Gumm.

Houghtby pledged to work for the dairymen in the state "because to do so will be to improve my own position as a farmer-producer of milk."

W. J. Swayer, acting secretary-treasurer, reported that the Illinois Milk Producers Association handled a sky-high 2,224,086,134 pounds of milk last year through its 23 associated member companies.

This figured at $78,447,905 for total sales, highest on record, and $9,550,578 more than last year.

Swayer said sales of fluid milk continued high during the year and almost no surplus problem was experienced.

He told dairymen at the meeting that producers supplying fluid milk to most of the larger cities of the state are now organized.

Of the 23 co-ops affiliated with IMPA, 14 are collective bargaining groups only, 3 are engaged in collective bargaining and operate receiving and manufacturing plants, six bottle milk and manufacture dairy products.

At the meeting of the Illinois Milk Producers' Supply Company, held the preceding night, Leonard H. Lundahl, sales representative of the Land O'-Lakes Creameries, warned that dairy equipment is going higher every day.

L. H. Lundahl

Illinois Milk Producers Supply Company is a purchasing organization for the cooperative associations who are members of the Milk Producers' Association.

Lundahl said that Land O'Lakes was able in 1945, after more than twenty years of struggle, to get regular jobbers discounts for a complete line of dairy manufacturing equipment.

His company, a large dairy cooperative operating principally in Wisconsin and Minnesota, has sold much of the equipment purchased by Producer's Supply this year.

Land O'Lakes supply company, he said, is planning an overnight supply service and expects to go into manufacturing of dairy equipment as soon as they can get building materials.

Judson Mason, assistant director of dairy marketing, reported on the activities of the Illinois Milk Producers' Supply Company for the past fiscal year.

The company reported sales of dairy supplies to member associations in the amount of $96,721 in contrast to $43,-151 for last year. This represents an increase of 124 per cent.

Net income for the supply company for the current year amounted to $7,-128 or seven per cent of total sales. Dividends were declared on the outstanding Class "A" preferred stock out of net earnings and the balance of $5,748 was distributed to participating companies on a patronage basis.

Illinois Milk Producers Association board of directors, left to right, standing: L. A. Schnekloth, Davenport, Iowa, Quality Milk Association, Moline; Wm. J. Kessler, Auburn, Sangamon Farmers Milk Co-op., Springfield; Glen Tombaugh, Streator Milk Producers Association, Streator; Dean Rodford, Kewanee Milk Producers, Kewanee; W. J. Swayer, (Temp. secy.-treas.) Chicago, Pure Milk Association; B. J. Schumacher, (Vice-Pres.) Mason, Assistant Director of Dairy Marketing, IAA, Harold P. Kamm, Franklin, Jacksonville Producers Dairy, Jacksonville; Delbert Freeman, Canton Milk Producers Association, Canton.

SMITH CALLS FOR *Statesmanship*

Excerpts from speech "OBSERVATIONS" delivered to Annual Meeting of Illinois Agricultural Association

I GREATLY appreciate the pleasure and the honor of appearing on this important occasion in the life of the Illinois Agricultural Association. I have greatly enjoyed the past three days in being permitted to mingle at ease among you, and to renew many old and make new acquaintances. It has been a rather unique experience for me.

. . . While there have been some disappointments, such as the failure to secure the adoption of the Gateway Amendment by the voters on November 5, it is with a deep sense of pleasure and satisfaction that I congratulate all of you on the over-all progress and results of the IAA during 1946.

I am sorry that I cannot speak so assuringly of the progress or transition of our nation from a war to a peace basis.

Whether we appraise our national government from the standpoint of its moral, spiritual or financial position and standing, it gives cause for great and serious concern. I do not speak as a partisan or as a prude, but solely from the standpoint of an interested citizen. I am sure you all know that I am neither an opportunist, an alarmist, or a crusader, but I have observed government, both from the front and behind its scenes of action. I have witnessed political machines in operation, both in private rooms and on the platform.

Recognize Sinister Influences

We have all recognized the sinister influences of machine politics on the radio, in the newspapers, in the enactment of laws and in the administration of government. We are all living witnesses of the results and never have I seen or felt the confusion of people in all walks of life, over the trends and activities of government, as during the past year.

I have made several trips into the South, into the West and into different sections of the Midwest, and whether talking with men of large affairs, workers in various lines of business, pullman porters, cab drivers, bell boys or farmers, I have found that one word would well describe their state of mind — "confusion." Everywhere farmers have been bewildered at the ever changing and conflicting rules, regulations and statements emanating from Washington, and I am well within the facts in stating that from the same source came rules and regulations even more seriously affecting many in other walks of life. Everywhere people were asking, — why or how could government do this, or do that, because of some of the announced rules affecting the lives and activities of people and business, when it seemed so apparent that current problems could be much more simply solved? Then, I got to thinking of the great address delivered a year ago at our convention by the Honorable Everett Dirksen. You will remember he discussed the subject — "Communism On The March." He told us of his trips around the world and the condition he found in so many countries. He clearly portrayed how those with communistic tendencies were infiltrating into the affairs of government of many countries and through carefully conceived plans were bringing about, — first, confusion in the minds of the people, — second, distrust of government and lastly, — despair, and he forewarned the American people, in that address, of similar trends within this country. I sometimes wonder if many of the complex and conflicting rules and regulations affecting the lives of our people were not conceived by a given few operating within some of the bureaus and divisions of government, where rules and regulations are actually written, for the exact purpose of bringing about confusion, distrust and finally despair on the part of the American people.

Necessarily I can speak here only in the broader sense relative to the confusion I have mentioned.

It is well to remember that immediately after V-J Day, just a little over a year ago, many top government leaders ventured the prediction that America was destined immediately for a long era of the greatest prosperity in history. We were told there would be forthcoming, very soon, blue prints for action that would co-ordinate our resources and the efforts of the people in a manner that would culminate in this high degree of prosperity. Tonight I ask, — have you seen or heard of such a blue print? We were told of the great need for continuing the Office of Price Administration as a means of avoiding inflation; we were informed how imperative it was to keep wages, prices and profits in balance. With this requisite for a balanced economy, farmers were generally in accord. Even with some misgiving, organized farmers, with very limited exception, gave their support. Authority for action was given by Congress and it is therefore appropriate to mention the results. Strike after strike occurred; demands were made, at least in some cases, for an exorbitant increase in wages. This is notably true with the steel, automobile and coal miners' unions. Have you forgotten the statement of Mr. Reuther, now president of the United Automobile Workers, in demanding not less than a 30 per cent increase in wages, and that no increase in the price of automobiles be permitted; or the demands of steel workers for a very substantial increase in wages, which they stated, would not require any increase in the price of steel?

The break came when government responded to these demands. Immediately the price of basic steel was increased $5 per ton. Official pronouncement, at the

IAA Past President Earl C. Smith Addresses Wednesday Night Session.

time of increasing automobile workers' wages, declared there would be no increase in the price of automobiles until the manufacturers proved there was no profit and that they were on the losing side in their operations. Later, quite substantial price increases were officially oked. Similar conditions existed with coal and in all cases the public suffered, and the national economy was further impaired. Notwithstanding their earlier statements relative to the necessity of holding the wage and price line, our national leaders again informed us that all was well and the nation was enjoying the greatest industrial activity in history.

These statements again threw the people into confusion. If we were having the greatest production in all history, where were the building material, cement, hardware, paint, plumbing, automobiles, sugar, soap and meat, — yes, even men's underwear. The same conditions seem to exist with nearly all of the basic industries manufacturing in varying degrees, those things that play such an important part in the progress and lives of all classes of citizens..

Statistics Misleading

I got to wondering how could any recognized economist or statistician furnish data that warranted statements of such large production, and yet the products were not available in the markets of the country in amounts that even approached a balance of supply with demand. And then, there came to my observation an explanation. This large production was determined by measuring dollars of value rather than units of goods. From the standpoint of dollars, possibly the statements were correct, but people do not either eat, wear or build with dollars. If farmers measured their production with dollars instead of pounds and bushels, their total production would be recorded as very much larger than it is today. In more recent weeks, meat seemed to occupy the center of attention. The meat situation furnishes a good example of the great confusion that has existed in the minds of the people, particularly in the cities. Possibly no more outstanding example of this confusion exists than appeared in the article in Life magazine of last May 6. That article would have its readers believe that the shortage of meats, during recent months, was a direct result of selfishness and hoarding on the part of farmers. Certainly no place can we find, throughout or since the war, any group of people that has tried to measure up to the official requests of government in the field of production as have the farmers of the country; they overcame all obstacles resulting from shortage of manpower, machinery, transportation or price and gave to the country by far the largest production of agricultural commodities of all time, and *this* measured in pounds and bushels and *not* by dollars.

During the recent campaign, we have all heard charges and counter-charges, and propaganda of all kinds emanating from speeches, articles and over the radio relative to the meat situation. Some of these statements came from leaders of both major political parties, candidates for office, newspaper writers and government officials, but they were largely based on prejudice rather than facts. As I have not seen any offical answer to these misstatements, I want to take just a few moments to deal with established facts, so that there will at least be one record in defense of the American farmers for the condition that has existed relative to the supply of meat versus the demand of the people, and to place the responsibility where it rightfully belongs.

Immediately after Pearl Harbor, the Secretary of Agriculture called upon American farmers for all-out production, and soon thereafter coined the phrase "food will win the war and write the peace". In 1942 the farmers raised about 20 million more hogs than the previous year, or an increase of nearly 25 per cent. In the fall of 1942 the government asked for another increase of about 15 per cent and farmers were assured that the government would maintain a price floor of $13.25 CWT, basis Chicago, until September 30, 1944, as an inducement for this production. Farmers again responded and produced approximately 121 million head of hogs in 1943. Every hog feeder and producer remembers the failure of the government to effectively maintain the promised floor, and the millions of dollars of losses suffered by both feeders and producers. Some of those carrying this responsibility for failure in maintaining prices, adopted an alibi declaring the price inducement had resulted in an oversupply of hogs, but the record discloses the supply was within one per cent of official government requests.

IAA Past President Earl C. Smith (left) and IAA President Charles B. Shuman comment on farm problems over station WBBM. Announcer is Harry Campbell.

In desperation over the failure of the government to make effective its promise to maintain price floors, the government in November of 1944 called upon the farmer to reduce hog production by 15 per cent and announced a reduction in the floor to $12.50 CWT. Again, the record shows, that production was substantially in balance with this official request.

Orders Confuse Farmers

In the fall of 1945 the official government goals for 1946 were approximately those of 1945, and the price floor was further reduced to $12 CWT, even though the cost of producing hogs was steadily rising. All signs indicated an approaching shortage of corn, and corn producers insisted upon a revision of the corn ceilings upward to a basis of honestly interpreted parity. This request was not only a matter of justice, but to encourage larger production. However, the government refused, stating that with no increase in production goals, and a lower price floor, hog feeders and producers could not absorb any further increase in the price of corn. Corn producers were officially requested to market their corn in an orderly way, as there would be no further increase in corn ceilings and therefore no advantage to any corn producer in witholding his corn from market during the marketing season of the 1945 crop, which runs officially to December 1, 1946. Both in January and again in February of this year, top officials of government urged farmers to market more corn, reiterating there would be no price advantage by holding for later marketing. But in March, the situation became so acute that the government officially offered a 30-cent bonus for the delivery of corn to the Commodity Credit Corporation for shipment abroad, while holding ceilings in the domestic markets at the previous levels.

After such a plea from top government officials to market corn and their assurance that there would be no increase in the ceilings of corn for the marketing year, can anyone rightfully blame farmers, who by the sweat of their brow, investment and other effort produced and sold corn according to government advice, for being confused, then sore and finally disgusted when they were forced to witness the government later offering a premium of 30 cents a bushel for corn? Can anyone blame a feeder for becoming angry after being asked to participate in the production and feeding of hogs, only to find himself in competition for the purchase of necessary corn with his gov-

(*Continued on page 40*)

Propose Coordinated
STATEWIDE LIVESTOCK MARKETING
Program

A workable, flexible state-wide program for livestock marketing was presented by George Metzger, IAA field secretary, at the livestock marketing conference held Nov. 20 during the annual meeting of the Illinois Agricultural Association at the Hotel Sherman in Chicago.

The plan projects the already existing livestock agency, the IAA affiliated Illinois Livestock Marketing Association, into a statewide marketing agency.

To encompass its short and long-range goals the marketing program unfolds logically through three major developments.

Each of these three developments, Metzger explained carefully, is in itself a major and complete program. Farmers themselves will determine how far they wish to go.

First plan

Metzger pointed out that development of the marketing plan, the result of two years of study by the IAA marketing committee, can be started with marketing machinery already at hand. (see map No. 1).

County Farm Bureaus with enough livestock available to pay operating expenses of a local cooperative concentration point, can set one up, finance it locally, elect its own board of directors, and contract with the Illinois Livestock Marketing Association for sales service.

He said that local points should be set up in such a way that they could be absorbed into a more extensive and coordinated livestock marketing plan if one is developed.

Plan No. 2

The second plan outlined by Metzger, provides that a statewide marketing agency be set up, financed by farmers, with a board of directors elected from different regions of the state. (see map No. 2).

This new agency would probably purchase the state office of the Illinois Livestock Marketing Association, take over all its contracts, and become the exclusive sales agency for local concentration points contracting with it for sale of hogs.

It might also place buyers in the terminal market where producer agencies operate as an additional safeguard against market breaks or fluctuation in the price of hogs in the terminals.

Illinois Livestock Marketing Association is an established marketing organization and has been in operation for several years. These marketing points would contract to market hogs only through the Association but would ship any other species of livestock for any farmer in their community direct to a producer agency on a terminal market.

Plan No. 3

The third proposal outlined by Metzger provides for the same general service as the second plan with one major addition. (See Map No. 3.)

A number of yards located so that they could be reached by farmers in a two hour truck drive would be established to handle all species of livestock.

These concerns would be regionally financed, would operate under a regional board of directors and would contract with the state sales agency for exclusive sale of all species of livestock.

Such a plan, Metzger explained, would tend to coordinate livestock marketing and enable farmers to gain bargaining power in the sale of his livestock in a degree which he does not now possess.

It would also make it possible for a livestock producer to sell his livestock in a cooperative marketing agency of his own choice.

He could ship to a commission concern on a terminal market and have his stock move through cooperative channels.

He could sell his hogs through a local concentration point located rather close to his home. He would have a man, whom he employs, weigh and grade the hogs and he could take his check home with him.

By moving other species of livestock a little farther, he could do the same with his cattle, sheep or calves.

Such a plan would make it possible for farmers to market livestock under a cooperative plan at any time and in any way they see fit.

A fourth development in this long range plan for cooperative marketing presented by Metzger outlined a proposed pilot meat packing plant. This will depend on the success of the marketing program in part, and is of necessity projected furtherest into the future.

The proposed plant would cost an estimated $400,000 to build and equip with an added $350,000 for operating capital.

It would have a capacity of approximately 2,000 hogs, 500 sheep, 500 cattle, and 500 calves for butchering weekly.

The idea back of the program, Metzger said, is construction and operation of a pilot plant large enough to gain knowledge in cost of processing and distribution of meats.

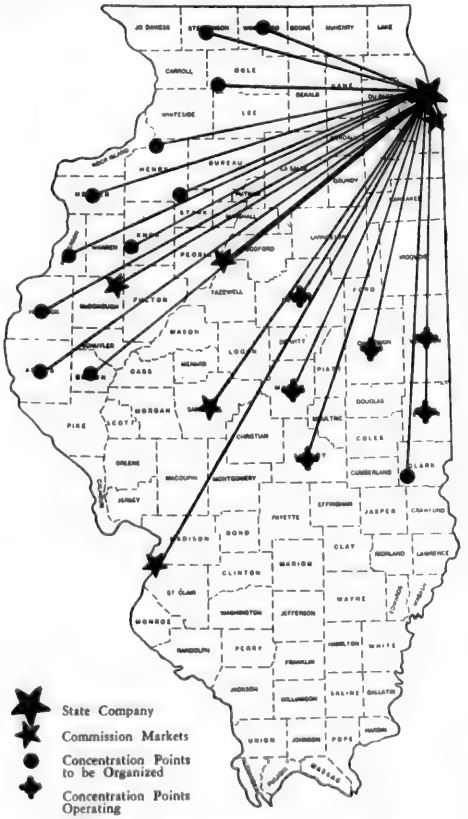
Illinois Livestock Marketing Association board of directors, left to right: (seated) Treasurer Ralph Beckett, Macon county; Vice-President Carl Lage, McLean; President Mont Fox, Vermilion; (standing) Russell V. McKee, Marshall-Putnam; Milton W. Warren, Piatt; Secretary Clark Wise, Champaign, and H. W. Trautmann, manager. Not in picture are Fred Smittkamp, Edgar, and LaRue Tice, Shelby.

PROPOSED PLANS FOR LIVESTOCK MARKETING

NO. 1 — This plan can be started with the marketing machinery already at hand. It is the result of two years of study by the IAA marketing committee. (See Story)



NO.2 — This plan provides that a state-wide marketing agency be set up, financed by farmers, with a board of directors elected from throughout the state.

NO. 3 — This plan provides for the same general service as the second plan with one major addition. It would buy livestock at district points. (See Story)

At the speakers' table during the marketing conference during the annual meeting are, left to right: Edwin Gumm, Galesburg; J. P. Redman, Cairo; Carl Johnson, DeKalb; Homer Curtiss, Stockton; Byron Kline, LeRoy, and Lawrence Todt, Harvel.

PROF. L. J. NORTON
Sees Hog, Cattle Prices In Slow Decline

MORE meat for the nation's dinner table in 1947 at slowly declining prices was predicted by Dr. L. J. Norton of the University of Illinois College of Agriculture at the meeting of the Illinois Livestock Marketing Association held Nov. 19 during the IAA annual convention.

"Fat cattle are now very scarce," Norton said, "that is why they sell for over $30."

"But with about 80 million head on farms and plenty of corn to feed, the cattle will be rolling in from the range and feedlot next spring and winter."

Prices, he believes, will be favorable to cattlemen as long as incomes remain high but meat over the counter will be cheaper as demands for better quality cuts are more nearly satiated.

"Hog market this winter may show a seasonal drop beginning in December but pork supplies are too short to allow much decline in price," Norton believes. "Lard will sell at top prices since shortages of fat are worldwide."

The '46 fall pig crop is down some 15 per cent and will not bolster spring and summer marketing.

With these light summer marketings it will pay to have spring pigs ready early, to catch the summer slack. This will be especially true, Norton believes, if the large crop of spring pigs, now being predicted, materializes.

"Everyone knows we have had a record corn crop this year. This certainly means that the sooner the individual farmer gets corn converted into saleable meat animals, the more money he will realize for it," Norton continued.

"And the price of hogs must go down a long way before hogs fail to pay for corn at loan prices of about $1.15 on the '46 crop."

Reporting on the activities of the Illinois Livestock Marketing Association, Manager H. W. Trautman of Decatur said more livestock moved through the association's yards last year than during the relatively stable preceding year despite confused market prices.

He reported to the conference that 182,680 animals were handled by the marketing association this year as compared with 169,207 for the preceding year. Net earnings of the association were $10,189.96 for the fiscal year ending Sept. 30.

Prof. L. J. Norton, acting head of the University of Illinois department of agricultural economics, addresses Livestock Marketing conference. Left to right: Clark E. Wise, Champaign; Mont Fox, Vermilion; Prof. Norton; Illinois Livestock Marketing Association Manager H. W. Trautmann; R. W. Beckett, Macon, and Mrs. B. Meagher, office secretary.

PROPOSE COORDINATED LIVESTOCK PROGRAM

(*Continued from page 22*)

The plan proposes that the plant should be a complete meat packing unit, providing for the processing of all edible and inedible products.

It should be equipped with ample cold storage, so that if it would seem advisable to go into the market with boned frozen meats, such a product could be produced.

Since the plant will probably become a part of a state-wide marketing system, it is felt that it would not be fair to the livestock farmers of the state to confine its ownership, educational advantages, and distribution of patronage dividends, if any, to one community.

If it is made a part of a general livestock marketing program, patronage dividends, if any, could flow into a marketing agency, and if the marketing agency is properly set up, could be equally distributed over the state, Metzger pointed out.

Their study leads them to believe that a meat packing corporation of this kind should not buy its live animals direct from farmers.

A direct buying program would virtually mean that many Farm Bureau members would offer material to the meat packing company which it could not use but would be obliged to take and then because of necessity sell at some other market.

To avoid this conflict and hard feeling if such stock was refused, the committee members came to the conclusion it would be better to buy through established cooperative marketing agencies.

Possible location of the plant involves complex factors not readily solved. Their study for possible locations involves the following points.

To insure the proper meat supply, adequate numbers of all species of livestock within a 50-mile radius of the plant should be assured. The area should contain as good a general quality of all species of livestock as can be found in any one section of the state.

It involves a sympathetic attitude on the part of the farmers, local Farm Bureau, and businessmen and city people at the point where the plant is to be located.

It should be near one or more cooperative marketing agencies where a supply of livestock might be purchased.

There must be an outlet for meat and finished products within a 50 to 60-mile radius of the plant to absorb the output of such a plant.

It should be located at a point where there is opportunity to improve quality of meat being sold through local outlets.

Prairie Farms Creameries board of directors, left to right: John Starchl, Richland county; D. L. Garber, Carroll; H. B. Smith, Brown; Carl Geiger, Rock Island; Secretary Thad Loveless, Macoupin; President Harold W. Enns, McLean; Treasurer Harry Gehring, Knox; A. Oliver Bower, Champaign; H. J. Prairie Farms Creameries BUYS Record Volume of Butterfat

BUTTERFAT purchases by Prairie Farms Creameries during the fiscal year ending Sept. 30, 1946 were just short of enough to make 10,000,000 pounds of butter, according to the annual report of retiring Manager J. B. Countiss.

Purchases of butterfat were the highest on record for Prairie Farms Creameries and reflected the continuing upward trend in business during the past several years.

Butterfat purchases for the year showed an increase of 16.87 per cent over 1945 and 24.49 per cent over 1944.

The past year marked the addition of the Henry plant to the family of Prairie Farms Creameries. Construction of the creamery at Henry was completed and put into operation in May. Cost of the new plant was estimated at $180,000. It can be geared to produce one million pounds of butter annually.

Addition of the Henry plant brought the number of Prairie Farms Creameries to 10. Others are located at Bloomington, Champaign, Carbondale, Olney, Galesburg, Carlinville, Mt. Carroll, Moline and Mt. Sterling.

Principal speaker was Dr. E. O. Herreid of the University of Illinois College of Agriculture.

Dr. Herreid

Discussing probable trends in dairy manufacturing, he said:

"As a Johnny-come-lately in the field of milk production, Illinois farmers marketing their milk cooperatively have one big advantage.

"They can plan their plants and equip them to manufacture diversified products. The trend today is away from the one product plant.

"In this state the cooperatives are taking the lead in improved plants. Your company has an excellent record, too, in the marketing of quality products.

"We'll soon see the need for emphasis on quality especially on cleanliness of milk received in plants. Health authorities will demand it."

He said milk production in Illinois is almost certain to increase. "Dairying follows hand in hand with soil conservation. We have a large outlet of milk in the Chicago area. Much of the milk coming in to the city comes from Wisconsin."

Farmers now have $770,207.22 invested in the member creameries which have a total net worth of $1,209,860.39, which represents a net value of $439,653.17 above their original investment.

More Illinois farmers patronized Prairie Farms Creameries than ever before. The added volume lowered costs and helped increase prices paid to members for butterfat and also increased the profits to be returned in form of dividends and patronage refunds.

Prairie Farms Creameries held to its high quality tradition. No butter grading less than 90-score government grade can be packaged and sold or offered for sale in Prairie Farms cartons.

The member plants have continued to diversify operations. All 10 plants make Prairie Farms butter and in addition six make powdered milk, three make condensed milk, two retail milk and ice cream and one makes cheese. Practically all of the plants sell sweet cream during the year in accordance with conditions when markets are favorable.

Future plans of the creameries provide for increased diversification because it offers a market for those members who prefer to market milk rather than cream.

Although butterfat purchases were near 10 million pounds for an all-time record, butter sales fell to 5,711,010 pounds for the lowest volume since 1937. Butterfat was diverted to more profitable channels when price ceilings made butter making less profitable.

Increased interest among farmers to market more of their products through their own plants also has resulted in the board of directors becoming increasingly thoughtful and careful in every major change in operations. Managers have become more and more conscious of their greater responsibilties.

They have moved forward cautiously and at all times in line with good business principles which would protect the member's investment and at the same time afford him better markets.

During the period of operation from 1933 to date, a total of 89 cents have been paid back to members in preferred stock dividends, and patronage refunds for each dollar invested. Today, the remaining 11 cents is worth $2.09. A substantial amount of this will be distributed in patronage refunds to members and the balance will be used in further expanding the business.

During the year, Prairie Farms Creameries lost the services of its capable manager, J. B. Countiss, who resigned Oct. 1 to become sales manager for Pfister Associated Growers, hybrid corn producers and distributors with headquarters at El Paso, Ill. Countiss had been manager for 16 years.

Countiss was succeeded by Dave Henry, former fieldman for Prairie Farms Creameries who had been in the army since March, 1941.

ANNUAL MEETINGS

Creameries holding annual meetings in late December and January include: Prairie Farms Creamery of Bloomington, Dec. 19; Prairie Farms Creamery of Galesburg, Dec. 17, and Prairie Farms Creamery of Henry, Jan. 18.

FARMERS WANT ECONOMY, PRICE STABILITY — SHUMAN

(*Continued from page* 10)

adoption of employee retirement plans by both private and cooperative business organizations has become general during recent years. The advantages to both the employer and employee are many and obvious, and need not be discussed here. The wide divergence of our activities and the many different types of organization have made it difficult to develop a plan which would meet the requirements of every situation. Studies over a considerable period of time have culminated in the plan being recommended by your Board of Directors to the voting Delegates at this meeting. The plan to be presented is not perfect and probably can be improved as it is developed, but your Board believes that it is a progressive and desirable program and should be established at this time.

During the year the Association, as principal original sponsor of the "Gateway Amendment" to the State Constitution, undertook the task of organizing support for the amendment at the election in November. I want to compliment the county Farm Bureaus and all individual members who did such a wonderful job in this worthwhile effort. The prestige of your organization is measureably increased by the effectiveness of your work. In addition, every county that actively participated in this campaign will have an increase in membership consciousness through the active participation of its many member workers.

State Legislative Problems

The Association will soon again have the opportunity to present to the state legislature certain suggestions regarding legislation on many problems affecting agriculture and the state as a whole. The delegates in this convention will adopt definite policy resolutions to guide your new Board of Directors in legislative matters during the coming year.

The present school reorganization movement in Illinois is rapidly gaining momentum. I know we are all proud that the Illinois Agricultural Association has played a major role in initiating and guiding these improvements. All who have had contact with the school laws in Illinois know that they present a confusing problem. Steps toward school reorganization have brought our attention more forcibly to some of the inadequacies of our present laws. Certainly a careful study should be made of our school laws and suggestions for improvement and clarification of reorganization procedure brought to the attention of the legislature.

Country Roads

In 1945 the Illinois Agricultural Association sponsored state legislation providing $15,000,000 for surfacing farm-to-highway roads. In many counties substantial progress has been made under this program. In other counties most of the funds have been used for maintenance or other activities and farmers have seen little improvement. The whole farm-to-highway road problem in Illinois remains acute and largely unsolved. One of the first responsibilities of the State of Illinois should be to develop an adequate long range road plan. The Association must study this problem carefully and be prepared to make recommendations for action by the state legislature.

The state weed and seed laws of Illinois are in need of revision and improvement. Laws dealing with animal health regulations also appear to require some modification. The hasty adoption by the last legislature of new laws providing for assessment of property of 100% of actual value created many problems. The next legislature must devote considerable time to a solution of these problems and a clarification of the new laws. These and many other problems forecast a very active year for your organization on the state legislative front.

National Problems

Illinois farmers have much at stake on the national level. In many ways our problems seem greater and farther from solution today than they did one year ago. Certainly this year of 1946 has been one of such confusion of agricultural policy that no one can blame farmers for being disturbed and resentful. Little consideration was given to the effect upon farmers of countless changes in regulations and laws. Governmental agencies lightly toyed with the prices of farm products and through ill considered actions ran the prices of livestock, grain and dairy products up and down as their whims or political considerations dictated. Farmers now demand an end to this type of manipulation.

Greater Stability of Price Levels

Agriculture, perhaps more than any other group, has suffered the full brunt of the violent and recurrent periods of inflation and deflation that have characterized our economy for generations. Moderate cyclical changes are expected and cause farmers no great concern. It is the severe and prolonged periods of depression, such as we experienced in the nineteen thirties, and the wild inflations such as that in which we are now engulfed, that threaten not only agriculture with bankruptcy, but the entire nation as well. Farmers believe that some corrective action can and should be taken that will bring about a more stable general price level. Most certainly the national government should follow fiscal, monetary and credit policies that will reduce, rather than accentuate these ruinous cycles. Common sense should tell us that this is not the time for large

Looking over the 1946 IAA annual report during distribution during the annual convention are left to right: Audia Bennett, Franklin county; Victor Yung, Franklin; President Charles B. Shuman, Moultrie; Stanley Castle, Madison; Arthur L. High, Kankakee, and Frank A. Easterly, Jackson.

public works projects or other "make work" spending programs. On the contrary, now is the time to reduce public payrolls and expenditures and to reduce the public debt. A program of real governmental economy coupled with continued high federal taxes would do much to temper the present inflationary spiral. Admittedly, it is easier to follow other routes. It is easier to continue large scale government spending than it is to eliminate unnecessary agencies and projects. It is easier to get money for operating the government by borrowing from banks than by taxation. It is easier to increase the federal debt than to reduce it. Following the easy way today will result in greater trouble tomorrow.

Labor—Industry—Agriculture

Farmers believe in organization. They believe in the right of labor and industry, as well as agriculture, to organize to promote the best interests of each group. However, farmers firmly believe that the interests of any one group in our democracy must be secondary to the general welfare of all America. During 1946 this country has been torn by industrial-labor strife of such bitterness and of such a selfish nature that farmers and the public in general have been shocked and disgusted. Agriculture has demanded and will continue to insist that reasonable regulation be applied to both industrial and labor organizations so that the very economic life of our nation will not be again threatened by bitter strife of the type we have witnessed since V-J Day. Farmers would like to challenge industry to offer to labor a program of reasonable security, a security that cannot be based only upon high hourly wages, but also upon stability of employment that comes with high production. In return for this type of security labor should be willing to give assurance to industry that it will produce more efficiently, will maintain greater rather than less production per worker per hour and will keep its agreements. Farmers have always preferred capacity production and want to continued this practice; however, they cannot long maintain full production in the face of restricted output policies followed by both labor and industry. During the year ahead I suggest that the Illinois Agricultural Association and affiliated county Farm Bureaus might well take the initiative in making contacts with industrial and labor leaders at state and local levels in the interest of promoting better understanding between all groups and full production of both agricultural and industrial products.

Correlation of Governmental Agencies

Recommendations of the American Farm Bureau Federation designed to correlate the activities of the various agricultural action agencies to eliminate duplication of effort and waste should be given careful consideration. Farmers have little sympathy for the overlapping of activity that now exists and they will not long tolerate the centralized control from Washington that seems to be creeping into a number of these agencies. The A.A.A., or Production and Marketing Administration as it is now called, the Farm Credit Administration, Extension Service, Farm Security Administration and the Soil Conservation Service all have important functions to fulfill. However, there is no good reason why they cannot be correlated at all levels — national, state and local. There is also every good reason why farmers should have a large share in the direction and guidance of their activity at all of these same levels.

Conservation of Soil

A sound, practical program for conservation and rebuilding of our soil is a most pressing need. Long neglect, coupled with the all-out production efforts of the war years, has drawn upon our soil resources until a truly critical situation exists. This is not merely the farmers' problem, but it is a major national problem. Its solution will require the cooperation of all citizens and the greatest possible correlation of all the agencies of government.

We cannot afford to waste more time. A greatly accelerated national program must be adopted if we are even to replace the soil fertility losses of the war years. The nation, however, cannot expect farmers to preserve and build up its soil resources for the use of future generations unless it is willing to give some definite assurance to producers that they will receive adequate prices for their products. When prices of farm products drop to low levels, there is only one way in which the farmer can make up for the disparity in the purchasing power of his production — that way is to "mine" his soil. Farmers love the land more than any other group in America. They love the land so much that they choose to live on it and to make their living from the soil. Nevertheless, soil conservation cannot be based upon love of the land alone. An adequate return for the products of that land is all-important.

Agricultural Prices

Probably the most important part of the Agricultural Adjustment Act is the parity principle. Certainly the future of agriculture as a basic American industry and the assurance of the farmers' rights to a standard of living comparable to that of any other group depend upon how well we support and put into practical application this principle for which we so long fought. We must be willing, of course, to consider suggestions for improvement in the mathematical formula for computing parities, but we must never compromise or weaken our position in support of the basic principle. At present there is great temptation to resort to some device, such as by the inclusion of farm labor, to raise parity prices. Again, I would like to quote from the last annual address of Mr. Earl C. Smith when he said, "Should agricultural wages be put into the parity formula, it would merely mean that less emphasis will be placed upon prices of industrial commodities, which are largely influenced by industrial wages, and substituting therefore the wages of agricultural workers. I submit that it is much more sound, defensible and in the long time interest of farmers, to keep the legal yardstick for determining fair prices for farm commodities tied to the general price level of industrial commodities. . . . ."

Parity and Surpluses

If agriculture should resort to some device to raise parity during this period of rising prices, we would soon be forced to fight efforts to artificially lower parity during price declines. Suggestions of this nature have already been made by some who fear results of the 90% of parity price support program as authorized by Congress for the post-war period. While farmers had not anticipated that the official end of the war would be so long delayed, yet they make no apology for insisting that the Federal government take such action as is necessary to make the price supports effective and at the same time discourage the accumulation of ruinous surpluses. Some experts say that it will be impossible to support prices of 90% of parity without piling up a huge surplus and they point to potatoes as a horrible example. I am sure we must frankly admit that this is a real danger. The Illinois Agricultural Association is striving to pool the best thinking of informed farmers and agricultural economists upon this and related problems. By authorization of the Board of Directors, an Economic Study Committee has been appointed. I feel

Industry Can't Meet Needs of Farmers For Plant Food

INDUSTRY can't begin to meet the needs of midwest farmers for plant foods, Neil Bass, chief conservation engineer for TVA, told a large group of farmers attending the soil improvement conference held in Chicago Nov. 20 during the IAA annual convention.

To break the supply bottleneck, Bass indicated that phosphorus deposits in the western states of Montana, Idaho, Wyoming and Utah which contain most of the nation's reserve should be developed.

Bass did not treat the National Fertilizer Association too kindly when he told of their reaction to TVA's early proposals to develop high analysis phosphatic fertilizers:

"They said that such a program would never succeed for the reason that farmers would not use high-analysis fertilizers but preferred the sort of material they had grown accustomed to using."

Bass indicated that midwest farmers would increase their commercial fertilizer program by three-fold to meet soil needs if supplies were available.

He said that TVA's research has been directed to the making of high-analysis materials such as the electric furnace process of processing 45 to 48 per cent triple super-phosphate.

Tests of these and other high analysis plant foods on thousands of Illinois farms during the past two years were discussed by a state-wide group of Illinois Farm Advisers during this conference.

Speaking modestly of the work done by Farm Advisers in testing plant foods, W. H. Tammeus, McHenry County Farm Adviser and principal speaker, said in summary of his associates work:

"Our findings are not scientific data, but just plain, practical results obtained on Illinois farms by Farm Bureau members.

"Some results have been phenomenal and occasionally yields have not come up to expectations. But with more experience, we'll see far more economical crop production in the future."

This year their results seem to indicate that greater increases in yields can be obtained by applying nitrogen in large amounts than either phosphorus or potash, Tanneus reported.

"The greatest increase in yield, however, is obtained by applying all three plant foods — nitrogen, phosphorus and potash.

"We have also found," he pointed out, "when any two of these plant foods were applied, the increase in yield was about the sum of the increase of the two applied alone. The same is true when all three are applied together."

He said there is no doubt of the need for high analysis fertilizers in McHenry county.

"Our soils are slightly sandy and a great lot of them are over sand and gravel. They did not carry a very high mineral content in their original state."

And even though there has probably been more manure hauled in McHenry county than any other county in the state, he said this has not increased the nitrogen or mineral content of the soil.

"Poor soils make poor manure," he said. "Just like the pup that chases his tail, you never catch up."

FRANKLIN COUNTY FIRST ON '47 MEMBERSHIP QUOTA

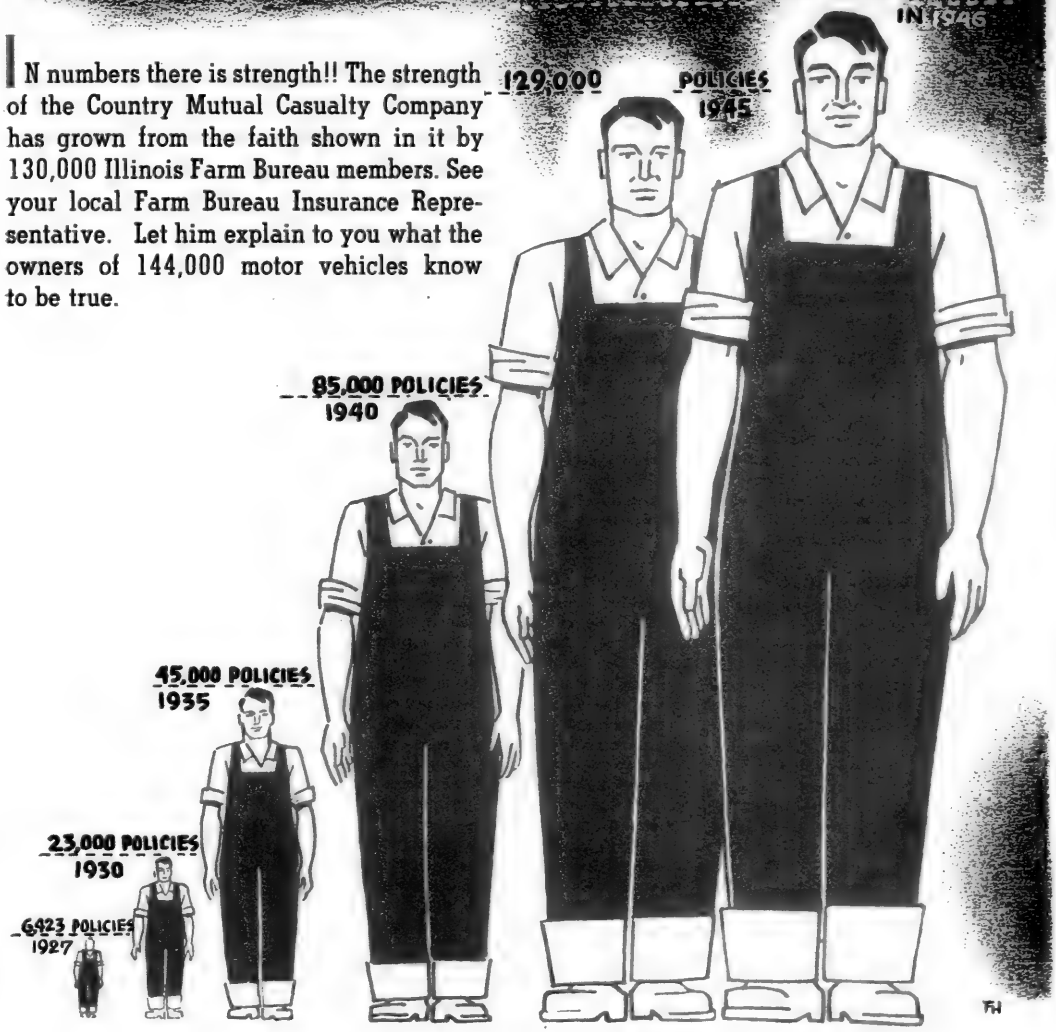
Carl K. Cox, Franklin county, reported that his was the first county to meet its 1947 membership quota. They did it before coming up to the IAA annual meeting. And at the meeting Albert Webb, of Ewing, Franklin county, was elected director from his district. Marie Beaty also of Ewing was district winner in the Rural Youth Talkfest contest. A small county, Franklin can be proud of its achievements.

Chatting informally during a recess in the Illinois Wool Marketing conference are left to right: Ralph Allen, Tazewell; H. P. Joy, Morgan; Maurice Friedman, Fayette; W. C. Buzzard, Fayette, and J. P. White, Tazewell.

SPEAKING OF *Growth*....

144,000 POLICIES IN FORCE... IN 1946

IN numbers there is strength!! The strength of the Country Mutual Casualty Company has grown from the faith shown in it by 130,000 Illinois Farm Bureau members. See your local Farm Bureau Insurance Representative. Let him explain to you what the owners of 144,000 motor vehicles know to be true.



COUNTRY MUTUAL CASUALTY CO.

608 SOUTH DEARBORN ST., CHICAGO 5, ILLINOIS

FRED HERNDON L. R. LANGFORD C. H. BECKER H. STRELLUF

AT THE 20th annual meeting of the Illinois Farm Supply Company at the Morrison Hotel, Nov. 19, delegates and members heard C. H. Becker, manager, report that the company had closed its most successful year with sales totaling $21,178,614.45 (wholesale value), a gain of 14.9 per cent over last year, the previous record.

The Illinois Farm Supply Company, affiliated with the Illinois Agricultural Association, is the state purchasing association for 96 member companies and 74 other Farm Bureau cooperative organizations. Among these members, 81 are engaged in the distribution of petroleum and related supplies, 70 are authorized distributors of feed and related supplies, 75 are authorized to distribute plant food, and 100 are in the seed inoculant business.

New Director Elected

During the election of directors, Harley R. Neal, Lawrenceville, retired and was succeeded by J. P. Redman, Cairo, in District 8. The rest of the board was re-elected, as follows: Glenn Geiter, Dakota, District 1; Charles Keslinger, LaFox, District 2; George Chapple, Dwight, District 3; John P. White, Washington, District 4; Fred E. Herndon, Macomb, District 5 (president); Frank J. Flynn, Murrayville, District 6 (secretary); Jesse L. Beery, Cerro Gordo, District 7 (Vice-President); R. H. Monke, Litchfield, District 9; F. E. Morris, Buffalo, director at large; and Otto Steffey, Stronghurst, director at large.

J. P. Redman

Committees appointed for the day were:

Resolutions: William H. Sheffner (Stephenson) chairman; L. W. Roberts (Champaign); L. R. Langford (Edgar).

Credentials: Harry Strelluf (Ford) chairman; Ivan E. Hill (Christian); Louis J. Hertel (St. Clair).

Main speaker of the day was Leonard J. Fletcher, director of Training and Community Relations at Caterpillar Tractor Company, Peoria, and a director of the Illinois State Chamber of Commerce, as well as past chairman of the Agriculture-Industry Committee.

Fletcher stressed the need for a public relations department on behalf of agriculture and the farmer who represents one of the minority groups.

"We must develop understanding and get at the facts," the speaker advised, "because most people get their ideas of the farmer's life on their sunny summer afternoon drives into the country. People have no understanding of the things that farmers are up against — their problems, their costs, their hard work."

Fletcher advised that we could better develop understanding and confidence between other groups and ourselves if we would 1) *Listen* to the other fellow when he's giving his ideas on Agriculture, and tell him "I'm interested in why you think the way you do." 2) *Talk* when he's through, and in the same friendly vein tell him the truth about cooperatives, about the farmer's life, and *don't argue* with him. 3) Leave him as a *friend*. Tell him that you're glad to have known and talked with him, glad you had the opportunity to share viewpoints.

Petroleum Division Makes Spectacular Gains

In the annual report of the Board of Directors as presented by Manager Becker, the Illinois Farm Supply Company was reported as being in a stronger position than at any previous time "by any standard of measurement." The Petroleum Division, it was pointed out, had made spectacular gains, and last year gallonage hit an all-time high with the largest increase in the company's 20-year history.

Total sales of this Division amounted to $14,131,007.32 involving 152,460,834 gallons of petroleum products. This is a gain of 15.3 per cent over last year. During the year, Becker related, two new and vastly improved products, Illini Premium and IFS Heavy Duty motor oils, were introduced and found wide acceptance. Both products were brought about through wartime scientific development within the Petroleum Industry and findings of the company's own research laboratory. According to Becker, sales of the two new products for the five-month

1946 IS BEST IN

Farm Supply Co. History

period, April 1-Aug. 31, constituted more than 50 per cent of the company's motor oil sales. Total motor oil sales for the year amounted to 2,435,378 gallons, the largest gallonage for any single year since the company was organized.

Becker reported that another highly successful division of the company — General Purchasing — came through the year with a record business, sales amounting to $2,450,816.02. Outstanding in this Division's activities for the year were tire sales which exceeded 61,000 or $1,000,000 wholesale value. This is almost double the volume of any previous year.

Plant Food Division Has Successful Year

The progress of the newest division — Plant Food — was also cited by Becker. He said that tonnage of plant food amounted to 111,118 tons, which is more than three times the amount sold the previous year. However, this fell far short of the demand, Becker pointed out, because supplies for the year were curtailed by the general conditions of shortages and stoppages.

"Our objective," stated Becker, outlining the plans for the newest program of the company, "is to make plant foods widely available in proper forms to Illinois farmers at the lowest possible cost per unit. In doing this we expect to supply a high percentage as straight materials, to obtain a proper balance of elements in the soil, and then use mixed fertilizers as supplements. Our long-term objective is the development and utilization of high analysis fertilizer materials."

Feed Production Short of Needs

The past year was marked by severe shortage, the worst in its history, in the Feed Division. The total tonnage manufactured and marketed during the year amounted to 39,894 tons, including 30,628 tons of Blue Seal feeds, 4,562 tons of feed ingredients, and 4,704 tons of Service Brand feeds manufactured by five authorized Service Brand distributors. Becker emphasized in his report that at no time was quality of feeds sacrificed in order to gain quantity, high standards being maintained without exception.

$1,094,336.06 Patronage Refunds Declared

Becker announced that patronage refunds in the amount of $1,094,336.06 had been declared. This money will be returned to member service companies who, in turn, will pass these savings on to their farmer patrons. Ultimately, therefore, this amount will reach the pockets of patrons during the 1946-47 season through their local Farm Bureau cooperatives.

RICHARDSON and WILCOX HEAD IAA INSURANCE COMPANIES

★ ★ ★

A. E. RICHARDSON, manager of Country Mutual Casualty Company since 1938, has been named head of Country Life Insurance Company.

A. E. Richardson

Frank V. Wilcox, assistant superintendent of claims for Country Mutual Casualty Company, has been appointed successor to Richardson. Both took over their new duties Nov. 1.

Richardson replaces Dave Mieher, who resigned to become first manager of the newly-organized Southern Farm Bureau Life Insurance Company with headquarters at Jackson, Miss.

Richardson leaves Country Casualty with 164,500 insurance policies in force of which 144,748 are on automobiles. This is the largest number of Illinois automobile insurance policies held by any insurance company operating in the state.

Frank V. Wilcox

Under the management of Mieher the Country Life Insurance Company had $276,066,174 of life insurance in force at the fiscal year ending Sept. 30.

Before going to Country Casualty in 1927 as a field man, Richardson did organization work for the Illinois Agricultural Association and several cooperatives including Pure Milk Association and U. S. Grain Growers, Inc.

Wilcox has been assistant superintendent of claims for Country Casualty since March 1. He came with the company in 1942 as claims examiner in the Chicago office and later served as a staff adjuster working out of Kankakee and Galesburg.

Last August he was appointed claims supervisor for the northwest area of Illinois and in March returned to the Chicago office as assistant superintendent of the claims department.

Wilcox was born July 31, 1905 on a farm in Henderson county, attended public schools at Stronghurst and graduated from Monmouth College in 1929.

After graduation from Monmouth, he became director of athletics and taught science at the Media high school for five years, then taught at Bradford high school until June, 1942.

Illinois Farm Supply Company's District 8 is shown in caucus. During this session District 8, the extreme southern Illinois area, named J. P. Redmon to the board of directors. He is the only new face on the board this year.

Rural Youth Holds Most Successful Conference in Chicago

Donald Freebairn Wins Second Annual Talk Fest

By JIM THOMSON
Ass't Editor, IAA RECORD

DONALD FREEBAIRN, 17-year-old freshman at La Salle-Peru Junior College, was rated top Topnotcher at the annual Rural Youth Talk Fest held in conjunction with the Illinois Agricultural Association convention in Chicago.

He follows in the footsteps of Bob Temple, also of La Salle county, who went on to win the national Talk Fest held in connection with the American Farm Bureau Federation convention last year.

Whether he will repeat the performance of his fellow Rural Youther from La Salle county when he represents Illinois at the National Talk Fest in San Francisco Dec. 9 remains to be seen. Loyal La Salle county thinks he has the stuff to do it.

Besides he has one of the best public speaking coaches in the Rural Youth movement in Assistant Home Adviser Helen Elliott. Farm Bureau folks say she has a lot to do with the crop of Topnotchers that come from La Salle county.

Four others, including Bill Mason of La Salle county, were rated as Topnotchers. Freebairn's topic was "How Can Farm People Include Recreation in Their Work Schedule," and Mason's was "Rural Youthers Enjoy Programs With Vitality and a Purpose."

The other Topnotchers and their subjects were: Albert Beyer, Will county, "Why Are State Legislatures Passing Driver Responsibility Laws?" Robert Guehler, DeKalb county, "Good Looks Without Personality is a Hook Without Bait," and Marlyn Burgener, Richland county, "Every Rural Youth Should be a Member of Rural Youth."

Receiving honorable mention were Clifford Betzold, Montgomery county and Russell Scheeler, Peoria county.

Freebairn entered the state Talk Fest after winning the district meet at Amboy. He is a member of the junior college debating team and is studying agricultural engineering. He lives with his parents, Mr. and Mrs. John Freebairn of Dimmick township. He has two brothers and a sister and his father was a delegate to the IAA convention from his county Farm Bureau.

Don has been in Rural Youth three years and seven years in 4-H Club work in which he specialized in raising beef cattle.

According to Ellsworth D. Lyon, IAA Director of Young People's Activities, participation in the Rural Youth district Talk Fests was the highest on record. There were 119 chosen from participants from 55 counties in the nine districts.

Others who competed in the finals at Chicago were: Mary Gebhart, Champaign county; Parris Hester, Vermilion; Haskell Bernard, Wayne; Marie Beaty, Franklin; Eugene McCormack, Saline; Fred Korando, Randolph; Ruth Wright, Marion; Robert Dittmer, Adams; J. B. Barnard, McLean; George Litchfield, Marshall-Putnam; and Lee Myers, McDonough.

Winners of the coveted title of Topnotcher at the Rural Youth Talk Fest held during the IAA convention in Chicago were, left to right: Albert Beyer, Will county; Marlyn Burgener, Richland; Don Freebairn, La Salle; Bill Mason, La Salle, and Don Guehler, DeKalb. Freebairn is being congratulated for receiving the highest number of points and the honor of representing Illinois at the national Talk Fest in San Francisco.

ONE of the most successful Rural Youth conferences in many years was held during the annual convention of the Illinois Agricultural Association convention in Chicago, according to Ellsworth D. Lyon, IAA Director of Young People's Activities and Clareta Walker, University of Illinois extension specialist Rural Youth.

More than 500 members of Illinois Rural Youth registered during the convention. Seventy came in the first night of the meeting for a get acquainted session. Fifty members still in Chicago the third day went with Director Lyon on a tour of the Museum of Science and Industry.

Tuesday night after an unusually good evening of entertainment sponsored by the IAA, members of Rural Youth met for a dance and mixer in the Bal Tabarin room of the hotel. The large crowd of Rural Youth at the mixer testified to the popularity of this annual affair.

During the business sessions five persons were elected to the State Rural Youth Committee which will meet in Chicago Dec. 5 to plan a series of short courses to be held in February. Members of the committee are Edwin Dew, Ogle; Ruth Huser, Tazewell; Durnell Henert, Lee; Ray Ferris, Clark, and Marcella High, Christian.

Walter W. Whitlock, IAA Director of Public Health and Safety, spoke on the prevention of accidents around the farm. He emphasized the importance of the five "didn'ts" which cause so much suffering and loss of time because of accidents. The five didn't according to Whitlock were: I didn't know, I didn't see, I didn't hear, I didn't think, and I didn't care.

Problems facing Rural Youth organzations were discussed in an open forum Wednesday morning, Nov. 20, led by Miss Walker.

Questions discussed at length on the forum included "Why Does a Group Have a News Letter?" "How Can Rural Youth Build Membership?" "How Can Rural Youth Keep Members" and "Should Rural Youth Groups Schedule Outside Speakers?"

Miss Walker closed the forum by emphasizing points all Rural Youthers should keep in mind if they would promote the best interests of their organizations: "Rural Youth members must act as hosts and hostesses. Help others to feel comfortable. Be ready with cheerful greetings, the proper physical set-up of a meeting place, and a well-planned and interesting program."

RURAL YOUTH LEARN IMPORTANCE OF GOOD PUBLIC RELATIONS WORK

THE importance of good public relations with other organized groups in labor, industry and agriculture was stressed in an address before the Rural Youth conference by L. J. Fletcher, director of training and community relations for the Caterpillar Tractor Company at Peoria.

The conference was held in conjunction with the annual convention of the Illinois Agricultural Association held Nov. 18-21 in Hotel Sherman, Chicago.

Fletcher said that even Rural Youth needs a good public relations program to promote better understanding with others and to promote the organization's growth and welfare.

"The greatest single problem faced alike by agriculture and industry," Fletcher continued, "is that of developing better understanding between these two groups. Each must know more of the experiences, the thinking and problems of the other.

"Many earnest and hard-working people engaged in operating our farms hold firm convictions concerning the desirability or undesirability of the actions of people engaged in industry. Some of this lack of understanding is due to different methods of accounting employed in agriculture as compared to business.

"The same words, such as 'profit,' for instance," Fletcher said, "means different things. Representatives of each group are inclined to look over the fence into the other fellow's pasture and see where his problems appear to be so much more simple.

"During the past three years a state wide program whole-heartedly endorsed by the Illinois Agricultural Association and the Illinois State Chamber of Commerce has resulted in the establishing of 97 committees in over 80 counties in Illinois. These committees numbering from 30 to 75 people are made up of half people engaged in the business of farming and half in other businesses. These committees meeting from three to 10 times per year include in their programs the discussion of subjects of mutual interest whether they are local, state, or national. Personal acquaintanceships and much better understanding are automatically a most desirable by-product of such meetings. In some areas these groups are joined by representatives of educational institutions, labor organizations, and the clergy.

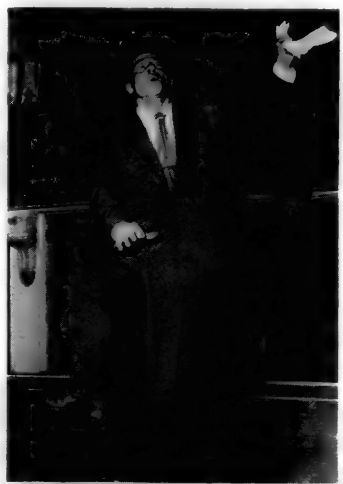
SERUM ASSOCIATION DECLARES BIG REFUND

ILLINOIS Farm Bureau Serum Association declared a whopping $70,244 patronage dividend this year and returned $3,500 interest on preferred stock to its 91 county members.

In its annual report to the membership, Secretary-Manager Sam F. Russell and President Russell V. McKee, of Marshall-Putnam county announced that sales of serum and virus totaled $323,891.

Refunds, they said, figured out at 18 cents for each dollar of sales.

The company's records indicate very clearly that over the years farmers have done an excellent job in vaccinating hogs and controlling cholera, Russell said, refuting claims of those not friendly to the association.



Only 21 serum and virus trouble cases were reported and veterinarians showed that in most cases these losses were due to added complications from such causes, other than cholera, as worms, pneumonia, enteritis and erysipelas.

Next year the serum association will have the benefit of the aid and advice of Dr. C. D. Van Houweling, veterinarian recently employed by the Illinois Agricultural Association.

This year's volume represents sales of 39,492,725 cubic centimeters of serum and 3,362,900 c. c. of virus purchased last year by the association for distribution among county members.

Since 1933 when the first dividend was paid $823,663.53 has been refunded to counties buying serum and virus from their state organization.

No new member counties were added this year. Massac county became 91st member of the association in 1945.

County Farm Bureau companies were urged to transfer the serum account to their commercial subsidiaries as some 60 counties have done this year.

DR. VAN HOUWELING NAMED IAA VETERINARIAN

DR. C. D. Van Houweling, 28, recently discharged from the army veterinary corps, has been named head of the Illinois agricultural Association's new Department of Veterinary Medical Relations.

Dr. Van Houweling

He will devote much of his time to activities related to the veterinary profession in Illinois and will serve as veterinary technical adviser to the Illinois Agricultural Association and Associated Companies.

Dr. Van Houweling was born on a farm in Mahaska county, Iowa and was graduated from Iowa State College of Veterinary Medicine in 1942.

He practiced in central Illinois before joining the army veterinary corps in which he served three years. He was last stationed at the Kansas City quartermaster depot.

Married to the former Roberta Olson of Kansas City, Dr. Van Houweling has two children: Douglas, 3, and Donald, five months.

Rural Youth Holds Most Successful Conference in Chicago

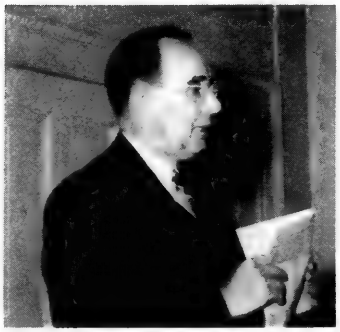
Personal acquaintanceships and much better understanding are automatically a most desirable by-product of such meetings. In some areas these groups are joined by representatives of educational institutions, labor organizations, and the clergy.

Leonard J. Fletcher, chairman of the agriculture-industry committee of the Illinois Chamber of Commerce, addresses the Rural Youth conference.



SERUM ASSOCIATION DECLARES BIG REFUND

ILLINOIS Farm Bureau Serum Association declared a whopping $70,244 patronage dividend this year and returned $3,500 interest on preferred stock to its 91 county members.

In its annual report to the membership, Secretary-Manager Sam F. Russell and President Russell V. McKee, of Marshall-Putnam county announced that sales of serum and virus totaled $323,891.

Refunds, they said, figured out at 18 cents for each dollar of sales.

The company's records indicate very clearly that over the years farmers have done an excellent job in vaccinating hogs and controlling cholera, Russell said, refuting claims of those not friendly to the association.

Only 21 serum and virus trouble cases were reported and veterinarians showed that in most cases these losses were due to added complications from such causes, other than cholera, as worms, pneumonia, enteritis and erysipelas.

Next year the serum association will have the benefit of the aid and advice of Dr. C. D. Van Houweling, veterinarian recently employed by the Illinois Agricultural Association.

This year's volume represents sales of 39,492,725 cubic centimeters of serum and 3,362,900 c. c. of virus purchased last year by the association for distribution among county members.

Since 1933 when the first dividend was paid $823,663.53 has been refunded to counties buying serum and virus from their state organization.

No new member counties were added this year. Massac county became 91st member of the association in 1945.

County Farm Bureau companies were urged to transfer the serum account to their commercial subsidiaries as some 60 counties have done this year.

Master of Ceremonies Roy Davis' snorting, groaning and whistling makes a hit with Farm Bureau folks.

DR. VAN HOUWELING NAMED IAA VETERINARIAN

DR. C. D. Van Houweling, 28, recently discharged from the army veterinary corps, has been named head of the Illinois agricultural Association's new Department of Veterinary Medical Relations.

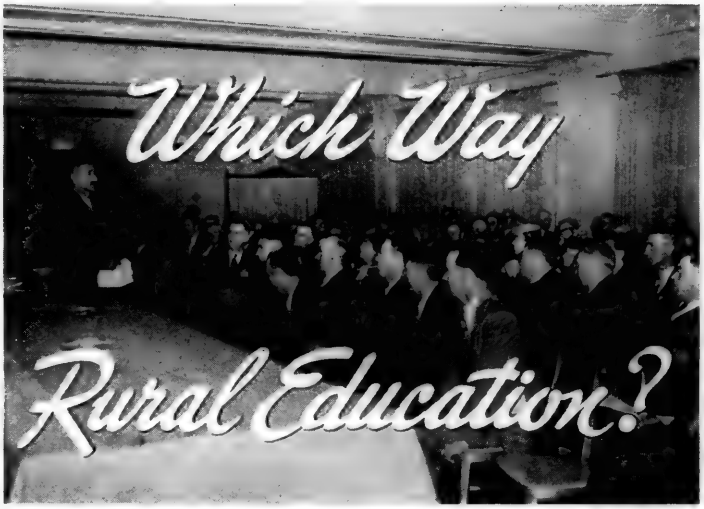
Dr. Van Houweling

He will devote much of his time to activities related to the veterinary profession in Illinois and will serve as veterinary technical adviser to the Illinois Agricultural Association and Associated Companies.

Dr. Van Houweling was born on a farm in Mahaska county, Iowa and was graduated from Iowa State College of Veterinary Medicine in 1942.

He practiced in central Illinois before joining the army veterinary corps in which he served three years. He was last stationed at the Kansas City quartermaster depot.

Married to the former Roberta Olson of Kansas City, Dr. Van Houweling has two children: Douglas, 3, and Donald, five months.



NUMEROUS rural people and school officials attending the rural schools conference held in conjunction with the Illinois Agricultural Association convention were pretty well agreed on the need for further improvement in Illinois schools.

Divergence of opinion came on the question as to how this improvement should be accomplished. Discussion revealed that three main approaches to the problem of school reorganization are being considered or followed by 93 counties.

"Wait and See"

First, is the "Wait and See" method. The school committees and the county superintendents in these counties do very little to lead the people but will help if the local people take the initiative.

Second, is the "Elementary School First" method. This group is reorganizing on the elementary school level. They believe that the elementary school problem is the most pressing and that to bring in the high school at this time would complicate their chances of getting reorganization on the elementary level. Most of these counties plan to deal with the high school and non high school territory separately.

Third, is the "12-Grade Unit District" method. Followers of this system believe the high school is the key to a more comprehensive program of school reorganization including all 12 grades. These counties generally discourage school reorganization until the county committee has had an opportunity to make a thorough study of the needs of all of the people.

The conference was conducted under the chairmanship of Milton W. Warren of Mansfield, member of the IAA board of directors and president of his school board.

Editor's Note: Headline illustration shows Clem Garton, Logan county farmer, speaking before the rural schools conference.

John K. Cox, IAA director of rural school relations, spoke on the progress of school surveys throughout the state. "Rural people," he said, "are progressing faster in their thinking on school reorganization than village people who have been less well-informed.

Greatest Dangers

"The strong points of resistance to school reorganization," Cox continued, "are in the villages and their opposition is generally to proposals for reorganization of small high schools into larger, more effective administrative units."

Cox pointed out what he considered to be the two greatest dangers confronting those who are working on school reorganization plans today; first, that too may small, makeshift reorganizations will be voted upon which will not answer the needs of the people in those communities and will not be adjustable to future changes, and secondly, that rural people will vote their territory into larger districts dominated by preponderant urban populations and where it would be impossible to secure adequate rural representation on the school boards.

"The two main programs upon which we should concentrate our attention as we proceed with school reorganization," the IAA rural schools relations head said, "are a reorganization of the high school and non high school territory as well as the elementary school districts and a strengthening of our grade school program which attempts to educate 72 per cent of our boys and girls on adequate finances and with too many emergency teachers."

Importance of Roads

IAA Secretary Paul E. Mathias dicussed school legislation and explained the need for action if we are to reach the IAA School Report recommedation that schools have a minimum of 15 pupils per teacher. At present the law requires a minimum of seven. Mathias pointed out that to jump now to a minimum of 15 would create some hardship and suggested that the next requirement be for a minimum of 10.

Among the members of the audience taking part in the open discussions were Elijah Meyers, Woodford county; Elliott Arnold, Lee county; Luther Black of the office of the State Superintendent of Schools; Henry T. Marshall, La Salle county; Dr. L. W. Hacker of Illinois Normal Schools; D. E. Lindstrom, professor of rural sociology at the University of Illinois; Everett C. Phelps, Winnebago county; George Hayes, Henry county; Clem Garton, Logan county; Hugh Rowden, Montgomery county, Mr. Ostrander, McHenry county, and J. C. McCormick, Pulaski county.

McCormick emphasized the importance of roads in school consolidation and recommended a change in the road system. Said he: "In Pulaski county we have felt that in order to have school consolidation we must have improved transportation; in order to have improved transportation, we must have improved roads, and in order to have improved roads, there must be a change in the present road system."

Others attending the conference included Harlan A. Beem, president of the Illinois Association of County Superintendents; Miss Peal Barnes, president of the Illinois Home Bureau Federation; Del Gurley of Prairie Farmer, and Mrs. Joseph May, rural service chairman of Illinois Parent-Teachers Association.

1947 Officers Elected to IAA Companies

RESULTS of elections of board directors of statewide cooperatives affiliated with the Illinois Agricultural Association announced at the IAA convention in the Hotel Sherman, Chicago, are as follows:

Illinois Farm Bureau Serum Association

Directors re-elected: R. V. McKee, Varna; Ray Cunningham, Alvin; J. W. Cory, Earlville; Ben Bodecker, Sutter; Everett G. Reynolds, Jacksonville; Jesse E. Tuttle, West York, and K. T. Smith, Greenfield.

Illinois Wool Marketing Association

New directors: John T. Evans, Hoopeston, who succeeds Ronald Holt, Galva; J. King Eaton, Edwardsville, who succeeds August Eggerding, Red Bud.

Directors re-elected: William Temple, Serena; A. L. Doubet, Williamsfield, and Escol Oxford, Elizabethtown.

Illinois Milk Producers Association

New directors are: Fred Patterson, Harrisburg, who succeeds Joseph M. Hart, Harrisburg; Julian D. Ray, Vandalia, who succeeds B. J. Schumacher, Altamont; and Oran Sweet, Edinburgh, who succeeds William J. Kessler, Auburn.

Directors re-elected: George W. Pitts, McLean; Delbert Freeman, Canton; George I. Maxwell, Champaign; W. J. Swayer, Gurnee; J. Warren Ellis, Ridge Farm; Ray H. Miller, Clinton; William O'Malley, DeKalb; L. B. Coomber, Freeport; Edwin Gumm, Galesburg; Harold D. Kamm, Franklin; Dean H. Radford, Kewanee; Charles Cameron, Peoria; Carl Eisele, Peoria; Mattie Nolan, Pontiac; Anthony Grawe, Quincy; W. A. Newman, Rockford; O. H. Ryan, Tonica; Charles W. Krell, Springfield; Glen Tombaugh, Streator; and L. A. Schnekloth, Davenport, Iowa.

Illinois Livestock Marketing Association

Directors re-elected: J. E. Mau, Harwood; LaRue Tice, Shelbyville; Ralph Beckett, Blue Mound; Carl Lage, Saybrook; Fred Smittkamp, Paris; R. V. McKee, Varna; Milton W. Warren, Mansfield, and Clark E. Wise, Champaign.

Illinois Cooperative Locker Service

Directors re-elected: J. E. Mau, Harmon; Earl Wenzel, Kirkland; Dana Cryder, Minooka; Carl J. Bates, Kewanee; C. Ray Ward, Cropsey; Paul Rosentreter, Carlinville, and E. A. Fosse, Marion.

Illinois Grain Corporation

New director is Homer Curtiss, Stockton, who succeeds Charles Lauritzen, Reddick.

Directors re-elected: E. E. Stevenson, Streator; Arthur Bertsche, Pontiac; Charles Schmitt, Beason; Carl O. Johnson, Varna; A. E. Burwash, Champaign, and John Butterfield, Pana.

Illinois Agricultural Auditing Association

New directors: Dana Cryder, Minooka, who succeeds Frank Easterly, Carbondale, and Lyman Bunting, Ellery, and additional member on the board.

Directors re-elected. B. W. Horan, Reynolds, and Roy Elwards, Tolono.

Illinois Farm Supply Company

New director is J. P. Redman, Cairo, who succeeds Harley R. Neal, Lawrenceville.

Directors re-elected: Charles Keslinger, LaFox; Frank J. Flynn, Murrayville; Jesse L. Beery, Cerro Gordo; George Chapple, Dwight; Glenn H. Geiter, Orangeville; John P. White, Washington; R. H. Monke, Litchfield; Fred Herndon, Macomb; Otto Steffey, Stronghurst, and F. E. Morris, Buffalo.

Prairie Farms Creameries

New directors: Henry Vollmer, Quincy, who succeeds H. B. Smith, Bardolph, Elmer Orendorff, Randolph, who succeeds H. W. Enns, Minier.

Directors re-elected: Harry Gehring, Altona, elected to the presidency succeeding Harold W. Enns, Minier; A. Oliver Bower, Bushton, who succeeds Harry Gehring, Altona, as vice-president; Thad Loveless, Gillespie, elected again as secretary; D. L. Garber, Mt. Carroll; John Sterchi, Olney; Chester McCord, Newton; E. A. Fosse, Marion; H. J. Schumacher, Toluca, and Carl Geiger, Milan.

Country Mutual Fire Insurance Co.

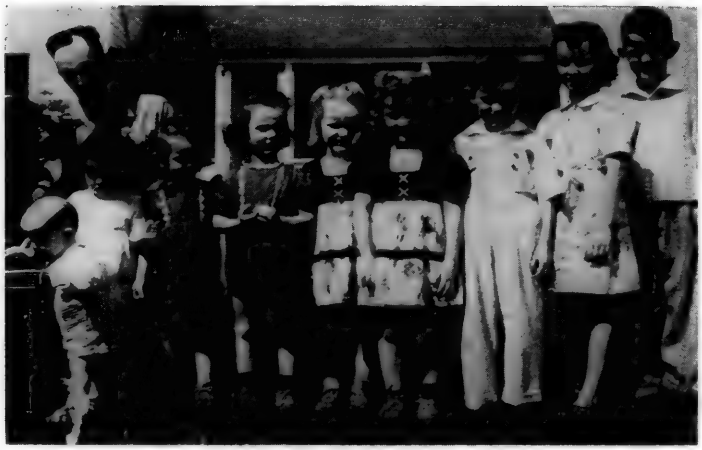
New Directors are Ora Ross, Rossville, and F. E. Morris, Buffalo; elected for three-year terms. Lyman Bunting, Ellery, and Otto Steffey, Stronghurst, elected to one-year terms. Albert Webb, Ewing, elected to a one-year term to fill the unexpired term of John E. Miller, retired. George W. Lenhart, Georgetown, and George F. Tullock, Rockford, formerly of St. Jacob, retired.

Director re-elected is L. E. Lingenfelter, Ullin.

The topic for discussion is on improvement of Illinois' rural schools as these farmers get together after the schools conference at the IAA annual convention. Left to right: Tom Culbertson, Effingham county; H. P. Ash, Macon; H. T. Marshall, La Salle; E. Y. Naffziger, Bureau; L. E. Lingenfelter, Pulaski-Alexander; George Hayes, Henry; J. C. McCormick, Pulaski-Alexander, and Orin Coultas, Shelby.

1947 Soybean Year?

Some experts are predicting that with a shortage of fats and oils rivaling that of meats and corn products, soybeans may be a better cash crop in 1947 than corn.



$5 PICTURE-OF-THE-MONTH AWARD

Winner of the RECORD's $5 Picture-of-the-Month award for December goes to Marian Walsh for this appealing shot of the Keron Walsh Farm Bureau family of Winnebago county. Mr. Walsh kneels behind his family of nine children. Left to right: Billy, 1; Susan, 2; Twins Joan and Julia, 3; Twins Ann and Alice, 4; Eddie, 6; Loraine, 8, and David, 7.

The chickens on the Arthur Knouppel farm in Iroquois county should be pretty well fed judging from the willingness of daughters Rosemary (left) and Diane. And just look at the size of these buckets.

What does Hollywood know about kissing that Roland Gantzert doesn't know? Here he shows his technique to neighbor Virginia Sue Dreschel. Both are children of Grundy County Farm Bureau folks.

FARM BUREAU FOLKS IN PICTURES

Florence Konow of Will county takes time out from a brisk canter on her horse "Billy" to get her picture taken in Western style, i.e., in full regalia atop a board fence.

Just like Humpty Dumpty, all the kings' horses and all the kings' men couldn't put this melon together again after Leatha Rae Simpson of La Salle county dropped it. Harold Kain thinks his melon is a bit heavy too.

Bill Ehlers devised this home made buck rack in his spare time. It makes one-man hay hauling an easier job. Bill farms 100 acres with his dad in St. Clair county.

NEW PERSONNEL JOINS ILLINOIS GRAIN STAFF

Because of the tremendous growth in activities of Illinois Grain Corporation, new personnel has been added to its staff.

Two new men have been hired: Howard McWard, 42, former manager of the Farmers Grain Elevator at Palmer, Christian county, and Harry Treichel, 35, of Evanston.

McWard as manager will be in charge of sales and acquisition and Frank Haines will be Chicago sales manager. This will permit Haines to devote his full time to sales. Treichel, who has been a member of the Chicago Board of Trade since 1935, will be an assistant in sales.

Howard McWard

McWard was born Sept. 23, 1904, at Miami, Oklahoma, and came to Illinois with his parents in 1908. They settled on a farm four miles west of Morrisonville, Christian county. He was graduated from Morrisonville High School in 1932, and for the next two years taught country school. He then farmed with his father for two years before he became manager of the Farmers Elevator at Palmer in December, 1927. He has served as manager of this elevator since that time. It does an annual gross business of $1,250,000. McWard is married and has three children.

Treichel is a graduate of Northwestern University with the class of 1933. After graduation he started work with Cargill, grain commission firm in Chicago, and continued in that employment until 1939 when he entered the Army Air Corps. He was stationed in England for more than two years, and was discharged from the Army in October, 1945. From the time of his discharge until joining the staff of Illinois Grain Corporation, he was employed by E. M. Combs & Son, Chicago commission firm.

Testing of a large acreage of Illinois land showed that about 24 million acres, or three-fourths of the farm land, needs phosphate in addition to lime for clover and alfalfa.

PUBLIC RELATIONS CONFERENCE

(*Continued from page 7*)

given consideration at the public relations conference were rural roads, 100 per cent asesssment laws, and weed control.

The position of the IAA on the first two are covered in the resolutions. On weed control, it was pointed out that the many new types of spray developed in weed control offer opportunities for the establishment of a county weed control commissioner to supersede the township setup. The farmer would pay the approximate cost of such service on a voluntary basis. Those who did not control weeds would be served with a notice, and if they did not take corrective action, the county commissioner would do the job and collect from the owner. Such a county setup would be adopted only in the counties that desired it.

E. E. Houghtby, new IAA director of dairy marketing, resigned recently as member of the board of directors of the DeKalb County Farm Bureau where he had served for 19 years, 14 as president.

"OBSERVATIONS"

(*Continued from page 21*)

ernment and whereby, he could not legally compete with the 30 cents margin being offered by the government?

The indictment of officials of government was so clear that this bonus or premium was removed in a few weeks and the official ceiling price of corn was raised 25 cents early in May with wheat boosted 15 cents and comparable increases made in other grain ceilings.

During this period it became illegal to purchase corn for feeding hogs in excess of 225 pounds; for feeding more than 80 per cent of the previous year's production of poultry, or for feeding better than Grade A cattle.

These conflicting and unfair rules and regulations forced a large volume of immature stock into market channels.

After living so long under such ever changing and unjust rules and regulations and indefensible ceilings, can anyone rightfully blame any producer or feeder of meat animals during the 51-day respite from government ceilings for marketing their livestock? Even this temporary increase in marketing was not what some would have the American people believe.

The official figures disclose that from June 1 to October 1, there was a decrease of 8 per cent in the number of hogs marketed in 1946 from that of the previous year. This comparatively small decrease was caused by official rules and regulations which forced premature marketing during the period from March 1 to June 1. Notwithstanding the approaching shortage of pork, it should be noted that the Secretary of Agriculture in May of this year asked farmers to further reduce fall farrowings by 10 per cent.

I cite these statements and figures not in a spirit of reprisal, but merely so that the truth may be recorded relative to the manner in which the farmers have, each year since 1941, so magnificently responded to, so nearly followed the officially requested goals for production, and to disclose that such temporary gluts and shortages as have existed were largely, if not wholly, caused by the ever changing and indefensible rules and regulations affecting the production and feeding of meat animals.

Can anyone expect farmers to express other than deep concern, when in January of this year the Department of Agriculture officially warned farmers as to the dangers of overproduction, surplus of farm commodities and a break in prices, while in the recent campaign the Secretary of Agriculture is reported by the press to have said that all signs point toward adequate outlets and good prices for farm commodities, at least until well into 1948.

. . . The many causes for and degrees of confusion of the American people during the past and preceding years were brought to a temporary, and I hope, permanent close by the recent election.

The various foreign ideologies that have infiltrated in some degree into the affairs of government and into the minds and lives of citizens, taken together, was the outstanding issue in the recent political campaign.

I have always believed in America, and the result of the recent election clearly discloses that a strong majority of the American people can be depended upon when issues are clear and the truly American ideals of government are at stake.

When asked what I thought of the result of the election, I said that I did not regard it as a Republican victory or a Democratic defeat; that the CIO-PAC and all other extreme leftists were conclusively defeated, and that the American people won. It certainly was the American people speaking on the great and broad issues and ideals of government. The election reminded me of the election of 1932 when the American people, sorely tried and disgusted with the inaction of the government in meeting the needs of the times, through a protest vote, unseated those in power and placed government in new hands. I remember stating at that time that it was not a Democratic victory or a Republican defeat, but that the election of 1932 was an expression of the American people in answer to the *do-nothing attitude* and program of the administration then in power.

Need For Statesmanship

It is my hope, as we look forward, and the new Congress comes into session that the statesmen in the Republican and Democratic parties will rise above all narrow partisanship and work together in speedily restoring to America and Americans the ideals, and functions of government that made this the greatest nation of all time.

Is it unreasonable to ask for the same degree of cooperation among political leaders in meeting our serious domestic problems that existed in winning the war and that now operates on a high plane in representing America at the peace conferences? Do we as a nation fail to recognize that many of our problems at home equal if not exceed in importance our responsibility in solving the problems of others? Is it not necessary that we make democracy really work at home before we can expect to successfully introduce such ideals of government abroad?

That the problems confronting us as a nation are extremely difficult, serious and some acute, there can be no doubt; that the early and effective solution of these problems is imperative, no reasonable person will deny. All impartial observers recognize that many policies of government need a complete overhauling, and they further recognize that neither the leaders of the Democratic nor the Republican parties have as yet presented a constructive program. As farmers would put it, — as a nation we must start from taw. Because of the great need of America for early and constructive action, let us forget the mistakes of the past, except as they may contribute to sound decisions of the future. May we increasingly recognize our obligations to future generations, and may we, with courage, fortitude and conviction, both as individuals and groups of individuals, be as helpful as we know how to be. That those charged with the responsibility of leadership of our government cannot do the job alone is recognized by all thoughtful people. Speaking and working as individuals 130 million people can be of little help. It is for this reason that there has developed during the present century the organizations of business, labor and of agriculture. Which one of these groups can be most helpful? Which one of these groups, on the basis of its record, is entitled to the respect and confidence of fair-thinking people? Will the American people or the leaders of government look primarily to big business for advice and counsel when it has only partially recovered from the stigma of its abuse of power in former years? Will they look to organized labor, which has increasingly demanded more and more for doing less and less; a group that while demanding and receiving the highest wages of all time has insisted upon the taxpayers contributing to its daily and yearly grocery bill, while at the same time, insisting upon a revision of tax policies that would relieve through exemptions a large percentage of their membership from remaining contributors to the revenue of government.

I would not deny any group the opportunity of presenting solutions to any of the nation's problems, but I am one who believes that the great group of American citizens, who, because of historic ideals, love of land, belief in home ownership, and property rights; a group that has never requested, let alone insisted upon, receiving more than an equitable share of national returns; a group that has never sought advantage at the expense of others; a group that seeks only policies necessary to assure fair economic balance for all; a group that has come into the spotlight as the one great group which on the basis of its record, of its interests and its fundamental beliefs can make the greatest contribution toward solving the momentous

questions confronting our country. Needless to say, this group embodies the American farmer and the other rural people of America. With this responsibility, it behooves organized agriculture as never before to take careful stock as to its needs and its requirements. As farmers we must be particularly careful that we ask or seek nothing beyond the realm of equity, justice and those things that are in the interest of all the people. We must never fail to recognize that anything gained beyond this will be only of temporary advantage. This is one axiom organized American business, and a large percentage of labor leaders have failed to recognize. It is because of this oversight that they cannot continue to exercise the influence to which they might otherwise be entitled.

Farmers Must Lead Way

As the producers of food and fiber, American farmers are a requisite to the first essentials of life. The investment in agriculture is more than the total investment in all of our railroads, all of our utilities, and all equipment in all the mills and factories of the country. Economists generally agree that the products of agriculture constitute a major portion of the new raw wealth produced annually. It is an established fact that the level of values placed upon new wealth has a direct and stable influence in determining total national income. As a group, farmers of the country constitute the largest buying unit for the products of industry. Seventeen per cent of civilian labor is employed on farms. There is about 3½ times as many workers in agriculture as in the iron and steel industry, the automobile industry and the mining industry combined. Thirty-six per cent of all wholesalers and nearly ½ of our retail establishments are engaged in the handling of agricultural products and food. They in turn employ about 35 per cent of all wage earners in the wholesale and retailing businesses of the country. It is estimated that during the past 10 years rural America has been reproducing itself 136 per cent, while urban America, with 55 per cent of the population, has only been reproducing itself 76 per cent. At this rate, in less than three generations time, more than 80 per cent of the total population of this country will be direct descendants of people now living on farms. With this vast interest in America and its ideals, and on a basis of its record, do not the farmers of this country have an interest and a responsibility that entitles them to take a leading part in solving the problems of these crucial days?

In the past, constructive organized agriculture has of necessity largely centered its efforts to matters affecting production and fair prices in the market place for farm products. With comparatively limited experience and means at its command, agriculture has not effectively widened its sphere of influence into the broader aspects of government. Today the condition is changed. The ranks of organized agriculture have been greatly increased; its means and its manpower have been greatly increased; its record in never seeking selfish advantage is without blot and its vast interest in a return to the ideals of a true democracy are recognized. If agriculture is to take its rightful position in influencing sound legislative and administrative policies of government, it must get its own house well in order. It must give energetic support to those leaders of government who would balance the national budget. Whether an individual, an institution or a government, this is a requisite to orderly and successful operation. This can only be accomplished by reducing expenditures, without impairing necessary government functions. In this, there is plenty of room for action. Bureaucracy should be trimmed to the bone and wherever communistic leanings have found their way into the divisions or bureaus of government they should be immediately, completely and forever removed.

Need Adequate Taxation

Government should retire from the field of competition with private enterprise and confine its functions to impartial and effective regulation. By this I do not mean government removal from public building and construction programs that are in the interest of all the people or from functions essential to national stability, but I most definitely do mean its complete retirement from all activities that compete with the everyday lives of citizens in the administration of business, both large and small.

I have little patience with the efforts of either big business or organized labor to escape in varying degrees from public taxation. If we are to give confidence to the owners of American securities, it is essential that very substantial government revenues be continued and the budget balanced by reducing expenses. The budget will not be balanced by any attempt to delude the people as was recently done when one high official of the government stated that the current anticipated deficit had been greatly reduced, and the budget was approaching balance. Soon thereafter another official stated that the reduction in the anticipated deficit was accomplished, not through a reduction of expenses, but because revenues were some 4 billion dollars in excess of those anticipated.

National solvency and credit can only be assured when the national budget is balanced by discontinuing every unnecessary activity of government, maintaining substantial taxation and revenue and committing all surplus income to the retirement of interest and principal of the national debt. There is no justification for reducing or revising the tax structure except where such action will stimulate business activity to a point where the increased national income resulting therefrom will constitute a basis of taxation that will increase federal revenues and thus go even farther than present tax laws in protecting our money, our bonds, our property and the national security. If agriculture is to exercise its full and proper influence in securing a soundly balanced national budget, it must set the example by getting its own house in order.

Untold thousands of people are on the payroll of the department of agriculture who are of no practical value to the people who own the land or who produce the food and fiber in this country. During the depression farmers of necessity had to call upon government for action programs, some of which are today of little value. It would be a comparatively simple process to sift from those needed to those that are not needed, if impartial people were given the task. If this kind of an approach is taken by farmers, they will be in a very good position to demand similar action from other interests.

I wish time would permit me to deal at some length with the opportunity provided farmers in this field, but I am sure the overall opportunities for a reduction in government expenses is not only tremendous but obvious to all.

Next in importance to a balanced budget are policies essential to assure a reasonable balance in our national economy.

Seek Labor Law Revision

This can never be accomplished without a complete revision of our industrial and labor relation laws. We are all living witnesses to the unfair and inequitable laws that permitted a debacle of strikes that have so seriously hampered America during the first year of its transition from war to a peace basis. As a result of this calamitous experience, I observe that no one has gained, but all of us have lost.

A year ago, I stated at our annual meeting, — quote —

"I would not have you think that either as an individual or as a spokesman for others, I oppose either substantial, regular wages, or the best of working conditions for the workers of the country. Neither do I fail to recognize the importance of large scale employment and industrial activity. But I do strenuously

(*Continued on page* 43)

"OBSERVATIONS"

(*Continued from page* 42)

and uncomprisingly oppose the continuing efforts on the part of some leaders of labor to secure for workers more and ever higher wages for doing and producing less and less. Stating it in another way, it is not the high wage that is dangerous, but the ever-increasing per unit cost of producing industrial commodities. I oppose such policies because I know that if permitted to succeed, they will contribute to further unbalancing the economy and ultimately will not only undermine, but will destroy the free economy of America." Unquote.

I again record that conviction. When we measure the untold millions lost to the workers of the country as a result of strikes during the last year and the great reduction in commodities available to the American people resulting from such strikes, we can begin to appraise the gigantic reduction in the otherwise national income we might have experienced, and the indefensible and serious effect of these strikes upon the country as a whole.

Even more indefensible have been the so-called jurisdictional strikes. They have had no other purpose than to serve the selfish interests of a given few.

Laws Should Be Fair To All

Certainly, it is time to revise our national policies, so as to assure true collective bargaining between employers and workers. This can never be accomplished unless those sitting on both sides of the table are held equally and legally responsible for their statements, acts and decisions. Such revision of government policies should hold paramount the rightful interests of the masses of the people. As farmers we can rightly demand such policies because we have never struck, even though prices were low; we have never even thought of restricting food from the hungry as a means of bettering our condition even during periods when the price of farm commodities relatively were far below either industrial wages or industrial prices.

As a nation we must awaken to the fact that if free economy is to succeed intelligent management is entitled to reward; a laborer is entitled to wages in line with his ability to produce, and that honest investments are entitled to reasonable returns.

It is a proper function of government to see that these basic interests of all are rightfully protected and assured.

But in urging revision of laws governing industrial labor relations I am not suggesting any revision that would permit a return to the reactionary policies of former years. To do so would be calamitous. Certain elements of business have not yet fully regained public esteem and confidence because of the monopolistic practices and abuses of that period just as the more recent abuses of power by some groups of labor will live long in the minds and attitudes of fair thinking people.

Time For Action

American citizens generally and government leaders in particular must come to a full realization that throughout all history nations have declined and become obliterated through insolvency and that America now has a national debt approximating the normal value of all things tangible. That to meet this obligation will require very substantial, yes, heavy taxation. That to provide a reservoir of necessary revenue, we must maintain a national income at least 50 per cent greater than during any year previous to World War II. That to accomplish this will require a high degree of industrial activity and people at work everywhere at substantial regular wages. This can be accomplished with relative ease if and when the leaders of government, and the leaders of business, labor and agriculture are brought to a realization of their respective responsibilities. With the spotlight of public interest and attention thrown upon constructive efforts in this direction, I feel sure that public sentiment would soon bring into line leaders of any group that insisted upon selfish advantage at the expense of all the people and the welfare of the country.

In my opinion, this is possibly the most important annual meeting in the history of the Illinois Agricultural Association.

As the largest state organization of farmers in all history you carry as great if not a greater responsibility than do the leaders of farmers in any other state in contributing to and insisting upon immediate and constructive action.

It is my hope that this convention will outline and adopt policies that clearly reflect the interest and attitude of the farmers of Illinois on the broad and serious questions of public policy the nation must meet and solve. Only by so doing will your leaders be in a position to exercise their proper influence in guiding the policies and affairs of our national organization.

Certainly it is time that farmers throughout America outline a course for constructive action. The nation is at the threshold of decision, and at the crossroads for action. The problems I have discussed and many others will undoubtedly be considered by the next Congress. The American people have clearly given their mandate to the leaders of government, and government leaders in all of its branches should and will be held accountable to their public trust.

Let not the American farmer fail in this opportunity of service to his fellowmen and let the voices of the IAA and the American Farm Bureau Federation ring out clearly that it is time for a moral, spiritual and economic awakening in America.

May your program be fair to all, and may it continue to ever recognize that only on the high plane of economic justice and equity can America hope to survive these crucial days.

IAA HIRES SCHEER AS PERSONNEL DIRECTOR

WILBERT E. Scheer, 37, of Park Ridge, has been employed as personnel director for the Illinois Agricultural Association and associated companies.

W. E. Scheer

Scheer will supervise the hiring, assigning and transferring of office workers and coordinate the personnel policies between the IAA and its commercial and marketing companies.

More than 530 office workers are employed at the Chicago office of the IAA and its associated state-wide cooperatives.

Before coming to the IAA, Scheer acted as personnel director for McKesson and Robbins, wholesale drug firm with offices in Chicago, where he has been employed since 1928.

On leave of absence from the drug firm, he served in the army for two years from 1943 to 1945, and was assigned to replacement depots in New Guinea and the Philippines where he was engaged in personnel work.

Reared at Palatine, Scheer graduated from Des Plaines high school and later attended night school at Northwestern University.

He is married to the former Erna Blumenschein of Chicago and has one daughter, Arlene.

The William Beer farm in Woodford county sold this fall for a record breaking $550 an acre. This top producing 160 acre farm sold for cash. At an appraisal clinic held there this spring experts valued the land at $200 an acre based on its long time earning power. Farm is rated as among the state's top one per cent producers.

Illinois Cooperative Locker board of directors, left to right: Paul Rosentreter, Macoupin county; Earl L. Wenzel, DeKalb; President Dana Cryder, Kendall; C. Ray Ward, McLean; Vice President J. E. Mau, Lee; Carl J. Bates, Henry; E. A. Fosse, Jackson.

LOCKER ASSOCIATION PLANS *Million Dollar Building* PROGRAM

ILLINOIS farmers now own and operate 85 cooperative locker plants with a capacity of 46,000 lockers, Dana Cryder of Minooka, president of the Illinois Cooperative Locker Association, reported at the Nov. 18 annual meeting of the locker company.

The meeting was held in conjunction with the IAA annual convention at the Hotel Sherman in Chicago.

Through a million dollar building program to be developed during 1947 by various county locker companies the association expects to have a membership in excess of 100 by the end of next year.

Frank A. Gougler, director of produce marketing, said that at present 16 new cooperative locker plants are being built or will be built soon. Plants at Sparta, Lanark, Cambridge and Carbondale are being enlarged. Four private plants were purchased and converted into co-ops this year.

In addition to the locker plants three compartively large slaughter plants have been built at a cost of about $40,000 each and are located at Wyoming, Paris and Carbondale, Gougler said.

In discussing developments for 1947 Gougler said that probably one or more area rendering plants would be built to process by-products from locker and slaughter plants as well as dead animals from an area extending about 50 miles. One such plant is being considered at Carbondale.

Gougler reported that several companies are planning to build slaughter-processing plants to cost from $40,000 to $125,000.

These plants will perform such processes as slaughtering, processing, lard rendering, curing and smoking, and sausage making for locker plant members. Processed meats will be moved from the central plant in refrigerator trucks.

It is expected that these plants will dress poultry and do custom slaughtering and processing for other than locker patrons. One such slaughter-processing plant is being built in Macoupin county about eight miles from Carlinville.

C. F. Musser, manager of the Illinois Cooperative Locker Service Company, said more than $27,000 of supplies and equipment for member companies were purchased since May when the purchasing department was set up.

This could well have been $250,000 if supplies and equipment had been readily available, he said.

Discussing retail sales, Musser said most of the locker plants are now selling at retail pre-packaged frozen fruits and vegetables, and in some cases, frozen pastries, biscuits, and pies. Sales range up to $300-$500 a week and one locker reached a peak of $2,500 for one week's sales of various pastries.

LETTERS TO THE EDITOR

BELLS AND BORDER COLLIES

In your November issue of the RECORD I read your article on "Where's the Dinner Bell?"

Our old dinner bell has recently rated a new post and coat of aluminum paint and is proudly displayed in our back yard. Only yesterday it was used to summon the corn shuckers to dinner. We are all proud of the old bell.

I don't know whether you get many letters from down here in Hamilton county or not so I would like to let you in on a little of our work.

Since I have taken this opportunity to write you I would like to tell you about my father's Border Collie sheep dogs. This year he won the national championship with "Meg" which rated him a newsreel picture. Also Midwest championship with "Tweed" at Sedalia, Mo. His picture was in several newspapers and magazines. He has been working his dogs on exhibition with Roy Rogers' Rodeo for the past two years. He recently appeared in Chicago.

Verla Allen
Hamilton County.

THE BELL ISN'T LOST

In your November issue of the RECORD you had a question on "Where's the Dinner Bell?"

Our old dinner bell hangs on a chain in our peach tree in the back yard. We use it when we need it to call Daddy from the fields or most anything. Our old dinner bell still makes a loud noise.

The old bell isn't hidden, broken or lost because it still hangs in the tree.

Norma June Tait
Edwards County

Letters to the Editor are welcomed from readers on any subject related to agriculture. Writers should sign letters with name and address. Names may be withheld if desired. Address *Letters to the Editor, Illinois Agricultural Association Record, 608 South Dearborn, Chicago 5, Ill.*

RESOLUTIONS

(*Continued from page 6*)

corresponding increases in the productivity of our entire economy. We recognize the right of labor to organize and bargain collectively with management.

We believe that serious consideration should be given to providing necessary machinery for elimination of strikes and handling disputes in industries such as public utilities and other industries which are vital to the well-being of all citizens of this nation.

In developing appropriate legislation we believe that Congress should give consideration to laws which would make both labor and management responsible for the violation of contracts, which would hold unions responsible for wildcat strikes, which would compel the amicable settlement of jurisdictional disputes between unions and which would compel unions to state their complete demands at the opening of negotiations. We also believe that this legislation should outlaw secondary boycotts, the closed shop, forced membership, compulsory check-off dues, and the organization of foremen's unions since foremen are a part of management. We believe this legislation should provide for the right of management to appeal directly to workers in matters pertaining to unionization, give management the right to discharge workers who voluntarily violate contracts and participate in wild cat strikes, provide that either management or labor can call for a supervised election regarding union representation, and provide for appeal of Labor Board decisions to the courts. Existing laws with respect to contributions to political campaigns and candidates by labor unions should be strengthened and the same restrictions should apply to them and to organizations controlled through them as are applied to contributions by corporations.

We appeal to the Congress to develop legislation which will permit this country to proceed to produce abundantly without being continually interrupted by work stoppages. We consider it essential that no punitive action be taken against labor or against management, but that the primary considerations in developing a labor-industry program be the best longtime interest of the citizens of the nation, the promotion of free enterprise and maintaining the rights and dignity of the laboring man and all the citizens of our economy.

XII. UNEMPLOYMENT COMPENSATION

The present unemployment compensation system was designed for the worthy purpose of aiding involuntarily unemployed persons while they seek employment.

Under this program, as administered, benefit payments are easily obtained, and such payments are almost as high as prevailing wage rates in many areas. Consequently, many persons quit work or refuse to take available jobs. They enjoy an extended paid vacation at the expense of employers who are taxed on payrolls to raise unemployment compensation funds. At the same time, farmers and other employers are unable to obtain help to produce food and other essential commodities.

Any program that encourages able-bodied persons to remain idle and ask for governmental assistance instead of seeking and accepting available employment at prevailing wage rates is unsound, not in the public interest, and should not be extended.

We urge much more care and discrimination in the administration of unemployment compensation so that benefits will be paid only to those who are actively seeking and actually unable to obtain employment. We strongly oppose the extension of the unemployment compensation system or any increase in amount and duration of unemployment payments.

XIII. ROAD IMPROVEMENT

Participation in church and community activities, the delivery of farm products to market, reorganization of schools, the purchasing of food and supplies, and other activities of rural people are dependent upon serviceable all-weather roads. Local funds are not adequate to improve and maintain the approximately 75,000 miles of township road and district roads, which constitute almost 75% of the entire road mileage in the State. State support must be had. We urge and will sponsor and support such legislation as may be necessary to continue to secure state funds for the improvement of these farm-to-highway roads.

Rural people in many areas believe that expenditures for administration and for machinery, and equipment could be substantially reduced and more money made available for actual road construction and maintenance if townships and road districts were combined into larger units for road and bridge improvement and maintenance. Every possible economy should be effected. We urge and will sponsor legislation which will permit townships and road districts to combine into larger units for road and bridge improvement and maintenance.

XIV. PROPERTY TAX LEGISLATION

Far-reaching new property tax laws went into effect January 1, 1946. These laws provide for increasing property assesments to an average of 100 percent of actual value in each county for reduction of one-half in maximum tax rates, and for special taxing powers and restrictions during a five year transitional period.

The law governing taxing powers during the five years beginning January 1, 1946 is extremely complicated and confusing. It also apparently provides unreasonable large increases in effective tax rate limitations in most taxing districts. Consequently many unnecessarily large increases in tax levies were made in 1946 and many more will be made in succeeding years unless the law is clarified and amended. We urge and will support legislation to clarify and simplify this law and to make the tax rate limitations more effective.

Even though existing maximum tax rate limitations are reduced from present levels by state law it is probable that any new laws will allow unnecessarily large tax increases in many taxing districts, especially after the end of the five year transitional period. This will place much greater responsibility for control of property taxes upon local people. Citizens must become much better informed about and take a much more active part in local governmental affairs if they wish to prevent unnecessary increases in taxes. In order to make essential facts concerning local taxes more readily available to citizens, uniform and simple budgeting, accounting and auditing procedures are required. Therefore, we urge and will support legislation requiring all local units of government to use uniform budget forms and uniform accounting and auditing procedures adapted to the specific needs of each taxing unit.

XV. RURAL SCHOOL IMPROVEMENT

We reaffirm our policy of eliminating small, unnecessary school administrative units. We recommend legislation providing that State financial aid be withdrawn from administrative grade school districts with fewer than ten pupils and from high schools with fewer than ten pupils per grade. The qualifying figure for elementary school districts gradually should be raised to fifteen pupils and that for high schools to twenty pupils per grade.

We reaffirm our previously expressed policy of encouraging the improvement of rural schools through the reorganization of school districts and other means. We recognize and approve the fine spirit in which most counties and communities have accepted the County School Survey Law. We recommend that the officers of the Association seek specific legislation to enable a vote to be taken on any county committee proposals for reorganized districts including county-wide school districts and community unit districts.

We will also sponsor legislation to distribute the burden of school support more equitably by abolishing school administrative districts which have had fewer than five pupils for three successive years. Exceptions should be made where such requirements would work an unnecessary hardship upon local people because of road conditions or other geographical factors.

XVI. UNIVERSITY OF ILLINOIS HOME ECONOMICS BUILDING

The housing facilities for the Home Economics Department at the University of Illinois are inadequate and out of date. We will join with the Illinois Home Bureau Federation to secure a state appropriation for a new home economics building with adequate equipment for the research and educational program of this department.

XVII. FINANCIAL RESPONSIBILITY FOR AIRCRAFT OWNERS

The use of aircraft is increasing rapidly. This results in an increased number of aircraft accidents involving public liability and property damage. At the present time there is no law in our state requiring financial responsibility on the part of the aircraft owners or operators causing such damage. Property owners and other individuals should be adequately protected in case they are injured or adversely affected in any way by aircraft accidents or forced landings.

Therefore, we urge and will support legislation requiring each aircraft owner and operator to submit proof of financial responsibility before being allowed to operate an aircraft in this state.

XVIII. STATE REGULATION OF INSURANCE RATES

We are opposed to any legislation or regulations which would require all casualty insurance companies, including mutual companies, to maintain uniform rates. The state should limit its regulation to that which is necessary to make certain that the Insurance Companies are financially sound and their policyholders fairly treated. If a mutual company can operate soundly at a lower premium rate than other companies, it should be allowed to do so. We will vigorously oppose any attempt that may be made in Illinois to restrict the freedom of mutual companies to operate for the benefit of their members, providing their operation is nondiscriminatory as between members and such operation meets the requirements of the State Department of Insurance insofar as sound practices and procedures are concerned.

XIX. FARM BUREAU MEMBERSHIP

The present Illinois Farm Bureau membership of more than 130,000 is most gratifying, but the opportunity for greatly increased membership still exists. The membership in many counties is still low in relation to potential membership. Practically every county has one or more townships that are poorly organized.

Farmers are fully conscious of the importance of organization. They realize today as never before that only through complete organization can they hope to meet the problems and the responsibilities that face agriculture.

We, therefore, urge township, county and state leaders to redouble their efforts to establish and maintain such a program of service as will fully serve the present members and attract the non-member. We also urge that an effort be made to reach all potential members and, that they be personally invited to join with their neighbors in Farm Bureau. The time to do this is NOW.

FARMERS WANT ECONOMY, PRICE STABILITY — SHUMAN

(*Continued from page 29*)

certain that this committee will make a significant contribution to thinking along these lines.

Farmers believe in full production and they would certainly prefer not to return to the specific crop acreage control programs of the past. However, farmers know that prices supported at 90% of parity without any program for keeping production in balance with effective demand could result in huge surplus accumulation. Excessive production and surplus accumulation would be wasteful of soil resources as well as disastrous to price levels. Much of the surplus production in the past has come from increased grain acreage at the expense of proper land use and conservation practices. Consideration should be given to coupling the support price program with an effective soil conservation plan. Much public support could be had for a plan that would assure those producers who conserve the soil a parity price for their products.

Many people, especially those in great cities, have been led to believe that farmers are getting rich. As you all know, this is far from the truth. According to the U.S. Department of Agriculture, Illinois gross cash farm income in 1945 was $1,198,790,000.

Investigations by the University of Illinois indicate that about 60 per cent of gross farm income was required for operating expenses. Working from these figures we find that net cash receipts in 1945 averaged only $44.77 per farm per week. Out of that $44.77 the farmer had to pay income taxes, rent and interest.

After meeting these charges the average Illinois farmer had less than $30 a week for his labor, according to estimates by the Illinois Agricultural Association research department.

During the first seven months of 1946, Illinois farmers took in about 7 per cent more cash than in the corresponding period of 1945. Prices of farm equipment and supplies, however, have increased 10 to 20 per cent. Consequently net income of Illinois farmers this year will be little if any higher than in 1945.

World Problems

Agriculture, as much as any other group, has deep interest in the attainment of permanent world peace. We favor every reasonable effort to establish and maintain world peace. We commend Congress and the Administration for their non-political cooperation in the development of the United Nations organization. Farmers are practical in their approach to a solution of this unsolved problem. They know that we in America cannot separate ourselves from the world. However, we must concentrate on making our democracy so strong that it will be invulnerable to the attacks of those from within who would destroy our form of government.

If we can live in a spirit of brotherhood here at home, perhaps we can then convince the people of other nations that world brotherhood and peace are more to be desired than world domination.

As soon as the eggs hatch, spray bagworms on evergreens with one pound lead arsenate and one pound hydrated lime in 25 gallons of water.

Manager and board of directors of Illinois Fruit Growers Exchange are shown during Carbondale meeting. Left to right: (front) D. B. Kirtland, Clark county; President A. O. Eckert, St. Clair; Manager L. L. Colvis; L. A. Floyd, Bond; Secretary-Treasurer F. G. Anderson, Union; (second row) H. E. Hartley, Marion; Orin Hertz, Washington county farm adviser; Vice President E. D. McGuire, Jackson; William Beauman, Johnson; (back row) Trevor Jeffries, Jefferson; Arthur Foreman, Pike; Lyman Creed, Marion; and R. B. Endicott, Pulaski. Not present is Chester Boland, Edgar.

Fruit Growers Exchange Marks 25th Anniversary with New Records

THE ILLINOIS Fruit Growers Exchange, pioneer fruit and vegetable cooperative, announced at the marketing conference of the IAA annual convention in Chicago that its $125,000 cold storage plant will be ready for use early in 1947.

Near completion of this new building with its 60,000 bushel storage capacity climaxes 25 years of growth for the Fruit Growers Exchange, first of the IAA marketing co-ops.

Surviving good times and bad, successes and failures, the Fruit Growers Exchange is now in a strong financial position and has reached a high in membership and sales volume, its manager, L. L. Colvis, stated in his annual report.

Fruit growers themselves subscribed $65,000 in class A preferred stock for the new building and offered more money than this after the stock was sold.

Volume of fruit handled this year was placed at 370,522 bushels. Accounting for most of the fruit marketed this year were: apples, 198,839 bushels, peaches, 155,939 bushels, and strawberries, 4,505 crates.

In his report on fruit marketing Colvis said that this year nearly every state from Massachusetts to Colorado received shipments of fruit from the Illinois Fruit Growers Exchange.

As an aid in marketing of fruit and vegetables a teletype has been installed in the Carbondale office and is in addition to the special long distance telephone and direct Western Union wire already in use.

Although the greatest volume originates in southern Illinois around Carbondale, Colvis said, many growers from other parts of the state sell through the Exchange, especially apple growers in Eastern and Western Illinois and strawberry growers of the Edgar County Association.

Explaining that most sales are made through the Carbondale office, he pointed out that almost all fruit goes direct from grower's packing shed to its destination and does not pass through Exchange warehouses.

Their campaign to improve the quality and pack of fruit being shipped is paying dividends. This year a majority of sales were on the basis of U. S. No.1 and U. S. fancy grades.

In addition, repeat orders from buyers surpassed anything the Exchange has experienced during the past five years, Colvis said.

New sales manager is R. S. McBride who began working for the Exchange in June. He will alternate his time between Illinois during the busy summer season and a Texas organization during winter months.

Much of the field work done for cooperating orchardists is handled by Dudley Klamp, who also acts as assistant sales manager.

Right arm of the marketing exchange is the purchasing subsidiary, the Fruit Exchange Supply Company, headed by Manager Fred Bierer.

The supply company has maintained a stair-step growth for the fifth consecutive year, Colvis indicated.

For the first nine months of 1946 sales totaling $425,000 were made. This compares to $380,000 for '45, $260,000 for '44, $152,000 for '43, and $82,000 for '42.

The supply company returned these dividends to its members: 4 per cent on baskets, 8 per cent on spray materials, 5 per cent on fertilizers, 10 per cent on miscellaneous.

Many dividend checks, the report indicated, ranged from $100 to $500.

ANNOUNCE CORN LOAN RATES FOR '46 CROP

Corn loan rates for the 1946 crop, ranging by counties from $1.05 to $1.34 per bushel and averaging $1.15 nationally, were announced Nov. 18 by the U. S. Department of Agriculture.

Last year's national average was $1.10 per bushel, the rates by counties varying from 90 cents to $1.15.

The 1946 rates are based upon 90 per cent of the parity price of corn as of Oct. 1, 1946. Parity on that date was $1.28 as a national average, as contrasted with $1.12 at the same time last year.

Corn eligible for loans must grade No. 3 or better, except for moisture content, or No. 4 test weight only. Loans will be available to producers from Dec. 1, 1946 through July 31, 1947.

TO OUR READERS

If you are an Illinois Farm Bureau member and are not receiving your copy of the IAA RECORD, check with your county organization director, to see that he has sent in your full and correct address showing your rural route number. According to postal regulations, the mailman must have your rural route number, or in the case of a town address, the street and number. County organization directors should make certain that *full* and *complete* addresses are submitted on all new members, otherwise they will not receive the IAA RECORD. Only one copy of the RECORD is sent out on a joint membership.

Fewer Sheep Cause Reduction in *Illinois Wool Marketing Operations*

At the speakers' table during the Illinois Agricultural Auditing Association conference are, left to right: Roy V. Edwards, Champaign; F. A. Easterly, Carbondale; B. W. Horan, Reynolds; R. H. Voorhees, Jerseyville; IAA Secretary George E. Metzger; Manager C. E. Strand and Verna Gridley, office secretary.

A SHARP decline in sheep numbers, a set-up in buying from other wool dealers, and large world stock piles, brought new troubles and reduced operations for the Illinois Wool Marketing Association during the past year.

Members were told at their annual meeting by President William Temple of La Salle county that the wool clip marketed through the association dropped to 200,000 pounds from 275,000 sold in 1945. The annual meeting was held in conjunction with the IAA annual convention in Chicago.

Secretary-Treasurer Sam F. Russell said that even with reduced volume members stood to gain up to a nickel a pound by marketing their wool cooperatively.

Chief buyer for the association's wool was the Commodity Credit Corporation. They paid up to 57 cents for top grades with overall average of about 48 cents. Marketing the wool cost members about six cents a pound.

Need Storage House

At the annual meeting the board of directors presented their recommendation that a full-time man be hired to head the association's program.

They also said that an effort was made this year and in 1945 to buy or rent a warehouse to grade and store wool before shipping it out of state. No building was found to meet their needs.

The association handled its wool through county wool pools in cooperation with local Farm Bureaus which appointed managers with approval of the state organization.

Local managers weighed, stored and shipped the wool and for their services were paid one cent a pound. This year, however, they made no cash advances.

The wool, assembled in lots, was shipped direct to the Indianapolis warehouse of the Indiana Wool Growers Association. There it was graded by the Indiana Wool Growers Ass'n. and appraised by the Commodity Credit Corporation, and sold by the National Wool Marketing Corp. to the C.C.C.

Illinois is a member of the National Wool Marketing Corporation and previously had sent its wool to the National in Boston. After the wool was graded at Indianapolis the Illinois Wool Growers sent their advances direct to members.

Final Settlement Soon

These cash advances made were: clear medium, 35 cents per pound; fine and feed wools, 25 cents per pound; rejects, 20 cents.

Advances were made because the CCC guaranteed ceiling prices. These ceilings have been extended until April 1, 1947.

Wool was shipped to Indianapolis in two lots. Russell warned members that those who shipped their wool too late to have it graded and appraised in the first lot will be last to receive their final payments.

Russell said counties that had their wool in by Aug. 1 will soon get their final settlement check on this year's wool.

Added payments to members are being sent from the National Wool Marketing Corporation — refunds dating as far back as 1932.

These refunds represent payments from certificates of interest issued by the National, payments which have been held up until the organization built up central stock of $1,000,000.

This has been done and now earnings will be paid on a more current basis.

New crop-share and livestock-share lease forms, adapted to changed conditions, have been prepared by the University of Illinois College of Agriculture. Copies may be examined at the office of the county farm adviser.

Further Gains Reported By Illinois Agricultural Auditing Association

GAINS in cooperative auditing during the 1946 fiscal year were reported by C. E. Strand, manager of the Illinois Agricultural Auditing Association, at the organization's meeting held during the annual convention of the Illinois Agricultural Association.

A net increase of 35 member clients was reported by this IAA affiliate, a cooperative offering an auditing and general business service to its members consisting of cooperatives and farmer-owned organizations.

Its membership of 464 activities consists of 92 Farm Bureaus, 67 Farm Bureau subsidiaries, 32 cold storage lockers, 100 grain elevators, 19 livestock companies, five insurance companies, 84 service companies, three Home Bureaus, and 30 miscellaneous organizations.

During the past year the association had the greatest volume of business in its history with a total income in excess of $124,000. Operating expenses amounted to about $115,000 for net income of more than $9,000.

In order to handle the volume of work necessary to complete the number of audits performed by the company, the state has been divided into eight districts. Offices are maintained at Chicago, Oregon, Bloomington, Champaign, Springfield, Galesburg, Peoria and Edwardsville.

About 33 billion pounds of corncobs are produced annually on United States farms. An average bushel of ear corn contains 11 pounds of cobs.

Illinois Grain Terminals About Ready to go!

"ALL grain co-ops in the Midwest will be strengthened through our newly organized Illinois Grain Terminals Company," George Iftner of Pekin, acting manager, told delegates at the grain marketing conference at the Illinois Agricultural Association annual meeting.

"We will soon be able to enter the field of grain merchandising," Iftner said, pointing out that principal efforts this year have been directed toward organizing elevators into a giant merchandising cooperative.

Plans to organize Illinois Grain Terminals Company were approved last year after a two year study of needs and trends in cooperative grain marketing.

Local elevators, county companies and subterminal river companies were enlisted or organized into the company this year, Iftner reported.

Discussing the purpose of Illinois Grain Terminals and reason for its formation, Iftner said: "Under this new setup the farmer will be able to channel his grain directly to the consumer. Grain will move from his local elevator and will be sold to Illinois Grain Terminals, which in turn will sell to millers, processors and other users.

"Illinois Grains will effect savings not now realized by acquiring elevator facilities at terminal markets and barge equipment to move grain on the Illinois and Mississippi waterways."

Illinois Grain Corporation, the IAA's state-wide commission company, will continue to serve as a commission and brokerage service to its member elevators, to the Farmers Grain Dealers Association of Iowa, and the Indiana Grain Cooperative, Inc.

A summary of various organizational activities was presented by Iftner as follows.

Hancock Grain Company on Sept. 1 purchased the four elevators of the Denver Farmers Cooperative Company at Denver, Basco, Bowen and West Point.

Bureau County Grain Company was organized and on July 1 bought the original farmers elevator at Princeton to serve as a nucleus of a grain and feed program.

Local farmers elevators reorganizing under the 1923 Co-operative Act were Jamaica, Meridan, Rees, Arenzville, Guthrie, and Bath.

Southern Illinois Grain Company was organized by the Illinois Farm Supply Company as a subsidiary to market wheat at the Benton mill. This new company this year handled about 70,000 bushels of wheat and served parts of five southern Illinois counties.

Backbone of the business of the Illinois Grain Terminals Company will probably come from river operations that are being organized by county Farm Bureaus on or near the Illinois and Mississippi rivers.

Here a system of barges and towboats, operating between river subterminal points, and possibly trucking systems, are contemplated. It will help realize for farmers full savings of water transportation.

Three river operating companies have been organized and are in various stages of operations. A summary of their activities for the year follows.

Western Illinois Grain Company, organized late in 1945, purchased the river elevator at Dallas City and three county elevators at Adrian, McCall and Ferris.

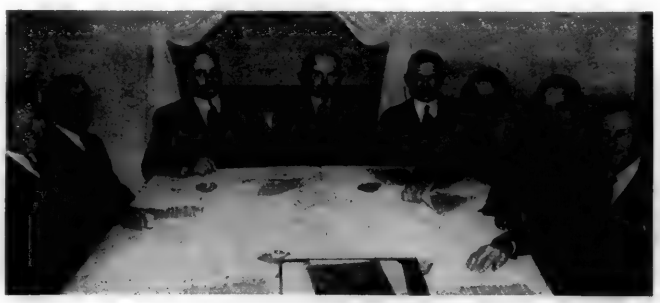
Operations started Feb. 1, when Fred Watt, manager, shipped the first barge of grain in May at a time when little old corn was left in the country. About $100,000 of stock was issued to subscribers in four counties the company will serve — Hancock, Henderson, McDonough, and Warren.

Havana River Grain Company made rapid progress during the summer as the stock raising campaign resulted in subscriptions totaling nearly $100,000 from Mason, Logan, Menard, Cass, Schuyler, McDonough, and Fulton counties.

On July 1 Havana Grains bought the land and properties of the Havana Cooperative Grain Company. Oscar Athey was employed as manager. A 60,000 bushel river elevator is being constructed.

Prairie Grain Company will serve La Salle, Lee, Henry, Marshall-Putnam, Stark, Woodford, Bureau and Peoria counties by buying or building river houses on the Illinois River between Peoria and Morris.

This company bought three land sites at Lacon, Hennepin, and Ottawa and elevators will be built on these three sites as soon as supplies are available. Some $200,000 have been raised by stock subscriptions to finance the operations.



ILLINOIS GRAIN TERMINALS BOARD

Left to right: C. J. Diehl, Monroe county; Andrew Larson, Mason, who resigned in favor of J. Howard Stone, Mason City; Homer Curtiss, Jo Daviess, president; Charles Schmitt, Logan, vice president; Milton Warren, Piatt, secretary; James Holderman, Grundy; Marion Herzog, McDonough; Wesley Attig, Lee. Arthur Burwash, Champaign, is also a member of the board.

Members of the Illinois Grain Corporation board of directors are, left to right, seated: Sam Yergler, Iroquois county; C. A. Hunt, Grundy; J. Fred Romine, Douglas; Secretary John H. Butterfield, Christian; President Charles Schmitt, Logan; Vice President Carl O. Johnson, Marshall-Putnam; Marie Hetherington, office secretary; A. E. Burwash, Champaign; E. E. Stevenson, La Salle; C. J. Elliott, La Salle. Standing: Erwin Isenberg, Madison; Charles Lauritzen, Livingston; K. T. Smith, Bond, and L. J. Sutter, McLean. Not present are Ralph Vercler, Tazewell, and Arthur Bertsche, Livingston.

Illinois GRAIN CORPORATION DECLARES ONE CENT PER BUSHEL REFUND

ILLINOIS Grain Corporation announced patronage refunds of about one cent a bushel during the company's annual meeting held Nov. 18 at the Hotel Sherman in Chicago.

Savings and volume of business were second largest since the company was organized and a sharp increase in volume of grain marketed cooperatively next year was forecast by Manager Frank Haines.

Selling and brokerage agency for 113 member elevators, Illinois Grain marketed more than 16 million bushels of grain for the fiscal year ending Sept. 30. During 1945 a record of 25 million bushels were handled.

At their annual meeting members were told that patronage refunds would total $146,802.04 and will be passed back to member elevators in form of cash and class "C" preferred stock.

Eight new member companies were added during the fiscal year. They are: Bureau County Grain Company; Southern Illinois Grain Company; Farmers Grain Company, Kane; Erie Cooperative Company; Virden Grain Company; Farmers Elevator Company, Jamaica; Stark Service Company, and Rees Farmer Elevator Company.

Owned and controlled by grain producers through their local cooperatives, county Farm Bureau and the IAA, the company maintains terminal offices in Chicago, Peoria, and St. Louis with branch offices at Mendota; Bloomington, Champaign and Jacksonville.

Illinois Grain works closely with similiar cooperatives in Indiana and Iowa and increased volume from these states has had the effect of lowering costs and increasing savings to each state company.

In an address, before the Illinois Grain Corporation, that sparkled with wit and philosophy, M. D. Guild, manager of the Indiana Grain Corporation, reviewed the history of the cooperative movement and the contribution of agriculture to the welfare of America.

". . . No great enterprise has been built through tilling the soil, yet all through the decades we have found the farmer producing the necessities of life which everyone shares and enjoys . . . but the farmer had not been adequately compensated for it," Guild pointed out. He added, however that farm leaders went to work and Congress gave farmers an opportunity through organizing among themselves to share a decent part of the national income.

"That's when the cooperatives of this country were born — not by accident, but by necessity. . . Supply cooperatives were formed. . . Then we find that the producer by himself in the marketing field was but chaff in the wind, but by joining hands with his neighbor he created a sales agency in an institution such as the Illinois Grain Corporation. . . So the farmer joined hands with his neighbor to meet the competition with a highly organized industry in order that he might do for himself what other industries were doing for themselves, rather than become wards of the state."

Guild built up an unbreakable case for the cooperatives in their position on federal income tax and pointing out that many industries are escaping corporation income taxes by operating as partnerships.

Guild cited the fact that of about 2½ million business enterprises in the wholesale field of the U. S., 86½ per cent are partnerships, 13.1 per cent are corporations and one-half of one per cent are cooperatives. "So who are the great majority of people escaping the corporation federal income tax," Guild asked. "It can't be the cooperatives."

Guild urged the support of the cooperative credit institutions for agriculture and stressed the fact that the sovereignty of any cooperative remains with the producer himself and not with the manager or the director.

"The producer is the man we are trying to serve," he asserted, "so it is our responsibility to see that he maintains his rightful place in an organized society, that he manages his own affairs and that the time never comes when the American farmer cannot rightfully claim agriculture as his own."

TERMINALS ACTING HEAD

George H. Iftner, director of grain marketing for the Illinois Agricultural Association, has been appointed acting manager of the Illinois Grain Terminals Company, recently organized IAA grain marketing affiliate.

George Iftner

Iftner came to the IAA in 1942 as grain marketing director. Before this he served as farm adviser for eight years in Tazewell county.

Graduating from the University of Illinois College of Agriculture in 1922, Iftner worked as an assistant in agronomy at the College and later taught vocational agriculture at Alvin and Sullivan before going into farm advisory work.

GAY APRON FOR WORK OR PLAY

These neatly trimmed aprons are sturdy enough for kitchen use, pretty enough for company. Top apron, pale yellow in color, is banded by strips of bright plaid. Bottom apron, of turquoise cotton, has white edging of eyelet embroidery. For free instructions enclose self-addressed stamped envelope to Women's Editor, IAA Record, 608 S. Dearborn St., Chicago 5, Illinois.

TELLS OF PHILIPPINES

In Moultrie County the Home Bureau members had an opportunity to learn first hand "Life in the Philippines."

Mrs. Atienza of Manila was a guest at a county membership training meeting. Mrs. Atienza is a graduate student in home economics at the University of Illinois. She is anxious to learn all she can about the home economics extension program in the hope that she can help organize a similar organization in the Philippines when she returns.

Mrs. Atienza told of some of the harrowing experiences she and her husband, who is a doctor, had during the raids on Manila. At present Mr. Atienza is studying at Harvard.

According to Mrs. Atienza the Philippine women have a deep admiration for the American homemaker and look up to her as a standard for fashion, homemaking, and leadership. —Mrs. Neva Love, Sullivan, Moultrie County publicity chairman.

NET $115

McDonough County Home Bureau members served 140 box lunches for a Farm Bureau Farm Management tour this fall and netted $115.00.—Fern Marshall, Vermont, secretary of the executive board of McDonough county.

QUAKERS ASK HELP FOR HUNGRY IN EUROPE

In the hungriest parts of Europe, the Quakers are feeding children a new and doubly nutritious cereal. This cereal is being made by an American processor at cost. It contains 20 per cent hard winter wheat, 10 per cent soybeans and 70 per cent rolled oats. It looks very much like rolled oats, but it contains twice as much protein and other food values. It is easily cooked and appetizing to eat.

Farmers over the country are getting together with their neighbors and making grain collection a cooperative project in their church or community so that the Quakers may have grains with which to make the relief cereal.

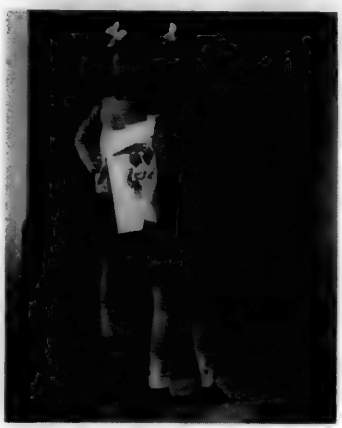
Others are making out checks to the American Friends Service Committee, and mailing them to the "Gifts-in kind Relief Office at 20 South 12th Street, Philadelphia, Pa."

A temporary branch office of the American Friends Service Committee is located at Quaker Hill, Richmond, Ind. Those interested in learning more about this relief project may write to either the Indiana or Philadelphia offices.

ENTERTAINS 100

The Cass County Home Bureau entertained 100 members and guests at a tea this fall at the Presbyterian church in Virginia. The County Executive board acted as hostesses with Mrs. R. B. Roher and Miss Donovan Hester, home adviser, presiding at the tea table. Guest speaker was Mrs. Loren Johnston, Altona, District Director for the West Central District of the Illinois Home Bureau Federation.—Mrs. Leo F. Devlin, Jr., Ashland, Cass county publicity chairman.

SWEATER SET FOR YOUNG MISS



This young miss wears miniature replica of a schoolgirl's sweater set. Long-sleeved pullover and wool skirt makes fine outfit for playtime. This smooth cardigan is handy, too, for extra warmth during cold winter months or coatless spring days. For free instructions enclose self-addressed stamped envelope to Women's Editor, IAA Record, 608 S. Dearborn St., Chicago 5, Ill.

MARKS 10TH YEAR

The Morgan County Home Bureau in celebrating its tenth anniversary of Home Bureau at its annual meeting had a special ceremony. The past county presidents planned a candle lighting ceremony in connection with a pageant depecting the progress and growth of Home Bureau during the past ten years in Morgan County.

Miss Pearl Barnes, president of the Illinois Home Bureau Federation, was the speaker.—Mrs. W. M. Bealmear, Morgan county publicity chairman.

BUY SAVINGS BONDS

The United States Savings Bond, with its guaranteed values, when held to maturity, pays a better return than any similar security anywhere, and the full faith and credit of the United States Government stands back of this Bond.

There is no stronger security anywhere in the world today.

During World War II, farm people put over 5 billion dollars into War Bonds.

The U. S. Treasury Department recommends that for a sound financial program, farmers should avoid speculation in land, keep debts at a safe level, hold War Bonds as long as possible and continue to build financial reserves in U. S. Savings Bonds.

Announcing NEW BLUE SEAL FEEDS

Our policy of continued quality improvement is reflected in the following array of New Blue Seal Feeds

POULTRYMEN

You will like our new Blue Seal feeds—they are formulated to give maximum production. These feeds include: a 30% Breeder Supplement and a 20% Breeder Mash for producing eggs of high hatchability, and an improved 30% Poultry Balancer for laying and growth. Our improved Grow Mash now contains 18% protein.

DAIRYMEN

Our Blue Seal Supplement has been improved in quality and is now available as a 34% protein feed.

CATTLEMEN

Blue Seal Steer Supplement is a high-quality feed containing 36% protein. This new Supplement is a combination of high-quality protein ingredients, well-balanced to give maximum and economical feeding gains.

HOGMEN

Our four modern Blue Seal Swine Supplements, while not new this season, continue to meet the nutritional needs of your swine as outlined by the "Illinois Plan" of feeding protein supplements.

DIRECT-TO-THE-FARM

Blue Seal Feed Distributors offer a Direct-To-Farm Service which saves time, expense, and eliminates "shopping around for feed." Adequate supply—Dependable delivery—Where you want it.

Distributed exclusively by 70 member companies affiliated with

ILLINOIS FARM SUPPLY COMPANY, CHICAGO

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

A NEW CHAPTER

By President Charles B. Shuman

THE year 1946 is a closed chapter in the history book of the ages. No matter how many mistakes have been made nor how many victories won, we can do nothing now to change the record. However, we once again have the opportunity to profit by the experiences of the past in looking forward to the new year. Three hundred and sixty-five unspoiled pages lie before us. What is to be written upon these clean pages depends, to a large extent, on our actions.

Organized farmers looking forward to the new year have, in recent annual meetings, adopted resolutions setting forth some things they hope to see accomplished in 1947. Agriculture is prepared to present an unselfish program for the good of all America and to challenge all other segments of our economy to join in support. Farmers insist that labor and industry cease their senseless conflict which, during recent months, has threatened to destroy our democracy. Voluntary action by industry to assure the workers greater security and, in return, voluntary action by labor to give greater rather than less production per worker, could bring industrial peace. However, if this voluntary action is not taken, farmers will insist that the powers of government be used to bring an end to the confusion and conflict of recent months.

Reflecting the thinking of farmers from all sections and phases of agriculture, the resolutions adopted by voting delegates of the American Farm Bureau Federation and the Illinois Agricultural Association deal with many other problems facing America. The development of monetary and fiscal policies to stabilize the general price level; the establishment and maintenance of a proper relationship among prices of agricultural and industrial products; the correlation and acceleration of the soil conservation program, and the stabilization of international relations in the interest of world peace are a few of the important problems upon which farmers hope progress can be reported when the pages of the year 1947 are recorded.

These are national problems but we can all help in their solution. If the program of organized agriculture is right, it can be put into effect only if aggressively supported. In 1947 we need the best thinking and the best cooperation that farmers can give their organization. It is not enough to hold our own; we must build an even stronger Farm Bureau.

In bringing you this first message of the new year, it is my sincere wish that happiness and progress will mark your path through 1947. May we help to make this year a better and brighter chapter in the history of the world.

NEW
BLUE SEAL FEEDS

Our policy of continued quality improvement is reflected in the following array of New Blue Seal Feeds

POULTRYMEN

DAIRYMEN

CATTLEMEN

HOGMEN

DIRECT-TO-THE-FARM

Blue Seal Feed Distributors offer a Direct-To-Farm Service which saves time, expense, and eliminates "shopping around for feed." Adequate supply. Dependable delivery. Where you want it.

Distributed exclusively by 70 member companies affiliated with
ILLINOIS FARM SUPPLY COMPANY, CHICAGO

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to improve agriculture.

THE STATE FARM BUREAU PUBLICATION

A NEW CHAPTER

By President Charles B. Shuman

THE year 1946 is a closed chapter in the history book of the ages. No matter how many mistakes have been made nor how many victories won, we can do nothing now to change the record. However, we once again have the opportunity to profit by the experiences of the past in looking forward to the new year. Three hundred and sixty-five unspoiled pages lie before us. What is to be written upon these clean pages depends to a large extent, on our actions.

Organized farmers looking forward to the new year have, in recent annual meetings, adopted resolutions setting forth some things they hope to see accomplished in 1947. Agriculture is prepared to present an unselfish program for the good of all America and to challenge all other segments of our economy to join in support. Farmers insist that labor and industry cease their senseless conflict which, during recent months, has threatened to destroy our democracy. Voluntary action by industry to assure the workers greater security and, in return, voluntary action by labor to give greater rather than less production per worker [illegible] industrial peace. California Trek First Vacation in 5 Years for Many

By CRESTON FOSTER

IAA RECORD EDITOR

IT WAS a grand trip!

That's the feeling of some 600 Illinois Farm Bureau folks who traveled 6000 miles on two special IAA trains to the AFBF convention at San Francisco and back.

In fact, some folks were so pleased with the junket that they wanted to know whether the IAA was planning on sponsoring another trip in 1947. Even when it was pointed out that the 1947 AFBF annual meeting would be held in Chiago, these folks said they would like to have a special trip either before or after the convention.

Credit for the planning of the special trip is due a number of folks, but particularly, Roy Johnson, IAA director of special services; Paul Mathias, IAA secretary, and Charles P. McEvilly, city passenger agent, Illinois Central railroad.

As is the case with most special trains operating over such a long route with many side trips, there were some minor disruptions in the schedule, but the Farm Bureau travelers took them in their stride. Railroad personnel assigned to the special trains reported that in all their long years of supervising special convention trains they had never had a finer group of people. "These folks enjoy themselves so much that the feeling of good fellowship is contagious," they said.

And there was good reason for these farm people enjoying themselves. For most everyone it was the first trip since before the war, and for many it was their first long journey since their honeymoon.

Only sad note of the entire trip was the death of one of the party, Chris A. Vercler, 70, father of Ralph Vercler, who is a member of the board of directors of the Illinois Grain Corporation. Mr. Vercler died suddenly in his hotel in San Francisco Thursday morning, Dec. 12. That was the day on which the special train started on its return trip. Mr. Vercler was prominent in Farm Bureau work in Tazewell county and in the Washington Farmers Cooperative Grain and Elevator Company. Funeral services were held Dec. 18 in Washington, Ill.

For most it was the first real vacation in many years. With their sons back from the service there was some one at home to take care of the chores.

Take Mr. and Mrs. Louie Husser of Ladd, Bureau county, for example. Their son, Ray, was back from the service after serving in New Guinea, Luzon and Japan, and they were able to leave the farm in his hands. It was their first really long trip since they were married 35 years ago. They celebrated their 35th wedding anniversary on Dec. 13. What did they think about the trip? "It was wonderful! We didn't know it would be anything like this," they said.

Then there were two other couples who were celebrating their 50th wedding anniversary on the trip. They were Mr. and Mrs. Nottingham, Pleasant Plains, Sangamon county, and Mr. and Mrs. B. F. Hoover, Morrison, Whiteside county. Mr. and Mrs. Frank Rathbun, Aledo, Mercer county, were celebrating their 40th wedding anniversary. There were probably others celebrating wedding anniversaries, and a number who had "Happy Birthday" sung to them.

Singing was a popular pastime on the train. Mrs. Charles Conway, Reynolds, Mercer county, wrote a special song for the group entitled "We're From Illinois." Practice sessions were held in the observation car and upon arrival in San Francisco, a large delegation of Illinois members sang the song before the convention audience.

This was the first real trip for Mr. and Mrs. Conway since their honeymoon 30 years ago. "All our family is grown now," Mrs. Conway said, "and our youngest, Charles Francis, 15, is a sophomore in high school. So this is our first real chance to take a long trip as James is back from the Army and is looking after the farm."

Then there was Dan Bergman, Jr., of Palatine, Cook county, who said that this was his first trip out of Illinois. He had made several trips to St. Louis, but he didn't really count that as being much outside of the state. His wife who made the Frisco trip with him had been out to the Coast in 1940, but he had been too busy on the farm to accompany her. Bergman farms the homestead settled by his grandfather. Bergman's father, who expects to celebrate his 95th birthday in April, farmed the homestead for 70 years.

Bergman, like most of the people on the special trains, first read about it in the IAA Record. "I'm glad that I made the trip," he said, "because I've never experienced anything like it."

These people were typical of those who made up the caravan. No group was more entitled to real vacation. They had overcome every obstacle to establish the greatest production records in wartime. They had served their country in time of need valiantly and without stint.

What was the best part of the trip? There is probably a lot of different answers to that question. The editors of the IAA Record would like letters to see what the folks on the trip thought.

But from the agricultural standpoint, the high point of the trip was the irrigated farm lands in the Salt River Valley in Arizona. Busses took train passengers for a 50-mile tour of the area in the vicinity of Phoenix. This area, once a desert now is lush with citrus groves, truck gardens, and rich pastures.

Inquiries revealed that the land had an asking price of $1000 per acre. Along the route a stop was made at orange and date groves and at a lettuce packing shed. Five thousand cars of lettuce move out of the Phoenix area annually. Lettuce not suitable for marketing is used for dairy cattle feed.

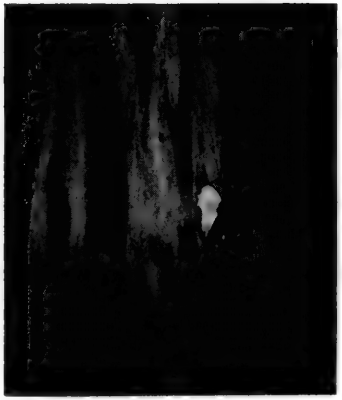
For the novelty side of the trip, Los Angeles and Hollywood perhaps were the most interesting. Trips were made to the broadcasting studios in Hollywood where folks saw in person their favorite radio entertainers. Mrs. L. A. Barrow, Gibson City, Ford county, got the wishing ring on Tom Breneman's breakfast broadcast, Mrs. Wilson Johnson received a compact on the "Meet the Missus" program. Others attended "Truth or Consequences" and other broadcasts. At Phoenix, passengers on the first section of the special train appeared on a radio broadcast from the station, and also had their picture taken. This picture was carried by the Associated Press Wirephoto service to Illinois newspapers.

From El Paso, busses took the group on a 172-mile trip to the Carlsbad Caverns, another high point on the trip. As one traveler said to her husband as they toured the caverns, "Dad, this sight alone is worth the price of our ticket."

There were many other highlights enjoyed. The view of the snow-capped mountains, the cotton-picking in Texas, cattle on the range in Colorado where many Illinois farmers buy their feeders, the old French district and open market in New Orleans, the historical Alamo in San Antonio, the dinner in Juarez, Mexico, where folks bought souvenirs, the Mormon Tabernacle in Salt Lake City where an organ recital was given for the visitors. And last but not least the four days spent in 'Frisco at the convention and sightseeing. Yes indeed, it was a grand trip.

21. HERE'S HOLLYWOOD BOWL,

22. SO, THIS IS A GIANT REDWOOD.



23. FRISCO, WE ARE HERE!

24. GEE, I ALMOST FORGOT, WE CAME FOR THE CONVENTION.

And last but not least the four days spent in 'Frisco at the convention and sightseeing. Yes indeed, it was a grand trip.

WHAT'S AHEAD?

5,000 Farmers Try To Find Answer To This Question Facing Agriculture, at San Francisco AFBF Convention

By CRESTON FOSTER
IAA RECORD Editor

WHAT'S ahead for American agriculture?

That was the biggest question in the minds of farmers from 45 states and Puerto Rico as they met in San Francisco for the largest convention ever held by the American Farm Bureau Federation. Official registration was 5,000 with more than 650 from Illinois, but hotel agencies in the convention city reported 9,000 reservations filled.

It was the biggest convention San Francisco had seen in some time and no doubt labor and industry groups of that area were impressed with the united strength of Farm Bureau.

Throughout the sessions it was pointed out that today the farmer is receiving a relatively fair price in the market place. He has established a production record second to none. But he's wondering what's ahead. While industry and labor are talking about higher prices, a number of expert economists are making the headlines with their forecasts of a slump in farm prices.

It is indeed a strange phenomenon. Here is agriculture, the one and only group that has consistently fulfilled its responsibility by producing to meet current needs. And, if the experts are right, agriculture is the one group that is going to be penalized with lower prices for increasing production 30 per cent over pre-war.

The farmer would like to continue his full production schedule, but he wonders if labor and industry will restrict their output a few years hence when supply catches up with demand. Industry has done that before and it may do it again.

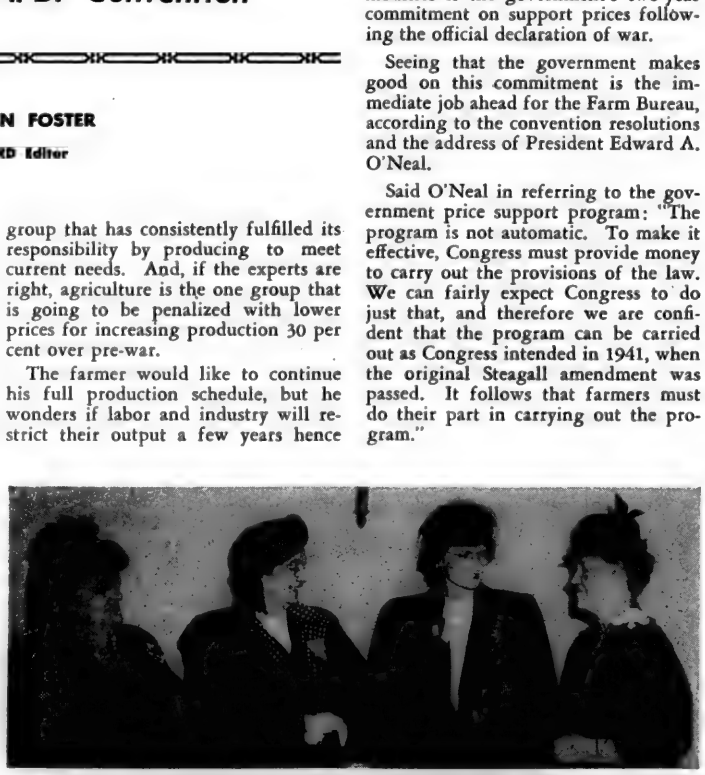
There are several factors in the picture, however, that were not present after the last World War. First is the present day strength of the Farm Bureau.The annual meeting report showed the American Farm Bureau Federation to have 1,128,259 farm families in 45 states and Puerto Rico in 1946. Based on USDA estimates of 4.1 members in the U. S. average farm family, this figure represents more than four million people in the Farm Bureau, making it the largest farm organization in the country.

That Farm Bureau membership is going to be a potent influence in the days ahead. However, there is an ever-increasing need for greater organization and enrollment under the Farm Bureau banner. This is apparent in view of the huge membership of organized labor and the strong influence exerted by industry.

The other factor that is expected to soften the price decline of farm commodities is the government's two-year commitment on support prices following the official declaration of war.

Seeing that the government makes good on this commitment is the immediate job ahead for the Farm Bureau, according to the convention resolutions and the address of President Edward A. O'Neal.

Said O'Neal in referring to the government price support program: "The program is not automatic. To make it effective, Congress must provide money to carry out the provisions of the law. We can fairly expect Congress to do just that, and therefore we are confident that the program can be carried out as Congress intended in 1941, when the original Steagall amendment was passed. It follows that farmers must do their part in carrying out the program."



Chatting with Mrs. Charles W. Sewell, right, of the Associated Women of the AFBF, at the annual meeting are, left to right, Mrs. Jennie Hack, Ford county; Mrs. Nettie Billerback, Livingston, and Mrs. Elmer Whidhelm, DeWitt.

"Should it be necessary, farmers must demonstrate their cooperative spirit and their good faith by cooperating in whatever acreage adjustment programs are called for."

The resolutions also asserted that the Farm Bureau will "resist any attempt to destroy the parity concept. . .It is the position of the Farm Bureau that for the Steagall support price period the present parity formula should be used in administering the support price program for most agricultural products. . . For certain non-basic commodities such as livestock and dairy products, however, some revision is needed in the parity formula for administering the support price program. It is recognized by the American Farm Bureau Federation that the parity formula should be modernized to become effective at the end of the Steagall support-price period.

"We earnestly request that the proper agencies of the Land-Grant colleges and the Department of Agriculture give serious study to strengthening the parity formula so that it will be sound, practicable, and workable in meeting the needs of agriculture during the postwar period.

"After such plans have been developed, we request that conference be held among the leading farm organizations and steps be taken to have a definite revised parity plan ready for operation at the close of the Steagall support-price period."

Considering the broad objectives of the Farm Bureau in the years ahead, President O'Neal said the first job for farmers to strengthen their organizations still further. . ."Our strength has been tremendously augmented in recent years, but that strength has not been tested in fires of adversity," President O'Neal said.

The AFBF leader also declared that "We intend to insist that the ever-normal commodity loans and price-stabilization features of the old farm program be continued, because they

Illinois Takes Big Share of INTERNATIONAL HONORS

By LEW REISNER

IAA RECORD Field Editor

ILLINOIS showmen with their blooded stock and samples of plump grains captured more than a fair share of the championship crowns at the 47th International Livestock Exposition held early in December at the Union Stockyards Amphitheatre in Chicago.

City folks who viewed the blue-bloods from the nation's farms with a mingling of awe and envy saw more than 10,000 prize cattle, sheep, hogs and horses valued at $5,000,000 parade before experienced judges.

Champion junior showmen, the 4-H kids from prairie, range and plantation country, felt for the first time the glare of limelight as reporters, photographers and newsreel cameramen exposed them to quick bursts of publicity.

Throughout the show Illinoisans upheld their state's prestige as a producer of hogs and grain by winning more than their share of blue ribbons in these two divisions.

One of the three big honors in the junior division was won by Bill Worthington, a 19-year-old, one-armed farm youth from Pontiac in Livingston county.

Bill showed his 228-pound Hampshire barrow, "Mike," through the junior swine divisions to win the grand champion award in the barrow class.

Young Bill, an uncrowned hero of the livestock show, lost his arm at the elbow last April when a shirt sleeve caught in the power take-off of a pulverizer plow.

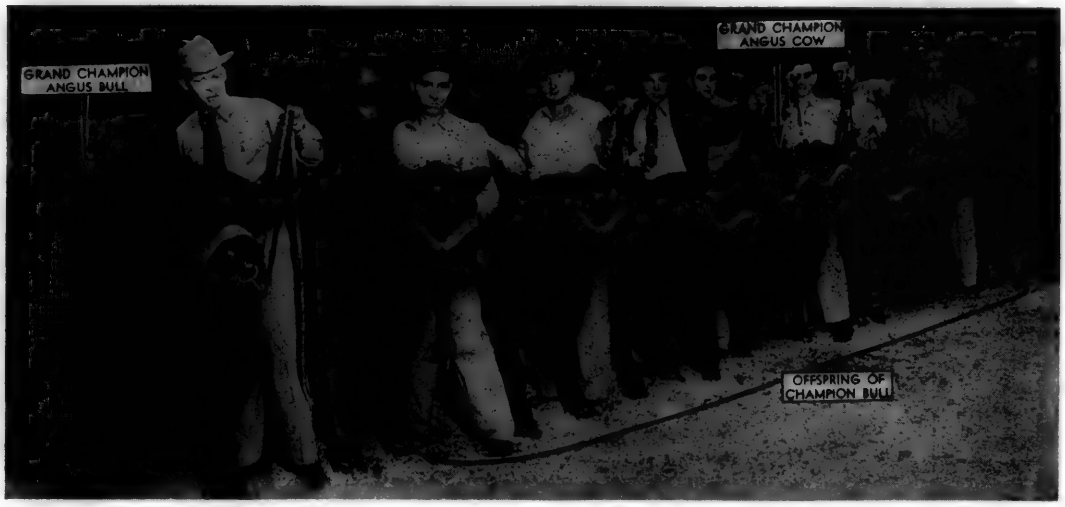
Worthington, a veteran 4-H club showman, said he fed "Mike" on corn, oats, buttermilk, minerals and Blue Seal protein supplement. Blue Seal feeds are sold by the Illinois Farm Supply Company, and Gordon Worthington, Bill's father, is a Livingston County Farm Bureau member.

Illinois won top soybean honors when H. L. Stiegelmier (above) of McLean county was declared the show's soybean king.

Herefords, a new breed of hogs developed largely in Illinois, were shown at the International for the first time this year, and in the fat Hereford swine contest, the champion barrow title went to Yalehurst Farms, Peoria, and the reserve championship to Stephen Ashley of Yorkville.

Reserve Corn King champion went to Edward W. Doubet, Hanna City, who showed a yellow dent hybrid variety. He is the Illinois corn breeder

(*Continued on page 29*)



It takes a good strain to produce champion stock. Here's the proof. Grand champion Angus bull, Elleenmere 500, and his offspring, exhibited by J. Garrett Tolan of Pleasant Plains, Sangamon county, were chosen as best group of 10 Aberdeen Angus at Chicago's International Livestock Exposition. One of his daughters, Blackcap Tolan 150, was judged grand champion Angus female.

PLAN COMPLETE SERVICE WITH NEW LOCKER PLANTS

BY FRANK A. GOUGLER
Director, Produce Marketing

WHEN the first cooperative locker plants were built during the late thirties, boards of directors and managers had in mind the rendering of two major services. One service was to provide lockers in which patrons could store their frozen meats, fruits and vegetables; and the other service was the processing of these products.

After a few years it was learned that many patrons were eager to have their lard rendered and hams and bacon cured and smoked. Early constructed plants provided neither space nor equipment for rendering these services. Plants constructed more recently are carefully planned so that these services can be rendered efficiently and to the complete satisfaction of patrons.

During the past few years other new services have been requested. One in which there appears to be wide interest is that of slaughtering animals for producers.

The first locker association to build such a plant is the Henry County Cold Storage Locker Service. The building as first constructed was a concrete block building 20′ x 52′, costing approximately $7,000.00 including equipment. Recently the building has been enlarged providing 500 sq. ft. more room so the slaughtering service can be done more efficiently. Another service that will be provided is that of dressing poultry. A dozen locker companies are now providing slaughter service. Half of these are built independent of locker plants while the others are a part of the locker plant.

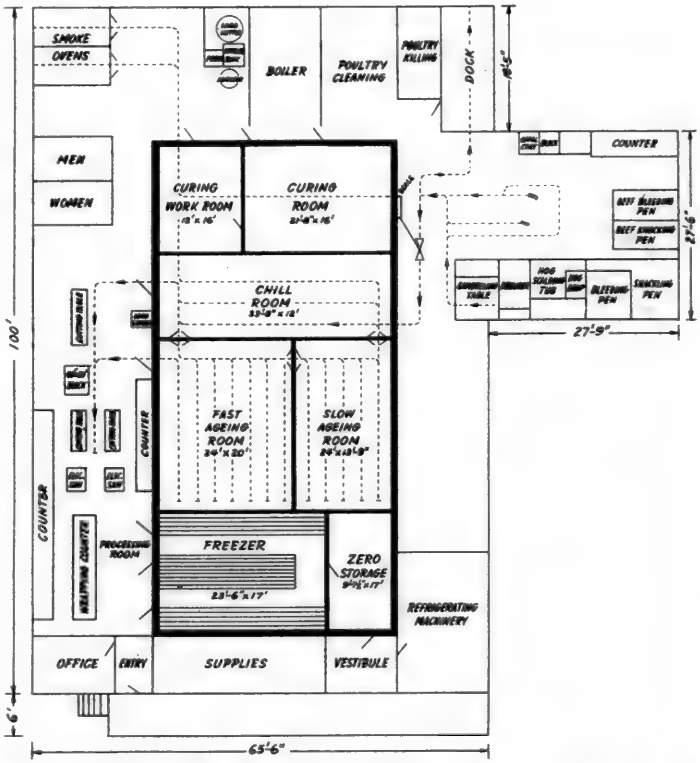
Once building materials are available and construction costs reasonable most of our cooperative associations will provide some kind of slaughter service. Many towns and cities have ordinances which prohibit the building of a slaughter plant within the city limits. A zoning board in one county has blocked every effort the locker board has made toward locating a slaughter plant.

A number of associations operating several locker plants are planning on concentrating their entire operation at one central point. To bring this about it is necessary to build a rather large structure wherein all slaughtering, processing, freezing, lard rendering, curing and smoking will be done under one roof. After the products are sharp frozen they will be moved by truck to the various locker plants.

This type of operation contemplates providing other services to patrons such as trucking the live animals from the farm to the central plants by operating pick-up truck routes on designated days and established routes. The dressing, processing and sharp freezing of poultry is included in the plan.

Boards of directors and management interested in building a central slaughter-processing plant are of the opinion that processing can be accomplished more efficiently in such a central plant than in several local plants. Furthermore, space now used in each locker plant for ageing, curing, smoking, etc. can be converted into additional locker space, thus the demand for more lockers can be satisfied.

At the present time the first such plant to be constructed is nearing completion for the Macoupin Locker Service. The plant is located about eight miles west of Carlinville. By the time this plant is completed this association will have more than 3500 locker patrons who will appreciate these services. Some of these services will be extended to non-patrons, stores, restaurants, etc. Numerous other locker associations are interested in establishing similar services and are only delaying the project until conditions become more favorable for building and the purchase of equipment.



Under construction about eight miles west of Carlinville is a slaughter-processing plant along the lines indicated in the above drawing. The Macoupin County Locker Service now operates three locker plants and is building its fourth as well as expanding the Carlinville plant. When this slaughter-processing plant is completed, all slaughtering, processing, sharp-freezing, rendering, curing and smoking will be done here. Chill and aging rooms in present plants will be converted into locker rooms. Finished products will be trucked from slaughter-processing plant to the several locker plants.

YOUR MONEY

Takes a Ride

By L. H. SIMERL, Director,
IAA Research Department

LAST November you went to your polling place and voted for local, state and national officials. You and the other voters in your senatorial district elected one state senator and three state representatives.

These persons together with 150 others similarly elected in other districts go to Springfield early in January. They will be members of the 65th General Assembly of the State of Illinois. The Assembly probably will continue in session through June 30, 1947.

While in the Capital city, the state legislators will make appropriations to carry on state affairs for the next two years. These appropriations may approach a total of a billion dollars. You and your family, your neighbors and fellow citizens of Illinois will have to pay taxes to meet those appropriations.

You'll have to pay every time you buy something to eat or to wear. You'll have to pay whenever you make a purchase for the farm or home. You'll pay and you'll pay and you'll pay.

No one escapes state taxes. The biggest state tax is the "sales tax." Officially, it is a retailers' occupational tax, but dealers are permitted to pass the cost of it on to the consumers. The state collects two per cent on all retail sales. Most retailers, however, charge a minimum of one cent for "tax expense" on all purchases of 15 cents and up. When little Johnny and Mary buy a 15-cent ice cream soda, there's usually an extra penny charged for tax expense. On such small purchases the cost to the purchaser figures out to be nearly seven per cent. The sales tax costs Illinois residents more than 120 million dollars a year.

The next largest state tax is the "gasoline," or motor fuel tax. The motor fuel tax is three cents a gallon. That's 30 cents every time it takes 10 gallons to "fill 'er up." For this tax alone, automobile and truck owners in Illinois are paying about 44 million dollars a year.

In addition to the gasoline tax, automobile and truck owners pay around 25 million dollars a year in the form of vehicle license fees. The fee for most small cars is $10.50, and the cost is proportionately greater for larger cars and trucks.

Liquor taxes cost state residents about 28 million dollars a year. Cigarette taxes take another 17 million dollars. In addition to these, there are inheritance taxes, indirect taxes paid through public utilities, unemployment compensation taxes, and several other state taxes.

It should also be remembered that a substantial part of the income tax and other federal taxes collected from Illinois citizens is returned to and spent by the state. All together the typical Illinois family of four persons pays nearly $200 a year to meet state expenditures.

State taxes go for many different purposes. The 1945 General Assembly passed about 125 different appropriation bills. Most of the money, however, goes for welfare, highways, education and general government.

The lion's share of state funds goes for public aid and relief. Appropriations for these purposes for 1945-47 totalled 248 million dollars. Old age pensions require more than one-half of the total relief funds. Part of the money for relief is obtained from federal grants.

Last year an average of about 250,000 persons received relief checks each month. Of these, approximately 125,000 received old-age pensions, 50,000 received general relief, 70,000 were dependent children, and 5,000 received blind pensions. There is a constant de-

(*Continued on page 22*)

IAA TAX STATISTICIAN RETIRES AFTER 26 YEARS

ONE of the IAA's stanchest champions and best-loved workers retired the other day after more than 26 years of faithful service to the farmers of Illinois.

He is John C. Watson, pioneer farmer's son turned teacher, classics scholar, statistician, farm manager and for nearly two decades director of taxation and statistics for the IAA.

Like his work in tax statistics aiming at giving Illinois farmers an even break on tax assessments in relation to assessments levied against other groups, there is nothing flamboyant in Mr. Watson's personal makeup.

Ph.D. in Classics

Typical of his friendly unassuming ways is his attitude toward his titles of professor and doctor. For although he has earned both the hard way in the study and teaching of classical philology, Mr. Watson made it clear in his early days with the IAA that just plain John was what he liked best and that's the way it has been. Although the younger members of the IAA staff, impressed by his distinguished record, can't help but address him as "Mr. Watson."

In presenting a gold watch to Mr. Watson as a token of remembrance on behalf of the IAA staff, IAA Field Secretary George Metzger described the Watson IAA career in a capsule when he said: "Where the interests of Illinois farmers were concerned, John Watson could pound county board of review tables with the best of them."

Born Near Ludlow

Before coming to the IAA, Mr. Watson had a long and notable career as an educator. He was born near Ludlow in Champaign county Jan. 9, 1869, on an 80-acre farm purchased by his father for $14 per acre.

His 98-year-old mother still lives in Urbana and may be the oldest Farm Bureau member in the state. She has held membership in the Champaign County Farm Bureau for several years.

Mr. Watson attended rural school when he wasn't helping his father on the farm, graduated from Eureka college in 1887 and studied the following two years at Harvard university.

Following the completion of his studies at Harvard, he was married to his Eureka classmate, Edna Hamilton of Harristown, and began his teaching career at Menominee, Mich.

Later he taught at Chicago's Lake View High School, and in 1899 returned to Harvard to do graduate work in classics.

After receiving the degree of doctor of philosophy in 1902, he taught Latin at Cornell university for five years, then farmed for three years near Minot, N. D. With only two total crop failures in 40 years, Mr. Watson still considers his North Dakota farm as good an investment as the Champaign county farm he inherited from his father.

In 1910 he quit active farming to teach Greek at the University of Nevada and serve as first dean of the College of Liberal Arts and Sciences. The hopeless illness of his father caused him to return to Illinois, leaving Reno, as he has often remarked, with the same wife he had when he went there.

John C. Watson (left), member of the IAA staff for more than a quarter of a century, is presented with a gold watch by IAA Field Secretary George E. Metzger on his retirement from the research and taxation department.

Returning to Champaign county, Mr. Watson managed his own and his mother's farms and operated the North Dakota farm for the last two years of World War I.

When the late Herbert W. Mumford, later dean of the University of Illinois College of Agriculture, took a leave of absence to become director of the newly established IAA department of livestock marketing, Mr. Watson heard he was looking for an analyst of livestock statistics. Soon after, on May 17, 1920, to be exact, he started working for the growing organization he stayed with for the next 26 years.

Appointed director of the IAA department of taxation and statistics in January, 1923, Mr. Watson became familiar to farmers in virtually every county of the state which he visited many times during his stubborn fight for tax equalization.

Made Assessment Tests

He presented strong evidence of inequity in state valuations to the State Tax Commission in 1922. The commission was asked to make heavy reductions in valuations of lands for state purposes, and as a result for the first time the tax commission accepted the evidence but granted only a six per cent cut.

The following year he started tests of assessments as between rural and urban property in the state. In that year these tests were made in 56 counties and in most, though not all, inequalities, often gross, were found between the average assessment ratios of lands and town lots. In all cases the County Farm Bureaus, with Mr. Watson assisting, presented this evidence to the county boards of review. Lower assessments followed in many cases.

Serves as Adviser

Mrs. Watson died in 1944, 29 days before she and her husband planned to celebrate their golden wedding anniversary.

They were the parents of three children: Mrs. Constance W. File, Indiana, Pa.; Malcolm H. Watson, Fresno, Calif.; and Mrs. Beatrice W. Tourtebatte, New York City.

He has three grandchildren: Robert W. File, Houston, Texas; James C. File, a student at the University of Chicago, who lives with Mr. Watson; and Mrs. Janet Watson Snively also of Chicago.

He retired from the directorship of the department of taxation and statistics in 1941 but remained as an adviser on taxation and school problems.

Mr. Watson retires from the IAA in good health, and with an eager interest in some of his later studies which he plans to continue.

For this purpose and the continuance of his pleasant association with his many friends, he has gratefully accepted the offer of a desk and a bookcase and secretarial service in the office of the Association officially given him by President Shuman and the board of directors.

Summary of **RESOLUTIONS** Adopted by

Foreword

With confusion and unrest prevailing throughout the world, and much of humanity despairingly searching for some bedrock of principle upon which they may place their trust, the United States of America, which emerged from the war as the leading nation of the world, must assume the fateful responsibility of world leadership.

To faithfully discharge the obligations which that position of leadership imposes we must first of all put our own house in order. Today we are on trial before all the nations of the world.

The overwhelming economic need today is production, and ever more production, to create the goods and services without which civilization cannot make further progress.

The future welfare of the entire world is in peril. Spiritual progress awaits economic recovery. The hour grows late. May we, in Christian humility, and in devotion to the principles that have made America great, so conduct ourselves that we may attain, and hold for all time to come, the position of world eminence that destiny has so clearly marked for us!

International Cooperation

The farmers of the American Farm Bureau Federation re-dedicate themselves to the nation's task of leading a war-torn and war-weary world to peace and security.

At this crucial stage in world history, our nation today occupies a strategic position of world leadership.

If we are to meet these responsibilities successfully, we must maintain our strength and play our full part in world affairs.

The American Farm Bureau Federation has supported and will continue to aggressively support the full participation of the United States in the United Nations Organization.

We particularly commend the policy of our government in providing for bi-partisan representation of Congress in the United States delegation to the United Nations. We urge that this bipartisian national unity in foreign affairs be continued and that the same policy be extended to the activities of our government in dealing with international economic problems and conferences.

Immediate steps should be taken by United Nations members to develop and put into operation effective plans for an international military police force, as provided in the United Nations Charter, to maintain and enforce the peace.

An integral component for winning the peace must include a workable plan for the control of atomic energy, guided missiles, and deadly bacteria.

Similarly, practical plans should be developed by the United Nations for the reduction and control of armaments. Such plan must be binding on all nations.

To be effective, plans for the control of atomic energy and for the reduction and control of armaments must be accompanied by adequate provisions for international inspection and enforcement measures by the United Nations Organization. Care must be exercised that the veto power not be used to nullify the effectiveness of this system of inspection and enforcement.

Greater attention should be given to the development of international laws to provide a legal foundation for the peaceful and just settlement of international disputes.

We have supported, and will continue to support, the full participation of the United States in the International Bank, the International Monetary Fund, the Economic and Social Council, the Food and Agricultural Organization, and other essential international organizations dealing with international economic and social problems.

We heartily approve the policy adopted by the President and the Department of State in appointing representives of farm organizations as advisers and full members of the United States delegations to international conferences at Mexico City, Caracas, Quebec, and Copenhagen.

International Trade

With farm production nearly one-third above prewar production, agriculture more than ever needs an expanded volume of foreign trade to absorb its output. Industry needs it to maintain full employment.

A greatly expanded trade in essential goods and services on a sound basis is a primary perequisite to maintaining world peace.

The American Farm Bureau Federation favors gradual adjustment of trade barriers, including tariffs, import quotas, currency manipulation, restrictive rulings on product specifications, and elimination of cartels and other monopolistic devices to facilitate trade.

To discharge faithfully our great responsibilities as the leading nation of the world, we must adopt foreign policies which encourage industrialization of other nations. The International Bank should make loans for this purpose.

We are sympathetic to the announced principles of the proposed international trade organization, insisting, however, that agriculture be given a voice in making its policies.

We urge our officers and directors to study the problem of stablizing prices of major farm commodities entering world trade, as well as the use of surplusses to relieve malnutrition and human suffering; and to confer with farm organizations of other countries on these matters.

We believe the use of international commodity agreements, coordinated under an appropriate international agency, within which agriculture has adequate representation, will be helpful in dealing with agricultural surplusses. Immediate action on this front is essential to handle surpluses which are now in prospect.

We reiterate our support of the principles of reciprocal trade agreements. It has been long recognized that our protective policies have worked undue hardships on agricultural producers. We must face the fact that farm products constitute a shrinking percentage of our total exports and a growing percentage of our total imports. In administering the trade agreements program, equitable treatment in adjusting trade barriers must be given agricultural products.

Foreign trade is essential to bring about a sustained high level of employment, an expanded volume of production, and an increasing standard of living in this nation.

Farm Program

The future pattern of production and distribution of agricultural commodities is of paramount importance to all farmers. It is extremely important that the gains which have accrued to farmers as a result of basic agricultural legislation enacted in the past be preserved. It is equally important that American farmers, through their farm organizations and representatives in Congress, strive for the strengthening of these laws which are the foundation of our agricultural programs. Every possible step must be taken to prevent the agricultural economy from again experiencing a debacle, such as followed World War I. An agricultural economy with the uncertainties, hardships, and deprivations of the late 'twenties and early 'thirties, cannot again be tolerated.

We recognize the necessity for adjustments in the agricultural program to meet changing conditions. We urge that thorough studies be undertaken immediately of programs for basic agricultural commodities and other commodities to determine what improvements and modifications are required in order to develop a permanent long-time agricultural program that will be more nearly self-sustaining and which will effectively assist in correcting the basic causes of disparity between agriculture, labor, and industry.

Farmers believe in an economy of abundance and stand ready to join with industry and labor to achieve maximum production and maximum employment through price policies and wage policies which are geared to a maximum level of consumption.

Whenever surpluses approach unmanageable proportions, it is imperative that farmers have necessary machinery to control and adjust these supplies to total demands of markets so as to prevent the wrecking of farm prices, the destruction of farm purchasing power, and the resulting unbalanced national economy.

The American Farm Bureau Federation believes in the principles and objectives of soil conservation, acreage adjustments, and marketing quotas when needed, commodity loans and surplus disposal, as provided by basic agricultural legislation. We favor the continuation of crop insurance, but urge its use only with regional adjustments and on sound actuarial basis.

We insist that the life of the Commodity Credit Corporation be extended. Sufficient funds must be made available to carry out the loan, support, and other programs authorized by law. We are opposed to the use of CCC or other public funds for consumer subsidies in lieu of fair prices.

We urge that the Agricultural Marketing Agreements Act in 1937 be strengthened to permit the use of marketing agreements and orders when the average farm price of a commodity is above parity where necessary to establish and maintain minimum standards of quality, maturity, and inspection requirements for agricultural commodities. We further recommend that the provisions of the Marketing Agreements Act be extended to all agricultural commodities whenever the producers of any agricultural commodity desire to utilize the provisions of this Act.

We insist that the Government's com-

mitment to farmers to maintain the present mandatory commodity loan program for the basic crops during the two-year period following the official termination of the war emergency be fully carried out.

We further insist that the integrity of the Steagall Amendment, committing the government to support the prices of non-basic commodities, for which increased production was requested during the war, at not less than 90 per cent of parity or a comparable price for this same two-year period be maintained. We insist that the intent of Congress requires that the support price for such commodities shall be a minimum of not less than 90 per cent of parity or comparable price, adjusted for seasonal, geographic, and grade differentials, in the market place at all times during the marketing season.

We recognize, however, that in some cases the support price program will necessarily need to be contingent upon compliance with production quotas, or other mechanism to prevent excessive production to the end that unnecessary governmental costs be avoided.

We advocate the immediate removal of price ceilings from the agricultural commodities on which price ceilings are still in effect.

Parity

We believe the parity principle has made a valuable contribution to American agriculture. The American Farm Bureau Federation will resist any attempt to destroy the parity concept. In previous resolutions we have recognized the need for adjustments in certain commodities and have recommended that steps be taken to develop a plan that will give equitable treatment to livestock, livestock products, dairy products, and any other agricultural commodity that is not treated fairly under the present parity formula.

It is the position of the American Farm Bureau Federation that for the Steagall support price period the present parity formula should be used and administered the support price program for most agricultural products. Since we believe it is the solemn obligation of government to fulfill its postwar support price commitments, which are based upon the present parity formula, we will resist any widespread attempts either to raise or lower the basis of these commitments. For certain non-basic commodities such as livestock and dairy products, however, some revision is needed in the parity formula for administering the support price program.

We earnestly request that the proper research agencies of the Land Grant colleges and the Department of Agriculture give serious study of strengthening the parity formula so that it will be sound, practicable, and workable meeting the needs of agriculture during the postwar period. After such plans have been developed, we request that conferences be held among the leading farm organizations and steps be taken to have a definite revised parity plan ready for operation at the close of the Steagall support price period.

Coordination of Government Agencies

The American Farm Bureau Federation is vitally interested in all farm programs promulgated by any Federal agency. It is thus imperative that farmers should have a voice in the development and administration of such programs, and that each program be efficiently and economically operated. We believe this objective may best be accomplished by farmers in each state and county developing and carrying out programs to meet their particular needs and conditions. A minimum of centralized control over agricultural programs from Washington is absolutely essential.

The size of our national debt and the resulting tax burden demands the cooperation of all groups in eliminating duplication, overlapping and unnecessary expense in governmental operations. The Department of Agriculture is one of the largest of the governmental agencies and farmers stand ready to support action designed to reduce to a minimum any unjustifiable expenditures of Federal funds in programs administered by this executive department.

We believe it incumbent upon the Secretary of Agriculture, in the welfare of farmers and the operation of departmental programs, to consult with the representatives of bona fide farm organizations in establishing agencies and agency responsibilities to carry out agricultural laws and programs. For a score of years the American Farm Bureau Federation has fought for basic legislation and appropriations in order to establish programs designed to assure farmers an opportunity for efficiency in production, equality in distribution, and higher standards of living. The foundation of our position has been farmer participation in program planning and operation. We believe any separation of these functions to be unsound and that government administrators must not lose sight of this basic principle.

One of our major problems is to rebuild and conserve our soil. Today there are several different agencies engaged in soil conservation work. An appraisal of the progress being made reveals duplication and overlapping by these various agencies. We therefore strongly urge a program of conservation of soil, water, grazing, and forest resources designed to secure a maximum of conservation with a minimum of expense. That this may be accomplished, we urge decentralization of program planning and operation of conservation programs with authority and responsibilities placed in bona fide local, district, and state farmer committees.

We recognize that there is need for reorganization of the Department of Agriculture and for departmental reorganizations of the bureaus and agencies dealing with agricultural programs. We urge, however, that nothing be done by way of reorganization which materially changes the operations of the agencies handling the farm programs without first consultation by the Secretary of Agriculture with farmer representatives and organizaions.

Labor Relations

The American Farm Bureau Federation has always supported the legitimate activities of organized labor aimed at advancing the welfare of employees. We will continue to support the legitimate rights of organized labor. However, the American Farm Bureau Federation in clear and unequivocal language, insists that the rights of the general public are paramount to the rights of any one segment of our economy, whether it be agriculture, labor, or industry.

For a long period there has been widespread industrial strife, with ever increasing tendencies on the part of certain labor leaders and their labor unions totally to disregard the rights and welfare of all the people in these United States. Conduct that promotes the economic power and control of one group at the expense of the general public challenges the principles of our democracy.

The American Farm Bureau Federation urges that constructive legislation be enacted immediately to correct the present unbalanced and disorderly situation in the field of labor relations, and that there be developed a mature and stable national labor policy which both labor and management can respect and trust and which will effectively carry out the objective of harmonious relations between employers and employes, with resultant benefits to all segments of our economy.

Price Level Stability

A more stable price level is essential to the prosperity of agriculture and all other segments of the economy. When a material change in the general price level occurs, the prices of some products change more rapidly than others. This results in serious dislocations in the economy, particularly when the price level declines. Farmers, probably more than any other large group, are vitally affected by a change in the general level of prices.

We realize that greater stability of the general price level will not solve all our economic ills, but it is a prerequisite to developing workable agricultural programs. We likewise realize that many of the war-created inequities in the price structure will have to be corrected, and price relationships brought into a more normal balance before a program of greater stability can be made effective.

Although the use of new governmental techniques is involved in the proposals for adding greater stability to the price level, it should be recognized that control of the monetary, credit, and fiscal policies should rest in the hands of the Federal Government, as is prescribed by the Constitution. Therefore, the problem is not one of dele-

We insist that the Government's com-

ainment to farmers to maintain the present mandatory commodity loan program for the basic crops during the two-year period following the official termination of the war emergency be fully carried out.

We further insist that the integrity of the Steagall Amendment, guaranteeing the government to support the prices of the basic commodities for which acreage production was requested during the war, at not less than 90 per cent of parity or comparable price for this same two-year period be maintained. We insist that the intent of Congress requires that the support price for such commodities shall be at not less than 90 per cent of parity at the same time, allowing for such geographic and grade differentials in the market price at all times during the marketing season.

We recognize, however, that in some cases the support price program will necessarily need to be contingent upon compliance with production quotas or other safeguards to prevent excessive production, to the end that unnecessary accumulations be avoided.

We advocate the immediate removal of price ceilings from the agricultural commodities on which price ceilings are in effect.

Parity

We believe the parity principle has been a valuable contribution to American agriculture. The American Farm Bureau Federation will resist any attempt to destroy the parity concept. In previous resolutions we have recognized the need for adjustments in certain commodities and have recommended that steps be taken to develop a plan that will give equitable treatment to livestock, livestock products, dairy products, and any other agricultural commodity that is not treated fairly under the present parity formula.

It is the position of the American Farm Bureau Federation that for the Steagall support price period the present parity formula should be used and administered for support price program for most agricultural products. Since we believe it is the solemn obligation of government to fulfill its post-war support price commitments, which are based upon the present parity formula we will resist any widespread attempt either to lose or lower the basis of these commitments. For certain non-basic commodities such as livestock and dairy products, however, some revision is needed in the parity formula for administering the support price program.

We therefore request that the appropriate research agencies of the Land Grant colleges and the Department of Agriculture give serious study to strengthening the parity formula so that it will be sound, practicable and workable meeting the needs of agriculture during the postwar period. After such plans have been developed, we request that conferences be held among the leading farm organizations and steps be taken to have a definite revised parity plan ready for operation at the close of the Steagall support price period.

Coordination of Government Agencies

The American Farm Bureau Federation is vitally interested in all farm programs promulgated by any Federal agency. It is thus imperative that farmers should have a voice in the development and administration of such programs, and that each program be efficiently and economically operated. We believe this objective may best be accomplished by farmers in each state and county developing and carrying out programs to meet their particular needs and conditions. A minimum of centralized control of agricultural programs from Washington is considered essential.

The size of our national [illegible] adding to burden [illegible] groups in the nation [illegible] ing activities [illegible] cultural agencies. The Department of Agriculture is one of the largest [illegible] agencies and has [illegible] support action designed [illegible] programs unrelated [illegible] Federal funds in progress [illegible] agencies' patterns.

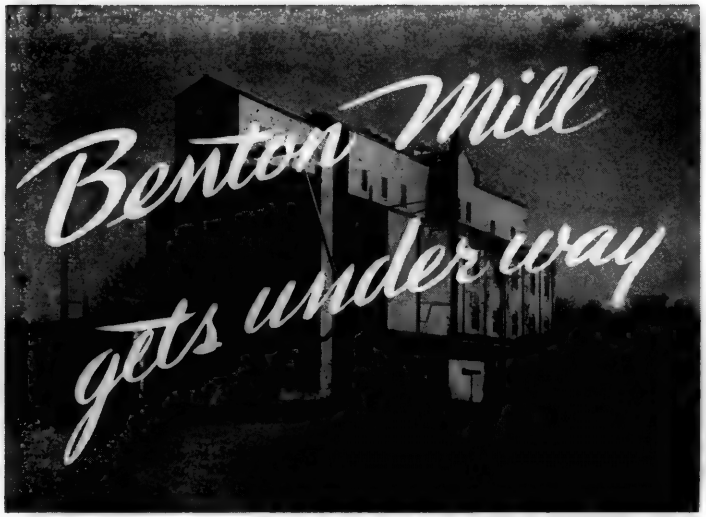
Labor Relations

The American Farm [illegible]

A California couple steps into the Illinois section to give a hearty welcome to the visitors who came to view the rodeo at the Cow Palace near San Francisco.



A NEW ERA of better and economical feed service for southern Illinois began Nov. 29 with the formal opening of the Illinois Farm Supply Company feed mill at Benton.

The new mill will supply patrons through 15 feed distributors who operate in 20 counties surrounding Benton.

At 1:20 p.m. Illinois Farm Supply President Fred E. Herndon closed the switch which set the wheels in motion and the first batch of Blue Seal feed went into production.

Sixty feed distributors, managers, directors and farm advisers from southern Illinois attended the formal opening.

During the inspection tour which followed, the first feed was put into production — a two ton batch of Blue Seal Hog Supplement. Visitors watched the weighing of each ingredient according to the formula written within the standards set by the quality control committee.

After the weighing process, the feed was dropped into the batch mixers to be thoroughly blended, then passed through conveying equipment to the automatic scales to be weighed, bagged, and sewed. From the bagging machine, the feed was carried directly into the new 12-ton semi-trailer trucks, also owned and operated by the company, to be driven to feed distributors' warehouses.

Each step in the making of the feed was accomplished with a maximum of efficiency and a minimum of actual manual labor. Mechanical equipment also conveys the major portion of ingredients in bulk direct from the railroad car into the new storage bins, and from them on to the scales, where it is manufactured as described heretofore.

When Illinois Farm Supply Company purchased the flour milling properties from Benton Milling Company in April, 1945, it was planned that, after minor alterations were made, the mill would begin operating within six months. However, after construction started, it was soon evident that it would be more advantageous to re-model the facilities with several major additions so that the finished plant might be modern in every respect.

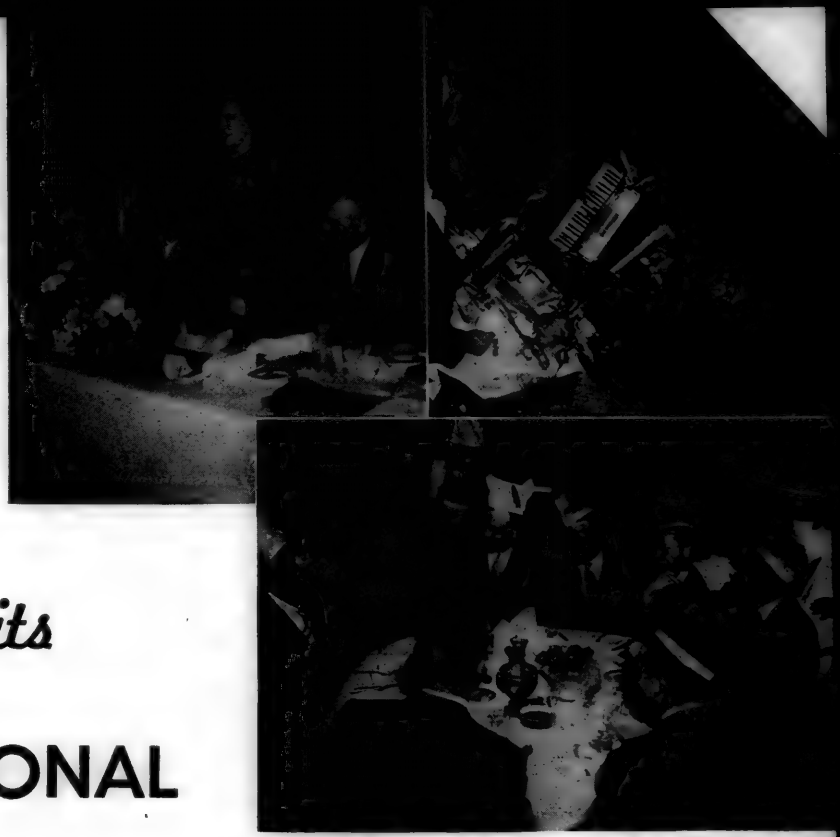
This would give more efficient production of feeds as well as assure better control of quality — impossible with less modern equipment. This change of plans, together with building restrictions and difficulties in securing deliveries of material and equipment, extended the time required for construction far beyond original expectations.

The original three story, brick building was adjoined by a two-story warehouse. As the building stands today, it is composed of four stories and has, in addition, twelve bulk storage bins.

At the request of Farm Bureau membership in southern Illinois, the mill is providing a marketing service in addition to the feed service. The elevator adjoins the mill proper. This part of the business was in operation during the wheat and bean harvest season, and a total of 120,000 bushels of grain was marketed through the mill by the Southern Illinois Grain Company, a subsidiary set up to render grain marketing service. Construction of the mill provides grain storage space for the feed milling operations during the non-marketing season.

The major portion of the planning and supervising of construction at Benton has been in the hands of C. E. Holtkamp, manager of the mill.

Left: Illinois Farm Supply Company President Fred Herndon (right), McDonough county, throws the switch that starts Benton mill operation. Others, left to right, are: Illinois Farm Supply Manager C. H. Becker, C. E. Holtkamp, mill manager holding watch to time operation; Jesse L. Beery, IFS vice president, Macon county, and William B. Mueller, treasurer of the Columbia Farmers Cooperative Grain Company. Right: Visitors to the Benton mill watch the mixing of the first batch of feed from hoppers holding the various ingredients.



Right: - Marjorie Healy of Kankakee county responds to IAA welcome for Illinois 4-H Club delegates. Others, left to right, are: Arnold Benson, Illinois director of agriculture; Bill Smith, F. H. Mynard, and Mrs. Elsie Butler of the University of Illinois extension service; Dr. W. C. Carroll of the College of Agriculture, and IAA Field Secretary George E. Metzger.

IAA

Resumes its

TRADITIONAL

4-h Club Dinners

Top: Fast, swingy music made a hit with the young folks attending the IAA's 4-H Club dinner. Bottom: IAA Organization Director O. D. Brissenden and IAA Safety Director Walter W. Whitlock keep their table lively with their humor. Left to right, facing camera: Howard Meyer, Kankakee county; Athylin Harris, Pulaski; Brissenden; Eugene Novack, Kankakee; Whitlock, and Halsey Miles, Crawford county farm adviser.

TAKE EQUAL parts of good food, good entertainment, and short speeches and then add a dash of youthful exuberance and you have the fiesta-like atmosphere that characterized the revival Dec. 2 of the IAA annual party for outstanding Illinois 4-H Club members attending the annual 4-H Club congress in Chicago.

The dinner, honoring 4-H Club boys and girls, was held in the Bal Tabarin room of the Hotel Sherman. IAA staff members, guests, leaders and parents of 4-H members swelled the attendance to more than 250. The IAA staff members acted as hosts at each of the dinner tables.

Field secretary George E. Metzger presided as Toastmaster and made a short address of welcome for the IAA.

Illinois outstanding 4-H Club members were introduced by F. H. Mynard and Mrs. Elsie Butler, both of the University of Illinois. Each member was cited for the most notable achievements in his 4-H career.

Principle speaker was W. C. Carroll of the University of Illinois College of Agriculture. His subject "4-H In Action" challenged the farmers of tomorrow to change "a social system which puts too much power in the hands of a John L. Lewis. It must be changed by you," he said.

"We won't have any trouble," Professor Carroll said "with socialism, communism, or fascism if we make our democracy work as it is capable of working."

Carroll declared to the 4-H leaders "the matter of discernment is yours to use to make the coming generation better than the past one".

Speakers representing 4-H youth were Marjorie Healey of Kanakee county and Harry Kline of McLean county.

Arnold Benson, Illinois State Director of Agriculture, congratulated the IAA for giving the banquet for the 4-H leaders — Farm Bureau leaders of tomorrow. He termed the meeting "a splendid move for giving 4-H members such encouragement."

Community singing was led by Bill Smith of the University of Illinois.

HOG FARMING
is I.A.A. Director McKee's
PRINCIPAL INTEREST

By JIM THOMSON
Ass't Editor, IAA RECORD

Editor's Note: This is the third of a series of articles to further acquaint you with the men who represent you on the Illinois Agricultural Association board of directors.

IF THERE is anything you don't know about hog raising you might ask Russell V. McKee, member of the IAA board of directors from the 16th Congressional district and president of the Illinois Farm Bureau Serum Association. From experience, he probably knows the answers.

Principally a hog farmer most of his career, he often has raised close to 900 porkers a year. For the past 20 years he has averaged 600 annually on his 250 acre farm (80 acres rented) southwest of Varna in Marshall county.

McKee came to the IAA board in November, 1945 succeeding Albert Hayes of Chillicothe. He represents the following counties: Peoria, Tazewell, Stark, Bureau, Marshall and Putnam.

Continuing with his hog-raising program, McKee farms today in partnership with his married son, Bert. Besides the hogs, which are cross-breds from pure-bred boars, they also are proud of a sleek, healthy herd of pure-bred Jersey cows numbering 12-16.

The IAA director from the 16th Congressional district was born in Richland township in Marshall county and has lived in that area practically all of his life.

He attended Washburn grade and high schools and spent part of a year at the University of Illinois College of Agriculture before returning home to help with his father's farm.

In 1908 he was married to the former Clara Buckingham of Woodford county and went into farming for himself. When the Marshall-Putnam County Farm Bureau was organized in 1919, McKee became a charter member.

IAA Director McKee keeps abreast of farm affairs by reading official Farm Bureau publications.

Consistently active in the interests of Farm Bureau, McKee was elected a director of his county organization in 1929, later serving as secretary-treasurer, vice president and finally as president in 1938. He served as president until elected to the IAA board.

During his tenure as president of the Marshall-Putnam County Farm Bureau, membership rose from about 900 to more than 1200. Membership now is about 1400.

Besides serving as president of the Farm Bureau, McKee found time to direct the activities of the Marshall-Putnam Oil Company as president. He was also president of the Marshall-Putnam Locker Service and served as an AAA committeeman five years.

He was elected to the Illinois Farm Bureau Serum Association board in 1934 and became president in 1937. McKee was a rural school director for 15 years until his children, Bert, and Mrs. Verna Wasson, now of Loveland, O., were graduated, when he resigned. He also is active in the Christian Church at Washburn.

Following the family tradition, Bert is now a director of the rural school and the local high school. Bert is also a member of the county school survey committee.

Sensible and efficient, the McKees are firmly loyal to their Farm Bureau organization and are ready and willing to adapt themselves to newer and better methods.

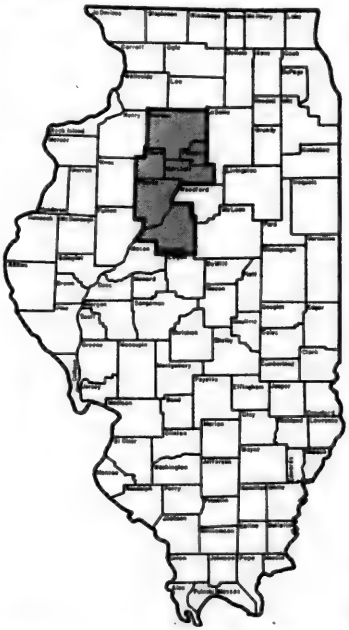
They follow a four-year crop rotation scheme. After experimenting with three-year rotation, they returned to the four-year plan — corn, oats, and mixed clover or alfalfa — as the more practical. Beef cattle haven't been raised on the McKee place in 15 years.

All of the land has been limed and

While his son and grandson look on, IAA Director McKee takes a turn at the corn planter.

1,000 pounds of phosphate have been applied to the home 170 acres. Additional phosphate is in the process of being applied. Although the land is fairly flat, the McKees hew strictly to the conservation line in contouring some of their corn.

Farm Bureau, McKee believes, is and will be just what the farmer makes it. "Our Farm Bureau and farm co-ops," he said, "have a solid foundation in the grass roots and will continue to flourish just so long as we do not become complacent, and do not forget that continued acceptance will only result from obtaining a maximum of service. Neither the Farm Bureau nor any of our cooperatives can long survive should they cease to do for farm folks those things they have a right to expect from them."



Shaded area on map is 16th Congressional district represented on IAA board of directors by Russell V. McKee.

TRIP IDENTIFICATIONS

(See pages 4, 5 and 6)

1.—Members of the second section of the IAA train take off on their trip with first stop at New Orleans.

2.—Passengers shake hands with engineer at end of first leg of trip at New Orleans.

3.—Mr. and Mrs. Albert Webb, Ewing, Franklin county, pause for refreshments in club car. Mr. Webb is a new IAA director.

4.—A friendly game of cards entertains Mr. and Mrs. Edward Nohren and Mr. and Mrs. Henry Kilian, Champaign county.

5.—Lloyd Walther, Rock Island county, reads, left, and Mrs. Elmer Widholm, Clay county, writes a letter home in the lounge car.

6.—A group dines at famous Arnaud's, New Orleans. Left to right, around the table, Ralph Whitehead, Macon; Mr. and Mrs. Emmett King, Lake county; Mr. and Mrs. Elsbury, Lake; Mrs. and Mr. Joe Adams, Lake; Robert Thurber, DeWitt.

7.—Mayor E. R. Smith of Saunemian, Livingston county, and his wife take pictures of the above-ground graves in New Orleans cemetery.

8.—Mr. and Mrs. Louie Husser, Bureau county, celebrated their 35th wedding anniversary on the trip.

9.—Mrs. Emma Stone, Bond county, takes a picture of a blooming flower in one of New Orleans' many parks.

10.—Farm Bureau travelers are greeted by a Mexican singing group at the San Antonio railroad station.

11.—A visit to the historic Alamo is a must stop on the trip.

12.—Group waves goodbye to San Antonio. Left to right, Mrs. Tom Lloyd, Macoupin county; Mrs. Clarence Whitler, and Mr. Whitler, Macoupin; Mrs. Claude Wheeler, Tom Lloyd, Macoupin, and Claude Wheeler, Macoupin.

13.—Ed Gumm, Knox county, new IAA board director, meets his son, Jack, at El Paso, and is pictured at dinner in Juarez, Mexico. At the left is Mr. and Mrs. Ray Ibrig. Adams county. Mr. Ibrig is a former IAA board member. Jack Gumm is in the Army stationed at El Paso.

14.—Taking pictures at Salt Flat en route to Carlsbad Caverns are left to right, Mrs. Hughes, wife of new IAA board member, and Mr. Keniston.

15.—An Illinois group pauses at Cavern Supply Company store, Carlsbad Caverns. Left to right: Mr. and Mrs. A. L. Doubet, Knox county; Mr. and Mrs. E. B. Runyon, Knox; Mr. and Mrs. Whitler, Macoupin; Mrs. H. M. Scott, Macon, and Mr. and Mrs. K. T. Smith, Greene county. Mr. Smith is an IAA board member.

16.—This is what the folks saw as they came out of the Carlsbad Caverns. Busses are lined up to take them back to El Paso, a 172-mile trip.

17.—Members of the second section of the IAA special train pose for picture at Phoenix.

18.—R. A. Kietz, Marshall county, examines lettuce on a truck at the Salinas Valley Vegetable Exchange, near Phoenix.

19.—Dan Bergman, Jr., Cook county, looks over a palm tree at Glendale, Ariz.

20.—Illinois folks examine Hollywood stars' footprints in front of Grauman's Chinese Theater. Mrs. Paul Mathias, wife of IAA secretary, is at left, and Mrs. Earl Hughes, wife of IAA board member, is at right.

21.—A group looks over the Hollywood Bowl where Sunrise Easter services are held each year.

22.—Fog and haze obscure camera view of valley where Farm Bureau travelers paused after crossing Golden Gate bridge in 'Frisco. They were enroute to Muir woods to see the giant redwoods.

23.—John J. New, Marshall county, looks over a giant redwood and wishes he had some lumber from it at home.

24.—A welcome banner is out for convention goers at Frisco as main sessions are held in the Civic Auditorium.

25.—Mrs. J. H. Everett, Mason county, looks at Illinois exhibit at AFBF convention.

26.—P. H. Joyce, Illinois Farm Bureau member, gets his steak at the barbecue and rodeo held in the Cow Palace at San Francisco.

27.—Two trick riders cavort in the arena at Cow Palace.

28.—Roy Johnson, IAA director of special services in back row, and Charles McEvilly, Illinois Central agent, extreme right, planners of the special trip, chat with several of the party at Salida, Colorado. Left to right are Farm Adviser H. N. Myers, Dewitt county; Chester McCord, Jasper county, IAA board member; C. J. Freeman, conductor on first section of special train; Mr. McEvilly, and in the back row, Mr. Johnson.

29.—Members of the first section of the special train have their picture taken at Salida, Colorado.

30.—One of the highlights of the trip was the Royal Gorge where the train stopped and folks got out and took a long look.

MAYFIELD NAMED TO HEAD IAA's NEW ROAD IMPROVEMENT DEPARTMENT

CHARLES S. MAYFIELD, 30, assistant in the department of research since last spring has been named director of the new IAA department of road improvement.

C. S. Mayfield

As IAA director of road improvement he will assist county Farm Bureaus with their road problems.

Mayfield was born in Hardin county and is a former superintendent of schools at Ullin in Pulaski county. He was discharged from the navy a year ago after 22 months of sea duty. He served as an ensign, most of the time aboard transports in the Pacific.

He was graduated from Harrisburg high school, received his bachelor's degree from Illinois State Teachers College at Carbondale in 1939 and his master's degree from Oberlin college, Oberlin, Ohio, in 1941.

Mayfield studied school administration and did part time work for the IAA state school committee. He became superintendent of schools at Ullin in 1941 and was there until he went into naval service.

The new director of road improvement is married to the former Geraldine Morgan of Jefferson county and is the father of two children, Juliet Ellen, 5, and Charles David, one year.

WATCH FOR RINGWORM

Ringworm, a fungus skin disease, is expected to seriously infect stabled calves this winter. Characterized by rounded scabby lesions around ears and eyes, the spread is most rapid when calves are placed in single pens or stalls.

Your Money Takes a Ride

(*Continued from page* 12)

mand upon legislators for bigger relief funds.

Appropriations for highways in 1945-47 totalled 146 million dollars, an increase of 50 per cent over the preceding two years. Most of the state road money is used for the construction and maintenance of the paved and numbered routes between principal cities. In recent years many of these costly concrete highways have been hammered to pieces by excessively heavy and overloaded trucks. The largest share of the repair bills and replacement costs are falling upon the owners of automobiles and small trucks.

A limited amount of state funds is used for state aid roads in the counties. A small amount, 15 million dollars, was allocated for use on township roads by the 1945 General Assembly.

For education, appropriations for 1945-47 totalled 92 million dollars. Of this amount, 47 million dollars was earmarked for aid to elementary and high schools. The state university and colleges are receiving most of the remainder.

General government activities absorb most of the other state funds. Such activities include numerous essential services. They also include many activities which few, if any, citizens would ever miss if they were discontinued.

Expenditures of state funds are authorized by and controlled through appropriations by the state legislature. Such appropriations have increased at a great rate in the last 20 years. Each succeeding General Assembly has established a new high record for spending the citizens' money.

In 1927-28 state appropriations totalled 270 million dollars. In the depression of the 1930's appropriations were pushed to over 400 million dollars. In the prosperity of the 1940's, state appropriations far exceeded all previous records, reaching 567 million dollars in 1941-42, and over 760 million dollars in 1945-46. (The latter figure does not include the veterans' bonus.)

Recipients of state funds will be after further large increases in appropriations in 1947. Increases for some purposes are necessary. In many cases, however, increased appropriations cannot be justified on the basis of service needed. Illinois citizens hope the new General Assembly will approve increases only when they are necessary to maintain adequate services.

As a taxpaying citizen, you have a primary responsibility in preventing unreasonable increases in state spending and taxes. If you want to save yourself some money, tell your state senator and your three representatives to "set the brakes" on unnecessary state spending while they are in Springfield.

Products which can now be made from wood include gunpowder, sugars, alcohol, paper, food for livestock, rayon, cellophane, imitation leather, molasses, lacquers, vanillin flavoring for ice cream, and rubber tires.

HEAVY RESPONSIBILITIES IN '47 FOR KING OF THE BARNYARDS?

THE WORLD IS RELYING ON THE AMERICAN HOG TO SUPPLY IT WITH INNUMERABLE NECESSITIES THIS YEAR. FARMERS CAN HELP GUARANTEE RECORD PRODUCTION BY GIVING 'EM A SHOT WHILE YOUNG, OF FARM BUREAU SERUM AND VIRUS

Shorts in the News

Runner-up in the International Junior Livestock Judging contest held during the fat stock show was Martin Lotz, Macomb, McDonough county, who tallied 545 points, just one less than Eugene Leftwick, of Kansas, who scored 456 points to win.

In the junior division Janet Countryman, 12, of Clare, DeKalb county, was Shorthorn class winner with her 16-months-old steer, "Stardust", Second place went to James Schlichting, Apple River, Jo Daviess county.

Russell and Amos Miller, Livingston county, have convinced themselves that soybeans yield about the same whether drilled or planted in rows. This fall they harvested 222 measured acres of beans and found that the drilled beans yielded 36 bushels and those planted in rows produced 35½ bushels per acre.

Deadly anthrax, often fatal to man and beast, broke out recently in a northern Illinois dairy herd but prompt diagnosis and shots of anti-anthrax serum by the local veterinarian kept the losses to three animals.

Illinois Farm Supply Company this year sold goods with a wholesale value of $21,179,614.45. Patronage refunds totaling $1,094,336.06 and capital stock dividends of $63,082.71 were declared for distribution. Surplus was increased by $373,584.01. This was the company's biggest year in sales volume and patronage refunds.

Allen McWard has been employed as manager of the Champaign County Service Company, and succeeds Russell G. Stewart, who as manager since the company was formed 16 years ago, brought sales up to $667,500 last year. McWard has been employed as petroleum sales manager for Illinois Farm Supply Company during the last year and before that served for four years as district field manager for the south half of Illinois.

Eugene G. Mosbacher, 28, has been promoted to farm adviser in McLean county. He succeeds O. L. Welsh who resigned Jan. 1 to operate the Prairie Lumber Company in Bloomington. Mosbacher came to McLean county as an assistant farm adviser a year ago after being discharged from the army. He was born and reared on a farm in Monroe county and received his master's degree from the University of Illinois College of Agriculture in 1942. Mosbacher is not married.

Cleland Hickman of Scales Mound has been employed by the Jo Daviess County Farm Bureau as county organization director succeeding Wayne E. Gustafson who has acted as both general agent of insurance and organization director. Gustafson will spend full time on insurance work.

John R. Huber, 16-year-old farm youth from Williamsfield, Knox county, is one of ten national winners in the 4-H poultry contest. His flock of 600 chicks and 500 layers grossed $3,831. His hens shelled out 2800 dozen eggs, about 186 per hen.

From half to all kernels of seed samples collected recently by the College of Agriculture at Urbana have carried spores of the new oat disease — helminthosporium. This blight can be killed by treating the seeds with the chemical Ceresan. This will keep down loss on all varieties, including Clinton and Benton, even though the soil itself is contaminated.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of January and February, at the hour and place to be determined by the Board of Directors of each County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association, shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting, or any special meeting of the Association, including the election of officers and directors, as provided for in the By-Laws of the Association.

During January, annual meetings will be held in Bureau, Calhoun, Carroll, Champaign, Clark, DeWitt, Edgar, Fulton, Greene, Jersey, Kendall, Knox, La Salle, Livingston, McDonough, McLean, Marion, Mercer, Rock-Island, Sangamon, Tazewell, Winnebago and Woodford Counties.

During February, annual meetings will be held in Coles, DeKalb, Douglas, Effingham, Grundy, Kankakee, Lake, McHenry, Mason, Monroe, Wayne, Whiteside and Will Counties.

Paul E. Mathias, Secretary
December 16, 1946

D. Dwight Thomas, 24, has been employed as full-time organization director of the Kankakee County Farm Bureau. Born and reared on a farm near Eldorado, Thomas has been working as insurance agent and organization director for Saline county since he was discharged from the army.

Delegates to the 4-H Club Congress in Chicago in December are shown with 4-H Club extension workers from the University of Illinois, front row, left to right: Lois Strubinger, Pike county; Robert Willrett, DeKalb; Marjorie Healy, Kankakee; Harry Kline, McLean; Miss Laura Mohr, leader delegate, McLean; Robert Ashley, La Salle; Jeanette Pegles, McHenry; and Carlan J. Hans, Madison. Second row: R. O. Lyon, specialist in boys' 4-H club work; Mary McKee, specialist in girl's 4-H club work; Russell Lowey, Montgomery; Mary Powers, Menard; George Deane, McDonough; Marilyn Gahm, La Salle; William Kock, Jr., Marshall; Elsie Butler, 4-H club adviser; F. H. Mynard, specialist in boys' 4-H club work; and Joan Neese, Shelby. Third row: John R. Huber, Knox; Carol Williams, Massac, Eugene Bonneur, Whiteside; Athlyn Harris, Pulaski; Dean Ward, Champaign; Mary Gebhart, Champaign; Orville W. Dickhaut, St. Clair; Bernice Bardelmeier, Madison; J. B. Barnard, McLean; Janet Bute, Winnebago; Lyle P. Schertz, Woodford; and Hazel Peters, Greene.

SUMMARY OF AFBF RESOLUTIONS

(*Continued from page* 15)

gating additional authority to the Federal Government in new areas, but rather one of reshaping and coordinating the policies in the fields in which government policy now largely prevails so that they will more definitely contribute to a stable price level.

The control of money, credit and fiscal policies of the federal government should be coordinated under one authority. This should be an independent agency, the membership of which should be appointed by the President and confirmed by the Senate. The policies of this monetary authority should be regulated as far as feasible by formula, based upon some established index which would direct the authority to take action when the index reached certain levels, in order to promote a dollar of constant purchasing power.

Legislation should be passed giving the proper agency of government the responsibility for maintaining the supply of money and credit appropriate to the production needs of the nation and a stable price level. Steps should be taken to allow the Federal Reserve to rejoin control of credit.

We believe that the fiscal policy of the federal government, which includes the handling of the national debt, is an important factor in stabilizing our national economy. Due to the magnitude of the national debt and future tax load, management of these is going to have a greater effect on the level of prices and production than ever before. A long-time stable federal tax policy should be adopted with a tax rate which balances the budget under normal business conditions.

We believe that the government should adopt policies in regard to expenditures.

We urge that the American Farm Bureau Federation cooperate with other groups in creating an understanding of the problem of price stability. We should also strive to bring about conditions which will permit our Federal Government to assume its proper and constitutional role in determining and regulating the value of money and thus adding greater stability to the general price level, which is essential to the preservation of free enterprise.

Taxation

The American Farm Bureau Federation believes that a sound national policy is essential to the welfare of our entire economy. Taxes should be not only equitable and fair, but also chosen with due regard to their effect upon the economy.

The American Farm Bureau Federation is opposed to any material reduction in the income tax rates as long as inflationary tendencies prevail and there is a high level of employment. We call upon the Congress to use discretion and not use an instrument as vital to our national welfare as a tax and fiscal program for political purposes. We believe that under present conditions all possible revenues should be applied to a reduction in our national debt. Furthermore, we believe that every effort should be made to eliminate all non-essential government expenditures and reduce essential expenditures to the minimum necessary for good government and adequate national defense. By at least maintaining revenues and reducing expenditures, the minimum contribution can be made to stablizing our economy under present conditions.

The personal income tax should be the major source of revenue for the federal government. We favor keeping the personal income tax base as broad as practicable through the retention of low exemptions and the avoidance of a general federal sales tax. All self-supporting persons should make a direct contribution to the support of government. The income from all future issues of Federal, State, and local government bonds should be subject to the same taxation as other income.

We recognize that if full employment is maintained, the bulk of the jobs must be provided by free enterprise. Therefore, the following recommendations are made pertaining to corporate taxes. The corporation should be exempted on that portion of its annual earnings distributed to the stockholders as dividends, where such dividends are taxed in the hands of stockholders.

Federal excise taxes should be largely limited to amusements and taxes on the so-called luxury goods, including alcoholic liquors and tobacco. The transportation tax on movement of goods and commodities should be repealed. The Federal gasoline tax should be reduced to one cent a gallon and it should not exceed that amount.

The Federal social security taxes should not be increased until a study of the entire problem is made, showing the need for a change from the present rate. Taxes for unemployment compensation should be levied upon employer and employee alike.

Taxation of Cooperatives

We believe in the private enterprise system and look upon farm cooperatives as part of that system. Cooperative earnings returned to members as patronage dividends should not be subject to tax since such dividends are now taxed in the hands of the individual members of the cooperative. Patronage dividends represent savings arising from the handling of a particular individual's business. They can be returned to him either through adjusted prices or through patronage dividends.

We will support such changes in the internal revenue law as may be necessary to require agricultural cooperatives to annually report their operations and earnings and to provide that there be income tax exemption or deduction from taxable income on only that portion of their earnings which is distributed or clearly shown on the books of the cooperatives as the property of the patron and subject to tax in his personal income.

Free Enterprise and Cooperatives

This time of adjustment from war to peace demands statesmanship, common understanding and cooperation, not bickering and bitterness.

We, the most numerous group of free-enterprises, should exercise our freedom of action and responsibility to organize, support and maintain real farm cooperatives as an essential, proper and effective means of promoting free enterprize and cooperation with other groups in our economic democracy. In particular, farmers must depend upon their cooperatives to conduct for them such free enterprises as are necessary to insure their ability to fulfill their individual responsibilties as custodians of the land which supports all the people.

Cooperatives, in behalf of their farmer members, should own and control a reasonable share of the natural and exhaustible resources and raw materials.

We consider these functions to be the essence of free enterprize and economic democracy. We therefore oppose any revision of federal or state statues or the enactment of new statues designed to affect adversely the freedom or character of bona fide farm cooperatives. Government should assist cooperatives, coporations and individuals alike in the rational development, conservation and use of essential exhaustible resources.

We propose to resist with every resource at our command all unreasonable attempts to limit the service to farmer members by their cooperatives and likewise we resent any inference that the operations of real cooperatives in the slightest degree undermine the principles of our established form of representative government.

National Soils Fertility Program

An effective national soils fertility program is long overdue. It is becoming increasingly apparent that the fertilizer industry and farmer cooperatives, assisted by existing public agencies, must greatly enlarge their programs for production and distribution and better use of essential exhaustible plant nutrients, especially phosphate and potash in the more concentrated forms.

Farmers must be able to initally increase substantially the mineral content of the land so as to establish effectively vegetative cover on the land necessary to reduce soil and water losses and to efficiently grow the kinds and quantities of crops and livestock needed to improve nutritional standards of the consumer and to enable the voluntary adjustment of production in line with effective demand. For these and other impelling reasons, we recommend immediate action on all of the following fronts:

(1) The fertilizer industry should be encouraged to increase greatly and expeditiously its plant capacity for the profitable production and distribution of both low-grade and high-grade phosphate and potash.

(2) Farmer organizations should mobilize their abilities, influences, and resources to acquire adequate natural reserves of phosphate and potash for utilization and to develop a reasonable percentage of needed plant capacity for the production of high-concentrated materials.

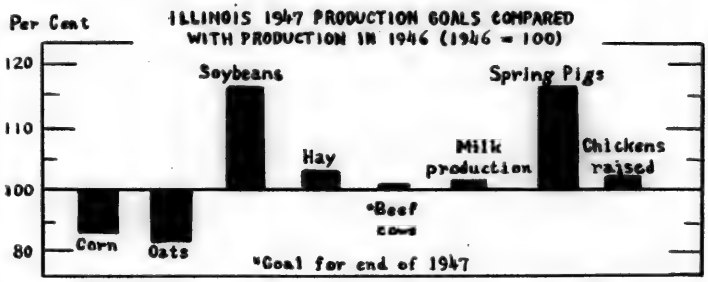
(3) The Tennessee Valley Authority should be authorized by Congress to acquire reasonable phosphate reserves in the Florida area to supply the needed raw materials for an experimental blast furnace phosphate plant in the Mobile area and additional reasonable reserves to protect the interests of farmer cooperatives servicing the Southern States, the Atlantic seaboard States, and the States in the eastern part of the North-central region; and further, that the Tennessee Valley Authority be authorized to construct and operate an experimental blast furnace phosphate plant in the Mobile area for a reasonable period of time with a definite plan for the production of materials necessary for educational use and the distribution of any excess production to farmer cooperatives and wherein such plant, within a reasonable period after the experimental production has been demonstrated, be disposed of to a private agency.

(4) The test demonstration program should be expanded throughout the United States to cover a reasonable number of farms operated by practical farmers, so that in the planning and administration of such test demonstrational program, farm and community tests and demonstrations can be carried on showing the improved uses of concentrated mineral fertilizers and fertilizer ingredients in conjunction with liming and other improved agricultural practices.

Farm Credit

Many years before the enactment of the Farm Credit Act of 1933, the American

(*Continued on page* 34)



Illinois Asked to Keep Farm Production High in 1947

FARMERS in Illinois are asked to keep their war production of grains and animal products at a record peak for at least another year.

This is the request of the United States Department of Agriculture and approved by the state USDA council as they recently announced the farm production goals for 1947.

A substantial increase of 15 per cent in soybean acreages and an equal reduction in corn and oats is of primary interest to Illinois farmers. (See chart for comparisons).

An increase in the number of spring pigs of about 15 per cent is also advocated to meet the strong world-wide demand for pork and kitchen fats.

The continued strong domestic and foreign demand, the need to build reserve supplies of many commodities and the possibility of lower yields were the reasons given by Secretary of Agriculture Anderson for the high production goals set for 1947.

If these requests for continued high production are met next year by farmers in this state it will bring the ninth consecutive year of record breaking crops.

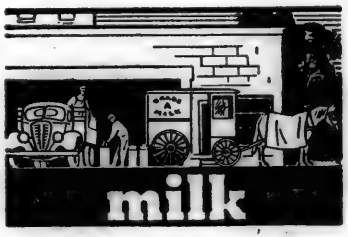
These production goals, the USDA reported, are meant to fit into the general trends indicated by prospective demands and good farming practices.

In certain cases the new goals do not reflect the immediate price outlook as much as they do the goals established during the war years.

About the same level of production for 1947 is suggested for chickens and milk — no change from last year.

The USDA is also recommending that the number of beef cattle be reduced by about six per cent and this would bring the beef cattle population down to the Jan. 1, 1946 level.

Since the numbers of sheep and lambs are down about 25 per cent from the five year 1937-41 average, no reduction is recommended.



As it now stands, there will be no subsidy payments for July milk. Although the Department of Agriculture announced a plan whereby they would make subsidy payments to producers who held the line during July 1946, this plan was recently rejected when submitted to John R. Steelman, Economic Stabilization Director. He stated that since price controls were not reinstated on dairy products, and since dairy production payments were not made available by Congress for the current year, and since a level of returns adequately comparable to last year had been maintained, the payments previously authorized will not be made. Producers who did not receive price increases for July milk were not satisfied with this announcement and more information concerning further consideration of this matter may be forthcoming.

Pure Milk Association of Chicago recently mailed checks to over 16,000 producers in an amount totaling $134,247.60. These checks were issued to members as their share of the producers' equity fund which was built up for the years 1932-1939, inclusive. This, with amounts previously distributed, makes a total of $471,453.80 in savings which have been returned to the membership.

Most annual meetings of dairy cooperatives affiliated with the IAA are now over. The reports of managers, officers and directors at these meetings indicated that much progress has been made during the past year and that most cooperatives are well prepared for tougher times.

Dairy Marketing Day will be held Jan. 28 in connection with the Farm and Home Week program at the University of Illinois. E. E. Houghtby, IAA director of dairy marketing, will be chairman of the morning meeting, at which time milk price programs will be discussed. Judson P. Mason, IAA assistant director of dairy marketing, will discuss the subject, "Should federal milk orders be extended into smaller Illinois markets?"

Tests made by the market administrator's office to verify the butterfat content of milk, cream and other dairy products were recently upheld in two court decisions in Chicago. The Ogden Dairy company had claimed that the market administrator's method of sampling was not representative of the dairy's monthly distribution and should not be used in computing its obligations to producers. The U. S. circuit court of appeals affirmed the decision of the district court, upholding the action of the market administrator. The other case was similarly associated with the butterfat testing program.

The Milk Foundation of Chicago, an organization supported by producers and handlers in that area to promote the sale of dairy products, is now located in its new quarters at 28 East Huron street, Chicago. The Milk Foundation is an affiliate of the National Dairy Council.

What About Mastitis?

Would you let the hired man pour one can of milk out of five down the drain? Would you throw one-fifth of your feed on the manure pile?

Cy Roberts made the startling discovery one day that milk production from his herd had dropped off about 20 per cent. Yet he was feeding the same amount and quality of feed. Also, his bacteria counts had risen to astronomical heights. Cy wasn't the kind of fellow who allowed such things to slip by unnoticed. Are you?

So he went to town and told his veterinarian that he had noticed some of his milk cows with sore, swollen udders, and that production from the herd had dropped off about 20 per cent.

Said his veterinarian: "It sounds like you have mastitis, or garget, as some call it, in your herd, Cy. Just how bad do you want to get rid of this trouble?"

"Doc, I'd do anything because this darn stuff is costing me a lot of money with milk and feed as high as they are today," Cy answered.

So he and the doctor mapped out a mastitis control and eradication program for his herd. Cy was assured that by carrying out a good program of sanitation, by sound milking practices, and aided by advice, testing and treatment from his veterinarian, he could control and eradicate mastitis in his herd.

Doc explained, "Cy, you are the most important part of this program, and it is really up to you. I can help by making an early diagnosis, by treating and outlining a program, but the big job is yours. You must 'carry the ball'."

If you are suffering decreased profits from a decline in milk production, you may have mastitis in your herd. Don't guess! Find out for sure by seeing your local veterinarian. More information can be had by obtaining literature from your farm adviser; or by writing to the Extension Service in Agriculture and Home Economics, University of Illinois; College of Agriculture and Veterinary Medicine; or to the Veterinary Medical Relations Department, IAA.

LETTERS TO THE EDITOR

NOT WORTH A HAT

I was very pleased to read the article pertaining to Charles E. Carrier, (Macon county organization director), and his picture looks natural and not so much older than it did 20 years ago. It was just at that time that Charley was doing some clean-up work in our Bureau County Farm Bureau membership drive that I met Mr. Carrier and I "carried" him around to see the laggards in our township whom we ordinary "fellers" could not get to "jine in" with us.

After spending the morning calling on some of the fellows we came back to our house for dinner. Then we went to see one of our neighbors who was always so outspoken against the Farm Bureau, that I said to Mr. Carrier, "Now if you get that fellow to join the Farm Bureau I will buy you a new hat," and Charley said, "I could use a new hat all right." After quite a lengthy conversation we went on our way and I said, "Well, you didn't get him." And Charley said, " I could have, but he wasn't worth it."

My father was a minister and I had heard him say, "If you scare folks into church, you have to keep them scared so they will stick." And I thought it was the same way about getting a certain type of men into Farm Bureau membership and keep them there and be satisfied. If you just have to "talk" them into the Farm Bureau, then the Farm Bureau is better off without them.

The man in question is still opposed to the Farm Bureau but I do not think he realizes the benefits that he, as a successful farmer has gotten from other folks doing the Farm Bureau work during all these years and what it has meant to them. As for me, I have been a member all these years, in fact I am one of the charter members of the Bureau County Farm Bureau.

Frank Smucker
Bureau County

TREASURED BELL

Perhaps some of the farm dinner bells have been junked, broken, or lost.

Ours, however, is highly treasured, still in use, and hanging where it has hung for over fifty years.

I admit it is not as effective in calling our men from their modern machinery — tractors, etc., as it was years ago when they were in the fields plugging away with the old team of mares.

Ours has saved me many steps in calling the men to the house or telephone when they were working about the place.

Mrs. F. E. Lambrich
Wayne county

Letters to the Editor are welcomed from readers on any subject related to agriculture. Writers should sign letters with name and address. Names may be withheld if desired. Address *Letters to the Editor, Illinois Agricultural Association Record*, 608 *South Dearborn, Chicago 5, Ill.*

70-YEAR-OLD BELL

I read an item in the Illinois Agricultural Association RECORD about old dinner bells. I am enclosing a picture of an old dinner bell which has been in our family for almost 70 years. This picture was taken in July 1946; we use the bell every day and it always brings back loving memories every time I hear it ring.

Mrs. Clyde E. Terry
Menard county

THE SWEET OLD DAYS

To the question in the November RECORD "Where's the Dinner Bell" allow me to hazard an answer: The dinner bell has gone into the junk pile in the old tool shed back of the barn where it is keeping company with the old clock that once stood with stately mien on the shelf in the kitchen and ticked away to the accompaniment of the old teakettle on the good old wood cook stove.

If you rummage about while out there looking for the old dinner bell, you may find a few other articles reminiscent of those sweet old days when farmers worked hard with their hands and had an appreciation of values, which they have lost. What with radar or radio or something to summon them to dinner and an electric contraption to tell time, which has no personality whatever, no individual beauty whatever (they make 'em by the million on some production line) no beautiful filigree or hand carving, heavens, no, people don't know what hand carving is any more — just a block of wood hollowed out and a round clock works dumped in and screwed down.

They're making 10 a minute now and hope to step it up to 10½ a minute in one factory. Where is the chance for personality now or individual beauty? Even in a clock! Gone is the friendly tick, gone is the friendly clock face embellished by beautiful wood working and carving. Only a monotonous hum now and that stops when the current goes off!

So the old dinner bell will lie there with its lovely old memories until a sane world returns, until people regain their sense of balance and values, until farmers decide that to till 100 acres well and get a good return for it is better, cheaper and easier, more sane, than to till double that acreage and waste one-third. When farmers learn to stay on their farms and work close to home instead of roaming over the countryside looking for more land to turn over, because they turned over the lower 40 before breakfast and what will they do between now and lunch time.

Yep, the old dinner bell will have the last laugh.

Alden S. Baker
White County

NOTE OF DOOM

A few lines from me, may change your viewpoint about the future. As I see it now after 1957 there will be a change all over the entire earth. All the people on earth will go back to the farm. All cities will be destroyed by earthquakes, etc. It is written in stone in the pramids of Egypt and I can prove it by the Bible (Old Testament). The year 1956 will be it.

Gustav A. Magucord
Calhoun county

THE LINCOLN CALENDAR

I received my calendar for 1947 and I want to thank you for same. It is really a masterpiece in art! Is it possible to get another? I covet a set of those Lincoln pictures for each of my two sons.

Kindly drop me a card if extra calendars can be had and state price. A calendar like that should hang in every rural schoolhouse.

Rev. Peter Beecken
Kane County

Illinois farm advisers chatting with H. M. Nicholas, Webster City, Ia., newly-elected President of the National Association of Agricultural Organization of County Agents, are: Edwin Bay, Sangamon county, W. F. Coolidge, Livingston county, L. A. Bierbaum, Union county, and T. W. May, Madison county. They are shown during the association's recent meeting in Chicago.

WHAT'S AHEAD

(*Continued from page 9*)

have proved their value in peace as well as in war.

"We are not unminded of the fact that we increased farm production more than 30 per cent during the war, and that when conditions return to normal we will again face the problem of surpluses. We want to be ready with a program when the problem appears," he asserted.

Of equal importance in the long-time outlook, President O'Neal said, is a program for halting loss of plant food from the soils and an expanded program of farm research.

Other sections of the agricultural outlook were given to Farm Bureau members attending the convention by a group of distinguished guest speakers.

Congressman Clifford R. Hope of Kansas, who has been a member of the House committee on agriculture many years, and is expected to become chairman of the agricultural committee in the 80th Congress, said that he forsees no disastrous slump in agricultural prices such as followed the first World War. He said that the Steagall amendment would give the country a breathing spell during which careful consideration can be given to a permanent post-war agricultural policy.

He further declared that the 80th Congress should make a careful examination of the country's agricultural picture to determine what changes in legislation and policy are necessary to meet the new problems resulting from increased wartime production, increased mechanization of farms, improved varieties of crops and breeds of livestock.

Senator Russell

As one possible means of remedy of overproduction, Congressman Hope advocated the application of research in the field of marketing to the same extent that it is applied in the field of production.

Senator Richard B. Russell of Georgia pointed out that while farm income reached the highest record level during the war, the farmer's income is still below the income of industrial workers. The per capita farm income, he said, in 1945 was $585, the highest ever known. But in the same year, the average per capita income of all persons in the United States, including the farmer, was $1294. The total national income in 1945 was nearly 162 billions of dollars, and farm income reached a record high of 21½ billion dollars, but the fact still remains that the less than 20 per cent of the nation's population who live on farms only received 9.1 per cent of the total income. He pointed out that it took a long hard fight to get laws on the books to protect farmers, and the farmers will fight to keep them on the books as long as there are others on the statutes for the benefit and protection of other groups.

N. E. Dodd, Under Secretary of Agriculture, told Farm Bureau delegates that farmers should prepare their production plans for the time when exports to foreign countries begin to taper off.

N. E. Dodd W. L. Thorp

Willard L. Thorp, Assistant Secretary of State for Economic Affairs, said today there is no escaping the fact that it is a small world, and that the American people are very thoroughly involved in its problems and happenings. He stressed the fact that international responsibility on our part is just as essential in economic affairs as it is in political affairs.

Gov. Earl Warren of California told the Farm Bureau audience that the country must recognize that the welfare of our families both on the farm and in the city depends upon a sustained high level of production and employment.

J. W. Burch, director of extension, University of Missouri, described a sort of revolution in farming practices, known as "balanced farming" that is sweeping Missouri.

Balanced farming, as outlined by Director Burch, is the operation of an individual farm by a careful planned system, which starts with the family itself and takes into consideration the entire farm unit. It ties the individual enterprises and practices together in the right balance to improve the soil and at the same time obtain progressively greater returns year after year in terms of net family income.

The AFBF's gold medal awards for Distinguished Service to Agriculture were presented to three farm leaders by President O'Neal. They were Congressman Hope, H. E. Babcock, chairman, board of trustees, Cornell University board of trustees, and J. F. Porter, for 25 years president of Tennessee Farm Bureau Federation.

In the election of directors whose terms expired, President Charles B. Shuman of the Illinois Agricultural Association was re-elected for a two-year term. President Shuman was first elected to the AFBF board in 1945 when he was named to complete one year of the unexpired term of Allen Kline, president of the Iowa Farm Bureau Federation, who had been elected vice-president of the AFBF. Other midwest directors up for re-election included Frank W. White, president of the Minnesota Farm Bureau Federation, who was re-elected for a two-year term.

Mrs. Roy C. F. Weagly, Hagerstown, Md., and Mrs. Raymond Sayre, Ackworth, Ia., were re-elected president and vice-president, respectively, of the Associated Women of the AFBF.

Winner of the National Rural Youth Talkfest was Lawrence Whaley, 19, Leroy, Ind. When the winner and two alternates of Indiana were unable to attend the convention, Whaley, who had competed in the Indiana Talkmeet, was drafted to represent the Hoosier state and promptly walked off with the national honor.

Records Show Farm Efficiency Pays Off

PROOF that careful feeding and marketing of livestock can pay an annual premium of $2,850 a year is revealed in the records of the top 35 cooperators enrolled in the Blackhawk Farm Bureau Farm Management Service.

These farms averaged 210 acres in size and earning ranged from $3,450 for the low 35 members to $6,300 for the high 35 cooperators.

A study of these farm accounts, made by M. L. Mosher of the College of Agriculture at Urbana, showed that this $2,850 spread in net income was due largely to efficiency in handling livestock and only a small part to crop yield, and labor and machinery costs.

Most of this efficiency, Mosher said, is due to a few simple and well-known practices. These he listed as feeding only good quality livestock and keeping the animals healthy, full use of high-protein hay and pasture, enough high-protein concentrates to balance grain rations, and timing production to get stock and livestock products on the best markets.

Rural Youth

By
ELLSWORTH D. LYON

The Illinois State Rural Youth committee is shown at work in Chicago. Left to right: Burnell Henert, Lee county; Ruth Huser, secretary, Tazewell; Edwin Dew, Ogle, chairman for the day; Ellsworth Lyon, IAA director of young people's activities, and Ray Farris, Clark. Marcella High, Christian county, was absent when picture was taken.

The new state Rural Youth committee elected at the Rural Youth Conference held in Chicago Nov. 19 has held two meetings: the first at the Sherman Hotel immediately following elections, the second on Dec. 5 at the IAA office. The committee listed the following items as worthy of attention for Illinois Rural Youth. Farm and Home Week, District Short Courses, Sports Festival, State Camp, Rural Youth Tours, Conservation school at Lake Villa, Talk Fests, IAA Short Course, IAA Annual Meeting, AFBF Midwest Farm Bureau Training School, AFBF Annual Meeting, Community Service program, Leisurecraft and Counseling Camp, Reporting of News, Skilled Drivers' Clubs, and Adequate Recognition of Extension Personnel in the County.

DuPage has just organized a new group in the northern port of the county. Mary A. Brummel of the south group reports, "We have just started square dancing and find it a lot of fun."

Powell Cunningham reporting for his group writes, "Plans are progressing toward the purchase of a public address system by the Ogle County Club." A county-wide dance was included in the December activities by the three groups.

The newly elected reporter, LeRoy Wetzel, sent his first report as follows: "Coles County Rural Youth held its first post-war meeting Nov. 1 at Charleston. The group has been dormant since 1941 but is now breaking out of its shell and stretching its arms and legs. It has found itself heir to $25 in folding money from the old organization. The group now has 20 delegates attending a series of recreation schools in Charleston led by Duke Regnier, University Extension Specialist."

DeKalb held its annual Christmas party Dec. 17 at the Eagles Hall. An exchange of gifts and refreshments added zest to the evening activities.

A skit, Christmas the American Way, was presented for Macoupin by Maxine Denby, Jerry Boston and Genevieve Boente at the December meeting.

Franklin's Christmas party was held at the home of Mr. and Mrs. Carl Cox. Mr. Cox is county Farm Bureau organization director.

Jefferson's Christmas party was planned with the children's home at Mt. Vernon in mind. All gifts were exchanged and then taken to the home. Edwards' Christmas party was planned in a similar manner with gifts going to the Carmi Orphanage.

Important features of Wayne's Christmas party were carolling, a "History of Christmas Bells", and Rural Youth slides.

Shelby, revived in April '46 and sponsoring an active program, held a pie social in November which added $152.00 to the treasury. President Don Kull and his group are to be commended for their active program.

Clark has just planned a membership drive to be headed in January by two teams. This is its first big project for the new year. A dinner will be served by the losing side in April.

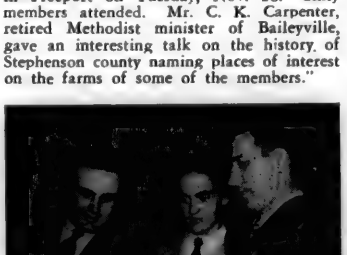
★ ★ ★ ★ ★ ★

McHenry's new county officers are Norman Johnson, president; Paul Swanson, vice-president; Betty Norman, treasurer; and Betty Nelson, secretary.

Hank Imig's Mason County group pepped up two of its recent meetings to the tempo of a one-act play given by members and a speech by Merrit Ackland, fieldman for Country Life Insurance Company. Add to these activities a membership drive and the annual banquet planned for Feb. 13 and you know why some groups succeed.

McLean's educational feature for November was a demonstration skit on parliamentary procedure. It was given before an audience of nearly 100 and according to secretary Alice Wright was instructive, amusing, and interesting.

A snappy news item from Stephenson reads: "One of the most interesting Rural Youth meetings of the year was held at the Stephenson County Historical Museum in Freeport on Tuesday, Nov. 26. Sixty members attended. Mr. C. K. Carpenter, retired Methodist minister of Baileyville, gave an interesting talk on the history of Stephenson county naming places of interest on the farms of some of the members."



Ellsworth D. Lyon, IAA Director of Young People's Activities, points out important tips for Talkfesters to Lewis Neal, Champaign county (left) and Melvin La Voie, Iroquois (center) and advises that Rural Youth groups begin now to prepare for 1947 Talk Fest.

Montgomery's recent community service activity consisted of preparation of T. B. Christmas seals for mailing.

In addition to their Christmas party Edgar Rural Youthers discussed "Highway Safety."

Stephenson is now sponsoring a roller skating party once each month.

Knox Rural Youth have been teaching square dancing for the Silas Willard school and now rate a standing invitation.

St. Clair's Rural Youthers and friends enjoyed a square dance Hoe Down at Shiloh Grange late in November.

Recent annual banquets have been held in Woodford, DeWitt, Edwards, McHenry and Wayne counties.

Kankakee visited the county courthouse offices and were told of the activities of the various county officials.

Christian will hold a panel discussion, January 16 on the theme, "School Reorganization." Christian and Montgomery have recently exchanged monthly programs.

We expect to hear more from Randolph soon. They are planning a benefit show.

McDonough held a box supper early in November and cleared $89.00 and later in the month created interest through a homecoming meeting. Their banquet will be held January 25.

The wedding bells have been ringing so much in Schuyler that a young married folk's club has been started. Recent weddings were: Elizabeth Jones and Joe Vincent; Rayetta Morgan and Byron Ross; Armagene Aden and Robert Croxton. George Mathews of the Prophetstown Tampico Warriers, Whiteside county, reports three weddings: Jean Martin and Bud Hartshorn; Edith Anderson and John Massey; Mary Nelle Satterfield and Leamon Hill.

"Graduations" through marriage have culminated in great interest in forming a Young Married Couples' group in McHenry according to Mr. and Mrs. Walter Lottig. One meeting has been held at the residence of Home Adviser, Mrs. Sweeney.

From La Salle county comes word that "Vince Werner and Luceille Gleim are now Mr. and Mrs."

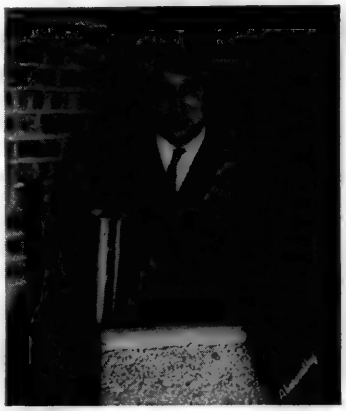
ILLINOIS WINS HONORS AT INTERNATIONAL

(*Continued from page* 10)

who traded a strain of superior hybrids to Lester Pfister, of El Paso, for an 80-acre farm, now valued at $20,000.

An Illinoisan was crowned soybean king as Harvey L. Stiegelmier of Normal, won the grand championship with an exhibit of Lincoln beans. His entry weighed 60.1 pounds to the bushel.

The title of "corn duke" was bestowed upon Vernon Ely of Mazon for his hybrid yellow dent variety. It weighed 58.3 pounds to the bushel. The corn duke title is awarded only for hybrid shelled corn.



Crown prince of the shell corn exhibitors was an Illinois man, Vernon Ely (above) of Grundy county. He took first place.

Stockmen from Illinois make up the largest block of exhibitors from any one state, won 48 of a possible 238 championships, and had runners-up and scattered placings in most of the breed and weight classes.

Champion fat Poland China barrow was owned by Oscar W. Anderson, Leland, and champion and reserve champion fat Yorkshire were exhibited by the Curtiss Candy Company Farms, near Chicago.

Cattlemen at the show agreed that the Tolan farm, Pleasant Plains, Sangamon county, is emerging as the home of some of the finest Angus cattle in the country.

The Tolan farm entries swept the Angus class. They showed the grand champion Angus bull and cow, the ten best head of Angus and placed first in many of the class showings.

Shorthorn winners from Illinois included the Edellyn Farms, Wilson, Lake county. They showed the reserve champion breeding female and the ten best head of Shorthorns.

Janet Countryman, 12, of Clare, DeKalb county, was Shorthorn class winner in the junior livestock feeding and in the same showing James Schlichting, Apple River, Jo Daviess county, won second.

Illinois sheep winners included: William Duncan, Lake Villa, fat Oxfords, wether lambs; A. O. Murray and Sons, Mazon, pen of three wether lambs; Alvin L. Helms and Sons, Belleville, breeding Cheviots, reserve champion.

ILLINOIS FARMERS FEEL BURDEN OF RECENT FREIGHT RATE RISE

ILLINOIS farmers are beginning to feel the burden of the increased freight rates which went into effect this month on authorization of the Interstate Commerce Commission.

The Commission granted rail and water common carriers an increase in their rates effective January 1, 1947, on five days notice, amounting to an average of approximately 17.6 per cent.

It is estimated that the additional revenue will aggregate close to a billion dollars.

What the increase means to the average farmer is explained by G. W. Baxter, director of the Illinois Agricultural Association transportation department.

Products of agriculture such as grain and grain products were increased 15 per cent; livestock 15 per cent; animal and poultry feed 15 per cent; agricultural limestone 15 cents per ton; phosphate rock 20 per cent with a maximum of 30 cents per ton, and fertilizer including potash 20 per cent subject to a maximum of six cents per hundred, or $1.20 per net ton.

This increase on grain shipped to Chicago from a point in central Illinois rises from a 12-cent rate to a 14-cent rate. This is based on 80,000 pounds and amounts to $16 per car, or about two cents per bushel.

A carload of cattle moving from Bloomington to Chicago, formerly taking a rate of 19 cents, is now 22 cents, an increase of $6.60 per car.

The new rates have increased by about a cent a bushel corn sent to Chicago from central Illinois.

Limestone hauled by rail now averages 15 cents more per ton than under the old rates.

The average car of rock phosphate shipped in from the Florida districts costs $12 more. Potash fertilizer, usually hauled in from New Mexico, costs $48 per car more.

The new rates have upped the shipping cost on feeder cattle from Texas by about $15 per carload.

The IAA and the American Farm Bureau Federation opposed the increases.

Baxter said that with the car shortage already moving corn by truck 100 miles to river points, this increase in rail freight rates means that trucks can move grain from still farther points to the river where cheap barge rates apply.

"I think it means a loss of business to the railroads," Baxter predicted. "It is the same with livestock as it is with grain — more will move by truck."

IAA records show that 838,000,000 pounds of corn moved into Chicago by barge in 1942. The elevators at Morris alone shipped 304,000,000 pounds of corn by barge. The barge rate there was two cents per 100 pounds into Chicago, compared to the rail rate of five cents.

The AFBF has voiced its concern because of the great need of most farmers for increasing quantities of plant foods to replace elements removed from the soil during the heavy cropping war years. Most of the fertilizers are hauled by railroads which are raising their charges to near-prohibitive rates.

ILLINOIS FARM BUREAU TOPS ALL STATES IN MEMBERSHIP GAINS

ILLINOIS beat Iowa, its closest rival, in membership attainments in 1946, according to the recognition given at the annual meeting of the AFBF in San Francisco.

Sixty-eight Illinois counties attained their 1950 AFBF goals in 1946 as compared with 58 in Iowa, and 50 Illinois counties made the two-million member goal of the AFBF as compared with 25 in Iowa.

Illinois as a state was one of three that reached its 1950 AFBF goal in 1946. The other two were Iowa and North Carolina.

Two Illinois counties, Menard and Piatt, qualified for "excellent" awards by having 90 per cent or more of all the farms listed in the 1945 census enrolled in their respective Farm Bureaus. Only seventeen other counties in the United States received this recognition.

Whiteside county in their mid-December membership drive established a new state record for a three-day campaign by signing 256 members in Farm Bureau. Whiteside now has 2590 members. Their active dairy and oil improvement program were considered as the biggest factors in attracting new members.

BLUE SEAL FARM TIRES

With our own BLUE SEAL brand tractor tires, we can offer Farm Bureau folks the very best in tire equipment—and at a substantial saving!

BLUE SEAL REAR TRACTOR TIRES

- Positive traction with full width and depth tread delivering maximum pull.
- Continuous center rib assures minimum vibration, smooth riding and center lug support.
- Tire is self-cleaning as it flexes, due to "built in" scientifically designed bevel behind each lug.

BLUE SEAL FRONT TRACTOR TIRES

- High center rib gives positive steering and easy turning, while two supporting ribs give stability.
- Full width tread with wide shoulder delivers maximum service.

BLUE SEAL IMPLEMENT TIRES

- Free-rolling ribbed tread reduces friction to a minimum. Long wearing.
- Self-cleaning—no intricate design to snag or "ball up" with soil.
- Reduces vibration and speeds up farm work.

Bad Roads and School Reorganization

Although bad roads may prevent consolidation of school attendance units, they need not prevent that district from becoming a part of a larger school district for administration and tax purposes. A former small district may gain a number of substantial advantages educationally by becoming a part of a large district, even though the school in that former district remains open and in use. The following are a few of the possible advantages:

1. Broader tax base and a more equal distribution of the tax burden.
2. Improvement of the school program through the hiring of instructors in art, music, speech, and physical education to serve in all of the schools on a pre-arranged schedule.
3. Provision for each school in the district to use equipment, as motion picture machines, equipment which would be too expensive for a small district to own.
4. More coordination of the course of study, as well as more uniformity in text books and in educational practices in any given larger community.
5. Better selection of teachers since working in the larger district offers more security and opportunity to the teacher.
6. Broadens interests and builds community spirit in a rural area. This area probably already serves as a community for trading, banking, church, and high school purposes.
7. More efficiency, simplicity, and perhaps economy in keeping records.
8. Partially relieves the isolation and possible stagnation in which the one-room teacher often finds herself by providing supervision from within the school district.
9. The seven members of such a school board would bring to that school a broader range of experience and could possibly outline and provide an educational program better adapted to the needs of rural boys and girls of today.
10. The state legislature encourages the setting up of larger school districts for administration and tax purposes so that state money for secondary roads can be used where most needed to facilitate pupil transportation.

Although the above mentioned advantages are possible while operating all of the schools in use when school reorganization is voted, yet the school board of the larger district would, doubtless, see opportunities to eliminate waste, improve efficiency, balance teacher loads, and offer additional educational opportunities by closing some of the schools and transporting the pupils to some other school.

However, no school should be closed in such larger district until the school board can offer substantially better educational advantages elsewhere and until roads, buildings and transportation facilities are adequate for such a change.

Wisdom of Youth

At a school meeting recently when various school problems were being discussed by members of a panel the chairman of the panel noticed a young man at the front of the room absorbed in writing on a pad of scratch paper. Near the end of the meeting he secured the copy of those writings, found them interesting and had the author read them to the audience. They were as follows:

When we hear how poor our schools
We wonder how our little jewels
Can evermore grow up to be
As very smart at things as we!

Our schools! They're poor;
They're small; they're broken!
For every ill they are bespoken!
It's strange indeed — with such a starter
Our kids, than we, grow so much smarter.

Our teachers all are underpaid!
Our Boards are awkward — lax or staid!
This screams a mystery aloud;
How youth grows up so well endowed?

It's strange indeed — with so much loss,
Our kids grow anything but cross!
Not only do they grow, alas —
They seem to grow both good and fast.

But paradox can be explained —
No matter how our pride is strained —
And we will note the answer lies
In something that should not surprise.

The thinking here may be quite crude!
The answer spoken, worse than rude!
Perhaps they're wise, in spite of fuss —
Because they quite ignore us!!

The author J. Thomas Hastings, Director, High School Testing Bureau and University Examiner, University of Illinois.

ONION GROWERS EXCHANGE

Onion set growers in the Chicago area have formed the Tri-State Onion Set Exchange as a bargaining agency to handle about one million bushels of onion sets grown annually by members.

EDITOR'S NOTE: Picture page entries should be addressed to Picture Editor, Illinois Agricultural Association, 608 South Dearborn Street, Chicago 5, Ill. If you wish picture returned, enclose self-addressed stamped envelope. Entries are judged on originality, clearness, and interest. Avoid shots of persons merely looking toward camera. Best picture receives $5. Others published receive $1.

IAA Opposes Rural Phone Rate Boosts

EXTENSIVE hearings have been held before the Illinois Commerce Commission in connection with the proposed increase in telephone rates of the Illinois Commercial Telephone Company.

The company has 181 exchanges serving approximately 100,000 subscribers. If the increase becomes effective it will mean an increase of $880,000.

The transportation department of the Illinois Agricultural Association has been active at all hearings at the request of local county Farm Bureau in opposing the increase in rates.

Regional hearings have been held at Marion, Mendota, Olney and Paxton. Another is scheduled in Monmouth, the purpose of which is to give local people an opportunity to testify as to service. Objections to any increase in rates have been made at the various hearings due to the class of service they now receive.

Final hearings will be held during the month of January to complete the evidence and a decision must be made by the latter part of February.

A group of top-flight 4-H Club young people are shown talking with John K. Cox, IAA director of rural school relations, while visiting the IAA offices during the National 4-H Club Congress in Chicago.

NEWS and VIEWS

Resolutions Adapted By Associated Women At The San Francisco AFBF Annual Meeting

Foreword

During the present period of reconversion we are confronted with critical problems in protecting and conserving the welfare of the farm family.

We believe it is the responsibility of the Associated Women of the American Farm Bureau Federation to face up to these problems and to help determine policies and carry forward a program of action for their solution.

Farm Family

We believe that the farm family is important to the nation. It produces most of the nation's children.

The necessity for conserving the ability of the farm family to transmit to the nation the best in human life is becoming increasingly evident.

The necessity for raising the standards of home life on the farm are evidenced by statistics which show a larger increase in juvenile delinquency in rural than in urban areas during the war period.

We believe that the family-sized farm offers the best opportunity for the development of the farm family. We recommend that all agricultural policy, including price and production, credit and land policies, be directed toward the maintenance of the family-sized farm and the long-time objective of owner-operated farms.

Better Living on the Farm

One of the critical decisions to be made is whether present income and savings shall be used to improve farm living or whether it will be used as after the last war, in capitalizing higher land values.

We believe that the best investment farm families can make at the present time is to earmark their Bonds and Savings for future use, for such things as the maintenance of the soil and buildings on the farm and for labor-saving equipment for the home such as running water and electricity.

There is still much to be done to make the farm home comfortable. Since the availability of electricity does more than any other one factor to alleviate the drudgery of home making, we recommend that every effort be used to extend the use of electricity to every farm home in the nation.

Food Policy

It has long been recognized that the fertility of the soil is the basis for prosperity in agriculture and in the nation, and we have come to know that a close relationship exists between soil fertility and human nutrition.

We believe that women and homemakers should be greatly concerned with programs designed to improve the soil. We recommend study and discussion of the significance of new developments now taking place in the fertilizer program of the American Farm Bureau Federation.

We heartily encourage the expansion of the school lunch program as an effective way to better serve the nutritional needs of all children, but we believe that the program means more than providing a meal.

It should also teach nutrition, selection of foods and good food habits, which will later reflect upon the health and well being of our future citizens. There is a great need for well trained supervisors of school lunch programs and trained lunch room workers — more equipment and special help is needed in the smaller schools, especially in rural areas; training of personnel in problems of finance and administration; and plans to combine school lunch and better health teaching.

Education

We are firmly convinced that education of our youth is the best overall, longtime method of solving our domestic and world-wide problems.

We urge the establishment of state and county Farm Bureau school committees to assist existing educational agencies in a study of possible school reorganization plans.

There is very real evidence that interest in preparation for the profession of teaching is waning due to general reluctance to adequately compensate those who are so engaged. We favor assistance through scholarships to interest young men and women in the teaching profession and legislation that will place teachers wages on a par with other lines of specialized work.

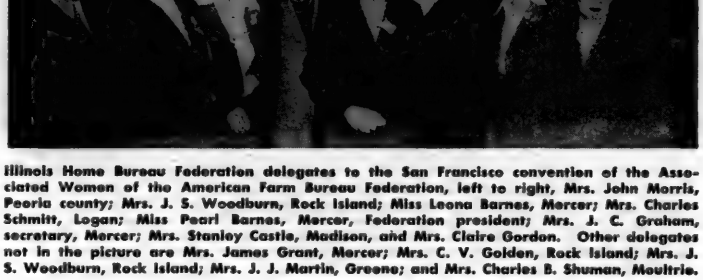
Believing that we have too long been inarticulate in expressing our disapproval of the unwholesome movie and radio programs being offered to the public, we urge that committees be set up in each community Farm Bureau for the purpose of expressing our disapproval to the proper agencies, and we solicit the aid of other organized groups of women interested in a program of this nature.

Health

One of rural America's most urgent problems is to provide a program assuring better hospital and medical facilities for rural peo-

THIS DRESS IS EASY TO MAKE

This softly draped dress made from tubular Jersey takes little cutting and stitching to make and is perfect for the beginner sewer. For free instructions send self-addressed stamped envelope to Women's Editor, IAA RECORD, 608 S. Dearborn Street, Chicago 5, Illinois.



Illinois Home Bureau Federation delegates to the San Francisco convention of the Associated Women of the American Farm Bureau Federation, left to right, Mrs. John Morris, Peoria county; Mrs. J. S. Woodburn, Rock Island; Miss Leona Barnes, Mercer; Mrs. Charles Schmitt, Logan; Miss Pearl Barnes, Mercer, Federation president; Mrs. J. C. Graham, secretary, Mercer; Mrs. Stanley Castle, Madison, and Mrs. Claire Gordon. Other delegates not in the picture are Mrs. James Grant, Mercer; Mrs. C. V. Golden, Rock Island; Mrs. J. S. Woodburn, Rock Island; Mrs. J. J. Martin, Greene; and Mrs. Charles B. Shuman, Moultrie.

for HOMEMAKERS

ple. It will take the combined efforts of the medical profession and rural people, as well as state and federal aid, to solve the problem. The solution must provide for comprehensive health education, for well trained doctors, dentists, nurses, technicians and laboratory scientists, as well as the establishment of public health centers, hospitals and clinics accessible to all sections of rural America.

We recommend the American Farm Bureau Federation for its progress in a program for better rural health and urge that this program be vigorously continued.

We encourage support of the prepayment plans for hospital, surgical and medical services.

The great shortage of nurses endangers our nation's welfare. We urge a concentrated effort on the part of the Associated Women to interest capable young women in this field of service. Establishment of scholarships could well be considered.

Producer-Consumer Relations

Agriculture is facing a serious crisis in the cry of the consumer for cheap food. Certainly an intensive educational program is in order between consumer and producer for the mutual benefit of all concerned. Farm women, through their organizations, must reach urban organizations of women with information about farming such as the per capita income of farmers, the investment in land, livestock and equipment, labor, the cost and the uncertainties of production and the spread between producers and consumers.

In addition, we recommend that as soon as practicable, the Farm Bureau conduct an expanded research program in the entire field of producer-consumer relations and that the results of this program be given the widest publicity possible, so that all groups understand their mutual problems.

Youth in the Farm Bureau

The boys, girls, young men and young women on the farms are the leaders of tomorrow. Their potentialities for becoming leaders in agriculture, in Farm Bureau, as well as for our country, cannot be overlooked. Many of those who come up through 4-H Clubs, Junior Farm Bureau and Young Married groups are leaders today in Farm Bureau work and are the better qualified because of their back-ground and training.

We endorse the progress of the program of the American Farm Bureau Federation for rural youth and urge its continuance and expansion.

We believe such expansion might well include programs for training young people in the history, organization, policies and programs of the Farm Bureau.

We urge the Farm Bureau to continue all of its present policies for the development of 4-H Club work and particularly in assuming responsibility for leadership of local clubs. We also recognize the value of the FFA and FHA programs and urge cooperation with these groups.

GIFT HANDKERCHIEF

You can make this dress-up handkerchief with its deep, lacy border by crocheting the wide edge from fine cotton thread around a square of linen. For free instructions send a self-addressed, stamped envelope to Women's Editor, IAA RECORD, 608 S. Dearborn St., Chicago 5, Ill.

Citizenship

We urge the appointment of Legislative committees of men and women at the local and state level, such committees to be thoroughly informed and to pass on information to the membership regarding matters which vitally concern agriculture and the welfare of the nation.

It is only by an aroused citizenship thoroughly conversant with national and international issues that we can hope to avert future war. The women of America can do much to bring about such a program. At no time in the history of our country has the status of women been at such a high level. They have made outstanding contributions to the nation in the winning of the war, as well as in many other fields of endeavor.

Libraries

We recommend that interest be maintained in rural library service and encourage more use of the facilities already available.

Rural communities should be able to have the benefits of a public library system such as the town and cities of our nation now have, yet comparatively little progress has been made to accomplish this. We therefore recommend legislation which will provide for the establishment of county wide public library systems in states not already so organized, to be supplemented by mobile units to reach all rural communities.

Safety

We favor cooperation with the Extension Services in bringing to farm people a well organized and effectively presented safety educational program.

We urge that farm people do all they can to reduce accidents on the farm and in the home, correcting all possible hazards in their own homes and using all precaution in the use of farm machinery.

To promote highway safety, we urge that all traffic laws be strictly enforced. We heartily endorse programs that many schools have developed, which include courses in safe driving. We favor adequate testing of drivers' skill and checking for mechanical defects of automobiles.

The Rural Church

"A nation's greatness cannot be measured entirely by its material resources nor does the well being of a people depend upon the abundance of its possessions. Any plans for building a better agriculture must include provision for the full development of religious institutions serving rural people."

We recommend that local Farm Bureau groups cooperate with local churches in such things as surveys of religious needs in their communities and in carrying out programs to meet these needs.

CHEESE TARTS

A deluxe dessert is Cherry Cheese Tarts. Add ½ cup grated sharp cheese to a favorite pastry. Make individual pastry tarts and bake tarts to a golden brown. Fill these tasty treats with a cooked cherry mixture and serve them at dinner.

TEEN-AGE ACCESSORIES

These easy-to-make "glamour" accessories are designed for teen-agers. Listed are: sequin evening bag with make-up mirror, tailored bandbox bag, velvet and lace earrings, bead-studded bracelet, belts, bonnet and muff set. For free instructions enclose self-addressed stamped envelope to Women's Editor, Illinois Agricultural Association Record, 608 S. Dearborn St. Chicago 5, Ill.

SUMMARY OF AFBF RESOLUTIONS

(*Continued from page* 24)

Farm Bureau Federation urged the development of a cooperative rural credit system, in the belief that a cooperative system of such credit is essential to the well-being of American agriculture.

Since the establishment of the Farm Credit Administration in 1933, which provided the foundation for a farmer-owned and farmer-controlled farm credit system, we have repeatedly reaffirmed our recommendations that the necessary steps be taken to make the farm credit system fully cooperative so that it will be farmer-owned and controlled, and that there be encouraged and preserved the initiative and responsibility of the local associations which are the basic units of a sound cooperative system.

In order further to improve the credit services to farmers, the American Farm Bureau Federation recommends that the various agencies of the Farm Credit Administration and the direct government lending agencies be coordinated and that as the first step in such coordination these farm credit agencies should be placed under the direction of a single independent national policy-making bi-partisan board. We also reaffirm our support of the general principles of the recent Flannagan farm credit bill.

Today through the continued efforts of the farmer-borrowers, all but one Federal land bank have repaid all Government capital. We urge that the cooperative features of the farm credit system be further expanded, and specifically recommend that a study be made on the desirability and feasibility of achieving complete farmer-ownership and control of the Federal land banks, production credit, corporations, intermediate credit banks and banks for cooperatives.

We affirm our recognition of the need for improvement of farm housing and our belief that such need can be met most effectively by utilizing existing credit agencies under the Farm Credit Administration, without embarking upon any expansion of direct government loans.

Farm Labor

The recruitment and placement of farm workers is chiefly the problem of the farmer-employer. During the war extensive governmental financial assistance was needed in order to assure an adequate supply of farm labor for the production and harvesting of the tremendous food and fibre requirements of the world. Steps now should be taken to minimize governmental control of farm labor and limit the operations of such program to the recruitment and placement of workers and their families and the gathering and dissemination of statistical information on labor supplies.

At the state level we recommend that the present program be continued, with appropriate legislation authorizing the state Extension Service if it does not desire to continue to conduct the operations of the program to designate some other state agency created or approved by the respective state legislatures to supervise the recruitment and placement of farm workers.

Land and Water Use

The American Farm Bureau Federation reaffirms its support for conservation and the wise use of our lands, water, and forests. This is a vast problem involving many diverse and controversial subjects, such as irrigation, reclamation, flood control, valley authorities, and the use of forests and other public lands. The American Farm Bureau Federation recognizes the importance of irrigation and water development to the agricultural economy of the arid West. We recognize that the welfare of Western agriculture demands the development of a constructive far-seeing water policy.

Now projects undertaken by the Federal Government on flood control, irrigation, reclamation, and valley authority projects should be advanced only after due consideration of necessity and of the effect in the monetary and fiscal field, and with real consideration of the viewpoint of those in the area affected.

Rural Electrification

One-half of the farmers of this nation now have electricity. The remaining rural families must receive this service as fast as possible. Electrified rural homes are brighter and healthier, and over-emphasis cannot be given to the part that electricity is playing in making farmers more efficient in the production and marketing of their products. We therefore urge and support the Rural Electrification Administration's program, designed to extend coverage on a self-liquidating basis, to farm people through local cooperatives, and so designed as to be owned, operated, and controlled by the people they serve upon truly cooperative principles. We also urge privately-owned utility companies to prosecute vigorously their programs of electrification in rural communities giving full coverage to all farmers in the areas which they serve.

We look with concern upon the extension of REA activities to merchandising of electrical equipment and related items.

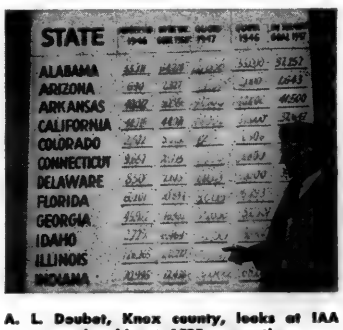
We oppose enactment of legislation designed to restrict authority to make loans for generating power, but insist that no such loans be made by the Rural Electrification Administration for building generating plants except in cases where a positive saving can be made to consumers or where sufficient energy is not otherwise available to serve rural consumers.

Transportation

It is well recognized that the maintenance of an efficient and economical transportation system is of vital importance to agriculture. The American Farm Bureau Federation has, year after year, reiterated its position on the general problem of transportation as it affects agriculture.

We reaffirm our established policies in regard to the construction and maintenance of year-round farm-to-market roads and urge the board of directors of the Amercian Farm Bureau Federation to seek a clarification of policy as the adoption of standards, specifications and other related matters by the public roads administration and state highway departments so that the determinations of these matters will be left to the states.

We recognize that American railroads constitute an important part of our transportation system and that railroads must operate under such reasonable regulations as will assure the public fair and reasonable rates and adequate service. We urge that greater emphasis be placed on the improvement of rail equipment in order to further reduce the cost of marketing agricultural commodities.



A. L. Doubet, Knox county, looks at IAA membership at AFBF convention.

Research

The American Farm Bureau Federation played a leading role in the passage of the Bankhead-Flannagan-Hope research bill, which provides for a greatly expanded research program for agriculture. We believe that this program is essential to the maintenance of the well-being of agriculture in our competitive economy. Special emphasis should be given to new research work in the utilization of agricultural products and the development of expanded markets. Added emphasis is also needed on coordinated studies of means to reduce the cost of marketing agricultural products.

We believe that the greatest possible proportion of these new funds should be spent in the respective states, rather than being centralized in Washington. We insist that these new funds be administered in such a manner as to avoid duplication of work, overlapping of functions and conflict of agencies.

Commodity Programs

No development in Farm Bureau in recent years has so encouraged the producers of speciality crops as has the new Commodity Program. These crops in the aggregate make up a large part of the national farm income. The problems of these crops are many, difficult, and varied.

Only men who are specialists in these fields can fully understand and adequately cope with these problems. The new commodity program gives the board of directors more information on, and a better understanding of, these problems as well as giving the growers of these crops a definite place in the Farm Bureau program. When coupled with varied activities on such general matters as taxation, credit, international relationships, and general price levels, the Commodity Program gives to the Americm Farm Bureau Federation a well-rounded ability to serve the interests of American agriculture.

Membership

The American Farm Bureau Federation has completed the most successful membership year in its history. The organization with 1,128,259 farm families representing approximately five million farm people who have voluntarily joined, is a tribute to the desire of farm people to make a contribution to the world in which they live. This membership record was attained by hard work on the part of thousands of individual farmers throughout the United States who voluntarily contacted friends and neighbors in membership drives. We express our grateful appreciation for their untiring efforts in membership solicitation. We also recognize the contribution of the various county and state leaders who have worked diligently on the membership programs.

Quality controlled ingredients

Conquerors

OF THE WILDERNESS

The covered wagon has come to represent the symbol of the hardy, rugged American spirit. The frontiersman has been glorified for what his spirit meant to the building of America.

But our covered wagons ofttimes carried men who sinned grievously against American soil. As they broke the virgin land they burned the trees that protected it, and when they had mined the soil of its rich fertility, moved on . . . abandoned that land, without cover, to the ravages of wind and rain and frost. In many places the ugly scars are still to be seen.

The covered wagon is gone, but periods of low and unprofitable prices have done even greater damage. Farmers were forced to farm every acre with soil-depleting crops in order to make enough to pay the mortgage and maintain the family. The economy of low, unfair prices made it a necessity during these recurring periods.

In the years ahead, there must be time and money to rebuild these tired acres. America's wealth is in her land. Her land is in our hands. Let us give a good accounting of our stewardship by united, militant action to maintain fair farm prices.

Country Life Policy

See your friendly, experienced Country Life agent today for full information on the various Country Life policies available. Learn how little it costs to enjoy protection and peace of mind. Learn how easy it is to underwrite plans for the future with a Country Life policy that fits your needs like a glove. It doesn't pay to take chances.

IF you want low cost protection in the event of death, you want the Ordinary Life Policy.

IF you want to retire when old, investigate the Endowment at Age 65 Policy.

IF you want paid-up protection in your declining years, look at the 20-Pay Life Policy.

IF you feel that maybe you'll need a little cash when you get old, don't overlook the 20-Year Endowment Policy.

IF you're paying off a mortgage, get a Home and Family Protector Policy to make sure the mortgage will be paid should you die before it matures.

IF the children are in school, make sure they'll not have to leave school and go to work should you, the breadwinner, die. Any Country Life policy will do this.

IF there's a baby in the family, a 20-Year Endowment Policy will put him through college.

IF you can't make up your mind as to which Country Life policy is best for you, the Term to 65 Policy will protect your loved ones while you are deciding.

IF you carry no insurance, stop just a moment and think of the chances you are taking. Then, phone your Country Life agent.

THE STATE FARM BUREAU PUBLICATION

OPPORTUNITIES

By President Charles B. Shuman

DURING recent months I have received many interesting letters, but there were two which fit together to tell a story. Both letters were from young men of ability and ambition and both were farm boys and college graduates. The first wanted to find a job in the city. He painted a picture that has been all too familiar in the past. His parents had denied themselves many of the comforts of life to give their son an education during a period when agricultural income was at such a disparity with that of other groups that few farmers had a decent standard of living. They had constantly encouraged him to go on to school so that he could "get a job in the city away from the old farm."

After graduation this boy went back home still preferring farming and rural life. However, his parents won out. They insisted that they had given him the opportunity to get away from the farm community and they did not propose to see him waste his life there. Besides they were not ready to retire and they were not interested in a partnership involving new methods and ideas. Their boy now reports daily to a great corporation and struggles to adapt his life and thinking to the depressing artificiality and selfish cruelty of the great city.

My second letter came from a man who had first tested the glamour and "opportunity" of a great urban center and had later, from choice, returned to his home rural community. A graduate in electrical engineering, he was happy in the knowledge that he was now serving where he was best adapted to live and where the need was greatest. In effect he said, "Not as many dollars in the bank perhaps, but more happiness for myself and my family."

It is time for the fathers and mothers, the boys and girls of rural America to awaken to their real opportunities. Today, the best place for rural youth to look for a full life of happy service is in their own home community. Opportunity depends upon need. Nowhere in America is there such an unfilled need for the services of trained specialists as in the rural communities. The mechanization of agriculture and modernization of the farm home, accelerated by the attainment of a parity price position for farm products, has opened the door. We need and will have new electrical and mechanical tools and conveniences, better roads, better schools, more rural hospitals and health centers, better land use and engineering practices, more decentralized and modern processing plants and a great increase in air travel and transportation. Farm people will not be denied these modern needs. That is why they have built the great organization that is ours today. They

PRICE SUPPORTS 'TIL '49

PRESIDENT Truman's official declaration of the termination of hostilities Dec. 31 abolished many of the president's wartime powers and established a definite time limit for the end of post-war farm price supports under existing legislation.

This proclamation automatically terminates at the end of 1948 the government's obligation to support prices of major farm commodities at not less than 90 per cent of parity.

In November 90 per cent of parity was equal to $1.22 a bushel for corn, $13.86 per cwt. for hogs, and $3.36 a hundred pounds for milk.

The minimum "floor" prices will be subject to change from time to time, depending mainly on the prices of the commodities the farmer buys.

At present, with the exception of potatoes, no government aid has been needed to maintain prices, since farm commodities have been well above legal support levels.

During the next two years, however, surpluses of many farm commodities are expected to drive farm prices down to the levels set by price support legislation.

Anticipating the expected post war drop in price levels, Congress during the war passed legislation to protect the farmer against ruinous price declines.

This price support legislation was embodied in the wartime Stabilization Act of 1942. The law, as it read today, guarantees the price on so-called basic commodities at 90 per cent (92½ per cent for cotton) of parity for two years.

The basic commodities protected by this law are corn, wheat, cotton, tobacco, rice and peanuts. The law provides that the prices on these commodities shall be supported by commodity loans.

These loans will be set up, in all probability, on a basis similar to those made to producers under the Agricultural Adjustment Act of 1938. (The old AAA).

The scope of the Stabilization Act was later extended by the Steagall amendment to include price support on hogs, eggs, chickens, milk, soybeans and potatoes.

While the basic commodities are to be supported by crop loans, the Steagall commodities may be supported by one or more measures, including loans to producers, purchases in the market, or, as the bill reads, "other operations."

★ ★ ★

By LEW REISNER
Field Editor, IAA RECORD

The Steagall commodities are to be supported at **not less** than 90 per cent of parity. In some cases, fluid milk may be an example, prices probably will be supported at levels higher than the legal minimum.

For all other farm commodities, including beef cattle, lambs and wool, the Steagall amendment declares, in effect, that they shall be supported inso-far as funds are available to bring them into parity relationships with basic and Steagall commodities.

Carrying out a program to keep effective price support floors under farm commodities during the next two years may not be done too easily. The government's difficulty with last year's potato crop offers an example. This past year the government bought millions of bushels of potatoes to support the price at 90 per cent of parity. This was required under provisions of the Steagall amendment.

The cost, as has been well publicized, was about $80,000,000. Next year acreage controls will be placed on potatoes with parity payments made only to cooperators.

Again, in 1943 when farmers were asked to increase hog production at

a guaranteed price, they responded by producing 122,000,000 pigs and in 1944 this record crop crashed through the guaranteed floor.

Farmers believe in full production and certainly do not relish a return to specific crop acreage control programs of the past.

It is generally agreed, however, that it will be hard to support prices without some control on production. Leaders in Congress appear ready to act on this basis if and when it becomes necessary.

Rep. Clifford Hope, (Rep.-Kan.) and chairman of the powerful house committee on agriculture, said in an address recently that while price support policy should recognize abundant production, safeguards should be used to protect the farmer from being "drowned in the flood of his own abundance."

It seems safe to say that production controls will be a part of any future price support program.

On the basic commodities — as corn or wheat — this will mean acreage allotments and, if necessary, marketing quotas, for cooperators. The prices will be supported by commodity loans made directly to farmers.

On the Steagall commodities production control may be necessary but probably will come later than on the basic commodities. Potatoes again are the exception. Other methods of maintaining support levels probably will include direct market purchases, loans, and direct payments to farmers.

Following are listed some of the major crops and products, and their support prices based on 90 per cent of parity in November:

For basic commodities: corn, $1.22; wheat, $1.68; cotton, 24.3c; tobacco, 28.9c. For Steagall commodities: soybeans, $1.84; hogs, $13.86; eggs, 50c; chickens, 21.8c; whole milk, $3.36; butterfat, 53.4c.

Pres. Truman:
WE ARE PLEDGED TO THE SUPPORT OF FARM PRICES

THE government's pledge to support farm prices for two years was renewed by President Truman in his state of the union speech and economic report to the Eightieth Congress now in session.

"We must honor the government's commitment to support farm product prices during the period of readjustment to a stabilized peacetime basis," the chief executive said.

The cost during the next fiscal year for price support operations was estimated at $330,000,000 and was based on the assumption of "continued general prosperity." Costs will be much greater if farm markets are depressed.

Even with the increased cost of price supports, the president asked a cut in the agricultural department's over-all fund of $73,588,033.

Largest single budget cut asked by the president was in the program of direct payment to farmers for soil conservation practices. The cut, from $300,000,000 to $200,000,000, would apply to the 1948 crop year.

Touching on short range agriculture policy, the president said: "Present laws give considerable stability to farm prices for 1947 and 1948, and those two years must be utilized to maintain and develop markets for our great productive power."

"We shall need to give increasing emphasis to marketing during the next few years. Better marketing can go a long way toward maintaining adequate rates of consumption, with benefit to farmers and the public alike."

He mentioned the permanent school lunch program recently authorized by Congress. "I hope this program will be expanded until we are sure that every American school child gets an adequate diet."

"In addition we should study carefully the possible need for food and nutrition programs to reach low-income families."

The government's long-range program to support farm income at reasonable levels must be kept flexible, the president said.

He advocated the preservation of the family-sized farm, prevention of another agricultural depression, comparable treatment for farm communities in education, housing, medical care, health, nutrition and social security.

Our Cover - - -

Editor's Note: This is the first of a series of cover pictures dedicated to some of Illinois' historic and picturesque scenes.

OF ALL Illinois' famous sons, none stands higher in her estimation than Abraham Lincoln. Born in Kentucky, he spent the greater part of his life in the area of the Illinois capital city of Springfield, where he is buried in the Lincoln Tomb pictured on our cover.

Visitors to the tomb — statesmen, royalty, presidents and thousands from all walks of life from every corner of the earth — have for many years come to pay their respects to the Great Emancipator. No longer does Lincoln belong only to Illinois, but as an inscription in the interior of the tomb puts it, "He Belongs to the Ages."

With funds acquired principally through subscription, construction of the monument, designed by Larkin G. Mead, Jr., was started in 1871. It was decidated in 1874. In 1899-1901 it was rebuilt and the casket moved to a new burial place 10 feet deep and six feet from the north wall.

Buried in the south wall of the chamber are Mrs. Lincoln and three children, Edward, William, and Thomas, familiarly known as "Tad." The eldest son, Robert Lincoln, who died in 1926, is buried at Arlington. In 1930-31 the tomb was again remodeled and the interior changed considerably.

This is an interior view of the Lincoln Tomb at Springfield.

Grain Marketing Program *Moves into High Gear*

FURTHER progress in the organizing, planning and developing of the Farm Bureau cooperative grain marketing association, which will be allied with the IAA's Illinois Grain Terminals Company, have been reported by Acting Manager G. H. Iftner.

Added to the lengthening list of counties which plan to affiliate with Illinois Grain Terminals Company is the Livingston County Grain and Supply Company which recently purchased the holdings of the Saunemin Farmers Elevator Company which included four elevators.

Besides marketing grain, the Livingston county co-op plans to become affiliated with Illinois Farm Supply Company and to supply farmers with Blue Seal and Service Brands of feed and fertilizers.

The Havana River Grain Company, which will service Mason, Logan, Menard, Cass, Schuyler, McDonough and Fulton counties, reported the near completion of its 70,000 bushel elevator at Havana. It will be ready to buy grain about March 1 and with the old elevator will have a storage capacity of 90,000 bushels.

The three elevator sites purchased by the Prairie Grain Company, which will serve La Salle, Lee, Henry, Marshall-Putnam, Stark, Woodford, Bureau and Peoria counties, are at Lacon, Hennepin and Ottawa.

Plans for the construction of a 125,000 bushel elevator at Lacon will be discussed with the contractor when he submits his first draft about April.

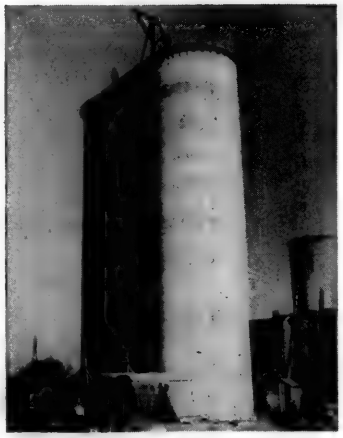
The board of directors will meet soon with the builder of the Hennepin elevator. Work is expected to begin about April 1. The site at Ottawa still awaits clearance of title. Other sites are being sought by the Prairie Grain Company. C. H. Kreiling, Havana engineer, has been authorized to secure permits for the construction of the Lacon and Hennepin elevators.

The elevator at Havana will be completed about the same time as the elevator being built at Decatur, Ala., by the Indiana Grain Cooperative. Havana River Grain Company intends to ship grain by barge to the elevator at Decatur, Ala., and later to the elevator at Louisville which the Indiana co-op is planning to build.

Havana Grain plans a membership in the Illinois Grain Corporation, the IAA's grain brokerage affiliate, which has an agreement with Indiana Grain to credit for patronage purposes grain marketed through Indiana Grain by Illinois Grain Corporation members.

Officers and members of the board of directors of the new Livingston County Grain and Supply Company are: Leonard Sellmyer, president, Saunemin; John Roth, vice president, Fairbury; Eugene Mies, secretary, Pontiac; William Thomas, treasurer, Flanagan; M. D. Rich, Saunemin; Charles Chapple, Dwight; Edward Brandes, Manville; John Murphy, Odell; and Charles Lauritzen, Reddick.

Western Illinois Grain Company, Dallas City, became the first active member of Illinois Grain Terminals Company on Jan. 13 when president Emory Ward, Ferris, signed the membership agreement following official action by his board of directors.



Workmen, shown atop the Havana River Grain Company's 70,000 bushel elevator, put the finishing touches to the structure which is expected to go into operation March 1.

LETTERS TO THE EDITOR

PRACTICAL JOKER

I note in the material for the February issue of the RECORD the story announcing the resignation of John C. Moore as assistant organization director for District 3. You have a statement in the article to the effect that practical jokes are legendary with Mr. Moore. I think I might enlighten you on a practical joke that John pulled on IAA Organization Director O. D. Brissenden during a Mid-West Training School in Madison, Wis., in 1931.

O. D. Brissenden and L. F. Brissenden, his father, were both in attendance at the school. L. F. Brissenden is quite a fisherman. The school was conducted at the University of Wisconsin which lies on the bank of a lake. Rather early each morning, L. F. Brissenden would get up and go down to the bank of the lake and do a little fishing. He usually pulled out a few small fish and gave them to some of the boys who would be along the lake shore.

On next to the last day of the school, O. D. Brissenden accompanied his father down to the lake to fish. They came up about 8 o'clock in the morning and thought nothing of their fishing adventure. However, the sly John Moore took cognizance of this event and decided to play a practical joke on O. D. Brissenden, who of course had no fishing license.

During the noon hour, John drove over to the state house, went into the office of the state office of conservation, secured some conservation department stationery, and a copy of a summons which was used to summon men into court who had violated the fish and game act of the state. John had this summons very carefully filled in with a typewriter, and then bribed a university cop to step into one of the sessions of the school and serve the notice on O. D. Brissenden before some 400 or 500 people assembled in this meeting.

Brissenden had no knowledge of such actions until the cop approached him, and the summons was so neatly done, that even after it was served, he never suspected John Moore as the man who had figured out the practical joke. Of course it was embarrassing to Brissenden, but John split his sides laughing. It was several hours before Brissenden finally discovered that it was a joke and found out who had been back of it.

I thought you might be interested in knowing about this occasion because it is fully characteristic of John Moore. That is one of the reasons why we all love him.

George E. Metzger
IAA Field Secretary

What CAN WE DO WITH OUR Rural Roads?

By CHARLES B. MAYFIELD, Director,
IAA Road Improvement Department

HOW MANY times have you gone to town on Saturday and observed mud-covered, battered automobiles parked here and there?

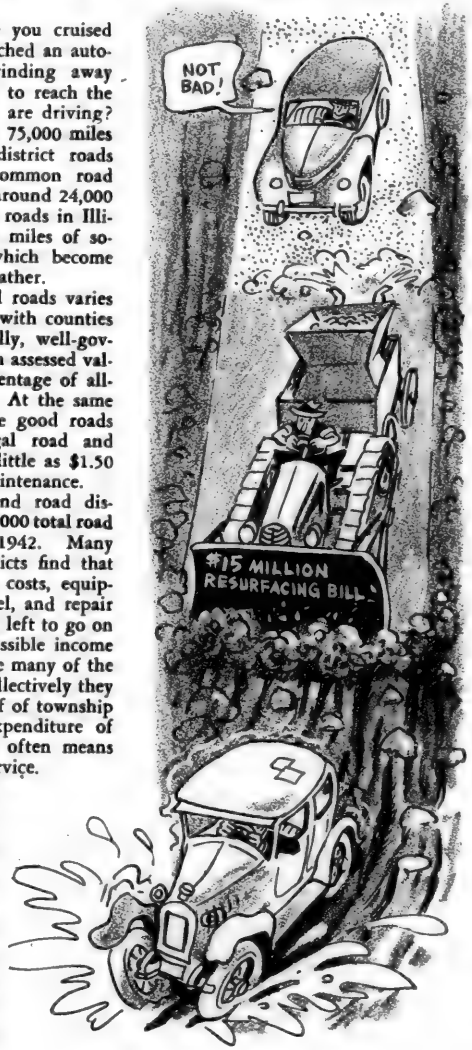
How many times have you cruised down a highway and watched an automobile lurching and grinding away over a rutted road trying to reach the paved road on which you are driving?

Farmers who travel the 75,000 miles of township and road district roads each year, have many common road problems. There are still around 24,000 miles of unimproved dirt roads in Illinois townships and many miles of so-called improved roads which become impassable during bad weather.

Ability to support local roads varies widely among townships with counties all over the state. Usually, well-governed townships with high assessed valuations have a large percentage of all-weather township roads. At the same time, no district can have good roads when the maximum legal road and bridge tax rate yields as little as $1.50 per mile each year for maintenance.

Over 300 townships and road districts received less than $2,000 total road and bridge income in 1942. Many townships and road districts find that after road administration costs, equipment payments, labor, fuel, and repair bills are paid, very little is left to go on the roads although all possible income has been collected. While many of the 1620 districts are poor, collectively they account for more than half of township cost payments. Wise expenditure of road and bridge revenue often means good or bad local road service.

The Illinois state legislature approved in July 1945 an act and appropriation for the construction and resurfacing of township and road district roads. On November 20, 1945, the first allotment of $10,000,000 was made to the counties and on July 1, 1946, the remaining $5,000,000 was allotted. Of the total appropriation $14,208,000 was allocated to townships; $591,999 was allocated to county highway engineers for engineering service; $200,000 was allocated to the state department of public works and buildings for administration purposes.



The Illinois Agricultural Association sponsored the legislation providing these funds in the General Assembly and has been greatly interested in administration of this law. The Association is interested in further assistance for farm-to-highway roads and permissive legislation allowing townships to combine, creating larger districts for the purpose of improving and maintaining roads and bridges.

Under this law and appropriation, the state, for the first time, has recognized some obligation for the improvement of local township and road district roads. This law met with variations of success and cooperation on the part of local road districts, depending on local difficulty. There is unanimous agreement that assistance is needed for farm-to-market roads. Many agree that the present type of assistance is completely satisfactory. However, different results are observed.

In one county, 227 of 1225 miles of township roads were scheduled to be resurfaced with oil or gravel. Good progress has been made and to date, all but 30 miles have been completed. The more wealthy townships of this county had money to prepare the right of way for resurfacing. The poorer ones did not do so well. Three townships are still held up because of rough terrain and lack of local revenue.

Five townships voted $70,000 in bonds in order to participate in this program. Other townships had money from previous bond issues and road and bridge revenue. Sixty per cent of the townships are now very close to the constitutional limit in bonding power. While a small percentage of township roads were resurfaced under this program, over 4000 bridges and culverts need repairs or replacement, and the remaining roads need resurfacing or heavy maintenance.

Gateway Amendment Carries in Five Counties

☆ ☆ ☆

THE TRADITIONAL lack of interest in proposed changes to the state constitution caused the Gateway amendment to suffer a 3 to 1 defeat at the Nov. 5 general election, a record of the official vote released recently would indicate.

The measure carried in De Kalb, Du Page, Effingham, Ford and Kendall counties and only by small majorities.

The proposed amendment would have passed with an overwhelming 4 to 1—majority if only the votes for or against the measure were counted. The official record shows 3,619,322 voted in the election, 1,273,653 voted for, and 368,108 voted against the measure. It was the balance of 2,345,669 non-voters who killed the bill.

Reports from counties received by Roy P. Johnson, IAA director of special services, indicate that 5,000 or more Farm Bureau members helped to publicize the Gateway and encouraged rural voters to take a stand for the measure.

Only about one-third of Cook county and one-half of downstate voted on the amendment. (See table). In 1932 the proposed amendment was defeated by a similar majority of non-voters. Those who did not vote were counted as voting against it.

Kendall is credited with conducting one of the best campaigns. The measure carried in every precinct and passed the county by a 59 per cent majority. Farm and Home Bureau cooperated closely and many women worked in the precincts.

Although the bill was defeated primarily because of the indifference of the city voter, the measure passed in De Kalb county which is dominated by the vote of DeKalb and Sycamore, cities totaling 15,000 in population. Farm Bureau and civic leaders worked closely together to pass the measure.

In Ford county 56 per cent voted for the bill. Here it also took the city as well as the farm vote to win.

By and large, however, the city overwhelmed the rural vote. In Jackson county 13 out of 14 rural precincts carried the proposed amendment while the city vote defeated the measure by a count of 9,734 to 4,454.

Outstanding work was done in St. Clair and LaSalle by Emmet Keim and Earl Hays, organization directors for the two counties.

Both counties were completely covered with publicity on the amendment and the organization directors helped to coordinate the Farm Bureau campaigns with those of civic groups. In LaSalle county 220 precinct volunteers worked to pass the amendment.

SEE YOU IN ST. LOUIS NEXT NOVEMBER

ST. LOUIS, MO., has been selected by the board of directors as the site of the 33rd annual meeting of the Illinois Agricultural Association. Plans for the convention, which will be held the week of November 17, were discussed by the board at a recent meeting.

It will be the first time in seven conventions that the annual meeting of the IAA will be held outside Chicago. During the war years, the shortage of housing and the government's ban on unnecessary travel caused the Association to confine meetings to Chicago.

Holding the meeting in St. Louis will give farmers from the southern part of the state a better chance to attend. Southern Illinois Farm Bureau people responded admirably to the invitation to attend the IAA annual convention in St. Louis in January, 1941. The meeting was the 25th or Silver Anniversary of the founding of the IAA and brought out the largest crowd in the organization's history up until that time.

IAA Announces *New Staff* Promotions

* * *

TO HELP handle the increasing volume of business of its three insurance companies, the Illinois Agricultural Association has appointed a treasurer and a comptroller for Country Life Insurance Company, Country Mutual Fire Company, and Country Mutual Casualty Company.

Treasurer of the three companies is William J. Nevermann, 35, a member of the accountancy staff of Country Casualty since December, 1945. Comptroller is T. D. Karnes, 44, formerly of the Bankers Life and Casualty Company of Chicago.

T. D. Karnes

W. J. Nevermann

Nevermann was born and reared in Tripoli, Ia., and was graduated from Drake University at Des Moines in 1932 where he majored in finance. He continued his education at Northwestern University night school and the American Institute of Banking.

After a year with an investment bank in Des Moines, Nevermann came to the Lake Shore National Bank in Chicago where he was employed as assistant auditor and note teller for several years until he joined the navy in March 1943. He served in the Pacific as a communications officer and was discharged in December, 1945 as a lieutenant.

Nevermann resides in Lombard with his wife, the former Palma Lima of Chicago. They have no children.

Karnes was born in Fairbury, Livingston county, son of the late T. D. Karnes, who served as manager of the Farmers Grain Company at Fairbury from 1912 to 1945.

After attending Fairbury schools, Karnes graduated from the University of Illinois School of Athletic Coaching in 1925. He studied business for one year in the College of Commerce.

He was a member of the Illinois basketball team in 1923-24-25 and his honorary and social affiliations included Tribe of Illini, Skull and Crescent, Sigma Pi fraternity, and commerce and coaching societies.

After graduation, Karnes coached at Illinois State Normal University until 1927 when he joined a Bloomington investment firm. During the next six years he also coached at Illinois Wesleyan University and Trinity High School in Bloomington and officiated at games.

In 1933, he was employed by the insurance department of the State of Illinois, working first in securities and later as an insurance examiner.

He enlisted in the navy in 1942 and served until the end of the war at Great Lakes, Pearl Harbor and aboard a destroyer. He was discharged with the rank of lieutenant commander.

Karnes returned to the state insurance department for 10 weeks then worked for a year with the Bankers Life and Casualty Company before coming to the IAA. He is married to the former Leta Stucker of Palestine and Kankakee. They have no children.

PRESIDENT SHUMAN NAMES 1947 IAA STANDING COMMITTEES

STANDING committees of the Illinois Agricultural Association for 1947 have been announced by President Charles B. Shuman of Sullivan. Farm adviser members to each committee except the finance group were to be named later.

The new committees as announced by President Shuman are as follows:

Finance — F. E. Morris, Buffalo, chairman; Russell V. McKee, Varna; and Milton W. Warren, Mansfield.

Marketing — Homer Curtiss, Stockton, chairman; J. King Eaton, Edwardsville; C. J. Elliot, Streator; Edwin Gumm, Galesburg; and E. T. Culnan, Lincoln.

Organization-Information — Otto Steffey, Stronghurst, chairman; John T. Evans, Hoopeston; and Albert Webb, Ewing.

Public Relations — K. T. Smith, Greenfield, chairman; Earl M. Hughes, Woodstock; and F. E. Morris, Buffalo.

Business Service — Lyman Bunting, Ellery, chairman; Dan Clarke, New Berlin; and Chester McCord, Newton.

APPOINTMENT of a comptroller and acting treasurer for the Illinois Farm Supply Company has been announced by Manager C. H. Becker.

Comptroller is A. M. Ault, 43, assistant treasurer of the Illinois Farm Supply Company since last February.

The new assistant treasurer, also designated acting treasurer, is Ralph O. Almgreen, 45, Illinois Farm Supply director of accounting and statistics.

The new office of comptroller will not only handle the accounting and budgetary functions of the company, but will be accountable for all analysis

R. O. Almgreen

A. M. Ault

work and the developing and interpreting of information and facts that have bearing on the future policies of the company.

Ault was born and reared in Kankakee county, and was graduated in 1932 from the University of Illinois College of Commerce.

Before joining the Jo Daviess Service Company in 1933, he did public accounting in Chicago. He transferred to the Marshall-Putnam Oil Company in 1935 and three years later became an Illinois Farm Supply Company southern district fieldman. He was called to the Chicago office in 1941 to head the company's petroleum division.

Ault also has the job of managing the new building purchased last spring to house the IAA's Chicago offices.

He is married to the former Sibyl St. John of Kankakee county, The Aults have two sons, Roger, 17, and Stanley, 8.

Almgreen was born and reared at Rio in Knox County, graduated from Galesburg high school, studied a business college course, and was employed by the Rio State Bank for 15 years.

He became a dealer for the Knox County Service Company, assistant to the manager of the Peoria County Service Company, manager of the Schuyler-Brown Service Company, and manager of the Ford County Service Company before going to the Chicago office in June, 1943 as office manager.

Almgreen is married to the former Lillian Mortensen of Knox county. They have one child, Robert, 18 months.

WHAT to Do About Newcastle Disease

HAUNTING the poultry industry today is the specter of a relatively new respiratory-nervous system malady known as Newcastle disease. The name is derived from the city of Newcastle in England where an outbreak occurred in 1927.

The disease has received a great deal of publicity but due to lack of factual knowledge relating to the disease recently attacking poultry flocks, some confusion has arisen in the minds of farmers who wish to know as much as possible about this new malady.

This article will attempt to clear up some of the confusing thoughts on the subject and is written with the hope that it will answer some of the questions in the minds of poultry men.

What is Newcastle disease? It is an infectious condition involving principally the respiratory organs and the central nervous system of chickens and other fowl. In 1940 in California a "respiratory nervous disorder" was reported. In 1942 California reported a condition they called avian pneumoencephalitis. It appears fairly certain that these conditions were actually Newcastle disease.

How prevalent is this disease? According to the latest reports it definitely has been in 29 states, and reports suggestive of the disease but not definitely diagnosed have been received from several other states. Illinois has had six outbreaks, mostly in north and central areas. It is logical to expect that additional outbreaks may occur as we enter another season of hatching and raising chicks.

By DR. C. D. VAN HOUWELING,
Director,
IAA Veterinary Medical Relations

Common symptoms are respiratory and nervous disorders — coughing, gasping for air and difficult breathing as manifested by open beak breathing. The nervous symptoms usually are lack of muscular coordination and partial or complete paralysis of one or both legs and a peculiar distortion in the position of the head. The symptoms are quite similar in young chicks and older birds. In adult flocks a marked decrease in egg production results. In some cases this egg production will drop to zero.

How deadly is Newcastle disease to infected chickens? The mortality varies to a great extent. A sub-committee from the National Newcastle Disease Committee investigating in California reported mortality ran as high as 80-90 per cent. There were instances, however, where the death loss was not expected to be more than 4 or 5 per cent, but egg production had decreased from 70 per cent to 20 per cent in some flocks. In one densely populated poultry area including 600,000 birds in 300 flocks, about 120,000, or 20 per cent died of the disease in 1944.

No specific treatment is known at present. Control measures should include isolation of sick birds, proper disposal of birds that have died from the disease, and a thorough cleaning and disinfecting of houses and equipment. A vaccine for the disease has been used extensively in California and seems to decrease the mortality rate substantially and prevent some of the decrease in egg production. Vaccinated birds also seem to come back into production sooner than those which have not been vaccinated.

You may now be a little more familiar with Newcastle disease — what it is, what its symptoms are, what it does, and it may seem that there isn't much you can do about it. So you probably wonder what authorities are doing to combat this malady.

I can report that the livestock disease control agencies of the federal and state governments are doing something about it. The federal government, through the Bureau of Animal Industry of the U. S. Department of Agriculture has organized a Newcastle disease research program. This program will cover five main fields of study, which are:

1. Determine the loss caused by the disease in various states; and determine the efficiency of control methods;
2. Develop an accurate, rapid diagnostic method or methods;
3. Determine the value of various physical and chemical agents for destroying the virus which causes Newcastle disease;
4. Obtain more information on the manner in which the disease spreads;
5. Prepare and test more effective vaccines.

Your state government, through the Division of Livestock Industry of the State Department of Agriculture, has five district veterinarians in Illinois who are prepared to cooperate in the early diagnosis and proper control of this disease. These men are Dr. Roy A. Thompson, Clinton; Dr. T. E. Palmer, Casey; Dr. W. E. LeCroy, Fairfield; Dr. L. B. Woods, Roodhouse; and Dr. Rex Van Sickle, Orion.

The College of Veterinary Medicine of the University of Illinois has published information pertaining to this disease, and has established laboratory facilities to assist in its diagnosis. The college will assist the district veterinarians in making a positive diagnosis when the malady is suspected.

Grain Farming is IAA Director Clarke's Major Interest

* * *

By JIM THOMSON
Ass't Editor, IAA RECORD

Director Clarke looks over some fine specimens of his corn as he walks through a ripening field.

TREKKING westward in 1839, a shrewd 27-year-old Yankee pioneer decided he had gone far enough when he reached the rich prairie lands just west of Springfield in central Illinois.

He settled in Morgan county but subsequently backtracked to Cartwright township in Sangamon county where he started farming. He was Dan L. Clarke of Rhode Island, descendant of John Clarke, who came from England on the historic Mayflower in 1620.

Dan L. Clarke was one of those restless individualists who brought the homely New England virtues of reverence, thrift, sobriety and independence to the Illinois prairies.

From these roots his grandson and namesake, Dan L. Clarke, today carries on and emulates the canny farming practices started by his grandfather. Going further, the grandson has taken an active interest in farm organization and has added his bit to the efforts of those who have made the Sangamon County Farm Bureau one of the best in the state.

Clarke has been a member of his county Farm Bureau for nearly a quarter of a century, serving for several years as a director, then two years as vice president and finally four years as president before being elected as an IAA director from the 21st congressional district, representing Sangamon, Christian, Montgomery, and Macoupin counties.

He succeeded Floyd E. Morris of Buffalo when Morris became vice president of the IAA in November, 1945.

Principally a grain and hog farmer, Clarke grows a preponderant amount of corn and soybeans with a moderate crop of oats.

The IAA director from the Lincoln country was born June 9, 1888 about midway between Pleasant Plains, New Berlin and Ashland adjoining the farm he operates today, part of the lands settled by his grandfather in 1839.

He was educated in the grade school and at Whipple academy in Jacksonville and following two years at the University of Illinois, he returned in 1911 to the home farm which he has operated since that time. He owns 350 acres and farms an additional 100 acres owned by his sister.

* * *

Editor's Note: This is the fourth of a series of articles to acquaint you with the men who represent you on the Illinois Agricultural Association board of directors.

Aptly named, the Pleasant Plains area was visited a number of times by Abraham Lincoln. The land is flat and fertile and is a virtual Garden of Eden for the raising of corn and soybeans.

Taking advantage of this fact, especially during the war years, Clarke has planted heavily in cash grain crops. In recent years he has had about 170 acres in corn, 140 in soybeans, 90 in oats and 25 in alfalfa and clover. Off and on he plants some winter wheat.

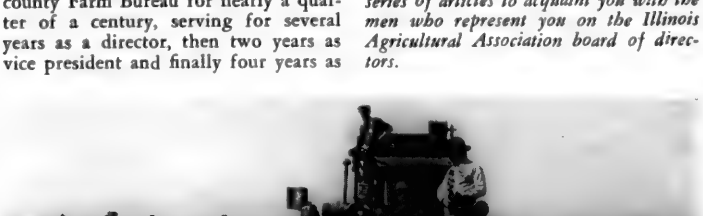
More than 100 years old, the Clarke home stands in a grove of trees set in some distance from the road at the end of a crushed-rock lane flanked by a row of walnut trees from which the place gets its name — Walnut Row Farm.

The present structure replaced a log cabin and was built of timbers hauled in by oxen from Meredosia on the Illinois river some 50 miles away. Mr. and Mrs. Clarke take a great deal of pride in the heirlooms which have been passed on to them and have done much to preserve an atmosphere of serene leisurely living with late eighteenth and early nineteenth century furnishings.

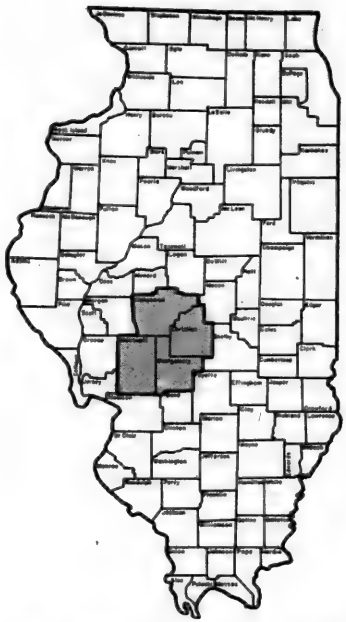
This is particularly true of the parlor and living room, which are completely furnished in early period design, and in the master bedroom with its ornately-carved rosewood bed.

This theme is carried through to the dining room where stands a handsomely hand-finished, large drop-leaf table and old sideboard and corner cupboard made by a cabinet-maker from walnut flooring taken from a dismantled carriage house which was built on the farm about a century ago.

Grandfather Clarke also left behind an interesting farm account book covering the farm's day-by-day operations during the middle years of the nineteenth century. From it you gain a



Combine operators are questioned about yields by IAA Director Clarke as they sweep across his extensive soybean fields.



Shaded area on map is 21st congressional district represented on the Illinois Agricultural Association board of directors by Dan L. Clarke of New Berlin.

pretty good insight into farm life on the Illinois prairie a hundred years ago through its information on prices, wages, markets, livestock health and progress, weather and crop returns.

Clarke has raised and fed annually an average of about 400 hogs until this year, mostly Hampshires and Durocs. On the farm also are 125 sheep, two horses and four dairy cows. He has had no beef cattle on his place for a number of years.

He plants his beans in rows, drills his corn, grasses his waterways, and follows a rotation scheme in this order: corn, oats, beans, alfalfa or clover, corn.

Only 70 acres of the Clarke farm have not been limed and 100 acres have not yet received an application of phosphate although preparations have been made to apply one and a half cars of phosphate and 17 tons of superphosphate.

Clarke helped set up the soil conservation district in his area. Although he has no children he has been active in working for the good of the rural schools in his neighborhood. He has been a trustee of his district's elementary schools for several years.

Director Clarke is an active member of the board of the Methodist church at Ashland and was active during the war in Red Cross, Community and War Fund drives and Victory Bond campaigns. He is a member of the Masonic Lodge at Ashland and Shrine at Springfield.

The Clarkes were married April 4, 1912 at the Congregational Church in Jacksonville.

Mrs. Clarke, the former Coral Furr, takes a deep interest in her husband's civic and agricultural activities as well as in her own clubs, church and Red Cross and likes to raise flowers in her garden.

With an abiding interest in the well-being of Illinois agriculture, Clarke believes that the future welfare of farming lies in concerted effort through organization. For this reason, he says: "As far as the Illinois farmer is concerned, it is Farm Bureau and the IAA which are destined to lead us to better farm living."

TED DAVIS IS NAMED MANAGER OF ILLINOIS FRUIT GROWERS EXCHANGE

Ted Davis, sales manager of plant foods for Illinois Farm Supply Company until a few weeks ago when he was appointed manager of information and education in the distribution division of Illinois Farm Supply Company, has been named to succeed L. L. Colvis as manager of the Illinois Fruit Growers Exchange.

Ted Davis

Colvis resigned to become secretary of marketing for the Illinois Agricultural Association. Headquarters of the Fruit Growers Exchange are at Carbondale.

Davis is a 1933 graduate of the University of Illinois College of Agriculture. He taught vocational agriculture for seven years and served as Pulaski-Alexander farm adviser from 1941 until 1944 when he became district supervisor for the University of Illinois extension service emergency farm labor program in southern and western Illinois.

He went to the Chicago office of the Illinois Farm Supply Company in September, 1945.

Davis was reared on a farm near Ewing in Franklin county. He is married and the father of three children.

The Prairie Farms Creamery of Henry held its annual meeting Jan. 18. This was the first annual meeting since the creamery began operations May 27, 1946.

L. L. COLVIS APPOINTED HEAD OF NEW IAA MARKETING DEPARTMENT

L. L. COLVIS, IAA director of fruit and vegetable marketing and manager of the Illinois Fruit Growers Exchange with offices at Carbondale, has been appointed secretary of marketing for the Illinois Agricultural Association.

L. L. Colvis

He will head the office designed to supervise and coordinate the activities of the dairy, grain, livestock, and fruit and vegetable marketing departments.

Colvis was born and reared on a Randolph county fruit farm and specialized in horticulture at the University of Illinois College of Agriculture from which he graduated in 1929.

After five years as teacher of vocational agriculture at Chester, he served as Pulaski-Alexander farm adviser from 1935 to 1939 where he was chiefly concerned with the production and marketing of fruits and small vegetables.

Before coming to the IAA in 1941, Colvis was an extension specialist in rural youth at the University of Illinois.

He is married and has three children Lawrence, Jr., 14, William, 12, and John, 2.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of February and March, at the hour and place to be determined by the Board of Directors of each County Farm Bureau, the members in good standing of such County Farm Bureau and who are also qualified voting members of Illinois Agricultural Association, shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting, or any special meeting of the association, including the election of officers and directors, as provided for in the by-laws of the Association.

During February, annual meetings will be held in Coles, DeKalb, Douglas, Edgar, Effingham, Grundy, Kankakee, Lake, McHenry, Mason, Monroe, Wayne, Whiteside and Will Counties.

During March, the Boone County Farm Bureau will hold its annual meeting.

Paul E. Mathias, Secretary
January 10, 1947.

Co-ops and Fertilizer Research

By GEORGE D. SCARSETH*

THE discoveries of fundamental facts pertaining to major plant food nutrient elements as nitrogen, phosphorus and potassium are far ahead of trade practices for their distribution. A long lag between discovery and use is a common occurrence, but in the field of fertilizers it is of special significance because in an indirect and complex manner soil resources and human welfare are involved.

If a sure cure for cancer should be discovered, the use of this discovery would be almost instantaneous. The utilization of new discoveries is not so prompt if by such utilization large segments of costly investments in an old established industry might be rendered obsolete.

With our American system of free and competitive enterprise, such changes have occurred every peaceful year because of competition — someone forced a change because they met the requirements permitted by the times.

In the field of fertilizers, the slowness of improvements in new mixing and distributing practices and the slowness of education spreading a broad understanding of the complex facts of fertilizers, in contrast to the swiftness of developments of fundamental chemistry and the swiftness of soil exhaustion, erosion and destruction brings about a situation that justifies pondering the Chinese proverb, "It is later than you think."

Research has brought forth in the last 20 years highly concentrated materials in nitrogen, phosphate and potash carriers, but these have not yet found their way extensively to the land. Nobody is to blame except history itself, but history has victimized the industry that mixes fertilizers.

It all started about 1824 when Peruvian guano was first imported. This material was very helpful to the cotton and tobacco growers, largely because of its nitrogen content. Chilean nitrate salts were soon imported and frequently added to the guano. Bone meal containing phosphorus helped the crops, too. By 1845, the British had learned to make superphosphate by pouring sulphuric acid on the bones. Somebody started mixing various combinations of these materials. Tobacco stems added bulk and some potash. Industrial waste products as fish scrap, tankage, slops and meals were used because they contained some fertilizer ingredients — largely organic nitrogen. Out of mixing these odd materials a fertilizer mixing industry got started about 1850.

There was no research to guide the way, no experiments, no control laws, no guaranteeing analysis, but a service was rendered to the grower because he continued to purchase the stuff. The mixtures did a lot of good, but they were not good enough when research began to indicate what the soils needed and what these fertilizers carried.

Analysis showed that it was common for a mixture to contain 2 to 3% nitrogen, 6 to 8% phosphate (P_2O_5) and as little as 1% potash (K_2O). The land was young with a lot of topsoil remaining because erosion was still to come. Those who foresaw trouble ahead went unheeded.

By 1880 the average plant food content of all mixed fertilizers used in the United States was only 2.4% nitrogen, 9.1% phosphate and 2% potash.

It is not much to boast of when by 1940 this average had only improved to 3.8% nitrogen, 9.6% phosphate and 6.4% potash. Such a mixture averaged only less than 20% total plant food content. Not only did this plant food cost too much because there was too little of it in each bag, but the concentration was too low to carry an adequate quantity of plant food to do the job of feeding the plants unless a whopping quantity was used. Such quantities were used only on specialized crops as tobacco, potatoes and truck crops.

The advantages of low concentrated fertilizer mixtures to the mixing industry, who became the real merchandisers of fertilizers, has tended to create a climate of belief in the nation that this is the way things must stand, or that progress is fast enough. Even some of the co-operatives have found the sunshine of such weather more agreeable than to venture into the storms of more vigorously representing the farmer's selfish interests in plant foods. The farmer's selfish interest in fertilizers is far different than the selfish interest of the merchants who manufacture and sell it. Ask yourself this question, "Whose selfish interest has been best represented in the 100 years of fertilizer history in America in making and distributing fertilizers?"

Farmer-owned co-operatives have a most vital responsibility to bring into the competitive fertilizer industrial world the farmer's long delayed, special and pe-

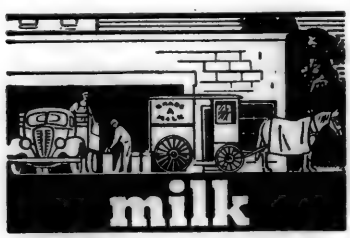
RURAL YOUTH MIX RECREATION, EDUCATION

Rural Youth generally make a bang-up affair of an annual banquet meeting and the young men and women of Edgar county are no exception. Here are some of the things they did at their last annual meeting at Paris. Left, at a signal, the boys grab for the girls' shoes. Get to dance with the shoe's owner. Center, Ray Farris, ovar from Clark county, acts as minister at mock wedding. Others, left to right, are David Ewing, Paul Kiley, the groom; Charles Webb; Thelma Sturgeon, the bride; and Violet Stewart. Right, they scurry around in a game played with chairs.

On the serious side, the meeting had farm landscaping and farm building layout for its principal topic. Left, Prof. H. W. Gilbert of the University of Illinois points out a farmstead feature to (left to right), President Charles Krabel, Catherine Brown, Thelma Sturgeon, Charles Webb and Jack Robinson. Prof. Gilbert gave the principal talk. Center, group examines farm plan drawing by Joe Ewing. Left to right: Dick Brown, Alice Baber, Ilene Stewart and W. E. Perisho. Right: signing up for human bingo. Left to right: Joe Hearn, Helen Smittkamp, Joan Brown, Wayne Krabel and Peggy Mitchell.



Edwin Gumm, Galesburg was re-elected president of the Illinois Milk Producers' Association and of the Illinois Milk Producers' Supply Company at meetings of the boards of directors which were both held in Chicago on Jan. 14. W. J. Swayer, Gurnee, was elected vice president of these two organizations and E. E. Houghtby, Shabbona, secretary-treasurer.

The Illinois Milk Producers' Association selected an executive committee consisting of O. H. Ryan, Tonica; Glen Tombaugh, Streator; L. B. Coomber, Freeport; Julian D. Ray, Vandalia; Charles Cameron, Peoria; with Gumm and Swayer ex-officio members.

The executive committee selected for the Illinois Milk Producers' Supply Company consists of Harold Kamm, Jacksonville; Anthony Grawe, Quincy; Charles Cameron, Peoria; J. Warren Ellis, Danville; L. A. Schnekloth, Moline; with Gumm and Swayer ex-officio members.

In addition to the election of officers these organizations made plans for the coming year which promises to be one in which many marketing problems will confront dairymen.

The creamery receives cream and milk from producers, and manufactures butter, sweetened condensed skim milk and condensed buttermilk. It also disposes of milk and cream in fluid form. The amount of milk and cream handled has steadily increased since the opening day, and the creamery is looking forward with confidence to a bright future.

The McLean County Milk Producers Association will hold its annual meeting in the Farm Bureau building, Bloomington, Feb. 15. At this meeting a resolution of the board of directors will be considered which would consolidate the McLean County Milk Producers Association and the Prairie Farms Creamery of Bloomington into a single organization. This proposal has been given considerable study during the past year by representatives of both organizations.

The Steagall amendment, passed by Congress in 1941, provides that the price of milk and butterfat shall be supported at 90 per cent of parity for two years after Jan. 1 following the declaration of the end of hostilities. This declaration was made by President Truman Dec. 31. Present price support commitments under current legislation, therefore, will end Dec. 31, 1948.

Secretary Anderson recently stated that if it becomes necessary to support dairy prices at 90 per cent of parity, dairymen will find that the present parity formula puts them at a disadvantage with other farmers. However, he pointed out that he did not expect dairy prices to go down to the support level. He stated that the dairy picture is characterized by high production, high consumption and relatively high returns.

As of December, milk production was 15 per cent above the prewar level, fluid milk consumption was up 26 per cent, dairy prices up 140 per cent, and cash income to dairymen, up 175 per cent.

A complaint filed by certain Will county handlers who contended that certain territory in Will county should not have been included in the marketing area under Order 69 regulating the handling of milk in the suburban Chicago marketing area was dismissed recently by Judge Sullivan of the U. S. district court.

Prices received by farmers for milk and butterfat will decline in the first half of 1947 as milk production increases seasonally, according to the Bureau of Agricultural Economics. However, prices probably will exceed the previous record returns (price plus subsidy payments) established for that period in 1946. Returns to dairy producers are expected to be slightly below average relative to prices for hogs and beef cattle, but will be favorable relative to feed costs, B. A. E. adds.

Shorts in the News

Plans for the 1947 season of the Illinois Farm Baseball League were scheduled to be outlined at a meeting set for Feb. 10 in the Stevens Hotel, Chicago. Representatives of all County Farm Bureaus in Illinois were invited to attend. Incumbent officers are Otto Steffey, IAA board member from Stronghurst, president; Ebb Harris, Grayslake, vice-president, and Roy Johnson, IAA director of special services, secretary. In addition to the business meeting, a showing of the 1946 World Series movie was to be made, with Don Kolloway, star infielder of the Chicago White Sox, as guest speaker.

President Charles B. Shuman of the Illinois Agricultural Association, Moultrie county farmer from near Sullivan, spoke for the American Farm Bureau Federation Jan. 18 on the new CBS radio program, "Cross Section—U.S.A."

President Shuman, a member of the AFBF board of directors was interviewed on the subject: "What Changes Should There Be in Federal Taxes?"

The broadcast was made from Edward Garms' farm near Arlington Heights, Cook county.

Peoria Producers Commission Association celebrated their 25th anniversary Jan. 16, declared patronage refunds of $10,535.08. During 1946 they handled 1003 cars of cattle, 88 cars of calves, 2480 cars of hogs, 293 cars of sheep for a gross sale value of $10,557,265.31. Les Doran, principle speaker and manager of the Central Co-op Association, So. St. Paul, Minn., described the activities of his organization, largest livestock marketing co-op in the U. S

R. W. Bartlett, University of Illinois economist, predicted recently that in the next 20 years co-ops will manufacture and distribute 50 per cent of farm machinery. Why, Bartlett asked, should a farmer pay $200 to a retail distributor to sell him a tractor he is going to buy anyway?

After July 1 no cattle may change hands in Illinois privately or at a public sale, except for slaughter, without a bill of health or certificate of vaccination for Bangs disease.

Mrs. Bette Lou Johnson has been employed as an assistant in White county to Farm Adviser Thurman Wright and Home Adviser Arven Holloway. Mrs. Johnson will be in charge of programs for the 4-H, Rural Youth and young adults in the county. Mrs. Johnson is the wife of J. K. Johnson, soil technician for White County Soil Conservation District.

American Farm Bureau Federation membership quotas for 1947 call for 1,270,113 members. Smallest quota is Delaware's 1,100. Largest is Illinois', 128,387, (already exceeded).

Elmer Aden, manager of the Hancock County Supply Company, has been employed as manager of the Calhoun County Farm Bureau Exchange which reorganized and affiliated recently with the Illinois Farm Supply Company. Henry Bach, Calhoun county exchange manager for the past 20 years, is retiring because of poor health.

Mrs. Mary Lou Clinton of Benton is the new youth assistant in Williamson county. A graduate of Southern Illinois Normal University, she has taught home economics at Jerseyville and worked as a commercial chemist in St. Louis, Mo.

D. P. Robinson, has resigned after 18 years as general insurance agent for Henry county. He will be succeeded by his son, Ward, 28, who has been working with his father since his discharge from the army.

W. B. Bunn, farm adviser in Pike county since Dec. 1, 1928, has been hired as adviser in Champaign county, succeeding J. E. Harris, who resigned in October, 1946, to work for a fertilizer company in Iowa. Bunn is scheduled to start work in Champaign county March 15.

During the past year Bunn has served as president of the Illinois Farm Advisers Association and as the farm advisers' representative on the Illinois Agricultural Association board of directors. In 1944, Bunn was recognized for his outstanding work in Pike county by the National Association of County Agents.

Bunn was graduated from Eastern Illinois State Teachers College and later received his degree in agriculture from the U. of I. in 1920. A world war I veteran, Bunn later attended Colorado State college and the University of Missouri for graduate work. He first served as farm adviser in Edgar county, 1920-21; then in McDonough, 1921-23, and in Richland, 1923-28.

4. **Balanced vitamins, minerals, proteins and energy-producing ingredients**
5. **Chicks feather well, have strong legs, stay healthy, grow fast**

Blue Seal Chick Starter is formulated to include the proper balance of vitamins, minerals, high quality proteins and other energy-producing ingredients needed in the critical starting period. All materials used in its manufacture are tested and must meet exacting specifications. This accounts for the superiority shown in tests in the laboratory and on the farm.

For high livability, greater disease resistance, rapid development, and more profits, feed Blue Seal Chick Starter.

Six Counties Are Organizing Co-op Livestock Marketing Yards

AS PART of a state-wide program for livestock marketing, six counties are setting up local concentration points to handle livestock cooperatively.

They will join the Illinois Livestock Marketing Association and will use its facilities to sell hogs directly to packers and ship other species of stock to the larger terminal markets.

Two of the six counties, Stephenson and Henderson, are already organized with yards at Freeport and Stronghurst and expected to be handling livestock sometime in February.

The remaining four, Mercer, Henry, Hancock and Rock Island, are faced with the problem of building or leasing yards but will start as soon as they can acquire facilities to handle stock.

These have been the first to ask the IAA livestock marketing department for help in setting up local yards and concentration points, according to S. F. Russell, director of livestock marketing.

Groups in other counties not now serviced by the Illinois Livestock Marketing Association have expressed interest in starting local buying and shipping points, Russell said.

The six western counties that have already started organizing are located in the great livestock producing area of the state, Russell said. Henry, for one, produces about 5500 carloads annually for market. . .

The Illinois Livestock Marketing Association will act as the sales agency for these county units. The central sales office of the Association is located in Decatur and is under the management of H. W. Trautmann.

Six member county units are now operating in East Central Illinois at Bloomington, Champaign, Decatur, Danville, Paris and Shelbyville.

The new concentration points coming into the Association will buy hogs direct from their farmer-members. In turn the Illinois Livestock Marketing Association will sell the hogs to the highest bidder.

Farmers who have access to these local concentration points will be able to call by phone from their farm, get current price quotations, and then decide whether or not to sell. This means the farmer will know before his hogs leave the farm the price they will bring.

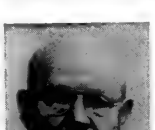
Other species of livestock will not be bought direct, at least for the present, but will be shipped through local yards and sold cooperatively on terminal markets.

These cooperatively owned concentration points should give farmers more control over their marketing. Members will own their scales, office, and in some cases, yards, and employ a manager to weigh and grade their own livestock.

This plan will give farmers a choice of selling either at home or on a terminal market. In either case they can use the facilities of their own marketing agency.

JOHN MOORE RETIRES AFTER 23 YEARS IN ORGANIZATION WORK

JOHN C. MOORE, southern Illinois District organization director, announced his retirement on Jan. 31 after having worked for the Illinois Agricultural Association for more than 23 years.



John C. Moore

Since 1934 Moore has been in charge of organization for the 3rd district, comprising the 29 counties in southern Illinois, and has lived at Winchester in Scott county.

He has become known through his work to tens of thousands of Farm Bureau families and few IAA employees have been as popular or so well loved by farmers in southern Illinois as good natured, fun-loving John Moore. His love of a practical joke, both on himself and his co-workers, is legendary.

Although he has never been one to labor his own importance, Moore will be missed by those who have often drawn on his store of practical wisdom in the conduct of Farm Bureau business activities.

Moore started as a solicitor for Farm Bureau in 1923 and worked in many counties during this early period which he has often called the evangelistic days of the movement.

He was hired by J. C. Sailor, then director of organization, shortly after he had resigned as Scott county superintendent of schools and had returned to his 80-acre farm near Winchester.

During 1927 when the state was divided into eight districts and full-time resident managers were assigned to each district, Moore was assigned the 4th in western Illinois and remained there for eight years.

In 1934 the state was reapportioned into three districts and Moore was chosen as organizer in charge of the 3rd district, the position he has held until his retirement. During this time membership in the 3rd district has increased from 10,700 to more than twice this figure, 25,882 in 1946.

Even though he has been in charge of the organizational work for 29 counties, Moore has found time to bring many into the Farm Bureau by approaching them directly. He has probably sold more individual memberships himself than any district organizer in the state.

After spending many days of his life away from home, Moore is resigning to look after his personal interests. He owns a farm in Scott county and for many years has been a farmer in his own right.

SAVE BABY PIGS BY SLANTING YOUR FARROWING SHEDS

HERE'S a new slant which may save the lives of a number of your spring pigs. Like many important discoveries, it was the result of an accident.

The accident was the collapse of a foundation in a farrowing shed in Kentucky which caused a drop on one side of the floor. This slanting of the floor appeared to be a life saver for the little pigs because it kept them from getting under the sow.

On a slanting floor, a sow prefers to lie with her back to the high side while the unsteady baby pigs tend to stay on the low side. It's that simple.

One swine producer in Kentucky last year raised an average of two more pigs per litter on slanting floors than he did on level floored pens. Other farmers are reporting gains of from one to four pigs per litter, according to reports received by the U. S. Department of Agriculture from extension workers.

The department is passing the word along to slope floors of farrowing pens when possible. The approved amount of slope is about an inch and a half to the foot. In many cases one side of the shed can be blocked up a few inches to give the desired slope.

RURAL ROADS

(*Continued from page 7*)

It is roughly estimated that it would take at least $900,000 to realign, repair, and rebuild existing bridges and culverts in this county alone. If state assistance is made available in the future, these townships could match only to the extent of local tax income after maintenance and administrative costs have been deducted. Their bonding potentialities are exhausted.

Also, there remains the problem of maintaining existing township roads. Oil roads need to be re-oiled each year. Resurfaced gravel roads will require continuous maintenance. It is predicted by some local people that the roads resurfaced recently will not last much longer than five years with present maintenance service.

Nevertheless, the $15,000,000 resurfacing program has helped considerably. Miles of roads resurfaced in individual townships have been small, but badly needed sections have been resurfaced. In the state as a whole, the mileage improved has been substantial. Progress varies greatly according to local interest, initiative, and cooperation between the road commissioner, the county highway engineer, and the state department. This program, in spite of its limitations, has been a step toward better farm-to-market roads.

Some local groups are making detailed studies of their road problems. It is hoped the Farm-to-Market Roads Commission will present a plan for continued state contributions toward the cost of surfacing local roads. If permissive legislation is passed by the legislature allowing township road district reorganization, farmers should know their present condition and have ideas as to needed changes. Consideration should be given toward reorganization of road districts, additional assistance from the state, and continuous, long-range road planning.

CO-OPS AND FERTILIZER

(*Continued from page 14*)

culiar, selfish interest in what the fertilizer merchandise should be. It will not be such grades as 2-12-6, the leading national grade of today, or 3-8-3, the leading national grade of 1934.

The co-operatives in the New England states have demonstrated how effective they can be in influencing the whole industry by strongly representing the farmer's interest. The leading grade today in these states is 4-10-10, with such a high concentrated grade as 6-15-15 high in the list.

With concentrations of straight, single plant food carriers running from 20 to 42% in nitrogen, phosphates up to 45 to 63% and potash at 60%, farmers in a large part of the nation will not be satisfied until they can be supplied whenever they want it with these lower-cost-per-unit, straight goods. They will use row starters as 4-24-12 and 8-16-12, but in addition, they will want high concentrated phosphate-potash mixtures as 0-30-30, 0-20-40, 0-40-20 and nitrogen- phosphorus mixtures as 20-48-0. Even if these may cost more to manufacture on a unit plant food basis, many farmers (especially those far from supply sources and where rows are long) will still prefer these concentrations. To argue that the concentration of the mixtures must be low to allow minor elements in the bag is not sound because these must be bought on their own merits and specifications — not be just carried as extras that may or may not be there in the amounts needed.

The mixing industry had tended to get "set in its ways" by the time World War II came. Things were almost on dead center. It is up to the farmer-owned co-operatives to help set things in motion again for progress, and to get the farmer's interest reflected in the competitive picture of what the fertilizer packages of the future shall be. Those in the field with much history back of them have much experience and "know how" to contribute. The job needs both the old and the new, but the new will have to move with the times to avoid the pains that oppress the old because "It is always later than you think."

NEWCASTLE DISEASE

(*Continued from page 10*)

What should you do when you think you have the disease on your premises?

You should report the condition at once to your local veterinarian or one of the district veterinarians mentioned above. If, in their opinion, the disease is present, arrangements should be made to take typically infected live birds in the early stages of the disease to the laboratories at the university for positive diagnosis. These birds should be transported by automobile. *Do not ship Newcastle disease suspects by common carrier.*

While awaiting positive diagnosis all birds afflicted should be isolated at once. The house, feed pans, water troughs and utensils should be thoroughly cleaned and disinfected. If possible, one person should feed and care for all birds suspected of having the disease, and he should exert the utmost caution not to spread the disease by his shoes, clothes, or other means. If a positive diagnosis is returned, follow the directions of your veterinarians and the College of Veterinary Medicine.

A great deal of criticism was directed toward the National Newcastle Disease Committee and state livestock disease regulatory officials who recommended the ban of poultry shows during the past year. In justice to these officials it still appears to have been a wise move inasmuch as the information available on the disease was not complete enough to know what effect the holding of poultry shows might have on the spread of the disease.

The Division of Livestock Industry in Chicago has modified the ban on poultry shows to the extent that poultry shows may be held if birds are certified to be free from disease and exposure by the owner, and must be examined upon presentation to the show and daily during the show by a veterinarian employed by the sponsor of the poultry show.

Although Newcastle disease has not been widespread in Illinois, everyone interested in the production of poultry should be on the lookout for this condition. As more information on the disease is accumulated and substantiated, no doubt an adequate control or eradication program will be evolved, and Newcastle disease, like other diseases, will be satisfactorily controlled in Illinois.

OPPORTUNITIES

(*Continued from page 3*)

would prefer that these services and needs be supplied by young men and women with an understanding of farm problems and thinking that comes only as a result of a background of living on the land.

Most of what I have said deals with the opportunities in their home communities for rural youth trained in the sciences, professions of law or medicine, mechanical trades, engineering, architecture, accounting and business or industry. I could say much more about the place on the farm itself for young people with ambition, education and ideas. Farm parents should realize that the highest ambition of our most intelligent farm boys and most beautiful girls could well be to make a family tradition of the most respected vocation on earth — agriculture. Well trained farm youth on the farm is one crop of which we need not fear a surplus.

***EDITOR'S NOTE:** Picture contest entries should be addressed to Picture Editor, Illinois Agricultural Association, 608 South Dearborn Street, Chicago 5, Ill. Pictures will not be returned unless accompanied by a self-addressed, stamped envelope. Entries are judged on originality, clearness, and interest. Avoid shots of persons merely looking toward camera. Best picture receives $5 award. Others published receive $1 prizes.*

Rural Youth

By
ELLSWORTH D. LYON

Eleven District Rural Youth Officer Training Schools have been scheduled as follows: Paris, Feb. 17; Carmi, Feb. 18; Carbondale, Feb. 19; St. Clair Co., Feb, 20; Taylorville, Feb. 24; Rushville, Feb. 25; Peoria, Feb. 26; Princeton, Feb. 27; Woodstock, March 3; White Pines State Park, March 4; Kankakee, March 5.

If you are an officer, nominee for an office, or a leader, you will receive value from these schools. Choose the one nearest you.

Montgomery Rural Youthers contributed $10 from their Christmas dance receipts to the county tuberculosis fund.

Mary Brummel of DuPage reports that an expansion program has been planned so that the group may have better meetings. She promises pictures of Rural Youth activities as soon as possible. Will be glad to get them, Mary.

President Wayne Krabel says Edgar has been taking advantage of some good skating at Charleston. His group also has maintained a large representation at the district recreation schools which are being led by Duke Regnier.

Edward's True and False Quiz on Parliamentary Procedure led by Marilyn Wolfe and Max Green created much interest at the January meeting. Two service-men, Richard Smith and Clifford Briggs as well as a number of members now in college but home for the holidays were in attendance.

Reporter Betty Bauer announces that Logan has a big Valentine dinner and dance scheduled for Feb. 15.

President Eleanor Krueger of North Cook and her group are preparing a one-act play for the March meeting. On Valentine's Day, Farm Adviser Hughes will speak on "Lincoln at Gettysburg." A box social will follow.

At Tazewell's December meeting a large quantity of clothing was collected and given to the Pekin YWCA for distribution.

Ogle's Polo group had the seniors of the Polo high school as their guests for the December meeting when the topic, "Christmas in Many Lands," was presented.

"June in January" was the theme of the Rev. Earl Zetche's address at Richland's annual banquet on Jan. 2.

The Prophetstown-Tampico Warriors enjoyed a bob-sled party and wiener roast on Jan. 9, according to George Matthews, reporter.

The Marengo group of McHenry elected the following officers at the January meeting: Ruth Polnow, president; Clarence Anthony, vice president, Alice Wolf, secretary; Howard Dahlman, treasurer; and Arlene Niffenegger, reporter.

Wayne's January meeting was a box social; the girls providing the boxes and the boys the money.

St. Clair closed the old year and began the new with a dance "which was a grand success," according to Otto Graf, Jr., reporter for the group.

Randolph cleared $69 on its Christmas dance, which is doing well as a money-making project.

Coles county officers for 1947 elected at the January meeting held in the Teacher's College Auditorium at Charleston are: Leon Turner, president; Mary Ann Gillespie, vice president; Charleen Rosebrough, secretary; Geneva Swango, treasurer; Barbara Wilson and Ann Thompson, recreation chairmen.

Kankakee heard Jean Knorr and Rita Koerner, G.I. brides from Scotland and Australia, respectively, tell of Christmas customs in their former home lands. Vera Wenzelman had charge of the program.

LaSalle's officers elected for 1947 are: Frank Barron, president; Gilda Gleim, vice president; Mariam McConville, secretary-treasurer; Russell Wiley, public relations officer; Quintin Elliott, Malcolm Whipple, and Don Freebairn, executive board committee.

From Macoupin's "Rural Youth Astonisher" we read that Tom Chism and Marjorie Sanksen were married on Christmas.

Will has made plans to try publishing a monthly county news letter. Good luck. We know success will be yours!

William M. Smith, Jr., University of Illinois extension specialist in Rural Youth, was the speaker for Washington's January meeting.

Pike has a big annual banquet planned for Feb. 13; Logan for Feb. 15. Annual banquets were held in Vermilion, Jan. 9; Tazewell, Jan. 11; Knox, Jan. 18; McDonough, Jan. 25; and McLean, Feb. 6.

McHenry's Rural Young Married Folks group mentioned last month is now a reality.

LIKE A SNOW MAN IN A HOT SUN . . . . . the peril of Hog Cholera fades away with the use of Farm Bureau Hog Cholera Serum and Virus. Fresh and potent, it is a preventive! Yes, it is worth many times the cost to users.

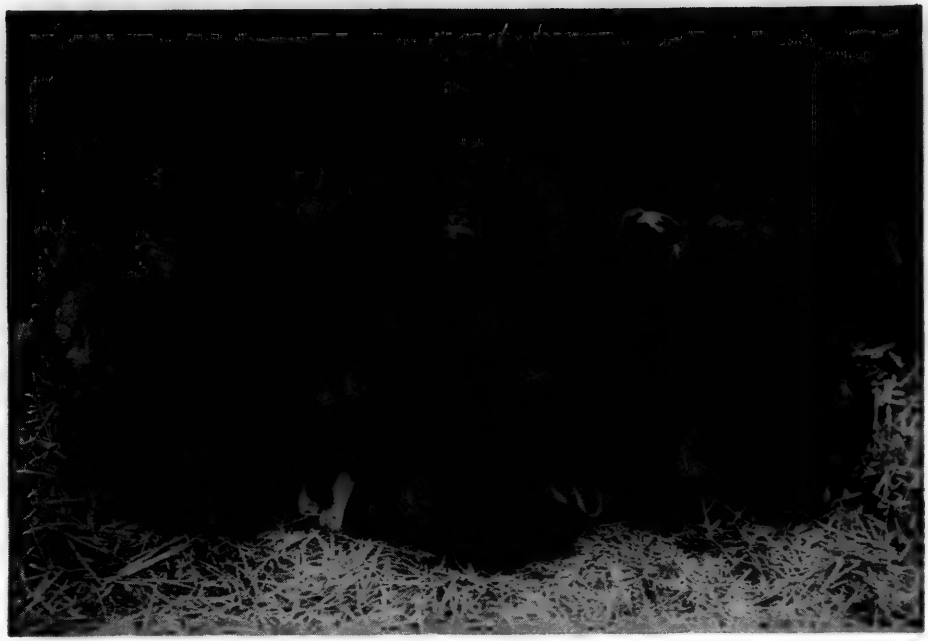
It's Better to Be Safe Than Sorry!



How many pigs will mature?

The failure to raise a large, healthy litter at weaning time is one of the most common causes of unprofitable production. The costs of a litter of 8 or 9 pigs at weaning time are but little greater than for a litter of 4 or 5. We are all familiar with the effect which the strength and health of pigs at weaning time has on economical gains that follow. Good management and proper feeding are needed to produce a large, strong litter.

Swine research has definitely shown that gestation and lactation are critical feeding periods. The following items are greatly influenced by the ration of the sow:

1. The condition of the sow at farrowing and her performance during lactation.
2. The number of pigs farrowed alive.
3. The health and strength of pigs farrowed.
4. The number of pigs weaned.
5. The health and strength of pigs weaned and subsequent growth.
6. The condition of the sow at weaning.

Until recently it was thought farm grains supplemented with proteins and minerals constituted a satisfactory ration for the sow. However, using the weight of the litter at weaning time as a measuring stick, the fact has been definitely established that many vitamins are also needed to make this ration adequate. BLUE SEAL SOW SUPPLEMENT has been formulated to include not only high quality proteins and minerals, but also the vitamin carriers demanded in this critical stage of swine feeding. Good management and BLUE SEAL SOW SUPPLEMENT insure large, strong litters.

NEWS and VIEWS

It Was A Wonderful Trip

By MRS. JAMES C. GRAHAM,
Secretary,
Illinois Home Bureau Federation

Undoubtedly a feeling of personal satisfaction occurs to the women selected each year as delegates to the Associated Women of the American Farm Bureau Federation, but to be named a delegate in 1946 was a thrill of a lifetime.

For that meant joining other Illinois Farm Bureau folks on a special convention tour on a southern itinerary to San Francisco with the return trip via a northern route. That the 6,000 mile trek arranged by Roy P. Johnson, head of the special services department of the Illinois Agricultural Association, was a success in putting it mildly.

Each major stop furnished something of interest for every passenger, 320 of whom boarded the first IAA special train which pulled out at 2 p.m. on Dec. 1, from the Illinois Central station in Chicago.

In New Orleans those people interested in history were pleased with the motor tour through the storied narrow streets of the old French Quarter with a stop at Jackson square, St. Louis Cathedral, The Cabildo, etc, while engineers viewed with greater wonder the glory of Canal street, paved with marble and brilliantly illuminated. The women marvelled at the huge poinsettias and all the floral beauty of the Old South.

Second stop was San Antonio. Here again history abounds. The sightseeing trip included a stop at one of the old missions, also a drive through Fort Sam Houston, the largest army post in the U. S. and concluded with a stop at The Buckhorn, curio store and museum. Everyone tried to buy at least one souvenir and a few postcards in the short time alloted for this stop before passengers were returned to the train.

One was able to get only a glimpse of El Paso, as passengers were whisked from the train to busses for the 150 mile drive to Carlsbad Caverns, the highlight of the trip for many. A recent issue of Holiday presents a full and beautiful description of the caverns, listed as the Eighth Wonder of the World.

The busses returning the Illinois people from the caverns took them to the International Bridge, so that the group might go to the Tivoli in Juarez for supper. Mexican food may appeal to some, but one man was overheard telling the waiter that "cows in Illinois have been known to recover from more serious injury than this." Not much time was allowed for shopping, but a few passengers next day were seen all decked out in Mexican jewelry.

At Phoenix the caravan was officially welcomed at the station by the Arizona Farm Bureau. Riding in each bus which toured the surrounding country was a Farm Bureau member to answer all the questions the Illinois folks had to make regarding the orange and grapefruit groves, the lettuce fields and packing plants, the growing and processing of dates, and the irrigation of the land.

It was very difficult for many to decide if it would be more of a thrill to attend Queen for a Day or have breakfast with Tom Breneman. The scramble for tickets ended with everyone going one place or the other, and with one or two making both. Filing in to Tom's an hour later than it was expected that the Illinois folks would arrive, one native, who had probably waited several hours, was heard to remark, "Such stupidity!" Illinoians weren't so dumb though — they were positive, having been unable to see much from the bus windows enroute from the beautiful Los Angles station to Hollywood, and also having been well dampened while dashing from the bus to the restaurant door, that it was raining in California, a fact which Tom Breneman and his colleagues couldn't comprehend.

Hollywood Boulevard was beautiful, dressed in all its splendor for Christmas with holiday trimmings and decorated Christmas trees. However, the only stars seen were those we saw in our dreams as we drifted into the last night of sleep aboard a pullman before reaching San Francisco and the convention.

The twelfth annual convention of the Associated Women of the American Farm Bureau Federation officially opened Dec. 8 in the Fairmount Hotel with a luncheon in the Red Room, Mrs. Paul Palmer, the recording secretary, presided. This meeting was open only to the official delegates, and many of the special trains from various states, including the second Illinois train, arrived in San Francisco too late to permit any on board to attend. The Illinois delegates included Miss Pearl E. Barnes, president, and Miss Leona Barnes, both of Preemption; Mrs. Stanley Castle, past president, of Alton; Mrs. James C. Graham, secretary of Aledo; Mrs. J. S. Woodburn, Hillsdale; Mrs. C. V. Golden, Cordova; Mrs. John Morris, Eden; Mrs. Charles Schmitt, Beason; and Mrs. Charles Shuman, Sullivan.

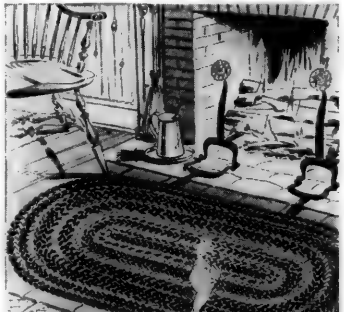
BRAIDED RAG RUG



You can make this beautiful rag rug from old stockings and rags. It may be made as large as your rags will carry you in oval, round, or square patterns. It can be enlarged from time to time. For free instructions send enclosed self-addressed stamped envelope to Woman's Editor, IAA Record, 608 S. Dearborn Street, Chicago 5, Illinois.

for HOMEMAKERS

Mend Frayed Cuffs This Simple Way

FRAYED cuffs on men's suits can be repaired by a careful seamstress, says Miss Edna Gray, University of Illinois clothing specialist.

One of the first parts to show wear is the sleeve edge but if the sleeve has a good hem the edge can be repaired.

For slightly frayed edges Miss Gray suggests that the hem be ripped out, turned to the right side and a stitching run along the edge next to the frayed part.

Then, with small pointed scissors, cut open the tuck. Press open the seam that is thus formed.

If the cuff is badly frayed it may be better to trim the hem off exactly on the line of wear. Cut the worn edge carefully from sleeve and from hem, which is to be used now as a facing. With a tiny seam, stitch facing back onto sleeve and press the seam open.

In either of these methods to keep the seam flat so it doesn't show on the right side, turn the facing down and stitch it close to the seam line. Then turn it up so the seam is just inside the sleeve and slopstitch in place.

Tack the lining back onto the facing. When the cuff is pressed it should be in condition for many more wearings, says Miss Gray.

PICK CHILD'S NAME EARLY

A child's name should be picked before the baby's born if for no other reason than to be sure the moppet's birth certificate is filled out properly, says the Illinois Department of Public Health.

When the baby is born at home the family doctor should fill in the record within ten days. If the baby is born in a hospital, the staff should furnish parents with the document and file the birth record with the local registrar within ten days of birth.

Oh! Yes. It helps to have a boy's and a girl's name ready. The doctor's predictions or your own inclinations may trick you.

TWO-TONE DICKEY

Here's a two-tone dickey to add color and crispness to a muted plaid suit. Pale yellow and soft blue in a firm cotton makes an attractive combination. You may have fabric on hand that will fill the bill. For free instructions enclose self-addressed stamped envelope to Women's Editor, IAA Record, 608 S. Dearborn St., Chicago 5, Ill.

THE FARMER'S WIFE

(*Reprinted from The Chicago Times*)

Apropos the opening of the International Live Stock Exposition we ran across a story which purports to prove that a farmer's wife is worth more than a city dweller's wife.

Seems the economists figure a farmer's wife is "worth" $69,000 to her husband in her lifetime. Gertrude Dieken, editor of the farmer's wife section of the Farm Journal, Philadelphia, said a 13-week study showed a typical farm housewife washed 1,509 pounds of clothes, carried four and three-quarters tons of water and spent 57 hours in her laundry during those 12 weeks.

Now, let's see. At 15 hours a day for 365 days a year for 40 years, the average hourly pay of a $69,000 farmer's wife would be 26 cents.

Ladies, they can't do that to you! Even with board and room thrown in, in these inflation days, you should be "worth" twice that much! Insist upon a theoretical value of $138,000 at least.

Now, city gals, how much are you "worth"?

My Favorite Recipe

Here's a favorite recipe submitted by Mrs. Tim H. Perry of Shelby county for mouth-watering lemon ice box cake.

It takes 2 tablespoons of melted butter, 3 tablespoons of flour, ½ cup of sugar, 1½ cup of milk, dash of salt, 3 eggs, and the juice and rind of 1 lemon (or enough to make it tart to taste).

To make the ice box cake Mrs. Perry says she melts the butter, adds flour, sugar, milk and salt in a double boiler, adds egg yolks and lemon juice, cooking until thick.

Then the custard is cooled until lukewarm and egg whites, beaten stiffly, are added. The cake mold is then lined with vanilla wafers and the custard poured into a mould.

The cake can be kept in the ice box until it is ready for serving and can be made 12 to 24 hours ahead of time, since it improves the flavor to permit the cake to stand several hours.

CROCHETED SLIPPERS

These crocheted slippers are easy to slip on and off. Comfortable as floating on air. They're crocheted of cotton yarn in a dark color and outlined in bright, contrasting trim. Sturdy too. Enclose self-addressed stamped envelope for free instructions to Women's Editor, IAA Record, 608 S. Dearborn St., Chicago 5, Illinois.

IT WAS A WONDERFUL TRIP

(*Continued from page* 24)

Following the luncheon three directors of the AFBF spoke briefly, each using the same topic, "Know Your Farm Bureau." They were Herman C. Aaberg, livestock department, Porter Taylor, vegetable department, and Wilfred Shaw, dairy department. Another speaker was R. B. Corbett, secretary of the AFBF, who described and praised "The Woman's Job."

Those devout persons disappointed in not being able to attend a church service in the morning, as well as many others with less religious inclinations, were made happy and were inspired by the Vesper Service which opened at three in the afternoon with an organ recital. This service was held in the opera house, located in the group of buildings comprising the Civic Center.

At the business session Monday it was reported by Miss Elizabeth Mac Donald of the credentials committee that there were 101 delegates present from forty-one states. Keen interest was shown in a number of special projects proposed for the next year, but one suggested by Mrs. Lewis Minion of Minnesota was officially accepted — a scholarship to be known as the Mrs. Charles W. Sewell Scholarship, to be given in honor of Mrs. Sewell's son, and to be used in research dealing with infantile paralysis, the disease by which her son lost his life.

Sandwiched in between sessions of the A.F.B.F. were trips to Muir Woods. Chinatown, Fisherman's Wharf, the Cliff House, the bridges, and other points of interest in San Francisco, of which there are many and which one can only mention in an article as brief as this.

Not many stops were made enroute home, but two were outstanding. With the train running behind schedule it was not possible to attend the regular daily organ recital at the Mormon Tabernacle in Salt Lake City. However, arrangements were made for a short recital in the evening so that the Illinois folks would not miss this treat altogether. Likewise, the proposed stop in Denver was shortened, but the stop in the Royal Gorge was made as planned. To some the grandeur of the scenic beauty of the Colorado Rocky Mountain region equals the underground beauty of the vast Carlsbad Caverns — for all a grand climax to a wonder trip.

DUAL VERSUS UNIT DISTRICTS

There is considerable discussion going on over the state today among educators and school patrons concerning the practicability of the dual vs. the unit school system. The main opposition to the unit system comes from those who do not understand it as yet or from some school men whose main interest is the high school.

Recognize Certain Situations

In respect to this discussion, we recognize the following situations:

1. There are many good high schools under the dual system.
2. There are good elementary schools under the dual system though the percentage of good elementary schools is lower than the percentage of good high schools under that system.
3. Even the best organization will break down unless we make it work, and that depends on an enlightened, active public and school administration.
4. There are a few cases where the grade schools have been robbed under the unit system, but these are exceptions and are the fault of the patrons and the school administration. These cases are possibilities which can be avoided but it has come to be the usual situation for the grade school to be at a disadvantage under the dual system.
5. There are some places where it might be inadvisable to establish a unit district, as where such a district would include a large urban center which would likely deprive rural people of sufficient representation on the school board to safeguard their interests.

The Facts Speak

However, these facts speak for themselves.

1. Less than half as much money per capita is spent in the grade school as in the high school.
2. Elementary teachers under the dual system are paid considerably less, as a rule, than high school teachers.
3. Working conditions and building facilities are often less attractive in the elementary school than in the high school.
4. A recent law requires graduation from four years of college before a teacher can secure a certificate to teach in either the grade school or high school, thus forcing grade schools to compete with high schools for teachers.
5. Last year only 12.4 per cent of teachers in training in Illinois were training to teach in the elementary school. This year the figure is 8½ per cent.
6. Approximately 72 per cent of our boys and girls are in the elementary schools. Therefore, only about 10 per cent of our teachers are training to teach over 70 per cent of our boys and girls.
7. Until we strengthen the grade school financially and make working conditions there more attractive, we shall continue to have a serious scarcity of well-qualified elementary teachers.
8. This means that if the present situation continues, we shall be using emergency teachers in the grade school for years to come. Grade school boards will have to depend largely upon teachers trained for high school but who are unable to secure a position there. These teachers will not be trained for teaching in the elementary school, their sympathies probably will not be there and they will be rejects from the high school and, therefore,of inferior quality in many cases. Also since recent and very wise legislation requires a teacher to do her practice teaching in the elementary field before receiving an elementary certificate, a teacher qualified only for high school teaching would have to have an emergency certificate to teach in the grade school.
9. The single salary schedule for both grade and high teachers is fairly prevalent in unit districts and will be increasingly so. It is almost unknown in the dual system. Such single salary schedule is fair in view of recent legislation establishing equal requirements for certificates. It is more attractive to elementary teachers and it recognizes teaching in the elementary field as equally important as teaching in the high school. It improves the social status of the elementary teacher, a factor that has loomed large and has deterred many capable people from taking training to teach in the elementary field.
10. Experience has proved that the elementary school has been unable to compete with the high school for either financial support or teachers.

Completes School Study

The research staff of the School Tax and Finance Commission has recently completed a study of Illinois schools. They listed 15 essential requirements of a good school and rated 930 high schools and grade schools by this standard. They studied 69 of our approximately 100 unit districts, the rest being dual system districts. They made the following discovery:

1. Efficiency —
   53 per cent of the grade schools under the dual systems met the foundation program.
   81 per cent of the grade schools under the unit systems met the foundation program.
   87 per cent of the high schools under the dual systems met the foundation program.
   95½ per cent of the high schools under the unit systems met the foundation program.
   According to that measure of efficiency under the unit system, the elementary school was 28 percentage points or 53 per cent more efficient than under the dual system. The high school under the unit system was 8½ percentage points or 10 per cent more efficient than was the high school under the dual system.
2. Economy — According to that same study there was very little difference in cost on the grade school level in the unit district as compared to the dual system district, but on the high school level there was an annual saving of $54.72 per high school pupil under the unit system.

Here's One Giant JACK DIDN'T KILL!

BETTER BE SAFE THAN SORRY

COUNTRY Mutual FIRE Company

A farm community, in the wake of a bad storm, is a weird and awesome sight with its twisted, topless trees, its roofless buildings, its shapeless, windowless houses — livestock wandering aimlessly amidst the ruin, in the footprints of the giant, WIND.

Every year this giant stalks our land, and all too often to the shock and heartache of a serious storm must be added the loss of a life's savings. Don't let this happen to you. Before the summer storms start, have a talk with your friendly Country Mutual Fire agent. When protection costs so little, it's foolish to take chances!

THE STATE FARM BUREAU PUBLICATION

LET'S GET OUT OF THE MUD

By President Charles B. Shuman

MY GRANDMOTHER'S account of her journey to Springfield to attend the funeral of Abraham Lincoln remains a vivid memory throughout the years. Through a steady rain which fell, like an ill omen, for more than three days and nights preceding the funeral, the four-horse team dragged the wagon and its bedraggled occupants through mile after mile of axle deep mud. Through seventy miles of mud it took three long days, with countless stops to rest the team and push the mud from between the spokes.

Today we can whisk over a ribbon of concrete that follows approximately the same route and be at Lincoln's tomb in less than two hours. Yes, we are justly proud of the wonderful network of modern trunk highways that serves our state. We have in Illinois one of the best of state highway departments and an outstanding Experiment Station at the University of Illinois, but these well-financed institutions have done very little research on secondary road construction and materials. Today, more than eighty years after Lincoln's funeral, thousands of farmers in many sections of Illinois are still plowing through mile after mile of axle-deep mud to get from their homes to these super-highways, paid for in part by taxes on the gasoline they burn.

For months during the winter and spring many rural communities live under conditions not much better than their ancestors of three generations ago. Thousands of rural families are beyond the reach of modern medical and health care or adequate fire protection because of the condition of our farm-to-highway roads. Countless numbers of farm boys and girls have been denied educational opportunity beyond the eighth grade because the road to high school was impassable. Rural churches have died, local business and industry has been throttled, progress of all kinds has been bogged down by mud roads. Violent price fluctuations result from feast or famine market supplies, and whole areas are barred from the production of perishable commodities.

What is being done to remedy this intolerable situation? With the support of your organization, the Illinois legislature in 1945 appropriated $15,000,000 for improvement of township roads. This has helped but it appears that much of the money has been used for maintenance rather than permanent improvement. The desperate need of today is for a carefully planned, long time program for local road improvement. Pouring additional millions into a farm-to-highway road program without a plan will result in more and more waste.

The time has come for the farmers of Illinois, through their organization, to take stock of the road situation and to demand a program of action. Effective action geared to a plan — a long range plan, based upon research and study — this is the long overdue need of today.

DO YOU FAVOR

Crop Control?

EDITOR'S NOTE: Opinions of the men expressed below were taken at random and without prejudice. We are aware, however, that you may disagree. If so, write and tell us why.

IF SURPLUSES cause prices to drop unreasonably will you favor crop control?

Here's the answers Illinois farmers gave when asked this question during Farm and Home Week held at the College of Agriculture in Urbana.

All answered yes. If surpluses got hard to handle they'd favor and support a fair program of crop and acreage control.

Martin Bailey Granville White

An effort was made to find a farmer who was against and would not support crop control. No luck. As a matter of chance all the farmers interviewed were Farm Bureau members and maybe were a little closer to the problem, as one of them said.

Granville White, first farmer to be interviewed, lives near Burnside, Hancock county, expects surpluses to get troublesome about 1950 when foreign demand for food will have dropped.

"I'll be willing to go into a crop reduction program even though it might not be just exactly what I'd want. We have to cooperate, and farmers know it," White said.

White farms 160 acres, keeps about 10 cows and 10 brood sows, raises equal acreages of clover, beans, oats and corn.

Martin Bailey, a neighbor, agreed with White and said of last year's crop: "By next fall there'll be little '46 crop carryover in our county. Corn and beans are moving out as fast as elevators can get the cars. We shouldn't have any problem with the 1946 crop."

Glenn Roby farms 120 acres near Gays

Glenn Spencer Glenn Roby

in Moultrie county, maintains a large flock of chickens and a small dairy herd.

"I went into the AAA before," Roby said. "If controls become necessary, I'll be for them. I don't expect surpluses for four or five years."

Glenn Spencer, Adams county, farms 650 acres with his brother and this year raised corn, oats, and a few beans. A livestock man, he normally feeds out all his grain.

"Farmers planted just about every acre they could during the war," he said. "In the next two years they'll cut down on crops, some anyway."

Lack of help has kept livestock numbers down, at least on his farm, he said, although if grain surpluses pile up throughout the country he d favor controls on crop acreage.

Everett Brown, Decatur, Macon county: "Farmers should be able to deal with their own surpluses, and I'm for controls

Lloyd Walden Everett Brown

on production if and when it's necessary.

"Corn is moving out fast from my area and I can't see a big surplus for next year. But when we're threatened with surpluses I'm for controls.

"I'm a director in my Farm Bureau and think that Farm Bureau members are closer to the problem of surpluses.

His big problem, he said, is getting help. He farms 240 acres, has 7 milk cows and 30 head of cattle on feed but would keep more stock if he had the help.

Lloyd Walden, Georgetown, Vermilion county, farms 240 acres, has a dairy herd and raises hogs. "I think we'd better start thinking about controls and surpluses now and give it really serious thought in 1948.

"We'll notice some effect of surpluses this fall, on corn and oats especially."

Lester Beery, Hammond, Piatt county, farmer, auctioneer, special agent for his Farm Bureau insurance company, is in charge of livestock purchases for foreign relief for the Church of the Brethren.

Lester Beery

"We'll be bothered with surpluses for the next two years a good deal less if we meet our relief commitments to Europe and Asia."

"The government has promised us two year's support on farm prices. That's going to cost money. It had better be spent for foreign relief where it is needed rather than to buy surpluses that are wasted."

He bought 112 head of dairy cattle last year, mostly heifers, assembled them on his farm and had the cattle shipped through Elgin to Newport News, Md., for shipment in cattle boats to Europe.

Our Cover

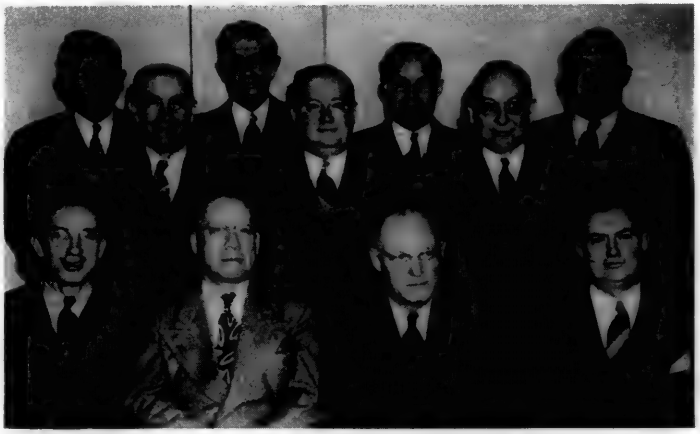
THE IAA RECORD cover this month shows the main gateway to Fort Chartres and is the second of a series of covers illustrating historic and picturesque Illinois scenes.

The reconstructed gateway to the fort stands in Fort Chartres State Park in Randolph county, four miles from Prairie du Rocher. The first log fort, completed in 1720 and named for the regent of France, was destroyed by the Mississippi river in 1727. It was rebuilt and abandoned later in 1747 and was built a third time on its present site upriver from the old fort in 1753.

The British took the fort from the French in 1765 and held it until 1772 when the rampant Mississippi again damaged it. Fort Chartres' historical significance ended with the withdrawal of the British garrison.

The guardhouse and chapel have been reconstructed but the powderhouse stands as it did in the 18th century. A museum contains many relics of the former stronghold.

Officials of the American Farm Bureau Federation present the organization's 1947 legislative program to the senate agricultural committee in Washington in February. Left to right, seated: Sen. Thye (R-Minn); AFBF President Edward A. O'Neal; Sen. Thomas (D-Okla); Sen. Capper (R-Kan); Sen. Aiken (R-Vt); Sen. Bushfield (R-S.D.); and Sen. Young (R-N.D.). Standing: W. R. Ogg, AFBF; R. E. Short, Arkansas; R. E. Corbett, AFBF; J. M. Bailey, West Virginia; George Wilson, California; Charles B. Shuman, Illinois (IAA); Alfred Lunn, Massachusetts; George Putnam, New Hampshire; H. L. Wingate, Georgia; W. W. Hawley, New York; H. E. Schenck, Indiana; J. W. Hammond, Texas; H. E. Slusher, Missouri; and R. F. Shaw, North Carolina.



Officers of the Illinois Farm Advisers Association elected during Farm and Home Week are, left to right, front row: O. O. Mowery, Macoupin, secretary-treasurer; I. E. Parett, Virmilion, vice president; W. E. Coolidge, Livingston, president; W. B. Bunn, Champaign, retiring president; standing, all directors, O. W. Hertz, Washington; G. C. Smith, Pope-Hardin; A. J. Rehling, Henderson; R. V. Watson, Mason; A. C. Johnson, Kane; C. S. Love, Christian, and A. B. Rowand, Ford.

Knox county's annual Rural Youth banquet held recently in Galesburg is shown in full swing.

SEE CRITICAL NEED FOR *Rural Health Services*

• • •

RECOGNIZING a shocking inadequacy in the health of rural people and a critical need for medical and hospital services for rural areas, the powerful American Medical Association held its second annual National Conference on Rural Health.

The two day conference, held in Chicago in February, drew together the Farm Bureau and other farm groups, as well as county, state, and federal health agencies, and state and national medical groups.

Stressing the need for rural health facilities Albert S. Goss, master of the National Grange, said that throughout the nation rural areas have but one doctor for 1700 persons, 15 million persons have no hospital service, and infant mortality is 25 to 30 per cent higher in rural areas.

Favor Health Centers

Outlining some of the medical program of the Missouri Farm Bureau, H. E. Slusher, president, said his group is backing rural health centers, pre-paid medical plans, more aggressive county medical associations, and last year aided in voting about $3,000,000 for rural hospitals.

The speakers agreed generally that the health needs of farm and rural people can best be served through some type of county or community health center, council, or unit.

The federal Hill-Burton bill provides federal assistance for such health centers and hospitals that might be built around a community unit.

For smaller units, Dr. Fred A. Humphrey, chairman of the Colorado Committee on Rural Medical Service, said rural communities could well use the army or navy plan of hiring hospital aids, similar to the pharmacist mate or medical corpsman, and setting up a dispensary, like sick-bays on navy ships, with the doctor as the final authority and clearing agent in cases needing a doctor's care.

A stable income for farmers and the urgent need for good country roads were listed as being among the most important needs for encouraging young doctors to come to rural communities.

This is a view of the crowd in the lobby of the University auditorium at the close of a general session of Farm and Home Week.

Price Outlook

By LEW A. REISNER
IAA RECORD Field Editor

Dr. W. L. Burlison, head of the department of agronomy of the College of Agriculture, receives a plaque for distinguished service to agriculture from Walter W. McLaughlin, Decatur, former farm adviser and member of the University board of trustees.

W. W. Whitlock, IAA safety director, points out some of the danger points in a corn picker at Farm and Home Week to, left to right, Bob Dittmer, Adams; Charles Read, Marshall-Putnam; and John Cooney, Whiteside. All are Rural Youth members.

"Uncle Joe" Fulkerson, Jerseyville, (left) and William H. Young, retired College of Agriculture staff member, are shown signing up for the 46th annual Farm and Home Week program. Both have attended every meeting except the first in 1901.

Representing Douglas county 4-H Clubs, Mary Biddle and Merle Rahn present Dean H. P. Rusk (center) of the College of Agriculture with a check for $2657.13 as their county's contribution to the funds being raised to develop the state 4-H Club Memorial Camp near Monticello in Piatt county. Left to right: J. Q. Scott, Douglas county farm adviser; Miss Biddle, Dean Rusk, Rahn, and Helen Pelletier, Douglas county home adviser.

Judson P. Mason, IAA assistant director of dairy marketing, speaks at Milk-Pricing Program meeting at Farm and Home Week. Left is Chairman E. E. Houghtby, IAA director of dairy marketing.

"1947 NOT YEAR TO

Studied by Farmers; They're Not Pessimistic

ARE farm prices, now on the decline, going to tumble us into another farm depression?

No! Not this time.

That was the well-considered answer the 4,373 farmers got from speakers at Farm and Home Week at Urbana. The 1947 registration was the second highest in the records going back to 1911. Highest on record was 4966 in 1942.

These Illinois farmers took home a pretty good picture of the agricultural outlook for the coming months after attending lectures, looking over

A cut-away model of an internal combustion engine was a popular object of interest at the Farm and Home Week machinery exhibit. Ora Denny, (left) McLean, and Jess Smith, Tazewell, take a look.

grain and machinery exhibits, exchanging views among themselves, and talking to farm advisers.

Prices for farm products, backed by a healthy, strong demand and a 90 per cent parity pledge, look good for the rest of this year, speakers said. They admitted though, that prices probably will drop a good bit this summer in many crops.

Dr. L. J. Norton, professor of agricultural economics at the U. of I., said one reason that farm incomes are likely to be lower is that farmer's costs will be higher in 1947 than in 1946.

"Costs lag behind prices of such primary products as farm produce; so costs will hold up after farm prices fall. Even though incomes are lowered, however, they will still be at a high level judged by prewar standards," he explained.

Dr. Norton's other predictions were: "Meat animals—cattle and hogs—are now high in price and with the increased production which will follow from the conversion of our large corn crop into meat will certainly be lower.

"Butter and other products which classify as fats are high in price and will probably be lower.

"The price of grain will be influenced by the size of the 1947 harvests.

"Prices of farm products may average lower a year from now by perhaps 20 to 25 per cent."

Dr. Norton added, however, "I do not think 1947 is the year to cut back on agricultural output."

Looking ahead, Dr. G. L. Jordan, U. of I. professor of agricultural economics, said he didn't think prices would slump to the 1935-39 level.

"We are not going to voluntarily bring on a serious deflation and the supply of money in the form of deposits and money in circulation is large enough to maintain the price level of farm products at a level 25 to 50 per cent higher than the 1935-39 average," Dr. Jordan said.

In general, the farm economists agreed that the corn belt farmer will be protected this time from the price decline and unbalance in parity that wrecked them in the '20's and again in the '30's.

This doesn't mean that an individual farmer won't get nipped if he steps out now that prices are falling and piles up a big debt, as he might in buying a farm.

Savings of the war and early postwar period have tempted farmers and others to bid farm land into the clouds, Dr. C.L. Stewart, university land economist, warned.

"A land price recession of not to exceed 20 per cent by 1951 can be regarded as within the possibilities in certain parts of Illinois and adjoining states," Dr. C. L. Stewart, U. of I. land economist predicted.

"These are parts in which prices for farm lands have already come within about 15 per cent of the 1920 peak, or may come within that range of the 1920 peak in the intervening time." Dr. Stewart said he thought the optimism of land buyers may have already reached its peak or may do so within a matter of months.

In his talk on adjusting to post-war operations, P. E. Johnston, college of agriculture economist, also urged farmers not to go in debt without good reason.

"Keep your bonds," Johnston admonished. "Seventy-five dollars spent later will buy more goods than $100 spent now."

Since Illinois farmers in 1946 had

A hydraulic control attachment for adjusting drawn implements interests G. C. Leipold and J. C. Becker, both of Wabash county, during Farm and Home Week.

CUT BACK ON AGRICULTURAL PRODUCTION:" DR. L. J. NORTON

Chatting backstage before they talked at a Farm and Home Week general session are, left to right: J. C. Spitler, extension service; President Charles B. Shuman of the Illinois Agricultural Association; Arnold P. Benson, State Director of Agriculture; Dr. Alfred P. Haake, mayor of Park Ridge; and Dean H. P. Rusk of the College of Agriculture.

20 per-cent more land in corn and soybeans than in 1940, a good deal of emphasis was placed on the need of getting these acres back into soil building legumes and pastures.

A good legume and grass program should not be delayed but started in 1947, speakers said, to tie in with a good livestock program.

Johnston also advised producers to take advantage of seasonal price changes in planning their livestock programs. With ceilings removed farmers should again plan to market their hogs in March and September, to have high egg production during the winter months, to sell medium and common cattle in the spring and choice and prime cattle in the late summer or early fall, he said.

Another recommendation was to buy light weight feeder cattle or cattle for a short feed. He predicted that the practice of buying calves to be fed on hay and pasture the first year and finished the second, will be much less profitable than during the period since 1933 when there has been an upward trend in beef cattle prices. Good to choice feeder calves, he said, should be pushed to market the first year. Beef cattle supplies are large and it appears that the liquidation period of the cycle will coincide with declining demand which will provide two price-depressing factors operating at the same time.

Johnston also recommended culling beef cow herds and dairy herds more closely than usual.

Farmers were urged to start or expand a family-sized flock of sheep. Since sheep numbers have dropped in the nation by 25 per cent during the war, the market for mutton is expected to be excellent for the next few years.

Another side of the agricultural outlook picture—farm legislation—was viewed by Dr. Norton who made these predictions.

(1) That the authority of the Secretary of Agriculture to limit support prices only to cooperating farmers may be extended to the non-basic commodities.

The Secretary now has this authority for basic commodities. This would mean the price support would only go to cooperators in reduction programs in the case of soybeans, potatoes, and also of livestock products if anyone can work out a way to limit livestock production.

The poultry people, he said, may ask to be exempted from the price support rather than be put under quotas. No one should expect price supports without acreage controls or marketing quotas, Dr. Norton said.

(2) The Secretary may be given authority to substitute direct payment for price supports under certain circumstances. Dr. Norton pointed out that the difficulty of supporting certain commodities in the market is becoming increasingly recognized. Just how, he asked, would you support the price of hogs? You can't put them in a crib and make a loan. No one can be compelled to buy all that is offered for sale at a fixed price.

(3) The life of the CCC, which finances most price support operations, will have to be extended. This will be done, but its borrowing power, which determines how much it can lend or lose, will likely be reduced, now that the war is over.

Dr. Norton added that he did not think any basic postwar farm program would be evolved in the near future as Congress will be too busy and will adopt a "wait and see" attitude.

Jimmy Benjamin, 13, of Will county was the beekeeping enthusiast at Farm and Home Week. He owns several bee colonies. Here he is shown with Carl Killion, Paris, state apiary inspector (center) and Dr. V. G. Milum, university entomologist (right).

Stockmen are shown at their annual banquet held in connection with Farm and Home Week in Champaign-Urbana.

The Illinois Agricultural Association was well represented on the program of Farm and Home Week. President Charles B. Shuman made a brief address during the opening general session, and members of the IAA staff spoke at other sessions.

S. F. Russell, IAA director of livestock marketing, and Carl Johnson, farmer from DeKalb county and chairman of the IAA livestock marketing committee, outlined the IAA's plan for coordinating cooperative livestock marketing activities in the state. This plan was fully outlined in the December IAA Record.

LETTERS TO THE EDITOR

OLDEST FARM BUREAU MEMBER?

We have a Farm Bureau member, Warren Beebe of Eldred, who celebrated his 99th birthday on Jan. 5. He has been a continuous member since the organization of the Greene County Farm Bureau 29 years ago.

We believe this is a record that can not be matched. Mr. Beebe shucked his 10 acres of corn last fall and has produced food for four wars, the Civil, Spanish American, World War I and II.

We also have another youthful member, Sylvester Melvin, Greenfield, who celebrated his 95th birthday in January. He too is a charter member. Mr. Melvin gets along without glasses when he reads and writes. He has been interested in breeding purebred Angus cattle for the past 45 years.

D. H. Sponsler
Greene County C.O.D.

THE LINCOLN CALENDAR

Congratulations on the unusual calendar being put out this year by the IAA. . . . . Had he lived Lincoln might have retired to one of his two farms in Iowa — one of 40 acres and one of 120 — which Uncle Sam gave him for his Black Hawk War services.

C. C. Tisler
La Salle County

Thank you very much for the Lincoln calendar. It is even nicer than I expected. . .

Mrs. Roy Nylander
McHenry County

I have just learned about your fine Lincoln calendar. I would appreciate one for myself and one for a friend who likewise collects Lincolniana.

M. L. Wilson
Director of Extension Work, USDA
Washington, D. C.

As a member of the Abraham Lincoln Association and the Illinois State Historical Society I wish to . . . . . preserve it as a historic document.

Frederic J. Dornseif
Chicago 25, Ill.

As a staunch admirer of Lincoln I would appreciate one of your fine calendars.

A. E. Bennett
Trenton, N. J.

During the recent convention (AFBF) your booth displayed a calendar with illustrations of Lincoln. Would appreciate receiving one of these fine calendars.

James G. Chapman
San Francisco, Calif.

I recently saw one of your calendars in one of our Farm Bureau offices here and being a great admirer of Lincoln, I am most enthusiastic about this calendar. I would appreciate receiving one.

M. Jacques
Ohio Farm Bureau
Columbus 16, Ohio

One of our pupils brought to school one of your calendars featuring beautiful pictures of Lincoln by Bonhajo. Congratulations; That is, indeed, a splendid and ideal way to spread information about this great son of Illinois.

Would it be possible for your Association to send copies of this calendar for use in our school? The pictures of Lincoln would be used as a valuable teaching aid in the classrooms.

Sister M. Sylvina
St. Barbara School
Chicago, Ill.

. . . . . My sister and I are teachers in the Sterling grade schools and we thought these were the finest pictures of Lincoln we had ever seen.

Beatrice Miller
Whiteside County

I was fortunate enough to receive one of your lovely Lincoln calendars. It is admired by everyone entering my home. You could use this fine calendar year after year and I am sure you'd never be able to supply the demand.

H. R. McCarthy
Cook County

My teachers saw one of your Lincoln calendars and have asked that I write for more of them.

L. G. Baxter
Principal,
Venice Schools

We gave our Lincoln calendar to the Lincoln Avenue school and they asked if it were possible to get another. It is one of the nicest calendars we have ever seen for a school.

Elmer Fadke
Cook County

It boosted our morale considerably to receive so many kind comments on the Lincoln calendar. To all who have written us, we are sincerely grateful. We are only sorry that we cannot fill your orders for extra calendars. Our supply is now exhausted.

BIBLE QUOTATION

I would like to know the place where Gustav A. Magucord gets his mail. I would like to have him explain his prophecy of the Old Testament regarding 1957. This is a new one to me. I have been over a good portion of Calhoun county. Thanks.

C. O. Hettick
Macoupin County

Please send me the full address of Gustav A. Magucord of Calhoun county, who had a letter in the January RECORD called "Note of Doom." I wish to find out where his statement is quoted in the Bible.

Mrs. J. E. Franklin
Fayette County

We are sorry we do not have Mr. Magucord's full address available. Perhaps he will be good enough to write to you and clear up your questions. Mr. Hettick is from Palmyra and Mrs. Franklin from Ramsey.

RE SAN FRANCISCO

In regard to the California trip I am glad to say I had a most enjoyable time. Anyone watching the others would enjoy himself. I really think they put me in the car with the best folks. Had William Bunn in the upper, Mr. and Mrs. Jim Martin ahead of me, Mr. and Mrs. Harold Meyers across the aisle and IAA Director and Mrs. Chester McCord next to them. Then we had L. E. Lloyd as guard at one end of the Pullman and L. E. Lingenfelter at the other and the rest of the lot were top people. The trip was planned just right, thanks to Roy Johnson and Charles McEvilly. And I think their wives had a lot of thanks coming too.

I had been all over the south and east but had never been west of Nebraska and Kansas. I am glad I made this trip. I didn't like San Francisco very much but did like Phoenix, and the Caverns were just more than anyone can describe.

Ira Cottingham
Jersey County

I certainly enjoyed my trip to the A.F.B.F. Convention at San Francisco. It was my second visit but I enjoyed seeing it all again. I was on the second train. I have been on several tours, but I was never with any finer people than were on this trip.

My thought on leaving Chicago was "What a wonderful world this would be if all were as fine as these people. Then truly there would be 'Peace on earth, good will to men'." I enjoyed seeing the pictures in the RECORD.

I will always feel indebted to Roy Johnson, Charles McEvilly and everyone from the Illinois Agriculture Association who were responsible for my most wonderful trip.

Mrs. Mollie E. Williamson
Sangamon County

The nicest part of the trip for us was the lovely meals and the service we received from the train crew. It was a rest not to have to plan meals and serve them three times daily. Also the bus drivers were very courteous. We had all this and the beautiful scenery along the way and visited many interesting places. My husband says we are so spoiled from being waited on it's hard to get back to normal. Thanks for everything.

Mr. and Mrs. Joe Adams
Lake County

I think the highlight of the trip was the association with the best people in the world. We might say there was nothing to mar our one continuous round of pleasure. I thought that with my past three score years and 10 I might be the granddad of the party till I met 84-year-old George Tullock of Rockford who was as chipper as a lamb.

Lou Lloyd
DeKalb County

"It was a grand trip!" agreed the three members of our family who were part of the San Francisco caravan. A real vacation — no transportation worries, excellent food and service, and such a congenial group of people. We would indeed like another trip next year. I hope our thanks and gratitude will help to repay all for the work and responsibility.

Thank you for a wonderful two weeks.

Mrs. Lloyd Walther,
Rock Island County

Fight Fires WITH SMOTHERING WATER FOG

Left is a barn fire being combatted by the Chadwick fire department with high pressure fog equipment. Notice fog stream at left and black smoke rising high as fire is smothered by vaporized water. Right is another gutted barn after fire with cow carcasses still visible at right. Fire got a good start in early morning and barn was beyond saving when firemen arrived from seven miles away at Lockport in nine minutes, and from Plainfield later. Water supply was inadequate but firemen saved silo, barn and house in rear of picture. This barn burned down in 1945 with a loss of 32 cattle, three horses, and 20 tons of hay.

* * *

"$30,000 IN THE BANK — AND YET HE DIED A PAUPER"! You'll read such an item in the papers now and then. It's news.

But have you heard of the farmer whose home burned to the ground in spite of the fact that he had one of the most effective types of fire-fighting apparatus lying idle in his barn? That's news, too, but we doubt if you've heard about it even though it just happened on an Illinois farm a few weeks ago.

This idle "fire-equipment" was none other than the common high-pressure orchard spray in use on many Illinois farms. Unfortunately, the farmer had not been notified of its varied uses.

Just a very few years ago, Michigan State College made extensive tests on the use of high pressure water fog in putting out rural fires. Many interesting discoveries have resulted from this study and subsequent use: Water sprayed under pressures of around 600 pounds per square inch, 1. will put out the same fire conventional equipment will — and do it with 10 times less water! 2. minimizes water damage by as much as 90 per cent. 3. cools, absorbs heat, blankets and smothers fires in short order.

Are these things important in rural fire fighting? You bet they are. Look around your farm and think of where in case of fire you might "right quick" get the conventional equipment requirement of one to five thousand gallons or more of water. The IAA

By W. W. WHITLOCK, Director,
IAA Safety Department

Safety Department survey on rural fire departments in Illinois shows the water supply problem to be a grave one indeed. High-pressure water fog apparatus, carrying its own water supply, is one of the best answers to this water problem.

Of course, every farmer doesn't have an orchard spray rig. Nor would it be possible for all to have one. But they can have other means of extinguishment, both individually and collectively.

If the high-pressure idea hits your fancy, these units can be had in "fire-truck" size for Rural Fire Departments. After the Michigan tests, manufacturers built a bigger pump and tank, put them on a truck, painted the outfit red and put them on the market for fire departments. Other manufacturers have followed with different styles and patterns. The war interceded on making these outfits available to rural areas when the Army and Navy bought them up to successfully put out some of the hottest fires in the books — airplane crash fires.

Now these fire-trucks are back in "civvies" and already 15-20 Illinois departments answer rural calls with high-pressure equipment.

Let's get back to our farmer whose house burned to the ground. Aside from

his forgotten an idle high-pressure pump, he had no available means whatsoever with which to combat the fire other than a water pail and two or three milk buckets. The fire had started in the attic and progressed slowly for an hour before developing into a "king-size" holocaust. In the meantime, Mr. Farmer's wife drew the water, and carried it in buckets in successive trips to the second story for her husband to use. The farm housewife is to be commended on her ability to perform various and sundry tasks around the household — but she'd never pass the Underwriters Laboratories' test for efficiency in rate of delivery of gallons of water to fight a fire.

How about the fire department on this fire? The nearest department was 12 miles away, with good roads, incidentally. But, alas, they don't answer rural calls.

How about the neighbors' help? Sure, they helped. Helped carry out the furniture — all of it, in fact. Then there was nothing to be done but to sit and watch the fire burn itself out.

A small fire extinguisher would have put out this fire at the outset. Three or four buckets of sand kept handy for fire-fighting might have done it. Certainly a small portable stirrup pump would have been effective. They're back in "civvies," too, you know, after a swell record in World War II. They're fairly cheap and easy to operate. So are the "back-pack" pumps, which gained so much army and navy use in fire-fighting and in insect control.

Fire-protection is "money in the bank" for you. Are you likely to find yourself in the position of the pauper? Or will you have the fire-protection assets to draw on in case of emergency?

As already mentioned, this fire protection can be the result of individual or collective efforts — or preferrably both. Over 140 Illinois communities have organized rural fire districts. A smaller number have organized cooperative or corporation forms of departments. Still others may draw some measure of protection from city-owned departments. All of these departments operate in varying degrees of efficiency. They cover a small proportion of the state as a whole. Nevertheless, they represent the collective efforts of many rural people in answering the fire protection problem.

Now, the individual fire protection problem is up to you, What will you do about it?

CULTIVATING his corn only twice didn't keep C. C. Taylor, Virginia, Cass county, from winning the coveted 10-acre corn yield contest sponsored by the Illinois Crop Improvement Association.

"We were too busy replanting fields that were flooded to get over the corn a third time," the young corn king, an Illinois College of Agriculture graduate in 1937, said when interviewed after he received the award at Farm and Home Week.

The corn sample Taylor entered was of excellent quality and his plot yielded 146.88 bushels per acre, one of the highest entered. However, it was his relatively low production costs, a total of $382.48, that enabled him to win in a highly competitive contest.

Second high score was earned by J. D. Adkisson, Roseville, Warren county. His yield was 152.97 bushels and total production cost was $396.26. Three points were used in judging: quality, yield and total cost.

Third in final score went to E. L. Atkins, Smithshire, Warren county. He had the highest yielding plot, 172.81 bushels per acre and his corn was rated top in quality. His production costs were high, however, $462.37.

Taylor, the winner, said his prize corn was raised on rich river bottom land along the Sangamon river. The land has not been pastured or in sod in the memory of Taylor. The field, second bottom land, has never flooded.

"We drilled the corn in rows 38 inches apart and equal to four kernels to the hill, checked. It was a good stand. Damage from corn borer was slight," Taylor said.

"The field is a long way from the buildings, about three-quarters of a mile, and has not been manured for a long time. But it's fertile. It has plenty of natural lime and potash, and we spread phosphate on it a year ago last winter."

The field had been farmed heavily during the war on the following rotation: corn, 1943; oats, 1944; wheat, 1945; corn, 1946.

Illinois Corn King C. C. Taylor of Cass county holds samples of his corn exhibited at Farm and Home Week.

Illinois Wheat King Paul Wessbecher, Logan county, shows sample of Ukrainian strain that won him the title

Paul Wessbecher of Mt. Pulaski, Logan county, a consistent winner in grain shows, captured the state wheat title with a Ukrainian strain purchased from a local elevator.

A charter Farm Bureau member in Logan county, Wessbecher used 150 pounds per acre of 0-20-20 fertilizer purchased from his local Farm Bureau supply company.

Wessbecher came to Illinois from Germany in 1912. Working as a hired man for several years enabled him to later purchase an 80 acre farm where he now lives.

His wheat, judged on quality only, was "pretty good," Wessbecher admitted, except he thought the color was a little too light. He grew 12 acres of wheat this year. It yielded 30 bushels per acre.

Verl Steele, Table Grove, Fulton county, won the 10 acre soybean contest, with a yield of 46.43 bushels, highest in the contest. Total cost figured at $276.25. His sample of Lincoln beans was judged high in quality and oil content.

IAA DIRECTOR

J. King Eaton is Long Time

Dairy Farmer

By JIM THOMSON
Ass't Editor, IAA RECORD

TIME does not set J. King Eaton in its plaster of Paris mould. He is a type of Illinois farmer ever interested in newer methods of operation and quite willing to adopt them if practical.

Perhaps it is his only son, 31-year-old Harrison, who keeps Dad on his toes. Nevertheless, between them they have put into practice a number of shortcuts and better ways of performing farm tasks. That sort of attitude would appear to be most desirable among policy makers such as the IAA board of directors to which Eaton was elected in November, 1945.

He succeeded Alvin O. Eckert of Belleville, St. Clair county, and represents the 22nd congressional district which includes the following counties: Madison, St. Clair, Monroe, Washington and Bond.

The Eaton farm is in central Madison county about two miles off U. S. highway 66 and is reached over a winding road through a picturesque area of rolling wooded hills.

When we arrived at the farm, Mr. Eaton and son Harrison were putting a new roof on the barn. But Mr. Eaton did not leave all the risky climbing to Harrison. He scampered around on the high barn roof with the agility of a teenager.

The 265-acre Eaton farm is a three-way partnership. Mr. Eaton owns 110 acres, Mrs. Eaton 115 acres, and their son Harrison 40 acres, all adjoining each other. Mr. Eaton's holdings are part of the original farm bought in 1837 by Director Eaton's grandfather, a Kentuckian who reached Illinois in 1856 by way of Mississippi. The Eaton family came to the American colonies in 1630 and lived in Massachusetts, Pennsylvania and New York before migrating westward.

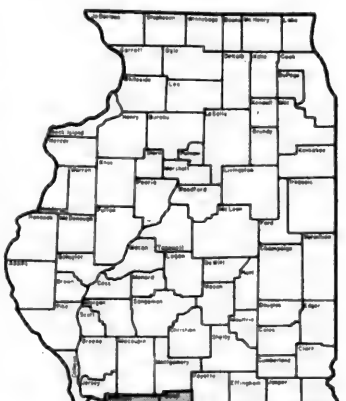
Eaton was born on the farm where he now lives and attended local schools and spent part of a year at the Edwardsville high school. At 21, after two years at McKendrick college in Lebanon, he left in 1907 to take over the home farm which had been operated by his father, a Civil War veteran.

He was married in 1911 to the former Anna Mae Hamilton, a neighboring farm girl, and became a charter member of the Madison County Farm Bureau in 1918, helping to solicit membership for the newborn organization.

Because they operate a close-in farm in the St. Louis milkshed the Eatons are mostly concerned with dairy farming. Much of their farm activity is centered around a herd of 25 Jersey and Holstein cows.

Soil building is a mighty important forerunner of high milk production, in Director Eaton's opinion. That's why his fields all have had liberal applications of plant foods starting from as far back as 1912 when Eaton first applied lime-

Editor's Note: This is the fifth of a series of articles to acquaint you with the men on the Illinois Agricultural Association board of directors.



Shaded area on map is 22nd congressional district represented on the Illinois Agricultural Association board of directors by J. King Eaton of Edwardsville.

stone to his land. Most of the land has received phosphate twice and limestone two or three times. He plans to apply potash to 30 acres in the spring.

The IAA director from the St. Louis area built his own lime spreader in the early days when good factory spreaders were not available.

To conserve his soil he also has done some terracing and contouring. Because pastures are an important part of dairy farming, he uses his grasslands to the greatest advantage on sloping fields.

He has had no hogs in the past few years and has had no sheep on his farm in many years. Normally he plants about 50-60 acres in winter wheat, 50-60 acres in corn, 20-25 in alfalfa and 15-20 in oats. His rotation follows this order: wheat, clover, corn, oats, pasture (rye and sudan grass), wheat.

Director Eaton has been one of the most active farmers in his area in civic, community, social, agricultural and church activities.

He is a former president of the Sanitary Milk Producers and until last year had served on its board since its organization in 1929. He also served as treasurer

Perched high atop his barn, Director Eaton hammers on new roof with son Harrison.

for 10 years. He has been a trustee of the Hamel township schools for 12 years and nine years as director of the Quercus Grove rural school.

In the late twenties he served on the Madison County Farm Bureau board for two years and is at present a director of the Madison County Service Company board. He helped organize the Hamel Co-operative Grain Company in 1920 and became the co-op's first treasurer, serving for one year; since then he has been secretary.

For five years he headed the Quercus Grove Rural Club, a social organization for neighboring farmers. His son Harrison is the current president.

Mr. Eaton also has directed farm boys in their 4-H Club activities for a number of years and has been a member of the Edwardsville Rotary club for 10 years.

For a number of years he has served as a trustee of St. John's Methodist Church at Edwardsville. At present he is assistant superintendent of the Sunday School, president of the Methodist Men's club, and is a member of the church choir.

The IAA director from the St. Louis area always has had the viewpoint, he said, that there is only one solution to our farm problems. That is, that we work together. The day of the farmer working as an individual is past, Eaton said. "It may not be just what we as individuals like but other groups present a united front in dealing with issues of great importance to them. We must do likewise."

Rural Youth

By
ELLSWORTH D. LYON

STEPHENSON was visited Jan. 28 by the state police in the person of John DePew who spoke to the group on "Safety on the Farm and Highway."

SCHUYLER'S "Schuylite" for February lists under the farm adviser's column a schedule of extension and local Rural Youth activities in the county. Why shouldn't young adults attend these adult educational meetings?

BROWN'S farm adviser, Eldon Powel, sets up a challenge for Rural Youthers in "The Little Brindle Breeze" to "lead the way to sensible farming through sound management of the family-sized farm" by putting good business into the biggest business and the best way of life on earth — Agriculture.

ST. CLAIR was honored at its February meeting by visitors from the Belleville Exchange Club. On April 2 the Exchange will lead this group on an industrial tour.

Success to WABASH Rural Youth! A membership drive is under way and will continue through March. Charles Newkirk, Mt. Carmel, is the new president.

FRANKLIN cleared $147.60 on its pie social on Jan. 30. Contributions are being made from the treasury to the March of Dimes and to the State 4-H Memorial Camp. RANDOLPH contributed $50 to the State Memorial Camp.

CLAY'S January meeting was a panel discussion much in harmony with the theme, "Choosing and Winning a Mate," discussed in the Youth Conference at Farm and Home Week. This panel was an attempt to answer the question, "What can be done to reduce the present high divorce rate and replace it with happy homes?"

DEKALB scheduled two movies for February. They were — "Highlights of the 1946 Football Season," and "Safe Driving."

MASSAC county's newly elected officers are: president, Lester Korte, Belknap; vice-president, Ralph Meinders, Metropolis; secretary, Monaline Meinders, Metropolis; treasurer, Ruth Barman, Metropolis; reporter, Elsie Barman, Metropolis; and recreation chairman, Bob Summers, Metropolis.

FORD county was reorganized on Feb. 5. Officers elected were: president, Warren Gustafson; vice-president, Harold Turner; secretary, Mona Stager; treasurer, Nancy Johnson, all of Paxton; reporter, Joanne Radcliff, Sibley.

Ruth Huser, retiring president, reports on Tazewell Rural Youth's successful year in 1946 and pledges her support to newly installed President Paul Chaffer at recent annual banquet.

Taking part in a Rural Youth panel discussion during Farm and Home Week at Champaign-Urbana are left to right: Kenneth Wilson, Montgomery; Marjory Johnson, Knox; Bob Dittmer, Adams; Mae Pitstick, La Salle; Burnell Henert, Lee; Mrs. Katherine Taylor, U. of I.; William Smith, U. of I.; Marcella High, Christian; Ray Farris, Clark; Martha Carlisle, Hancock; Quentin Elliott, La Salle; Ruth Huser, Tazewell; and Ed Dew, Ogle.

NEW FARM BUREAU MEMBER
Signs 28 others in Week

YOU'D think Gene Shufeldt of Kinmundy had been a member of the Marion County Farm Bureau for the past 20 years the way he talks up his county organization.

And he doesn't just talk, he does something about it. He convinces his neighbors. In fact he has set a new record in his county for signing up new members. In the recent membership drive he signed up 28 members in one week and 35 in all.

Yet Shufeldt has been a Farm Bureau member himself for less than a year. He came to the community not long ago and was signed up by County Organization Director E. L. DeLay. Taking advantage of Farm Bureau services he soon became sold on the organization lock, stock and barrel.

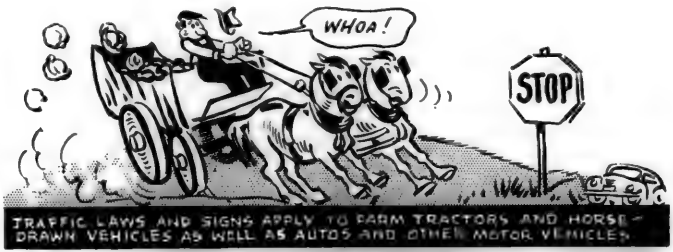
In the recent membership drive, Shufeldt was awarded the grand prize of a white nanny goat for signing up the greatest number of new members.

Asked the secret of his success in convincing members that their interests lie with Farm Bureau, Shufeldt said:

"I pick the time and the place, get the fellow alone and talk to him man to man. I ask him to come along with us and tell him that Farm Bureau needs him. Then I tell him the advantages of belonging to Farm Bureau and of the services he can expect. I lay the contract out, tell him to sign and say I'll see to it that he gets all the services that are coming to him.

"I never get excited when a man refuses to sign or objects to something in Farm Bureau. And if the man asks me about something I don't know myself, I don't give him a doubtful answer. I tell him I will check with the farm adviser or the county organization director and let him know."

I CAN DRIVE MY TRACTOR OR WAGON ANY WAY I PLEASE ON MY OWN PROPERTY, BUT ILLINOIS LAWS TELL US JEST WHUT WE CAN AND CAN'T DO WHEN DRIVING DOWN A HIGHWAY.



COUNTRY MUTUAL CASUALTY POLICIES GIVE FULL PROTECTION

The "Farm Profits Dike" is full of danger spots, potential breaks which could wipe out your life's savings! Your liability for injuries sustained by employees is a weak spot. The risk that your livestock may break onto the highway and cause an accident, that is a potential leak in the dike! A temperamental bull, a flighty horse, a weak hayrope are all danger spots, as is a slippery floor, a dark stairway, a loose-runged ladder. The ability risks of farming are tremendous, but those danger spots can be plugged and reinforced with Country Mutual Casualty insurance — an insurance program designed to take the worst risks out of farm management. Don't risk a break in the dike! See your Country Mutual Casualty agent today at the Farm Bureau and learn how little it costs to be protected.

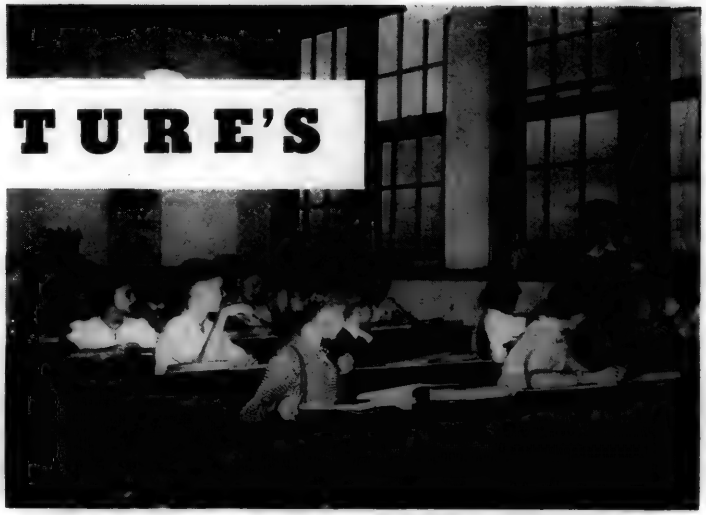
Your FUTURE'S *in* TEACHING



ATTENTION high school seniors! Have you considered the teaching profession as your life's work? Have your parents and teachers advised you of the rewards and esteem due you as a teacher?

Probably never in the history of the teaching profession in the United States has the demand for good teachers been so great. And probably never before have instructors commanded higher salaries.

This is particularly true of elementary teaching. It is particularly true of rural schools now on the verge of a bright future with finer buildings and sensible consolidation.

The rewards and esteem connected with teaching are worthy of your consideration if you are now about to embark on a career.

Why, you say, should I consider teaching, particularly in the elementary field, as a vocation?

There are a number of reasons. First, there is an awakening recognition on the part of the public of the importance of elementary education as the foundation of our entire educational program. Probably no profession has such a profound effort on the future of American thought. (Whether America is to stick to democracy, freedom of action and expression in the next generations depends to a great extent on the work of our teachers today. Secondly, there is a trend toward better salaries for school teachers and toward a single salary schedule for elementary and high school teachers.

Also, the summer months are largely free for most teachers to do as they please — travel, attend or teach summer school, or take other gainful employment — an opportunity enjoyed by almost no other profession.

By JOHN K. COX, Director,
IAA Rural School Relations

Other desirable trends in the eyes of the teacher include the disappearance of board of director districts under the school reorganization program in favor of board of education districts, thereby allowing the grade teacher more protection under the tenure laws.

Teachers in a few communities may be rated socially inferior, but in general being a teacher automatically carries with it the key to practically every home in the community as child and teacher strengthen the bonds between the home and the school.

Considering the large number of the nation's leaders who were once school teachers, it would indicate that the teaching profession is not a blind alley for those who desire greater opportunity and responsibility.

There are many opportunities for advancement in the grade school since there is less competition for jobs than in high schools. Opportunities are particularly good for men in elementary school administration.

Teaching provides unlimited opportunities to help mold the future and to render a direct personal service to mankind. The elementary school is in dire need of teachers. Our present supply is far short of demand and yet we shall need during the next eight years approximately 8,000 grade teachers, in addition to the ones we now have, to take care of the 240,000 additional children during this eight year period.

School reorganization plans now being contemplated probably will provide: 1. A broader tax base; 2. Better building and facilities, particularly in the grade school; 3. Better supervision; and 4. More coordination of the entire school program.

Farm boys and girls have the background needed for teaching in rural communities. Rural communities may be defined in this case to mean schools located in either rural areas or in villages of less than 2500 population.

In view of possible changes in our economic picture, teaching positions with steady salaries may be relatively much more attractive by the time a college freshman beginning next September can be ready to teach in 1951.

Many teachers already in training for high school teaching would do well to take their practice teaching in the elementary field as well as in the high school field, so that they can qualify for an elementary certificate. The prospects are that with nine of every ten teachers in Illinois training to teach in high school, which enrolls only 28 per cent of our school children, the demand for high school teachers shortly will be filled.

Knowing that it is handy to have a handy wife around the farm, 20-months-old Kay Bradley of McLean county gets early practice driving nails.

Picture of the Month

"Christmas Morning" is the title of this prize winner from Harvey Palmer of Bureau county. It shows his sons William and Kenneth opening their Christmas presents.

Mrs. Fred Helmkamp, Madison county, is on friendly terms with this neighborhood pet she is shown feeding nuts. The Helmkamps have been Farm Bureau members for a quarter of a century.

FARM BUREAU FOLKS IN PICTURES

☆ ☆ ☆

Merle Myers, 13, Vermilion county, puts his trained mare, Dolly, through her paces, making her sit up then lie down to play "dead."

Farm Adviser Thurman Wright snapped this picture of dead cattle on the Walter L. Clark farm in White county. They were killed instantly by lightning.

When Webster Gehring, Warren county, started to paint his house, son Michael, 3, was on hand with brush and paint bucket to give Dad a lift.

The Myers family gets together in the backyard during a sunny fall afternoon. Left to right: Nuel, 15, Ralph, 18, Mr. Myers, Elaine, 13, and Mrs. Myers.

PRODUCTION CREDIT + *Good Weather* = *Success* TO THIS FARMER

By JIM THOMSON

Ass't. Editor, IAA RECORD

BACK in 1938, Verne Myers owned 54 acres of pretty good Christian county land. His net assets amounted to around $8,000. Today, eight years later, he is worth close to $45,000.

The war, you say?

Myers, a Farm Bureau member for the past 15 years, says "No, mainly a combination of good weather and the Production Credit Association."

You could probably give him a darned good argument on his stand that the war didn't have a great deal to do with his prosperity but you couldn't find fault if we added one other cause to "good weather and the PCA" — in a word, work — plain, old-fashioned, weary, tiresome hours in the fields.

In 1942 when the United Nations were retreating on all major fronts and Washington was begging for greater production in farm and factory, Myers undertook to farm 1,000 acres.

Even without wartime shortages it would have been a tremendous job, but with the help of his family and hired men driving tractors day and night, the 1,000 acres produced more than they ever had.

Myers, a husky, active, unassuming man of medium height, settled himself on the attractive sun porch of his comfortable farm home and answered questions simply and directly. From an adjoining field across the road and the big, well-kept, front lawn came the hum of a tractor driven by his 18-year-old son Ralph.

"Some of my neighbors thought I would go broke when I started farming that thousand acres," Myers said with a smile. "But I don't think I would have been able to do it without Production Credit standing back of me."

"How did you get started using Production Credit Association loans?"

Myers looked thoughtfully out across the flat fields surrounding his home and spoke slowly of a trip in 1938 he made to Harrisburg where someone told him how farm loans could be obtained from PCA.

"I inquired further at the Christian county office at Taylorville," he said, "and borrowed $1,000 to buy a registered bull and two cows.

"It's a funny thing," he continued; "you know it doesn't bother the average farmer to put a mortgage on his land, but for some reason or other he feels embarrassed when he goes to ask PCA for a chattel mortgage on a crop. Instead he will go somewhere else. I never let a chattel mortgage bother me."

And Myers has never been afraid to borrow money from PCA whenever he thought it would help him with his farming operations. Besides obtaining PCA loans to pay operating expenses, he also has used them to buy livestock, seed, farm machinery, electrical equipment and furnishings for his REA-electrified home.

Myers will tell you that Production Credit loans are particularly adapted to the needs of the small farmer. For although he operated on a giant scale during the war years when it was the patriotic thing to do, he owned only 54 acres the day he first asked for a PCA loan.

Today, as the owner of 240 acres, this shrewd Christian county farmer knows from experience that Production Credit can help the small operator expand to profitable proportions. He knows, too, that PCA can make it possible for the one-man farm to produce more profitably.

Myers thinks it takes about a year to become intimately acquainted with the possibilities of Production Credit. Now

he knows that Production Credit can finance just about any farm operation. In 1944 he borrowed $10,000 — $5,000 for equipment and $5,000 for operating expenses.

One of Best Schemes

One of the most talked about services of PCA is its budget plan. Myers thinks it is one of the best credit schemes devised for farmers.

Under the budget plan, Myers or any other farmer goes to the PCA office or sees a fieldman. They discuss his credit needs for the coming year, how much he will need and when he will need it. Myers thereupon returns home and each subsequent month he receives a PCA loan check in the mail just as he asked for it. The checks are large when he needs heavier funds and small when he needs fewer funds. In this way, Myers pays interest on PCA funds only during the actual time he is using them.

"The best thing about Production Credit," Myers said, "is that it furnishes money just when you need it most. It's a nice feeling not having financial worries on getting your crops in."

ciation with the bulk of the funds put up by the federal government as bondholder. Farmer members who use the service, however, also own stock interest. Control is vested in the hands of the farmer stockholders subject to the supervision of the Production Credit Corporation office at St. Louis. The central office seldom exercises its veto privilege.

Directors and officers of the local PCA office have the responsibility for carrying on all phases of the organization's business including the making and servicing of loans. Myers is one of 15 members of the loan advisory committee which reviews and advises on loan applications.

Never a Foreclosure

The Decatur Production Credit district office made 6,735 loans up to Sept. 30, 1946. The amount loaned was $12,478,522. Losses amounted to $1,402 or an infinitesimal .01 of one per cent. The Decatur association has never had a foreclosure.

Myers success on the farm is reflected in the attitudes of his wife and sons Ralph, 18, and Nuel, 15, and daughter Elaine, 13.

A few years ago Dad bought a house in nearby Stonington but had to sell it again when the family flatly refused to leave the farm. It is easy to see why. The Myers have all the conveniences of city life and all the advantages of living in the country. What more could anyone want.

Get Acquainted With PCA

Myers farms rich black soil with high returns. He maintains high fertility with good soil-building practices including liberal applications of plant foods and fertilizers.

Myers thinks every farmer that needs credit should get acquainted with his Production Credit Association man. He is proud of his own success as a farmer, attributes much of that success to PCA, and feels that the average Illinois farmer can do as well with the same credit facilities.

A new health ordinance was adopted by the city of Quincy, effective next December. This ordinance places emphasis on the quality of milk delivered rather than on facilities used by farmers in producing milk.

There's no trick to Farm Bureau Serum

Simply vaccinate your pigs while young and, with proper care, you will gladden Uncle Sam's heart and stomach with a real crop in '47! The thousands of Illinois farmers who use it year after year can't be wrong!

See Your Farm Bureau

The Myers family gets together in the backyard during a sunny fall afternoon. Left to right: Nor[illegible] 15, Ralph 16, Mr. Myers, Elaine [illegible], and Mrs. Myers.

Baseball League

MAKES PLANS FOR '47

At least 25 teams are expected to compete in the 1947 season of the Illinois Farm Bureau Baseball league, according to Roy P. Johnson, secretary-treasurer of the league and director of special services of the Illinois Agricultural Association.

Don Kolloway

Johnson based this tentative report on the indications made by team managers and Farm Bureau representatives at the 20th annual meeting of the league held in Chicago in mid-February.

Counties represented at the meeting that had teams in league competition in 1946 were: Bureau, Coles, DeKalb, Ford, Henderson, Henry, LaSalle, Lee, Macon, McClean, Stephenson, Tazewell, Warren and Will. Counties that played last year, but did not have representatives at the meeting were: Marshall-Putnam, Boone, Saline, Woodford and Cass. These counties, however, will no doubt enter teams again in 1947. Counties sending representatives to the meeting that were not in league play last year, but indicated interest in 1947 competition, were: Champaign, Logan, Winnebago, Peoria and Livingston.

Deadline for the entry of teams in the 1947 season is May 1. The only exception to this is that teams may enter up to June 1, provided the member teams in the affected district agree unanimously to such entry. Last year, competition was divided into seven districts of the state.

To be eligible to play on a county team in the league, a player must be a Farm Bureau member in good standing, and not a member of a professional team holding membership in a recognized major or minor league.

Will county won the 1946 league championship by defeating Macon 2 to 1 in an 11-inning game.

Officers of the league re-elected were Otto Steffey, Stronghurst, president; Ebb Harris, Grayslake, vice-president, and Johnson, secretary-treasurer.

Guest speaker at the league annual meeting was Don Kolloway of the Chicago White Sox.

Grand champion bull of the All-American Jersey cattle show held last fall at Columbus, O., was Pompeus Dreaming Standard, owned by J. C. Piper and Sons, Richland county. J. C. Piper, is a director and treasurer of Prairie Farms Creamery of Olney.

THE TENTH ANNUAL CONTEST OF THE INDUSTRIAL EDITORS ASSOCIATION CONDUCTED IN CHICAGO, DECEMBER 1946

BOARD OF JUDGES

LELAND CASE CARROLL CHOUINARD ERIC C FOOTE FELIX B STREYCKMANS

The RECORD, Illinois Agricultural Association official publication, received three awards for excellence in the annual publications contest announced last month. More than 300 publications were entered in the contest sponsored by the Industrial Editors Association. The April and July-August 1946 issues took the award for general excellence. An article explaining the IAA's planned livestock marketing setup in the February, 1946 RECORD was adjudged the best project story, and an article in the June, 1946 RECORD explaining the issues involved in the army's plan for flood control in Illinois during a hearing in Springfield was considered the best coverage of a meeting. Above are the awards presented to the Illinois Agricultural Association.

Manning L. Kessinger, for the past year vocational agricultural teacher at Tolono high school, has been hired as assistant farm adviser at the Champaign County Farm Bureau. He succeeds Bob Castle who resigned to serve as fieldman for Country Life Insurance Company. Kessinger received his degree in agriculture from the U. of I. last spring after three years of war service interrupted his education. He is a native of Carlinville.

Wayne A. Gilbert, Stark county farm adviser for nearly 16 years, has resigned to work as general manager for the Stark Locker Service, a Farm Bureau co-op with 1500 lockers in three plants located at Wyoming, Toulon, and Bradford and a large rendering and slaughter plant at Wyoming.

Do farmers work hard? Yes, results from a national survey would indicate. But not the winter-and-summer, 5 a.m. to 9 p.m. grind, they used to. Farmers the nation over work 65 hours a week, workers in factories average 40, the report shows.

Lee Shafer will work with 800 patrons as fieldman for Prairie Farms Creamery of Olney. Born and reared in Richland county, Shafer graduated from the College of Agriculture at Urbana, taught at Farina, and served in the army for more than three years.

Two assistant farm advisers, both January graduates and war disrupted students from Illinois' College of Agriculture, have been hired by the McLean County Farm Bureau. They are: Howard J. Stevenson, Jacksonville, to be in charge of youth work, and Andrew Harris, to handle soils and livestock. Harris, as a dairy herd tester, worked in Adams, Hancock, Brown, Pike and Schuyler counties for three years.

Robert Castle, assistant farm adviser in Champaign county, has resigned to work as a coordinator of sales agencies in 24 Illinois counties for the three state Farm Bureau insurance companies.

In Knox county Paul McQueen, manager of the Knox-Warren Livestock Association, resigned to work for Peoria Producers; M. O. Vesass, assistant farm adviser, transferred to the Knox County Oil Company as assistant manager in charge of feed and fertilizer; Wayne Leinbach, from Rock Island county, was hired as insurance director.

Roger B. Corbett, secretary-treasurer for the AFBF for three years, has resigned. He will return to the University of Maryland as associate dean and director of extension for the college of agriculture.

At Farm and Home Week stockmen were told that "necro" in hogs, considered almost impossible to treat, shows promise of responding to a new miracle drug, sulfathalidine.

Shorts in the News

Illinois Home Bureau has set about the task of bringing its total membership to a round 40,000 by June 1, 1947. It has decided upon a quota of 4,052 new members to be added to Home Bureau ranks by next June.

When the lights went on at Ernest C. William's farm near Argenta, Macon county, the Corn Belt Electric Co-op last month had connected its 5,000th farm with electricity.

Special honors were reserved at Farm and Home Week for 1,500 Illinois farmers who have kept University of Illinois account books for 10 years or more. At a dinner held in their honor, Dean H. P. Rusk told representatives of the group that their records have served as a guide to thousands of other farmers to adopt better farming methods.

Mason county swept away all top honors at the Illinois Safe Homes program at the University of Illinois Farm-Home Week celebration. Mason received both major awards for having the largest number of enrolled families reporting no home accidents during 1946 and for having the lowest percentage of accidents among the number of families enrolled. Ninety-nine percent of Mason county's enrolled families had no home accidents.

Highest grain yields in Illinois have been recorded on farms where at least 25 per cent of the tilled land is kept in legumes and where enough livestock is kept to use the roughage and grain raised on the farm.

The 1947 convention of the American Farm Bureau Federation will be held in Chicago, Dec. 14-18, it was decided at the February meeting of the board of directors.

Clarence H. Castle, new assistant farm adviser in Will county, goes to his new job after 10 months as assistant adviser in DuPage county.

Roy Will has been employed as the new youth assistant for Iroquois county. Reared on a farm three miles north of Normal in McLean county, he graduated from the University of Illinois College of Agriculture in January after having served in the armed forces.

D. G. Carter, agricultural engineer, told farmers at Farm and Home Week that Illinois has 200,000 all purpose barns about 40 years old that need remodeling, particularly the over-head hay storage, horse stalls and drive ways.

Ending 23 years of Farm Bureau organization work as director of the southern Illinois district, John C. Moore and Mrs. Moore are shown with the case of silverware presented to them in appreciation by southern Illinois county organization directors. The presentation was made recently at a luncheon held in Mt. Vernon.

ROUND-UP ATTENDED BY 500 IAA AGENTS

More than 500 insurance agents, representing every county in the state, attended the annual Round-up convention of the Illinois Agricultural Association insurance companies at the Stevens Hotel, Chicago, in February.

The agents listened to reports from the managers of the three companies — Country Life Insurance, Country Mutual Casualty, and Country Mutual Fire — which indicated a record growth in Farm Bureau insurance service in the past year. Some speakers injected a note of humor by harkening back to the days of the very beginnings of the Farm Bureau insurance program, when critics claimed that "farmers are incapable of running their own insurance companies".

A. E. Richardson, manager of the Life company, pointed out that Country Life, born on the brink of the '29 depression, now has a total of nearly 300 million dollars worth of life insurance in force — a national record for any similar company operating in a state-wide only field. The totals of the three companies show a coverage on the lives and property of Illinois farmers valued at more than three-quarters of a billion dollars.

Agents and their wives attended a banquet at the Stevens and heard Nellis P. Parkinson, director of the Illinois State Department of Insurance, compliment the IAA leaders on their record of service to farm families of the state.

Other convention speakers included Floyd Morris, vice-president of the IAA, O. D. Brissenden, IAA organization director, and Gene Flack, chairman of the board of the Sales Executives Club, New York.

Harvey W. Adair, right, receives award as outstanding Illinois School Board Member.

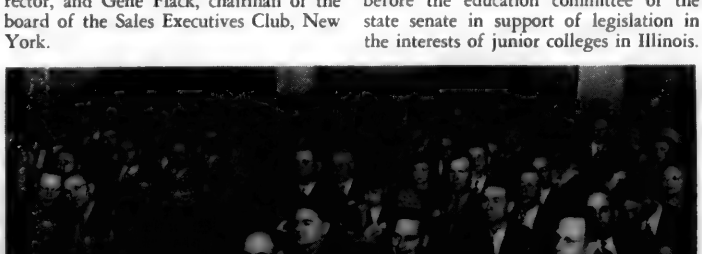
FORMER IAA DIRECTOR ADAIR WINS SCHOOL AWARD

Harvey W. Adair, Chicago Heights, former IAA board member representing the 1st to 11th districts, recently received a high honor in recognition of his service as a school board member.

At the annual meeting in Springfield of the Illinois Education Association, Mr. Adair was presented with a distinguished service as the most outstanding school board member of the year. He has served as a member of the board of Bloom Township High School for 14 years. The award received by Mr. Adair is made jointly by the Illinois Education Association and two national educational associations.

The citation is in recognition of the work of an individual board member who has made a contribution during the year that will point to the betterment of America.

During 1945, Mr. Adair appeared before the education committee of the state senate in support of legislation in the interests of junior colleges in Illinois.



HOWLETT NAMED HEAD OF 3RD DISTRICT C.O.D.'S.

John C. Howlett, 35, of Edgar county, Illinois Agricultural Association organization field man for the past year, has been promoted to District 3 organization director. His territory comprises 29 southern Illinois counties.

John Howlett

Howlett succeeds John C. Moore of Scott county who has retired to his farm after 23 years of Farm Bureau organization work.

Howlett attended Indiana University and started his association with Farm Bureau in 1933 when he worked for the Edgar County Supply Company. Later he served as IAA insurance company agent in Edgar, Fayette, and Christian counties and as organization director in Fayette and Iroquois counties.

He entered the army air forces in 1942 and spent 21 months in the Pacific from New Caledonia to Tokyo. He is married and has a three-year-old son.

CARROLL TO DIRECT AG COLLEGE RESEARCH

DR. WILLIAM E. CARROLL a pioneer in the field of animal nutrition and since 1939 head of the animal husbandry department at the University of Illinois, has been named associate director of the agricultural experiment station at Urbana.

W. E. Carroll

Carroll will be responsible for the coordination and routine administration of several hundred research projects in the agricultural experiment station.

Two other administrative assistants to Dean H. P. Rusk were named previously. J. C. Spitler will act as associate director of extension and R. R. Hudelson will serve as associate dean of the college.

Born and reared in Utah, Carroll graduated from Utah State College at Logan and in 1914 received his doctor's degree in 1914 from the University of Illinois in what was then the new field of animal nutrition.

KEEP FUEL STORAGE TANKS FILLED, SAYS IFS

In order to solve one of the biggest problems with which truck salesmen are confronted - that of keeping customers supplied with sufficient fuels to see them through the intensively busy spring plowing season - Illinois Farm Supply Company again urges every farmer and trucksalesman to cooperate in the "Fill Up and Keep Filled"' Program for 1947.

During this busy time when farmers are plowing and planting, trucksalesmen are called upon to supply farmers with approximately 30 million gallons of fuel.

In the "old days" not so long ago, this gallonage was delivered over a 30-day period, but in recent years with farming operations becoming more and more efficient with the advance of power farming, and with farmers taking advantage of good weather by putting on"night shifts" as well as day shifts, the huge task is being accomplished in one-third the time it used to take.

Illinois Farm Supply Company's answer to the problem is the "Fill Up Now and Keep Filled" Program whereby every trucksalesman keeps all of his customers' storage filled TO THE TOP at every visit.

According to statistics, the average delivery amounts to 200 gallons per customer and the average fuel storage capacity of each customer is estimated at 350 gallons. This means that a space equivalent to 150 gallons is available for additional fuel storage.

If every truck salesman keeps every tank in his territory filled to capacity before the rush season is upon us, and keeps filling to the best of his ability during the rush period, the job can be efficiently and capably handled.

Farm Bureau patrons are urged to help in this "Fill Up and Keep Filled" Program by seeing that every inch of storage space is utilized to the utmost.

Six major seed crops — alfalfa, red, alsike and sweet clover, lespedeza and timothy — made a record yield of 526 million pounds from 4.9 million acres in 1945. Only 420 million pounds were raised in 1944.

Hogs eat most and make the most rapid gains when feed is before them at all times. Plans for self-feeders are available at farm adviser's office.

NEWS and VIEWS

HOME BUREAU HAS A BUSY CONVENTION

By MRS. EDWARD A. SCHILF
Illinois Home Bureau Federation
Publicity Chairman

ILLINOIS Home Bureau Federation Women and their guests spent a busy day from 9 a.m. until after the past-presidents dinner, Jan. 28, during Farm and Home Week on the campus of the University of Illinois.

Mrs. Lilla Russell, Associated Country Women of the World, London, spoke at the morning session: "Glimpses from Across the Sea," and told of conditions in England during the war at the dinner meeting.

In the morning, Mrs. Russell said: "Homes are the basis of all national life." She continued that since women do spend 80 per cent of the national budget, industry should serve the home. Industry should enable us to have good homes.

At the dinner meeting, she told of the various struggles the Women's Institute groups had to keep going during the war years. (The Women's Institute groups are similar to our Home Bureau groups in Illinois.).

President Charles B. Shuman of the Illinois Agricultural Association discussed "Mutual Problems" of the two organizations in the afternoon session of the federation meeting.

"We have a wonderful heritage in Illinois but we are going on the road to ruin unless we go back and change our practices and build up our soils," he asserted.

The women folks on the farms of America must give inspiration to the efforts for better farm life, he said. "It is the job of the women to assist in the building of a better rural America."

President Shuman feels that there should be closer cooperation between the Illinois Home Bureau Federation and the Illinois Agricultural Association to do a more effective job.

He congratulated the women upon their member participation; it was excellent, he said. He concluded with four suggestions that he would like to see practiced: 1. A conference for women at the IAA annual meeting; 2. Closer cooperation at the county level; 3. More responsible part of farm women in the IAA organization . . . more of a family unit in Illinois; 4. Representatives of Home Bureau members on various IAA committees, such as legislation, voting and others.

Mrs. Kathryn Van Aken Burns, state leader, home economics extension service, University of Illinois, welcomed the group to the campus. In discussing the Home Bureau situation as she saw it, she congratulated the group on the healthy growth in membership.

In summarizing her remarks she said there were three problems: 1. Try to recruit girls to take home economics, which in turn will offer more candidates for home adviser positions; 2. The youth problem in the county. The extension program in each county has a youth program as well as an adult education program. Yet how many of the youth in each county does the extension program reach with 4-H and Rural Youth activities. She asked that each county check their youth enrollment with the last census figures. The average is only three to five per cent reached. 3. The last problem is program planning. In Home Bureau lessons more emphasis should be given to the science of living together.

In the home appliance exhibit at Farm and Home Week, Mr. and Mrs. Paul Ceykendall, Douglas county, are attracted by an automatic washer.

The following officers continue their term of office until next year: Miss Pearl E. Barnes, Mercer county, president; Mrs. James C. Graham, Mercer county, secretary; Mrs. D. M. Ames, Coles county, east central district director; Mrs. Frank Garwood, Christian county, south west district director; and Mrs. Burton King, Henry county, north west district director. Mrs. Ralph Emel, chairman of the credentials committee, reported that there were 157 voting delegates from 77 counties.

Newly elected officers are Mrs. Arthur Page, DuPage county, vice-chairman; Mrs. Earl Keniston, Will county, treasurer; Mrs. Clarence McCauley, Jefferson county, director of the southeast district; Mrs. George S. Esgar, Grundy county, director of the northeast district; and Mrs. Harry C. Smith, Pike county, director of the west-central district.

During the business meeting in the morning, the following officers and district directors gave their reports: Mrs. Burton King; Mrs. Loren E. Johnston, retiring director; Mrs. Frank Garwood; Mrs. W. M. Kimmelshue, retiring director; Mrs. D. M. Ames; Mrs. E. D. McGuire, retiring director; Miss Myra Robinson, retiring treasurer; Mrs. Arthur Page; and Miss Pearl E. Barnes.

In the afternoon the following standing committee chairmen presented their reports: Mrs. Leonard Killey, Associated Country Women of the World; Mrs. Stanley Castle, legislation; Mrs. Will Parks, Schools; Mrs. Raymond Hanley, 4-H; Mrs. W. R. Goby, health; Mrs. Charles Young, safety; Mrs. Ronald McDonald, library; Mrs. Dale Huffman, organization; Mrs. E. A. Schilf, publicity; and Mrs. Emile Rediger, recreation.

Mrs. R. E. Milligan, music chairman, was in charge of the special music for the program, the Champaign county chorus and the special trio she selected at the meeting, as well as the group singing.

Mrs. Huffman and Mrs. June Clifton, led a discussion for county and unit Home Bureau officers on organization.

for HOMEMAKERS

SMARTLY DRESSED FARM WOMEN ARE ASKED . . . . .

FARM and Home Week is a mad rush to see everytning one wants to see, to decide which session to attend, to find a place to eat, to find one's way around the campus.

At the federation meeting, one of the voting delegates got lost and wasn't present when roll was called by the secretary. She finally arrived and announced that she understood that the reason the home adviser was absent was the fact that the home adviser was out looking for her.

A Gallup poll wasn't conducted but it seemed that many of the women enjoyed Mrs. Lilla Russell and what she had to say about England; "Color Harmonies in the Home" by Clara Dudley; "The Secret of a Smart Appearance" by Celeste Carlyle, and "The People Behind the Iron Curtain," by John Strohm.

It would seem from the looks of the crowd in general that many of the women had learned the secret of smart appearance. So we asked some of the women . . . . . "Now that the war is over, what are you doing with your time and money?"

Mrs. Gordon Kramer, Clinton county, "We are still saving our money for new furniture, we certainly aren't going to buy any now." As to the time problem, Mrs. Kramer still doesn't have too much time because she helps her husband on the farm. She did during the war and just continued.

Mrs. Lester Helms, St. Clair county, stated that they were going to buy new machinery. They do general farming on 173 acres. She feels that she doesn't have any more time, but that she does different things. "More time to attend meetings like these."

Mrs. Herman Bergman, Champaign county, assists with the farming of 200 acres. They have a new home, but plan to spend their money on new machinery, modern conveniences and more land. "Guess we'll just work like we always have."

Mrs. Ralph Bartlett, Shelby county, some of the money has gone into new church decorations, a new carpet for the rural church in the neighborhood. As for themselves, they have spent more money on musical programs . . . . going to a nearby town for concerts and special programs. Mrs. Bartlett feels that they have more time for family recreation and plan to take a trip west . . . . . just as far west as they can go.

Mrs. A. R. Rohlfing, a past president of the Illinois Home Bureau Federation, but who is now the state legislation chairman for the Illinois Woman's Club Federation, and serves on two committees, The Illinois Committee on Child Welfare Legislation, and the Education Legislation Committee. "We just finished remodeling our house . . . . but we did buy several shares in a local grain elevator. And, what do I do with my time . . . . . serving on the two legislation committees keeps me busy."

Mrs. Grace Schrader, Lawrence county, feels that now her children are grown she spends most of her time sewing for the seven grandchildren. As to how the Schraders are going to spend their money . . . . . "Well, I got an electric stove for Christmas and it is wonderful." And, they plan to build a new machine shed with concrete blocks.

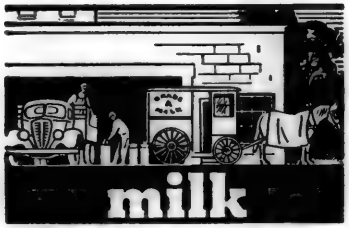
Mrs. Ernest Wiese, Edgar county . . . . "Never did have a whole lot of time." She would like to make a new kitchen in another room, and make the present kitchen into a utility room. She would also like a new sink for this new kitchen . . . . but plans to wait until everything eases up some. Would like a new rug, too . . . . "But, we'll get by until we can get what we want."

SOX FOR MEN

You can make a hit with the man in your life by knitting him a pair of these comfortable wool sox. For instructions on how to make them, write to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill., enclosing a self-addressed stamped envelope.

. . . . . WHAT ARE YOU GOING TO DO WITH YOUR TIME?

Illinois Home Bureau Federation officers are shown together during their annual meeting in Champaign-Urbana, front row: Mrs. Harry Smith, Pike county; Mrs. Arthur Page, DuPage county; vice president; Mrs. Clarence McCauley, Jefferson county; Mrs. Frank Garwood, Christian county; Miss Pearl E. Barnes, Mercer county, president; Mrs. Earl Kenlston, Will county, treasurer. back row: Mrs. Burton King, Henry county; Miss Nora E. Baro, Christian county home adviser, president of the Illinois Home Advisers Association; Mrs. D. M. Ames, Coles county; Mrs. Kathryn Van Aken Burns, state leader, home economics extension service; Mrs. James C. Graham, Mercer county, secretary; Mrs. Stanley Castle, Madison county, immediate past president. Absent was Mrs. George S. Esgar, Grundy county



McLean County Milk Producers Association of Bloomington, in its annual meeting Feb. 15, voted to consolidate the business of the association with that of the Prairie Farms Creamery of Bloomington. McLean County Milk Producers Association, which has assets of approximately $40,000, will distribute this money among producers on a patronage basis. The members then plan to become associated with Prairie Farms Creamery of Bloomington.

Sanitary Milk Producers Association held its 17th annual meeting in Belleville, Feb. 4. A. D. Lynch, manager of the association, reported that St. Louis enjoyed the highest milk prices in its history in 1946. The average price was $4.23 per hundredweight, an increase of 79c over 1945. The total value of production for the year exceeded $15,000,000, even though the amount of milk produced was one per cent less than a year ago. Sanitary Milk Producers Association paid out $6,456.69 in benefits to members throughout the year. The testing department ran $160,746 butterfat tests for member producers.

The litigation regarding the validity of the allocation provisions of the federal order in the St. Louis market was brought to the United States Supreme Court during the last year. The court refused to hear this case and by so doing, ordered handlers to distribute $105,000 to producers which had been growing in an escrow account since Jan. 1, 1944, when the last amendment was made effective.

R. D. Pennewell, president of the association, pointed out to members that they had assisted in organizing artificial breeding programs in both the Illinois and Missouri portions of the milk shed. Sanitary Milk Producers Association moved into its new office at 1439 Chouteau Avenue recently, where laboratory facilities are available for quality, butterfat and disease control testing. The association expects to initiate a program of mastitis control during the coming year.

George Metzger, IAA field secretary, and Milo K. Swanton, executive secretary of the Wisconsin Council of Agriculture Cooperatives, addressed the membership. Approximately 1200 producers attended the meeting.

The Producers Co-op Dairy of Quincy celebrated its 25th anniversary at its annual meeting Feb. 10. This dairy had the best year in its history. Gross sales for the year amounted to over $450,000, an increase of 26 per cent over a year ago. During the year the dairy had a net income of $42,526.08. Instead of paying a patronage dividend on the year's business, an electric milk cooler was purchased from savings for each member patron. These coolers are expected before warm weather and should contribute materially toward improving milk quality.

Pure Milk Association recently petitioned the secretary of agriculture to hold a public hearing to amend certain provisions of Orders 41 and 69, regulating the handling of milk in the Chicago and suburban Chicago marketing areas. The Pure Milk Association proposed a change in the pricing formula to encourage more milk during the fall months of the year. Amendments were also proposed by milk dealers and other cooperative associations following this request for a hearing.

Pure Milk Association will hold its annual meeting at the Hotel Sherman in Chicago, March 15, and Hassil Schenck, president of Indiana Farm Bureau, will be principal speaker.

Prairie Farms Creamery of Carlinville plans to move into its newly constructed building in March. The building has been under construction for some time and is of the latest design. It will be equipped to handle a large volume of milk and cream for producers in that area. This creamery recently declared a dividend of $29,913.45, representing surplus accumulated by the creamery for the years 1938 through 1944. The dividend will be paid in Class A preferred stock. After paying this dividend the creamery will have approximately $115,000 in its surplus account, accumulated during the years 1945 and 1946.

Chatting during the annual meeting of Sanitary Milk Producers in St. Louis recently are, left to right: E. H. Isenberg, Alhambra, chairman of redistricting committee; Judson P. Mason, IAA assistant director of dairy marketing; and Emil Klingenberg, Okawville, SMP director.

Prices of all major dairy products have been reclining at least seasonally, and some more, as production has increased in recent weeks. In spite of these price declines, abundant feed supplies will probably maintain favorable dairy production feed price ratios during the first half of 1947. Grain feeding to dairy cows is likely to be at or near record levels, and milk production per cow is expected to continue high. An expected lower level of consumer incomes in the latter part of 1947, combined with increased supplies of consumer goods and a substantial decrease in dairy product exports, will probably result in a somewhat lower level of cash receipts from farm marketings of dairy products in 1947, than last year.

A cow can make adjustments for external temperatures up to 85 degrees F.

NAME STATE 4-H DELEGATES TO NAT'L CAMP

Four Illinois 4-H club boys and girls have been selected to represent their state at the National 4-H Club Camp to be held next June in Washington, D. C. They are Irene Downey, Putnam, Putnam county; Loren E. Nelson, Varna, Marshall; Orvan Peters, Momence, Kankakee; Miriam Wrigley, Trivoli, Peoria.

Miss Downey, 18, has completed 20 projects in her nine years of 4-H membership and has been a delegate to National 4-H Club Congress and to 4-H Junior Leadership camp. She is a student at Illinois Wesleyan University.

Nelson, 20, helps to operate a 470-acre farm and has realized an income of more than $12,000 from his 14 4-H projects. He was valedictorian of his senior class and in 1946 was acting secretary of the Illinois FFA.

Peters has been a 4-H club member for 10 years and his 34 projects have resulted in an income of more than $39,000. He was a winner in 1945 in the dairy production contest at the National 4-H Club Congress.

Miss Wrigley, 19, has finished 9 years in 4-H Club work and is now attending the University of Illinois. She was state winner in the achievement contest in 1945 and won the right to attend the National 4-H Club Congress that year. She has held many offices in 4-H.

FOR FORCED LANDINGS!

You can't beat an economical Country Mutual Fire policy to cushion the "bump" of a windstorm — whether it's a really bad storm or just a quick, rough breeze that loosens up your shingles. In 1946, 1084 farmers collected windstorm claims; thousands of others in Illinois wished they had Country Mutual windstorm policies to collect on. So don't take chances! See your Country Mutual Fire agent today and learn how little it costs to laugh at the wind.

RUNNING WATER IN THE FARM HOME

By President Charles B. Shuman

WE SHIVERED in the raw wind of a gray November day as we stood reverently paying our last tribute to a saintly farm grandmother. Standing there, back of the little country church, I thought of the years of loving service that our neighbor had so willingly given to hundreds of relatives and friends. My glance fell upon a nearby headstone with its dim inscription, weathered by eighty years of exposure — it read, "Hannah, wife of Ezra ....., age 38 years".

Modern medical knowledge has added many years to the life span of the farm wife — to that of all rural people. Modern home equipment and conveniences can make those years happier and easier. Again I thought of our neighbor. For forty-five years she had carried water over the same 100 step route that Hannah had trod nearly a century before. She had daily cleaned, filled, trimmed and suffered eye-strain from the same kind of kerosene lamps that Hannah knew. Sanitary facilities were built to the same specifications and with the same art work of a century before. The kitchen range and two heating stoves had a little more nickel and chrome, but the same voracious appetite for fuel as Hannah's new stove of long ago. Perhaps it was some consolation for "Mother" to step outside the kitchen on a summer day and hear the hum of a modern, rubber-tired tractor in the fields.

Sad but true, modernization of farm homes has in no way kept pace with modern mechanization of farm work! True, there are some legitimate reasons and plausible excuses. Tenancy, scarcity of materials and labor, and low farm incomes have hindered progress. However, let us be honest.

If our desire for modern, pleasant, drudgery-free homes for ourselves and our loved ones is strong enough, we can surely find a way to make these desires a reality. At present levels of farm prices and farm income we should have more than the present 10 per cent of our homes completely modernized.

Isn't it about time for us men to give more consideration to providing some modern equipment and conveniences for our women folks? I am confident that husbands and landlords working in cooperation can do much toward making the farm home a better place in which to live.

Left: Don Ellison, Producers' Supply manager, shows Iowans John Cousin, R. W. Ashby, and Ira Cafferty how Winnebago's soil tester works. Below: Greeted as they left train is Iowa group arriving in Monmouth. Warren County Farm Bureau men doing the honors for the guests are, left to right: Farm Adviser E. H. Walworth, Arnold Isher, President Durham Lucas, and Russell White.

ILLINOIS HOST

"IT was time well spent."

That was the general opinion expressed by Iowa guests at the close of their tour of 24 Illinois Farm Bureaus.

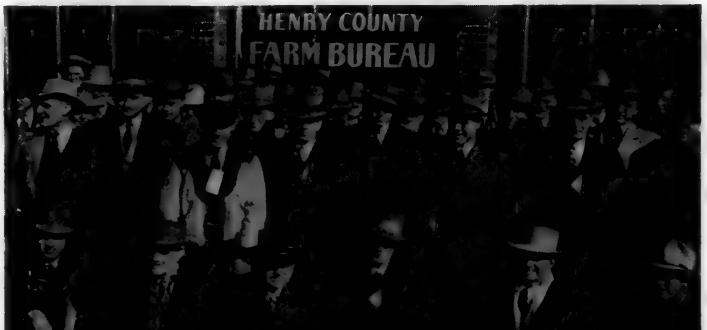
"I just hope," one Iowa farmer said, "that you folks return our visit. I would just like to pay back a little of your wonderful hospitality."

The Iowans arrived March 4 in two special trains, about 600 of them. Half came in through Galesburg and half through Amboy. County Farm Bureaus and the Illinois Agricultural Association were ready for them.

Breaking up into small groups, the visitors swept across northwestern Illinois visiting one Farm Bureau after another, inspecting buildings, offices and plants, devouring all available information and tirelessly asking questions.

They came to Illinois principally to learn something about our Farm Bureau ways of doing things. They were impressed by what they saw. They said so. They liked our progressive spirit. They liked our enterprise. Above all they were impressed by the fine Farm Bureau buildings they visited and by the explanation that they were generally debt free.

Soil testing laboratories attracted large groups of the visitors and many wanted to know how they could be set up in their own county Farm Bureaus.



Driving over from Galesburg, Iowans pose for a picture before inspecting the impressively up-to-date office building of the Henry County Farm Bureau at Cambridge.

Left: IAA Field Secretary George Metzger addresses general session of the Iowa groups at Amboy. Behind him on platform are left to right: Floyd E. Morris, vice president, IAA; Allen Kline, president, IFBF; Dean H. P. Rusk of the University of Illinois College of Agriculture; Vernon Vaniman, AFBF organization director, Midwest; and Wayne Tyler, organization director IFBF. Right: Henry County Farm Bureau President M. S. Morgan addresses Iowa group at Cambridge.

TO IOWA

Farm Bureau leaders from both Iowa and Illinois addressed the visitors at simultaneous general meetings in Amboy and Galesburg.

President Charles B. Shuman of the IAA told the Iowans at Galesburg that they were bringing out the best in their hosts and that it made us proud to have our friends from Iowa come to see what we were doing. John Lacey, AFBF publicity director, said he hoped the idea would spread so every state can benefit from the best in the others.

Dean H. P. Rusk of the College of Agriculture, noting the interest of the visitors in the soil laboratories, said at Amboy that they were one of the landmarks in the application of science to agriculture.

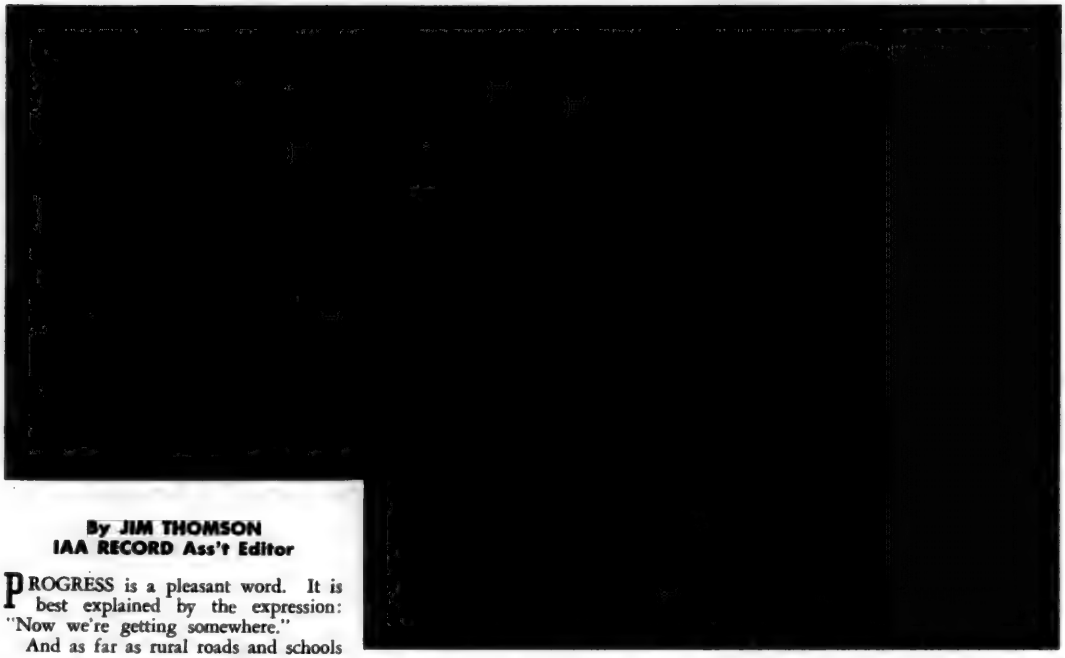
Also at the Amboy meeting Iowa Farm Bureau Federation President Allen Kline expressed the appreciation of the Iowa visitors for the welcome accorded by Illinois. Speaking for the hosts, IAA Vice President Floyd E. Morris outlined fundamental policy of the IAA and Illinois County Farm Bureaus.

With generous thanks and praise for the kindness of the Illinois county Farm Bureaus that played host during their two-day visit, the Iowa delegations entrained for home late in the day tired but pleased with the results of their trip.

Right: Manager W. G. Heinz, Tazewell Service manager, shows Iowans some Soyoil paint. At far right in group is Tazewell President Milo Miller. Below: The Iowa Farm Bureau folks showed a great deal of interest in the physical plants owned by the county Farm Bureaus. Here they visit the storage tanks of the Livingston County Farm Bureau at Pontiac.

Left: Iowans take a look at the Ford County Service Company office. Right: Winnebago Farm Bureau President Tom Derwent (left) welcomes H. J. Schaeffer, Dickinson county (Iowa) Farm Bureau president.

Left: An Iowa delegation hears Harry Gehring, Knox County Farm Bureau president, answer a question. Right: At speakers platform during general session in Galesburg are, left to right: Roger Fleming, secretary, IFBF; Howard Hill, vice president, IFBF; Charles B. Shuman, president, IAA; W. B. Peterson, Illinois Farm Supply; Harry Gehring; John Lacey, publicity director, AFBF; J. C. Spitler, state farm adviser leader; and A. R. Kemp, Knox county farm adviser.



By JIM THOMSON
IAA RECORD Ass't Editor

PROGRESS is a pleasant word. It is best explained by the expression: "Now we're getting somewhere."

And as far as rural roads and schools are concerned, progress and Hardin county may be on the verge of becoming synonymous.

It is an attractive land of rolling wooded hills tucked away on the Ohio river border of southern Illinois far from the influence of large cities.

It is not an exciting, bustling center of trade and industry. In fact, you wouldn't be far wrong if you said nothing exciting ever happens in Hardin county.

At least not since 10 years ago this spring when the angry Ohio spewed its dirty water across the main streets and drove the people from their homes.

But don't get the idea that the rest of Illinois has passed it by, leaving Hardin county in a Rip Van Winklesque Sleepy Hollow.

In fact it is already eight years ahead of the rest of the state in consolidating its road districts into a single administrative unit with a single county road and bridge levy for its road district (rural) roads.

No other county in the state can boast of such progress in road administration. Counties with more than 20 separate road districts are the rule in Illinois rather than the exception. La Salle county, for example, has 37 separate administrative units for its rural roads.

What has consolidation of all its road districts into one accomplished for Hardin county?

Today it is the only county in the state free of road district debt, no minor accomplishment in these days. Besides it is no longer levying the maximum road and bridge rate. Its all-weather roads are better and there are more of them. But good roads take time. During the war years the county has been accumulating valuable road equipment. Now the prospect of better roads looks even brighter.

Again, Hardin county is ready to do battle with tradition, local pride, and the dead hand of the past. This time it would do something about the schools which are woven interminably with the roads in the county's social and educational fabric.

Plagued by lack of teachers, dwindling pupils, and insufficient funds, the Hardin County School Survey Committee has, after more than a year's study, taken the bull by the horns and tentatively recommended the pooling of educational facilities and management under one county school board.

To progressive-minded folks in the county the recommendations look good. To the outsider they look simple of accomplishment. Actually consolidation in Hardin county is no less difficult than it would be in any other Illinois county. In fact, it might be more troublesome.

But the county is fortunate in having good men on its school survey committee. Chairman Harry Porter, editor of the Hardin County Independent at Elizabethtown, insists that the county's school tax funds be pooled to give rural children the same educational opportunities offered city children. He will not be budged from this viewpoint. "Good education," he says, "must be available to all American children regardless of town, city, county or state boundary lines." Virtually the entire committee concurs in this opinion.

Fortunate too is Hardin county that it has a county superintendent of schools, C. L. Flynn, who is an ardent champion of consolidation. Flynn is an outspoken advocate of the committee's recommendations.

The committee recommended in its report that the county operate seven elementary schools (kindergarten through sixth grade), two junior high (grades 7, 8, and 9), and one senior high school (grades 10, 11, and 12); and that the county establish a system of school bus routes to be maintained under state supervision and from state aid funds. The routes to be so planned "that no child will be denied educational advantages because of distance from school."

Courses in agriculture, home economics, vocational education, shop work, art, and music are recommended in the committee's tentative report; also that a health program be instituted, that a lunch and recreational program and good li-

LETTERS TO THE EDITOR

BULWARK AGAINST COMMUNISM

It must have been quite gratifying to all Farm Bureau members to read of the success of the convention in San Francisco. It really goes to show how big our organization really is, how really important it is when nearly 10,000 persons attended it. We are fast approaching a point where the Farm Bureau organization will be one of the most powerful agencies in the country. We are getting to a point where we will become more important than industry.

The American farmer is the backbone of the nation, he is the worst enemy of communism, nay, the main bulwark against communism. We have seen communism penetrate into agriculture.

Communism is a grim reality in many countries of Europe, the peasant populations of those countries offered very little resistance to the communists. Why? Simply that they were in a state of misery so low, that even communism seemed like a way out. Their own governments to them were failures, and as far as they were concerned, they didn't hardly care what type of government ruled over them.

The one main thing that has prevented communism from penetrating into American agriculture, has been the American Farm Bureau. Through it and because of its power, the American farmer has to a great extent been able to plot out his own future. We were not forced to take what we could get, as the farmers of the rest of the world were, through the American Farm Bureau we placed our demands, and they were met. We had no cause to even start thinking that a communist government would be better for us, sure we had to put up with strikes, manpower shortage, all kinds of regulations, but we were still a favored group, and the power of the American Farm Bureau helped make us a favored group. The American people owe a deep debt of gratitude to the Farm Bureau, if only because it remained a bulwark against communism, when all others were becoming its victims.

UNHEEDED BELL

We've been reading with interest the articles on the "Treasured Bell." Thomas Andy Walk, 2½ yr. old son of ours, finds it no problem to enjoy his favorite stunt of ringing the bell even though daddy placed the freshly painted bell on a high post, minus the rope.

Yes, the men heed the sound of the bell at meal-time and when within answering distance but find it usually one of the three youngsters.

I found from bitter experience the bell isn't very effective when it's far from the house. Our year and half old girl, Janice, once got a nasty gash in her head and I needed the truck to take her to a doctor. After a hurried trip by foot to the place where the men were filling up an old pond, they told me they heard the bell but didn't pay much attention, as it's usually the children, which is very true.

The old bell has been used many a time, probably very effectively by Tommy's great grandfather, Andrew Walk, 89, of Sigel.

Mrs. Foster Walk
Cumberland County

Letters to the Editor are welcomed from readers on any subject related to agriculture. Writers should sign letters with name and address. Names may be withheld if desired. Address *Letters to the Editor, Illinois Agricultural Association Record, 608 South Dearborn, Chicago 5, Ill.*

BOUQUET FOR IAA

I visited a few hours in Chicago recently with some of the officials of the Illinois Agricultural Association and was quite pleased to hear of the progress they have made during the past five years. When I left for army service here some five years ago the total membership in the IAA was between 90,000 and 100,000. Now I find that it has increased to about 135,000. This is a fine record of accomplishment and only goes to prove that the IAA is founded on sound principles and organization and is giving its members the service they desire.

G. Edwin Popkess, Jr.
Editor, Dairyman's Journal

MEMBERSHIP DRIVES

At the end of the 1947 membership campaign we had a total of 162 new members added to our Farm Bureau rolls. This exceeded our 1946 quota by 86 new members. The Old Timers were defeated and had to eat baked crow while the Up Starts dined on turkey.

Charles E. Webster
Will county C.O.D.

We just signed 134 new members on our spring membership drive.

Ed Henderson
Fulton County C.O.D.

Our membership drive worked out very well. The boys brought in a total of forty-one members — some of them will be reinstatements. They also brought a list of people they had contacted who talked as if they might become members soon.

Chelsea S. Williams
Massac county C.O.D.

We completed our drive with exactly one hundred contracts. Although I know we could have surpassed this number, I am well pleased with the cooperation of every worker.

D. Dwight Thomas
Kankakee county C.O.D.

We are pleased to report that since the membership drive began, we have brought in 106 new Farm Bureau members. Eighty-one were reported at the report meeting and the rest have come in since then. We extended our drive in the form of an intensive follow-up campaign for 60 days longer and the workers are still going after these prospects. We are having a very spirited campaign, I must say.

Caroll G. Johnson
Pike county C.O.D.

OUR CALENDAR AGAIN

At a friend's home this evening I saw a copy of your 1947 calendar displaying in color a most desirable portrait of Lincoln. I wonder if by any miracle, hook, or crook, I could persuade you to kindly send me one of those calendars.

Your kindness will greatly oblige.

Rev. Milton M. Allison,
Presbyterian Church
New Concord, Ohio

I am a teacher in Central school, Sterling, and have a collection of pictures to use in my classroom.

Recently a friend showed me the very fine collection of Lincoln pictures on your 1947 calendar.

I would be very happy to have them for use in my classroom and am writing to ask if it is possible to purchase this calendar.

Bernice Miller
Sterling, Ill.

We thank you for the Lincoln calendar you sent us. It came in time for our program, and the pictures fitted in very well for a background. Later, we put them on the bulletin board in our school library to be admired and enjoyed by all the classes.

Sixth Grade
Stuart School
Springfield, Ill.

FRISCO TRIP

Since returning from the AFBF convention at San Francisco I have wanted to write and thank you and others who helped so much to give the Illinois folk the most wonderful trip of my life. Words cannot express my thankfulness.

Mrs. Elizabeth Hill also of Poplar Grove, whom I asked to go with me, and I have written a little story of 10 pages on "California Here We Come" to help us remember as the years go by, the grand folk who shared the trip with us, the wonderful service even to Henry Harris our porter, the beautiful country we passed through and the wonderful food on the trains, etc.

Mrs. Maud W. Hoover
Boone County

THANKS, ILLINOIS

Received your list of the passengers on the IAA Special to the AFBF Convention in San Francisco. We sure enjoyed our trip and if possible when there is another trip we will be on it. You people sure did a wonderful thing in planning such a lot of interesting places to visit in such a short time. The meals and service were wonderful and we do not see how anyone can have anything but praise for the courtesy shown everyone. Thanking you for the list and the booklets sent us.

Mr. & Mrs. Ray R. Pinnow
R. 1
Brodhead, Wis.

Thank you very much for sending me a copy of the names and addresses of the people aboard the two special trains enroute to the San Francisco convention, and also the January publication of the RECORD. They are both fine remembrances of our trip and I join with you people in saying it certainly was a wonderful trip.

MORE STATE MONEY *for* WHICH Schools?

WHY all the clamor over more state money for schools? We all know that school supplies cost more. Our teachers deserve better pay. It is generally agreed that the state should provide more money for education. Money is available in the state treasury. All this is conceded. Most of the argument really concerns the division of funds between the needy and the well-to-do school districts.

Schools in the poorer cities and rural districts are desperately in need of money, and must have much more state aid. On the other hand, the well-to-do districts also need more money and are determined to get a large part of it from the state. Each group wants to get for itself as much state money as possible. Many people, including some who are closely connected with the schools, do not understand this conflict, so perhaps we'd better explain.

By L. H. SIMERL

Director, IAA Dept. of Research

The state now gives financial aid to all public schools (except unnecessary schools with less than seven pupils in average daily attendance). There are two principal kinds of state aid: (1) flat grants or general aid, and (2) equalization or special aid.

Flat grants are paid at a rate of $19 for each grade school pupil. Although flat grants are given to districts in both wealthy and poor communities, only the more prosperous districts benefit from flat grants. The reason for this will become clear only when the basis of distributing equalization aid is fully understood.

Equalization aid provides special assistance for districts in the communities where the property tax cannot produce a reasonable income. Each low income school gets enough equalization aid so that the total of a ¼ per cent tax levy, plus the flat grants and the equalization aid, will equal $80 per pupil.

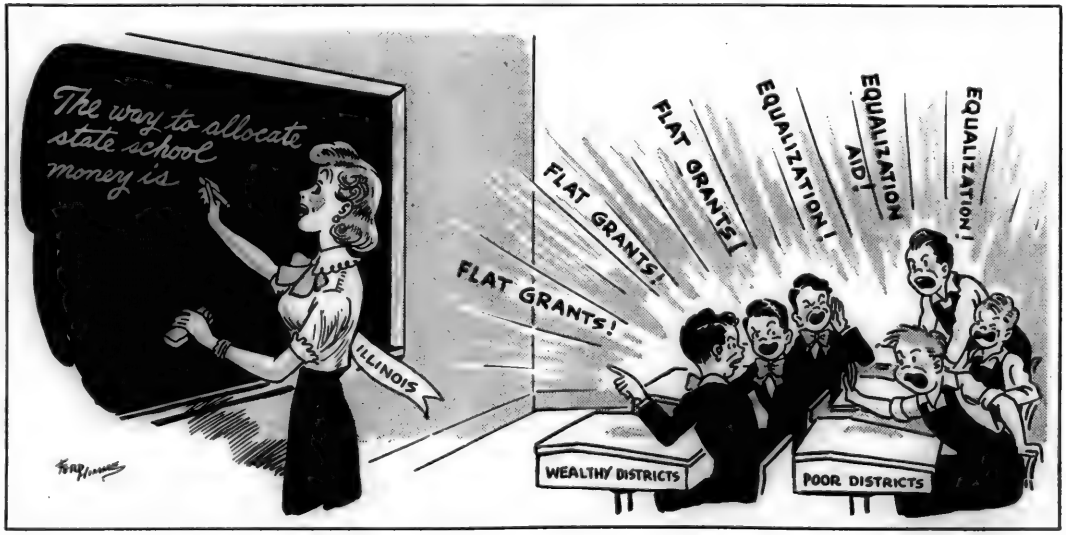
Let's take an example. In one school district the ¼ per cent tax levy (25c on each $100 of taxable property), amounts to $50 per pupil. State flat grants provide an additional $19 per pupil, making $69. Now the district can get $11 in equalization aid to bring the total up to the equalization level of $80. Thus we have:

Local tax (¼%)	$50 per pupil
State flat grants	19 per pupil
State equalization	11 per pupil
Equalization level	$80 per pupil

Many persons over-look the fact that the total amount of state aid is limited to the difference between the equalization level and the amount produced by ¼ per cent tax. Likewise they over-look the fact that increasing the state flat grants would reduce the state equalization aid by the same amount, leaving the district no better off than before. If flat grants were to be increased by $6 the school in our example would have no more total state aid than before:

Local tax (¼%)	$50 per pupil
State flat grants	25 per pupil
State equalization	5 per pupil
Equalization level	$80 per pupil

Note that increasing the flat grants



from $19 to $25 would reduce the equalization aid from $11 to $5. The district's total state aid would remain the same as before at $30 per pupil. In fact the district would get just as much total state aid if the flat grants were eliminated completely:

Local tax (¼%)	$50	per pupil
State flat grants	0	per pupil
State equalization	30	per pupil
Equalization level	$80	per pupil

Note that the total state aid would still be $30, the difference between the local tax and the equalization level.

Obviously the poorer districts have nothing to gain from increases in flat grants. They can, however, benefit greatly from an increase in the *equalization level*. Raising the equalization level from the present $80 figure to $110 would mean $30 per pupil more for each of these more needy schools. For the school in our example the figures would be:

Local tax	$ 50	per pupil
State flat grants	19	per pupil
State equalization	41	per pupil
Equalization level	$110	per pupil

Notice that the total state aid would be increased by $30, exactly the same amount that the equalization level is raised. *An increase in the equalization level, not larger flat grants, is the way to help the poorer schools.*

The situation is just the opposite in less needy and well-to-do country and city districts. Their income from a ¼ per cent local tax and the state flat grants is more than $80 per pupil. Therefore they do not receive equalization aid, and have no equalization aid to lose as flat grants are increased. For the well-to-do districts any increase in flat grants represents pure gain.

So far we have discussed only elementary school districts, but the same principles also apply to high school districts. However, for the high schools the flat grants are now $4 and the equalization level $90 per pupil. The poorer high schools can gain nothing from increases in flat grants. They can get more total state aid only by an increase in equalization aid.

The same principles also apply to school districts which maintain all 12 grades. The only difference is that for a 12-grade district the qualifying tax rate is ⅜ per cent, instead of ¼ per cent for each district where the elementary and high schools are operated as separate districts.

In all kinds of districts, however, the principle is the same: Flat grants benefit schools in the more prosperous communities, while the poorer districts can gain only by increases in equalization aid. Thus, there is a constant conflict of interests between the two classes of schools.

Generally speaking the wealthier school districts have the better spokesmen. They have the better trained administrators. They are more proficient at enlisting the support of Parent-Teacher Associations and other citizen groups. They send larger delegations to Springfield. They get the lion's share of state aid.

Slowly, however, the people of the less prosperous communities are winning their fight for equal educational opportunities for their children. The equalization level for elementary schools has been increased from $41 per pupil in 1935 to $80 in 1946. The high school equalization level has been increased to $90. The percentage of state aid going for equalization purposes has been increased from 15 per cent 10 years ago to 37 per cent in 1944-45.

But even with present equalization levels the schools in communities with less than average income from property taxes are at a severe disadvantage. Actual costs in the better schools are now at least $30 to $50 higher than present equalization levels. Much higher levels of equalization are necessary to provide more equal educational opportunities to the children in the less favored school districts.

For many years Illinois farmers have supported the drive for more equal educational opportunities. In 1945 the Illinois Agricultural Association sponsored legislation which reduced by 50 per cent the tax rates used for equalization purposes. This legislation, which will apply to state aid claims for 1946-47, will greatly increase the amount of state aid going to most needy schools. It will also enable a much larger number of schools to qualify for equalization aid.

During the present session of the Illinois General Assembly the Association will support legislation to provide the largest possible increases in equalization aid. If the equalization levels can be raised to, say, $110 per pupil it will mean an additional $30 for each elementary pupil and $20 for each high school pupil in that third of the schools where the need is greatest. At the same time many schools in average circumstances would be able to qualify for equalization aid and gain up to $30 per pupil.

This program is opposed by many persons in Chicago and other wealthy districts which would receive no direct benefits from increases in equalization aid. These persons are working for bigger flat grants, which are of benefit only to the well-to-do districts.

The program to raise equalization aid to adequate levels should, of course, be supported by all persons in districts where income from the property tax is less than average. It should also be supported by all others who believe that every boy and girl in the state should have a fair chance to get a good education.

ELECT SUBCOMMITTEE

Members of the statewide economic study committee of the Illinois Agricultural Association early in March elected a subcommittee from among its own members to prepare a tentative report of findings and recommendations gathered since it was organized in September, 1946.

Those elected were: F. E. Morris, Buffalo, IAA vice-president, chairman; E. D. Lawrence, Danvers; Leo Knox, Morrison; Earl M. Hughes, Woodstock; and W. A. Dennis, Paris.

Other members of the statewide committee are Everett C. Phelps, Rockton; John Hanna, Sr., Geneseo; J. S. Bumgarner, McNabb; Harry Munch, Argenta; Leslie E. Mathers, Mason City; Stanley Castle, Alton; Alfred Rister, Omaha, Ill.; Russell Hayes, Sparta; Otto Steffey, Stronghurst; K. T. Smith, Greenfield; Earl M. Hughes, Woodstock; Homer Curtiss, Stockton; Lyman Bunting, Ellery; Gerald Waters, Edinburg, and B. C. Fulling, Palestine.

Our Cover

STARVED ROCK, the third of our series of Illinois cover pictures, is clothed in legend and history. It rises abruptly from the Illinois river to a height of 100 feet and is situated in La Salle county midway between La Salle and Ottawa.

The half-acre top of the rock was the site of Fort St. Louis (1682-1692) built by de La Salle and his lieutenant Henri de Tonti. As to why the natural citadel is named Starved Rock, we quote the plaque on the rock's summit:

"Indian tradition tells us that about 1766 a band of Illinois Indians pursued by an overwhelming force of Pottawatomi, seeking to avenge the death of Chief Pontiac, took refuge on the site of this rock. . . The inaccessibility of this natural fortress enabled the Illinois to keep their foes at bay but hunger and thirst united to defeat them. Their provisions failed; the enemy cut the cords with which they tried to lift vessels of water from the river.

"With their vast hunting grounds in a panorama before them, they expired of starvation with true Indian fortitude and thus gave this lofty citadel the name 'Starved Rock'."

PMA DAIRYMEN EXPECT $3.50 MILK IN JUNE

A STRONG hope of $3.50 a hundred for May and June milk was expressed by Manager Art Lauterbach before 2300 dairymen attending the annual meeting of the Pure Milk Association held March 15 in Chicago.

If May and June milk remain relatively high, dairymen will see extended another year of the best prices the industry has ever witnessed, many of the voting delegates and farmer-members conceded.

Last year the average gross price of all members' milk was $3.929 a hundred for 3.5 percent milk compared to $3.079 for 1945, Secretary Charles M. Cosgrove said in his annual report.

Pure Milk Association, cooperative milk bargaining agency for producers who market in the Chicago milkshed, reported a record membership of 13,500 dairy farmers in Illinois, Wisconsin, and Michigan.

Members last year paid 5 cents a hundred to market milk through the association but the actual cost was placed at 2.2 cents by Walter Win, treasurer. He said the balance of 2.8 cents was saved for investment in plants and for refund. Savings made available for refund to members totaled $500,000.

Lauderbach said he thought the association would be able "to ride through" this year without increasing the 5 cent fee but warned that they may need more next year—perhaps an additional cent for two or three months if costs do not go down.

More than 1,645,695,000 pounds of milk were sold through Pure Milk Association, 82 percent in Chicago and 18 percent in nine suburban markets. This represents an increase of 2.3 percent more than last year.

Pure Milk has made an effort, Lauterbach indicated in an informal address, to break the "feast-or-famine" in the milk industry by proposing to pay a 30 cent premium from August to November, and 20 cents a hundred less for May and June milk. So far this still meets with some dealer resistance, he said.

Turning to resolutions, delegates asked for the establishment of a regular 12 week winter short course at the University of Illinois similar to those now held at Indiana and Wisconsin.

ILLINOIS GRAIN ANNOUNCES BUILDING PLANS FOR SUMMER

Inland and river operating companies of the vast new Illinois Grain Terminals Company are expanding rapidly through direct purchases and elevator construction planned for this summer.

River sites at Lacon and Hennepin have been surveyed for elevator construction by C. W. Krieling, Havana, engineer for the Havana River Grain Company and Prairie Grain Company, river operating affiliates of the Illinois Grain Terminals Company.

This construction company has also contracted with the Havana River Grain Company to build a 10,000 bushel ear corn crib complete with a sheller and cleaner at their new Havana elevator site.

Two inland county-wide grain companies were organized in Peoria and Ford counties in February and officers and directors were elected recently.

The Ford cooperative will be known as the Ford County Grain Cooperative and will have its office at Melvin. The Peoria County Grain and Feed Company will headquarter at Peoria.

The Livingston Grain and Supply Company, also county wide in its scope of operations, recently acquired an elevator at Forrest and will operate the elevators of the Saunemin Farmers Elevator Company.

Fred L. Martin, district sales manager for Illinois Farm Supply Company, has been hired as manager of the Livingston Grain & Supply company. He has worked for service companies at Shelby-Effingham, St. Clair, and Madison county.

MARSHALL PUTNAM FARM ADVISER DIES SUDDENLY

Farm adviser ranks in Illinois suffered a great loss in March with the death of L. J. Hager, veteran adviser of Marshall-Putnam Farm Bureau.

Mr. Hager died March 12 at St. Margaret's hospital, Spring Valley, where he had been a patient for a month. Funeral services were held March 15 at the Henry Methodist Church.

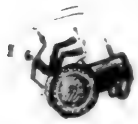
An indefatigable and aggressive worker, Mr. Hager assisted with a multitude of activities for the benefit of the farm population of the two counties. Known as "Doc" by his many associates in farm adviser work and throughout the state, Mr. Hager had an outstanding record, and he was especially interested in 4-H and rural youth activities. Graduated from the U. of I. College of Agriculture in 1925 he worked for a short time for a packing company and later as a vocational agricultural teacher at John Swaney High School in Putnam county. He joined the Farm Bureau staff as assistant adviser and 4-H club leader in 1929 and became farm adviser in July of 1931. He was born Dec. 14, 1900 on a farm near Altona, the son of Mr. and Mrs. Allen A. Hager.

In a tribute to the work of Mr. Hager, President Lester E. Leigh, president of the Marshall-Putnam Farm Bureau, said in part, "We will always remember 'Doc' as a capable, faithful and conscientious farm adviser, and a true friend. It has been a privilege and inspiration to all of us to have been associated with a man of such capabilities."

At speakers' table during 4-H Club Leaders Recognition Meeting are left to right: The Rev. Richard R. Newhall, First Methodist Church, Springfield; Prof. J. C. Spitler, state leader of farm advisers; Mrs. Phil Goodwin, Wilmington 4-H Club leader; George E. Metzger, IAA field secretary; Dr. J. O. Christianson, superintendent of the school of agriculture, University of Minnesota; Prof. E. I. Pilchard, head of Boys' 4-H Club work, University of Illinois; Mrs. Raymond Hanley, Home Bureau Federation; Albert Eisner, Jr., president, Eisner Grocery Company, Miss Anne Searl, head of Girls' 4-H Club work, University of Illinois, and Robert Irwin, secretary of the Chamber of Commerce, Springfield.

Springtime *is* ACCIDENT *time*

(AND YOU ARE LIABLE!)



Before the rush of spring work is upon you, give this fact a few minutes of very serious consideration: You could lose this year's work and the profits of many more should one of your horses, or cows or hogs break out onto the highway and cause an auto accident, or a stranger be injured on your premises.

You could lose this year's work, and the profits of many more, should one of the simple, common accidents shown here happen to one of your hired men.

It pays to be careful always, but wise farmers know that is not enough. The *really* careful farmer carries liability insurance. Think this through, then contact your insurance agent at your Farm Bureau and learn how little it costs to have the protection of a Farmers General and Employers Liability policy in this company.

Shorts in the News

Farm Adviser Ray Benbow of the McDonough County Farm Bureau, Macomb, resigned effective March 4 to work with the Stiegelmeier of Normal hybrid seed corn business. He has experimented in corn breeding for the last five years.

Frank Mealiff of Mendon in Adams county has been hired as youth assistant for Logan county. He is a war veteran and recent graduate of the University of Illinois College of Agriculture.

President David M. Hardy of the St. Louis Bank for Cooperatives has been hired as general agent of the Farm Credit Administration of St. Louis. A large land owner and farm operator in Monroe county, he is a leader in the farm cooperative field in Illinois, Missouri and Arkansas, states comprising the district of the FCA.

This year marks the 50th anniversary of the Farmers' Institute in Monroe county and Edgar S. Amrine, farm advisor, said they arranged a program similar to the first one. The original program included discussions on roads, hogs, dairy cattle, property insurance, and wide vs. narrow wagon wheels.

Aphids and mites, insect pests not affected by DDT, can be killed by a new insecticide called tetraethyl pyrophosphate, or TEP, researchers for the Illinois Natural History Survey announced recently. TEP apparently does not leave a poisonous residue, important when controlling aphids on peas, apples, potatoes, peaches and other crops.

G. W. Baxter, director of transportation for the Illinois Agricultural Association, has been appointed as a member of the Transportation Advisory Committee which will work with the U. S. Department of Agriculture.

Baxter has been asked to serve because of his "broad knowledge and experience in this important field", Anderson stated in his letter. Baxter has been director of transportation for the IAA for more than 23 years.

Fred J. Watts, 30, manager of the Western Illinois Grain Company at Dallas City since last June has transferred to Havana where he will manage the Havana River Grain Company. Both companies are subsidiaries of Illinois Grain Terminals Company, IAA's new $3,000,000 grain marketing co-op.

A strong scattering of dairymen shipping grade A milk to the Chicago market from Lee, Whiteside, and Ogle counties have signed a Pure Milk Association contract and have formed a local of that organization. Pure Milk is a bargaining agency for dairymen in the Chicago milk shed.

News of Vegetable Crops and Gardens, a weekly radio round-up for gardeners, will be broadcast by 13 radio stations for 26 weeks beginning March 16. It will be transcribed by Lee Somers of the College of Agriculture at Urbana. Stations carrying the talks are: KHMO, WCAZ, WCNT, WEBQ, WGN, WJBC, WJPF, WKRO, WLBH, WLDS, WMMJ, and WSOY.

Harlow B. Mills, state entomologist for Montana since 1937, has been hired as chief of the Illinois State Natural History Survey, succeeding Dr. T. H. Frison who died Dec. 9, 1945.

W. E. Schmidt is the new assistant farm advisor for Cook county and will be in charge of 4-H Club and Rural Youth Activities. Born and reared in Kankakee county, Schmidt is a graduate from the College of Agriculture at Urbana.

Emmett Bunyan of Lawrenceville was hired as assistant farm adviser and county organization director for Sangamon county to replace H. E. Humphrey who resigned to work for an advertising firm in St. Louis. Bunyan, an Illinois College of Agriculture graduate and specialist in soils and agronomy, served during the war in the Army Air Corps.

More than 750,000 acres of land in the 16 most southern counties of Illinois would be highly productive if planted in forest trees, particularly evergreens, J. N. Spaeth, University of Illinois professor of forestry, recently told the University committee on development of Southern Illinois resources.

Dr. C. D. Van Houweling, IAA Director of Veterinary Medical Relations, has been appointed to the national Newcastle Disease Committee. The national committee of 17 members includes pathologists, live stock sanitary officials, veterinarians, the Bureau of Animal Industry, and several branches of the poultry industry, organized to make recommendations for the prevention, control and eradication of the disease.

Woodland on the H. K. Patterson farm near Timewell in Brown county, has made a growth valued at $2.37 an acre each year during the past five years, not exceptional for a well-managed timber, reports Eldon Powel, Brown county farm advisor.

The British agricultural attache at Washington, A. N. Duckham (third from left) discusses British agricultural policy before the Economic Study Committee of the Illinois Agricultural Association in Chicago. Reading clockwise: Earl M. Hughes, McHenry; Lee Knox, Whiteside; Duckham; IAA Vice President Floyd E. Morris, Sangamon; K. T. Smith, Greene; Alfred Rister, Gallatin; and Russell Hayes, Randolph.

CHIEF INVESTOR for IAA RETIRES AFTER 23 Years Service

By LEW REISNER
IAA RECORD Field Editor

IF you'd want a history of any of the 14 IAA associated companies right down to just about the day they were started, you could probably get the inside facts from A. R. Wright. He probably was sitting in when the company was organized.

Substantial farmer and successful small town banker, Wright has been closely associated with the IAA since 1924 when he was first elected to the board of directors.

Thirteen years ago Wright, then vice-president of the IAA, was asked if he wouldn't spend his full energies as the assistant treasurer in charge of investments. He accepted.

And now, after helping to weather a depression and a war, he would like to get home to Varna, and so, reluctantly, the IAA board of directors has accepted his resignation.

Through Depression and War

Starting from scratch, investments have increased over the last 20 years until the IAA and its associated companies last year had invested as much as $45 million. Since 1935 it has been Wright's particular job to see that this money has been invested soundly and wisely.

Adequate finance and a real need are considered by Wright as being two of the major keystones upon which their success rests. He related early experiences to bear out his beliefs, which, although they have been widely told, bear retelling.

"We early found a need by farmers' elevators for adequate auditing. Audits were made for the managers of the elevators and not the farmer board of directors. So we set up our first company, the Illinois Agricultural Auditing Association. This was in 1924."

Never Heard of Co-ops

But Wright's experience goes back a good deal further than this. In 1893, as a boy, he went with his father to meetings held for the purpose of organizing a farmers elevator. "All they knew in those days was the 'endgate dividend'—cutting margins and prices. They'd never heard of cooperatives, not as they're known now. Our elevator would cut prices, so did our competition. We both starved."

This hard-earned knowledge — the necessity for adequate finance — came in good stead, when Wright helped to organize in 1927 the statewide oil purchasing company, now known as the Illinois Farm Supply Company.

"As Farm Bureau folks pretty well know, we couldn't compete at the beginning with big oil companies by slashing prices. We didn't try to irritate them, but kept their profit margin and returned the balance as dividends."

IAA Assistant Treasurer A. R. Wright (standing) breaks in his successor, Lyle Eikelbarner.

Wright had had other practical experience in oil co-ops before coming on the IAA board. Back home in Marshall-Putnam county in 1924 he had helped to organize the first Farm Bureau oil cooperative in Illinois. He served on its board of directors until about six years ago.

He said they really got into the oil business because of the poor quality of oil sold to farmers by fly-by-night salesmen. "They'd sell anything for lubricants, even fish oil, and of course, they never came back.

"We found a real need for insurance, too. When farmers began to buy cars and trucks, and got roads they could drive over with a car, they began to realize, when they bought insurance, they were paying plenty for it.

"Many farmers really thought they should be getting cheaper insurance rates. They didn't drive fast or in heavy traffic, at least not like city drivers. We studied into the matter and found it was true—they were preferred risks."

He said that most of the information they needed in a technical way for starting the insurance companies they got from the state insurance department at Springfield and our own legal department.

Actually, he said, except for a lot of hard work, the companies have been comparatively easy to set up, and they haven't encountered very serious troubles along the way. "But the board has been pretty sure their members wanted and needed the services before the companies have been formed."

20-Year-Old Boss

Born on the family homestead in the same house as his father, Wright attended country schools, the Varna high school, and later went to Bradley Technical College in Peoria, where oddly enough consideri..g his later career in finance and farming, he majored in chemistry.

Returning to the farm, Wright had thrust on him the full management of a 320 acre farm when he was 20 years old. "It took 24 horses to farm the land, and I usually had at least two hired men who were pretty critical of such a young boss," Wright confessed.

But he soon proved his ability. In eight years he was farming 700 acres. He continued to operate the farm but later worked as cashier in the Varna bank until 1921. At this time he took in a partner on the farm and bought controlling interest in the bank.

He is married to the former Louise Merritt from Varna, and has one son, Harold, of Harrisonburg, Va., and a grandson, Randy, 2.

Headed County Farm Bureau

He served as a member, and later as secretary and president, on the board of directors of the Marshall-Putnam County Farm Bureau from 1919 until 1924. In 1924 he was elected to the IAA board to represent the 16th congressional district. From 1930-35 he was elected as vice-president of the IAA.

The 320-acre homestead where he first started farming is now leased but on another holding, a 370-acre farm, Wright maintains an active interest in the management.

When he gets back to Varna, Wright has one hobby he'd like to work on. He wants to make this 370-acre farm a model of soil conservation.

Whatever their course in the future, farmers' co-ops in Illinois today owe a debt of gratitude to A. R. Wright for the strong foundation he has helped to build.

The 11 district Rural Youth Training Schools, or short courses, were attended by 563 Rural Youth officers, committee members, farm and home advisers, and youth assistants. Enthusiastic participation was in evidence in each center.

Some very interesting questions were asked at various meeting places such as the following:

1. How can meetings be started on time.
2. How can we get new members.
3. How can we hold the members after they start coming.
4. How can Rural Youth groups have good parliamentary procedure.
5. What are some good ways to make money.
6. How can we create interest in educational topics.
7. What are some good educational topics.
8. How can we get 100% cooperation.

Possibly Rural Youthers over the state would like to answer these questions. How about writing your answer to me or to the editors of this magazine. We shall be glad to pass your experiences, opinions, and ideas on to the readers of the IAA RECORD. Let us hear from you.

"Rural Youth in Civic Affairs" was CLARK'S February theme presented in the form of a panel discussion with County Judge John Hollenbeck, Farm Adviser C. M. Glover, Home Adviser Marie Nuttall, and Rural Youth members taking part. Secretary Evelyn Eubank comments that this educational feature was "very interesting." KANE, DEKALB, and southern DUPAGE met in Geneva Feb. 19 and planned a series of joint parties as follows: March 27, roller skating party at the Sandwich roller rink; April 11, Square Dance, Masonic Temple in DeKalb; May 20, wiener roast, Hopkins park, Sycamore. Plans are under way for a softball schedule to be played by these and other nearby counties.

EDGAR recently heard Youth Assistant H. V. Deffenbaugh and members Ralph Pantle and Erwin Duzan, veterans of the southwest Pacific and Europe speak on the life and

customs of people in the various countries where each had served and traveled. Pictures and souvenirs displayed were of great interest to the audience.

Having fun at the recent Rural Youth annual banquet at Bloomington are left to right: Lloyd Johnson, Marilyn Gerling, Robert West, and June Dickson.

MENARD joined the long list of counties interested in Rural Youth as youth and adult leaders met on March 14 to discuss the values and needs of an organization and to outline future tentative plans. Recent reports of annual banquets held or to be held include: OGLE, March 15; FRANKLIN, March 17; PEORIA, March 19; CHAMPAIGN and LEE, March 25; KENDALL, March 26; WINNEBAGO, April 14; MONTGOMERY, April 15; ROCK ISLAND, May 18; GALLATIN, recently organized, heard an instructive talk at its March meeting by Farm Adviser Earl M. Lutz on extension work.

LOGAN and TAZEWELL held a combined square, folk, and ballroom dance party Feb. 28 in the Armory at Delavan. Central groups of ROCK ISLAND has developed a share-the-ride plan and have sent out an announcement to all on the mailing list giving names and telephone numbers of transportation chairmen. MCDONOUGH was brought up-to-date on "New and Future Appliances" for rural homes as they toured a distributing company's shop in Macomb on March 7.

HOUGHTBY NAMED TO BOARD OF AMERICAN DAIRY ASSOCIATION

E. E. Houghtby of Shabbona, IAA director of dairy marketing, was elected to the board of directors of the American Dairy Association at a rally and two-day business session of delegates in Chicago March 3 and 4.

The American Dairy Association is a federation of state, regional and national associations charged with the responsibility of nationwide promotional, advertising, research and merchandising activities supported by five million dairy farmers throughout the United States.

Wilbur Swayer of Lake county, a Farm Bureau member and president of the Pure Milk Association, was elected vice-president of the American Dairy Association at the business session.

Both Swayer and Houghtby are members of the Board of Directors of Dairy Products Promotion, Inc., an affiliate of the American Dairy Association. Both men have been serving on a two-state district committee coordinating the work of Indiana and Illinois through the Indianapolis, Indiana office, directed by Manager Oscar Swank.

The 1947 Illinois Agricultural Association board of directors is shown in session. Left to right: Albert W. Webb, Franklin county; J. King Eaton, Madison; Dan L. Clarke, Sangamon; Otto Steffey, Henderson; Milton W. Warren, Piatt; K. T. Smith, Greene; W. F. Coolidge, farm adviser member, Livingston; Chester McCord, Jasper; Vice President Floyd E. Morris, Sangamon; President Charles B. Shuman, Moultrie; Secretary Paul Mathias; Charles J. Elliott, La Salle; Shirley Manis, office secretary; Lyman Bunting, Edwards; John T. Evans, Vermilion; Earl M. Hughes, McHenry; Homer Curtiss, Jo Daviess; Russell V. McKee, Marshall-Putnam; Edwin J. Gumm, Knox; and Edward T. Culnan, Logan.

There OUGHTA BE a LAW!

"THERE oughta be a law against that!" Sam Brown spoke sharply to his veterinarian.

"After the first of July there will be a law, Sam."

The two men were discussing a mistake Sam had made some time before.

One morning he went to the barn and was startled to find that one of his cows had aborted a calf during the night. Sam knew the cow wasn't due to calve for at least three or four months, but, there she was with a partially developed calf lying in the gutter.

On first thought this didn't worry Sam too much. He always had had a Bang's disease-free herd, and he figured the cow probably had been injured in some way and had aborted the calf as a result. So he disposed of the calf and forgot about the whole matter.

Two weeks later, he again found an aborted calf lying in the gutter. He knew this cow wasn't due to freshen for four months so he became concerned. He had heard a lot about abortions and Bang's disease, and abortion storms going through herds, and thought it might be wise to call in a veterinarian.

The local veterinarian advised Sam to blood test his herd for Bang's disease. He had been testing quite regularly for several years and had never had a reactor in his herd during that time. But on the veterinarian's advice he had blood samples sent to the laboratory for analysis. To Sam's amazement the report came back that he had several reactors and several suspicious cows in his fine dairy herd.

"Where do you suppose I could have picked up this infection, Doc? I can't understand it. My herd has been clean for so long."

"There are many ways, Sam, by which infection can get into a clean herd, and one of the most common methods is by bringing in replacement animals that are infected. Have you added any cows to your herd recently?"

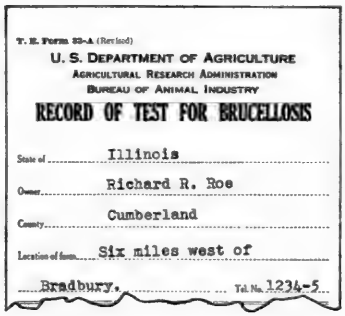
"Well, yes I have. About three months ago I bought a fine looking cow at a sale. That's her right down there. She seems to be all right."

"Let's check her blood test and see what it shows."

"OK, Doc. Her number is 789375."

"Looks like she's a reactor all the way across, Sam. That's probably where you got your infection. Didn't this cow have a blood test before you bought her?"

"I don't know. She looked good and I never gave a thought to checking on her for Bang's disease."



B. A. I. Form 82-A (Revised)

U. S. DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH ADMINISTRATION
BUREAU OF ANIMAL INDUSTRY

RECORD OF TEST FOR BRUCELLOSIS

State of Illinois
Owner Richard R. Roe
County Cumberland
Location of farm Six miles west of Bradbury. Tel. No. 1234-5

This is part of the front page of the form that must be filled out to conform with the law requiring a record of test for brucellosis.

The veterinarian shook his head. "Well, Sam, it's really too bad, but it looks like that's where you got your Bang's disease. Right in that old girl down there."

And that's when Sam said: "There oughta be a law."

The law the veterinarian was referring to is a change in the state Bang's disease law which becomes effective July 1. It says that:

"On and after July 1, 1947, no female cattle or breeding bulls more than eight months of age shall be sold in this state except for slaughter, unless such cattle either:"

a. "Have been tested for Bang's disease and found negative within 30 days prior to the date of sale;"

b. "Are under twenty months of age and were vaccinated against Bang's disease with an approved vaccine when they were not less than four or more than eight months of age and were positively identified; or"

c. "Were in an abortion-free, accredited herd at the time of sale."

This means that any cow sold after July 1 will have to show a clean test for Bang's disease unless it has been properly vaccinated, or comes from an accredited herd.

There are some exceptions to this law. The Department of Agriculture may permit cattle which react to the Bang's disease test to be sold or transferred into herds where all of the animals have been vaccinated against Bang's disease, or where infection is known to exist. The Department of Agriculture may permit cattle more than eight months of age to

Elliott has a wide range of reading interest and reads a good assortment of magazines to keep abreast of current affairs. Here he sorts some periodicals in his magazine rack.

IAA DIRECTOR ELLIOTT

Has Long Record with

FARM BUREAU

By JIM THOMSON
Ass't Editor, IAA RECORD

THERE'S a farmer down in La Salle county who feels as strongly as any chamber of commerce booster on the motto that says: "To the past we take off our hats, to the future, our coats."

He is Charles J. Elliott, Illinois Agricultural Association director from the 12th district representing La Salle, DeKalb, Grundy, Kendall, Winnebago, and Boone counties.

America's great tradition, says Elliott, was established by hard work. So let's get to work and make for ourselves a better way of life.

That, in a nutshell, is Elliott's realistic answer to much of the confusion that plagues the nation today. Does he follow his own advice?

He does. For proof take a look at his efficiently and profitably operated 360-acre farm near Streator. Or look at his Farm Bureau record. Since 1914, when the La Salle County Farm Bureau, which he helped found, was organized, Elliott has taken an active and responsible part in promoting agriculture in his area.

He was elected to the IAA board in 1944 to fill a vacancy caused by the sudden death of R. E. Peddicord of Marseilles.

Last, but by no means the least of his accomplishments, is his successful job of rearing a family of five sons and a daughter. Mr. and Mrs. Elliott can be proud that their children would be considered valuable assets in any community.

Mr. Elliott was born on the place he now farms and attended local schools and Streator high school before entering the University of Illinois College of Agriculture. He was graduated from the University in 1912.

Editor's Note: This is the sixth of a series of articles to acquaint you with the men you elected to the Illinois Agricultural Association board of directors.

Following his graduation he returned to the home place, which he has farmed since. He was married to Lillian King, a Hancock county farm girl and graduate in home economics from the state university.

Elliott is descended from John Eliot, the distinguished colonial clergyman of the 17th century. His grandfather farmed 95 acres of the present Elliott farm when he came to Illinois in 1850. His mother's people came from Germany to La Salle county and started farming in 1828.

The Elliott farm is composed of three separate tracts comprising 225, 95, and 40 acres. The 40-acre tract slopes down to the Vermilion river.

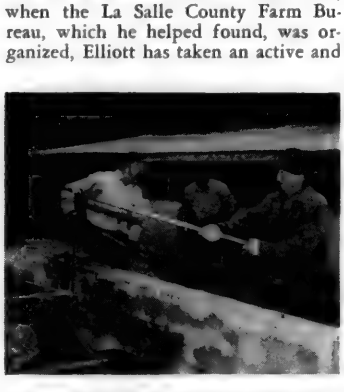
Principally a hog and beef cattle farmer, Elliott ordinarily feeds all he raises to about 65 feeder and pure-bred Shorthorns and 250 Durocs. His sows generally farrow late in the season and he markets late in March. He uses and likes concrete feed lots. Last year his acreage included 130 acres of corn, 35 of soybeans, 70 of oats, 56 of red clover and the rest in pasture and lots. In the past his rotation has followed this scheme: corn, oats, and clover. But in recent years he has substituted soybeans for oats.

All of the Elliott farm has been limed and phosphated. He started applying plant foods as far back as 1912. Today he follows good erosion control practices because part of his land slopes. One of his grassed waterways extends half a mile.

The IAA director from the 12th district served from 1919 until 1945 on the executive committee of the La Salle County Farm Bureau except from 1935 to 1939 when he was an appraiser for the Federal Land Bank. He also worked as a farm evaluator for the Federal Housing Administration. While on the Farm Bureau executive committee, he served as vice president and chairman of the finance committee.

He helped organize the La Salle

Shaded area includes five counties of the 12th Congressional district represented on the IAA board of directors by Charles J. Elliott. Winnebago is also in 12th district.



Director Elliott pitches manure with two of his four sons, Wayne (left) and Quintin.

County Farm Supply Company and served as its secretary for 16 years. Mrs. Elliott has been active in Home Bureau, serving on the state board and as county president for three years.

Mr. Elliott is a member of the La Salle County Taxpayers Association, an organization devoted to keeping an eagle eye on the spending of public funds.

The Elliott children are Donald, 30; Helen, 27; Hubert, 25; Kenneth, 24; Quintin, 22; and Wayne, 19.

Donald, an Illinois graduate engineer, works for Boeing in Seattle. He was a lieutenant in the navy. Helen, an Illinois home economics graduate and a former ensign in the Waves, is La Salle county assistant home adviser.

Hubert, a mechanical engineer, is employed by Pratt and Whitney at Hartford, Conn. Kenneth, a student at the College of Agriculture, is studying general farming and agricultural economics. He enlisted in the army after a year at the University.

Quintin and Wayne work on the farm at home and plan to further their education when the help situation eases. Both are members of Rural Youth.

★

On a chilly winter morning, Director Elliott and son Wayne, (left) work over a gasoline engine attached to a concrete mixer. The Elliotts have used concrete widely about their farm and appreciate its advantages.

★

"Farm Bureau," says Director Elliott, "has a better foundation today than it ever has had before. As long as it renders service to its members, it will remain strong. But Farm Bureau itself needs more than the man who thinks only in terms of the money returns from our commercial companies.

"Above all, we must work to produce the goods which will bring about a better standard of living. There is no easy way."

Meredith Johnson is New Field Man for Prairie Farms Creameries

Meredith Johnson, 33, of Galesburg, has been employed as the new fieldman for Prairie Farms Creameries and will work out of the Chicago office.

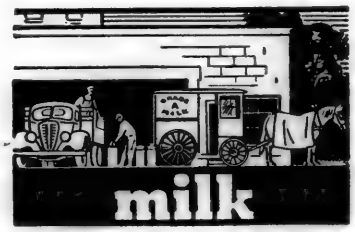
Johnson will devote his time to working with the 10 member creameries and their patron farmers in a program to maintain and improve the quality of milk and cream used in the manufacture of Prairie Farms products.

Well qualified by experience for this work, Johnson has worked for the last five years as fieldman for the Prairie Farms Creamery of Galesburg.

He first worked for the Galesburg cooperative for two years as a truck salesman, and from 1937-40 was employed in the plant of a Peoria creamery.

Born and reared on a stock and grain farm near Joy in Mercer county, Johnson graduated from the local high school in 1931.

He then attended Augustana College in Rock Island in 1931, the Roosevelt Military Academy at Aledo, 1932-33, and the University of Illinois, 1936-37. He is married to the former Irene Longly of Aledo.



W. J. Swayer, Gurnee, was recently named vice president of the American Dairy Association, at its annual meeting in Chicago. Swayer is also president of the Pure Milk Association in Chicago, and vice president of the Illinois Milk Producers' Association. The American Dairy Association re-elected D. T. Carlson, Willmar, Minn., president. It was pointed out at the A.D.A. annual meeting that milk and dairy product prices have already dropped from their peak levels and that it is time for the dairy industry to put more emphasis on sales. It was the feeling of the group that advertising would help maintain the wartime advances in milk consumption, which increased 30 per cent above pre-war levels.

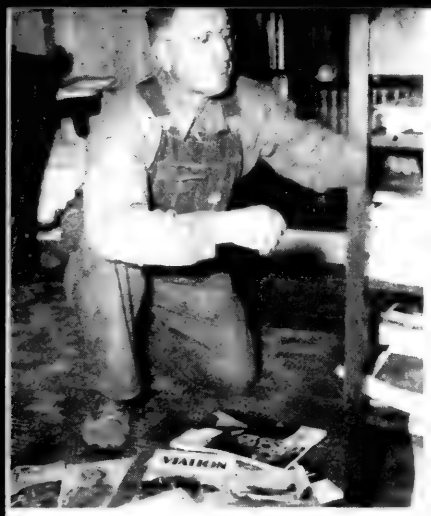
The marketing committee of the Jo Daviess County Farm Bureau met with representatives of the IAA at Elizabeth, March 24, to discuss steps which might be taken in that area to improve the milk marketing situation.

On Jan. 1, 1947, there were 24,479,000 milk cows on U. S. farms. This number represented a decrease of 850,000 cows from Jan. 1 last year, and 1,296,000 less than the peak level established in 1944. Production per cow in 1946, however, was the highest on record — 4,891 pounds. Total milk production in 1946 totalled 119.73 billion pounds.

The Second Annual Midwestern Milk Marketing Conference attracted a large crowd at Urbana, April 4 and 5. Milk producers from several midwestern markets convened to discuss current marketing problems and to hear leaders tell of new developments in the milk marketing field. Speakers included Herbert L. Forest, assistant director, Dairy Branch, USDA; R. K. Froker, University of Wisconsin; Dr. R. W. Bartlett, University of Illinois; and others. E. E. Houghby, IAA dairy marketing director, discussed the place of cooperatives in pricemaking.

A public hearing was held in Chicago, beginning March 3, to receive evidence with respect to proposed amendments to the federal orders regulating the handling of milk in the Chicago and suburban Chicago areas. The principal proposal submitted by the Pure Milk Association of Chicago would raise the level of milk prices during the fall and winter months when production is normally in short supply. This proposal, if adopted, should materially reduce the seasonal variation in milk production. A similar pricing program is in operation in the St. Louis market and in many other large fluid milk marketing areas.

The secretary of agriculture recently ruled that the Department of Agriculture was within its legal rights in establishing a federal milk marketing order for the Columbus, O., marketing area. Producers there sought a federal order mainly on the grounds that milk in that area burdened, obstructed and affected interstate commerce in milk and its products. Handlers contended that this market was not subject to federal regulation. Although this matter more than likely will be appealed to the higher courts, it does express the position of the Department of Agriculture with respect to its attitude toward an extension of the federal order program. This case has been closely watched by Illinois producer groups.



Elliott has a wide range of reading interest and reads a good assortment of magazines to keep abreast of current affairs. Here he sorts some periodicals in his magazine rack.

IAA DIRECTOR ELLIOTT

Has Long Record with

FARM BUREAU

By JIM THOMSON
Ass't Editor, IAA RECORD

THERE'S a farmer down in La Salle county who feels as strongly as any chamber of commerce booster on the motto that says: "To the past we take off our hats, to the future, our coats."

He is Charles J. Elliott, Illinois Agricultural Association director from the 12th district representing La Salle, DeKalb, Grundy, Kendall, Winnebago, and Boone counties.

America's great tradition, says Elliott, was established by hard work. So let's get to work and make for ourselves a better way of life.

That, in a nutshell, is Elliott's realistic answer to much of the confusion that plagues the nation today. Does he follow his own advice?

He does. For proof take a look at his efficiently and profitably operated 360-acre farm near Streator. Or look at his Farm Bureau record. Since 1914, when the La Salle County Farm Bureau, which he helped found, was organized, Elliott has taken an active and responsible part in promoting agriculture in his area.

He was elected to the IAA board in 1944 to fill a vacancy caused by the sudden death of R. E. Peddicord of Marseilles.

Last, but by no means the least of his accomplishments, is his successful job of rearing a family of five sons and a daughter. Mr. and Mrs. Elliott can be proud that their children would be considered valuable assets in any community.

Mr. Elliott was born on the place he now farms and attended local schools and Streator high school before entering the University of Illinois College of Agriculture. He was graduated from the University in 1912.

Editor's Note: This is the sixth of a series of articles to acquaint you with the men you elected to the Illinois Agricultural Association board of directors.

Following his graduation he returned to the home place, which he has farmed since. He was married to Lillian King, a Hancock county farm girl and graduate in home economics from the state university.

Elliott is descended from John Eliot, the distinguished colonial clergyman of the 17th century. His grandfather farmed 95 acres of the present Elliott farm when he came to Illinois in 1850. His mother's people came from Germany to La Salle county and started farming in 1828.

The Elliott farm is composed of three separate tracts comprising 225, 95, and 40 acres. The 40-acre tract slopes down to the Vermilion river.

Principally a hog and beef cattle farmer, Elliott ordinarily feeds all he raises to about 65 feeder and pure-bred Shorthorns and 250 Durocs. His sows generally farrow late in the season and he markets late in March. He uses and likes concrete feed lots. Last year his acreage included 130 acres of corn, 35 of soybeans, 70 of oats, 56 of red clover and the rest in pasture and lots. In the past his rotation has followed this scheme: corn, oats, and clover. But in recent years he has substituted soybeans for oats.

All of the Elliott farm has been limed and phosphated. He started applying plant foods as far back as 1912. Today he follows good erosion control practices because part of his land slopes. One of his grassed waterways extends half a mile.

The IAA director from the 12th district served from 1919 until 1945 on the executive committee of the La Salle County Farm Bureau except from 1935 to 1939 when he was an appraiser for the Federal Land Bank. He also worked as a farm evaluator for the Federal Housing Administration. While on the Farm Bureau executive committee, he served as vice president and chairman of the finance committee.

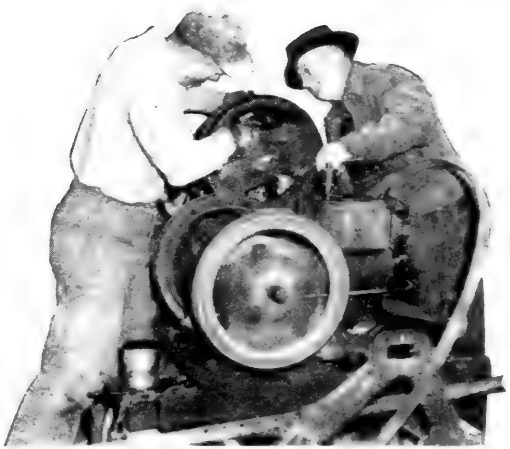
On a chilly winter morning, Director Elliott and son Wayne, (left) work over a gasoline engine attached to a concrete mixer. The Elliotts have used concrete widely about their farm and appreciate its advantages.

★



"Farm Bureau," says Director Elliott, "has a better foundation today than it ever has had before. As long as it renders service to its members, it will remain strong. But Farm Bureau itself needs more than the man who thinks only in terms of the money returns from our commercial companies.

"Above all, we must work to produce the goods which will bring about a better standard of living. There is no easy way."

Meredith Johnson is New Field Man for Prairie Farms Creameries

Meredith Johnson, 33, of Galesburg, has been employed as the new fieldman for Prairie Farms Creameries and will work out of the Chicago office.

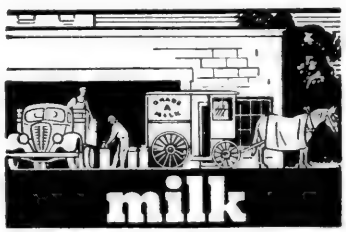
Johnson will devote his time to working with the 10 member creameries and their patron farmers in a program to maintain and improve the quality of milk and cream used in the manufacture of Prairie Farms products.

Well qualified by experience for this work, Johnson has worked for the last five years as fieldman for the Prairie Farms Creamery of Galesburg.

He first worked for the Galesburg cooperative for two years as a truck salesman, and from 1937-40 was employed in the plant of a Peoria creamery.

Born and reared on a stock and grain farm near Joy in Mercer county, Johnson graduated from the local high school in 1931.

He then attended Augustana College in Rock Island in 1931, the Roosevelt Military Academy at Aledo, 1932-33, and the University of Illinois, 1936-37. He is married to the former Irene Longly of Aledo.



W. J. Swayer, Gurnee, was recently named vice president of the American Dairy Association, at its annual meeting in Chicago. Swayer is also president of the Pure Milk Association in Chicago, and vice president of the Illinois Milk Producers' Association. The American Dairy Association re-elected D. T. Carlson, Willmar, Minn., president. It was pointed out at the A.D.A. annual meeting that milk and dairy product prices have already dropped from their peak levels and that it is time for the dairy industry to put more emphasis on sales. It was the feeling of the group that advertising would help maintain the wartime gains in milk consumption, which increased 30 per cent above pre-war levels.

The marketing committee of the Jo Daviess County Farm Bureau met with representatives of the IAA at Elizabeth, March 24, to discuss steps which might be taken in that area to improve the milk marketing situation.

On Jan. 1, 1947, there were 24,470,000 milk cows on U. S. farms. This number represented a decrease of 850,000 cows from Jan. 1 last year, and 1,296,000 less than the peak level established in 1944. Production per cow in 1946, however, was the highest on record — 4,891 pounds. Total milk production in 1946 totalled 119.73 billion pounds.

The Second Annual Midwestern Milk Marketing Conference attracted a large crowd at Urbana, April 4 and 5. Milk producers from several midwestern states met to discuss current marketing problems and to hear addresses by well known authorities in the milk marketing field. Speakers included: Herbert E. Forest, assistant director Dairy Branch, USDA; R. K. Froker, University of Wisconsin; Dr. R. W. Bartlett, University of Illinois; and others. L. E. Hoschbo, IAA dairy marketing [illegible] discussed the place of co-operatives in [illegible] marketing.

A public hearing was held in Chicago, beginning March 5, to receive evidence with respect to proposed amendments to the federal orders regulating the handling of milk in the Chicago and suburban Chicago areas. The principal proposal submitted by the Pure Milk Association of Chicago would raise the level of milk prices during the fall and winter months when production is normally in short supply. This proposal if adopted should materially reduce the seasonal variation in milk production. A similar pricing program is in operation in the St. Louis market and in many other large fluid milk consuming areas.

[illegible] Department of Agriculture was within its legal rights in establishing a federal milk marketing order for the Columbus, O., marketing area. Producers there sought a federal order mainly on the grounds that milk in that area burdened or obstructed the interstate commerce in milk and its products. Handlers contended that this market was not subject to federal regulation. Although this matter may be [illegible] appealed to the higher courts, it does express the position of the Department of Agriculture with respect to its attitude toward the extension of the federal order program. This case has been closely watched by Illinois producer groups.

McLEAN COUNTY CONSOLIDATES

CREAMERY, MILK ASSOCIATIONS

CONSOLIDATION of the Prairie Farms Creamery of Bloomington and the McLean County Milk Producers Association received final authorization in February by vote of the membership at the Milk Producers annual meeting in Bloomington.

The two organizations will be united by Nov. 30 as the Prairie Farms Creamery of Bloomington.

The consolidation became inevitable as recent trends, accelerated during the war, caused Prairie Farms Creamery to duplicate some operations of its parent, the McLean County Milk Producers Association.

The Milk Producers Association dealt strictly with fluid milk and operated within a radius of 30 miles of Bloomington while the Creamery reached out more than twice as far. Since fluid milk brings highest prices, farmers not selling through the Milk Producers Association wanted to share in the fluid milk market and began selling milk to the Creamery.

Competed With Each Other

A study made by the University of Illinois revealed that prices received by producers in the market in recent years have been a little higher than prices of milk used for manufacturing purposes. The study further revealed that there were good possibilities of increasing returns to all dairymen through a sound unified program.

When it reached the point that the two organizations were actually competing with each other it was decided to do something about it. A committee was therefore appointed about a year ago to study the situation and make recommendations. The consolidation resulted.

Membership of Prairie Farms Creamery paved the way for consolidation last fall at their annual meeting by voting approval of increased capitalization and an increase in the size of the board of directors to include five milk producers.

In its report, the committee concluded: "The consolidation, if properly effected, will avoid unnecessary outlay of capital expenditure, eliminate duplication of effort, and prevent conflicting interests among dairymen."

The legal, research, and dairy marketing departments of the Illinois Agricultural Association and the department of agricultural economics of the University of Illinois assisted the committee in its study.

A survey of present activities led the members of the committee to the conclusion that closer correlation of the services of the two organizations was essential. One healthy factor in the union was the fact that both organizations are very active and in sound financial condition. Both also have been under the same management, have used the same office facilities, and have had producers serving on both boards simultaneously.

The Creamery also has proceeded to install equipment to handle an increasing volume of whole milk besides the machinery it has for the processing of cream and butter.

Recommendations of the reorganization committee included approval of the articles of incorporation of Prairie Farms Creamery for the new organization; provision for a date to begin consolidated operations (Nov. 30); liquidation of the McLean County Milk Producers Association and payment of each producer's equity in the remaining assets according to patronage; a request for new marketing agreements to be signed between Creamery and members of the Milk Producers Association; provision for reorganization of the board of directors; a request of the board of directors that it set up equitable prices to be paid producers for milk and farm separated cream, and that the costs and savings of the consolidated company be shared equitably by all producers.

Speakers at the annual meeting included E. E. Houghtby, IAA director of dairy marketing; Judson P. Mason, IAA assistant director of dairy marketing; Prof. R. W. Bartlett, University of Illinois department of agricultural economics; and Charles W. Holman of Washington, D. C., secretary of the National Milk Producers Federation.

Members of the reorganizing committee who devoted a great deal of time to the study of the proposal for consolidation were: John E. Rocke, chairman, and Joash Stutzman, vice chairman, both of Carlock; Elmer Orendorff, secretary, Randolph; Evar Hanell, Bloomington; Menno Keim, Danvers; J. E. Gresham, Bloomington; E. J. Miller, Normal; Lester Elson, Chenoa; A. V. Birky, Hudson; W. B. Staubus, Stanford; C. R. McCue, Bloomington; G. W. Pitts, McLean; H. R. Waggoner, Saybrook; Clarence R. Ropp, Normal; and Elmer Sharp, Congerville.

George Pitts (left), president of the McLean County Milk Producers Association, and Harold Enns, president of the Prairie Farms Creamery of Bloomington, extend mutual congratulations following approval by the membership of the consolidation of the two organizations. Others (all contributed to the study that resulted in the union) are Judson P. Mason, IAA assistant director of dairy marketing; Prof. R. W. Bartlett of the department of agricultural economics, U. of I.; Forrest Fairchild, manager of both organizations; and E. E. Houghtby, IAA director of dairy marketing.

When You Burn the MIDNIGHT OIL

Remember to

"Keep Filled!"

Increased efficiency in power farming has cut the time needed for Spring work to about one-third of what it used to be.

This is Fine, BUT—

It requires 3 times the amount of fuel per day! It means that your truck-salesman must deliver 3 times the normal amount of fuel for the 10 days of intensive work.

Figures Tell the Story!

During the intensive Spring work period the Illinois Farm Supply Company delivers approximately thirty million gallons of fuel.

This used to be spread over a 30-day period. Now the work is done in about 10 days.

Here's how it figures out:

10 years ago 450 salesmen did this:

Delivered 15,000,000 gallons in a 30 day work season.

That's 500,000 gallons in a day.

NOW—575 salesmen do this:

Deliver 30,000,000 gallons in a 10 day work season.

That's 3,000,000 gallons in a day.

What's the answer?

Here's How—

Let's assume that the average delivery is about 200 gallons per customer. The average fuel storage capacity of each customer is 350 gallons. This leaves 150 gallons of unused space available for storage *before the rush begins.*

Here's The Answer

Every farmer should keep *all storage space* filled all the time. Ask your trucksalesman to keep your tanks *filled to the top* and we'll all get the job done.

Remember to fill up now and

Keep Filled

CHICAGO 5, ILLINOIS

PRODUCERS CELEBRATE

Silver Anniversaries

THE silver anniversary of the Chicago Producers Commission Association ended a colorful era in livestock marketing last month with the retirement of President Henry H. Parke of De Kalb county.

H. H. Parke

Succeeding to the post held by Parke for the past 20 years is the former vice president, Theodore Funk of McLean county. Funk is a large cattle feeder, a prominent Farm Bureau member, and member of the board of directors of the Funk Hybrid Seed Company. He has been a member of the Chicago Producers board for the past nine years.

Retiring President Parke, one of the organizers of the Chicago Producers, also is numbered among the giants of the founding fathers of Farm Bureau and Illinois farm cooperatives. As a young man recently out of college he had a profound interest in scientific agriculture.

He suggested that the Farmers Institute at DeKalb county broaden its scope to reach more farmers. Parke then organized farmers clubs and by the winter of 1911-12 several of these clubs with a membership of 700 were holding monthly meetings at which authorities on soils and crops were invited to speak.

Parke suggested again that someone work all the time with DeKalb farmers to show them the best in scientific agriculture. Parke's enthusiasm for better agriculture led to plans being discussed to obtain an agricultural expert and on March 27, 1912, the DeKalb County Soil Improvement Association was founded.

Parke's enthusiasm and hard work had resulted in the first forerunner of what we know today as the county Farm Bureau. As a result of his efforts, DeKalb shares honors with Kankakee county as the first in the U. S. to hire a farm adviser—June 1, 1912.

In a prepared speech which he was unable to deliver before the Chicago Producers meeting because of ill health, Parke, in spite of a difficult year, sounded a note of optimism: "The road ahead looks brighter," he said. "The members of the Chicago Producers have today the strongest and best marketing organization in the world. We can now go forward with greater confidence in a large production and marketing program."

Only new member elected to the board of directors was Carl Johnson of DeKalb county. He replaces H. H. Parke as representative from the first district.

Ted Funk

The struggle by the Chicago Producers to keep its head above water during the on again off again days of the OPA was outlined by Manager Dave Swanson in his annual report to the members.

Net operating loss in 1946 for Chicago Producers amounted to $42,460.41. Swanson pointed out, however, that the association was back in the black with the end of the OPA. During 1946, the Chicago Producers handled 13,990 cars of livestock valued at $50,186,897 or one-eighth of all the livestock handled on the Chicago market.

Principal speaker was Dr. Raymond W. Miller, president of the American Institute of Cooperation. Miller contended that too many people are ignorant of the true significance of farm cooperatives.

FITTINGLY enough, the Silver Anniversary meeting of the St. Louis Producers was probably the most enthusiastic ever held. Members were cheered by the realization that for the first time in four years they are selling on a free market and that their cooperative, along with other Producer agencies, played a big part in having improper controls removed from live stock and meat.

Producers members, too, experienced a sense of pride in the fact that their association has reached an important milestone and can look back on a quarter of a century of splendid accomplishments and faithful service.

President Roy Burrus of Arenzville, Ill., struck the keynote of the occasion when he reminded members that they, as live stock producers working through their own agency, have helped realize a higher standard of marketing service and better live stock returns. "Our job now," declared Burrus, "is to hold as much of this improvement as possible."

In 25 years, Burrus reported, the Producers has handled the equivalent of 353,399 cars of stock having a gross value of more than half a billion dollars. The gross value of sales made last year alone was placed at $30,714,243.

Manager H. D. Wright pointed out that again last year the agency was first among some 40 firms on the market in each of the four species of live stock, cattle, calves, hogs and sheep.

"Directors and management," Wright continued, "have always been conscious of the underlying purpose of the association — to seek and use volume for bargaining power, to effect savings as far as possible and to render efficient service in the selling of cattle, calves, hogs and sheep and the buying and financing of stocker and feeder material. The Producers can look forward to opportunities for even greater accomplishments in the future."

A Kane county group has lunch together during the silver anniversary meeting in Chicago of the Chicago Producers. Left to right: Conrad Lind, Arthur N. Healy, Ralph Dugan, Nelson Myers, Arthur Lind, and Clement Vickery.

The quizzical expression and cocked head by the cat at right is the dominant interest in this picture. It comes from Mrs. Rollie Dittmer, Hancock county.

Astride her trusty steed, Mary Renner takes a canter around the farm. She is the daughter of Mr. and Mrs. Paul Renner, Randolph county.

FARM BUREAU FOLKS IN PICTURES

As a four-year-old, Max Reisinger of Edwards county takes advantage of feeding time to ride Dad's pigs. Dad is Harold Reisinger.

Twenty-eight neighboring men and their wives helped clean up this farm yard after a fire leveled the home in Whiteside county; from Mrs. Kenneth Fulfs.

$5 PICTURE OF THE MONTH

Mrs. Charles Hildebrand of Bureau county takes the $5 prize this month for this shot of her granddaughter Karen Ann at the county fair.

In a typical spring scene, Glenn Dodd, Adams county, feeds his pet lambs he calls Dogwood and Blondie. Glenn's parents are Mr. and Mrs. H. R. Dodd.

Zealy M. Holmes, 81, Former IAA Vice Pres., Dies March 5 in Peoria

Zealy M. Holmes, 81, of Mossville, veteran farm leader and for two years vice-president of the Illinois Agricultural Association, died March 5 in a Peoria hospital.

Z. M. Holmes

Active as a farmer and farm manager during his adult life Holmes served on the IAA board of directors from 1919 to 1921 and as vice-president in 1920 and again in 1921.

Shortly after its organization in Peoria county Holmes served as president of the Peoria County Farm Bureau and for a number of years as a member of its executive board.

A grand-nephew of Lydia Moss Bradley, founder of Bradley University in Peoria, Holmes has served as a trustee of the school since he was 30 years old. His ability as a farm manager proved invaluable.

Holmes farmed for many years near Mossville in Peoria county and for the last 25 years has been farm manager for the Bradley endowed university, a position he held up to the recent illness that preceded his death.

His father came from Londonderry, Ireland, and settled in Peoria county in the 1830's and at one time owned 1,500 acres of Peoria and Marshall county farm land.

A life-long member of the Methodist church, Holmes was active in local civic affairs, having held nearly every office in Medina township.

Holmes is survived by his wife, the former Nellie Frye with whom he celebated their 59th wedding anniversary this year, and three sons, Maurice of Richwoods township, Charles of Edelstein, and John of Medina township.

One kilowatt-hour of electricity will pump 1,000 gallons of water from the average farm well. It will milk 30 cows, heat five gallons of water, grind 100 bushels of grain, run a tool grinder for four hours, shell 30 bushels of corn, cool 10 gallons of milk, or cut one ton of ensilage and elevate it into a 30-foot silo.

Eikelbarner Succeeds A. R. Wright as IAA Assistant Treasurer

LYLE F. Eikelbarner, 41, investment adviser in the trust department of the Continental Illinois National Bank & Trust Co., Chicago, since 1933, has joined the staff of the Illinois Agricultural Association as assistant treasurer.

Eikelbarner will handle the investment work of the IAA and associated companies. Three insurance firms serving Illinois farmers are among the associated companies. County Life, Country Mutual Casualty, and Country Mutual Fire.

This investment work formerly was handled by A. R. Wright, Varna, assistant treasurer of the IAA, who retired April 1.

Eikelbarner, a native of Washburn, was graduated from Monmouth college in 1928, and received his master's degree from the Northwestern graduate school of business administration in 1932. He has also studied law at De-Paul and for the past four years has been head finance lecturer at Central YMCA college.

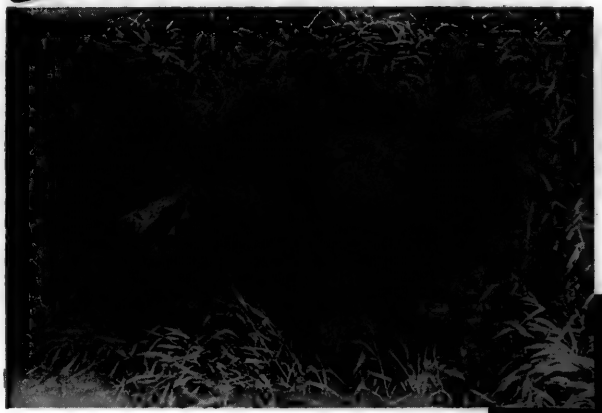
It's A Sure STRIKE-OUT

FOR YOUR UNVACCINATED PIGS WHEN THEY'RE PITTED AGAINST HOG CHOLERA!

Yes, once hog cholera gets into the game it's all over with not one reaching first base. Play safe—vaccinate your pigs early with Farm Bureau Serum and you're sure to be a winner at the season's end.

SEE YOUR FARM BUREAU

Does it pay to pamper pigs



How About YOUR PIGS?

Most pigs are *not* pampered—in fact, most pigs do *not* get *enough* attention. 40% of all pigs farrowed die before they are weaned, according to U.S.D.A. figures. That is almost half! This is a loss which can largely be avoided through proper care and feeding.

LET'S SAVE MORE PIGS

Larger and heavier litters are produced through careful feeding of the sow before and after farrowing and a definite feeding program for the pigs. Experimental feeding has definitely proved the need for extra amounts of nutrients, particularly vitamins, during these periods.

BLUE SEAL SOW SUPPLEMENT

Blue Seal Sow Supplement is a special feed designed to aid the sow in producing strong litters and the rich milk required for the pigs' first weeks of life. It is rich in vitamins, proteins and minerals.

BLUE SEAL PIG SUPPLEMENT

When pigs are from two to three weeks old, they will need to supplement their milk diet with other feed, particularly if the litter is large. Blue Seal Pig Supplement should be placed in a self-feeder in the creep along with farm grains. This supplement supplies the added nutrients required during this important growth period. The pigs will need this highly fortified feed until they reach 75 pounds weight.

These special Blue Seal Feeds are available from the authorized Blue Seal Feed distributor in your county.

NEWS and VIEWS

4-H CLUB ADULT LEADERS ARE HONORED AT SPRINGFIELD MEETING

MORE than 300 persons attended the first annual 4-H Club Leaders Recognition Meeting in Springfield Feb. 27. The meeting was arranged under the joint sponsorship of the Illinois Agricultural Association, the Illinois Home Bureau Federation, the University of Illinois Extension Service, and the Illinois Chain Store Council.

Mrs. Goodwin

An all day meeting was held with a banquet in the evening given over to the recognition of the constructive work which has been carried on by local 4-H Club leaders during 1946.

The program in the afternoon included a conducted tour of Lincoln's home, Lincoln's tomb, the State House and the Centennial building. Principal speaker was Dr. J. O. Christianson, Farm Club program director for Minnesota and superintendent of the school of agriculture, University of Minnesota.

Speaking for the Illinois Agricultural Association was George Metzger, IAA field secretary. Mrs. Raymond Hanley, Scott county, represented the Illinois Home Bureau Federation and Prof. J. C. Spitler, state leader of farm advisers, spoke for the extension service.

Spokesman for the local 4-H Club leaders was Mrs. Phil Goodwin, Will county, Edwin I. Pilchard, director of agricultural 4-H Club work in Illinois, presided as toastmaster. Other speakers included Robert B. Irwin, secretary of the Springfield Chamber of Commerce and Albert Eisner, Jr., president of the Illinois Chain Store Council.

Four prominent leaders were invited from each county, representing both agricultural and home economic 4-H Clubs. Sixty-seven counties are represented.

A group of 4-H Club leaders attending the 4-H Club Recognition Meeting in Springfield visit Lincoln's tomb.

STYLED FOR GLAMOUR

This high style sweater has a trick up its sleeves in the new, deep armholes. The high neckline adds fashion interest and is a perfect setting for your throat-hugging jewelry. Cable stitch insets decorate the front and sleeves and contrast with the smooth stockingette stitch. Chest X-Rays Check On Tuberculosis Is Made In Kane County

HAVE you had a chest X-ray recently to check whether or not you are free from tuberculosis?

If you lived in the village of Hampshire, population a little over 650 in Kane county, you would have had the opportunity to have had the chest X-ray by the mobile unit of the Kane County Tuberculosis Association.

The Hampshire Home Bureau unit sponsored the mobile unit and spent one day in Hampshire making X-rays at the school, on Main street.

During the day 279 persons were X-rayed. The school was covered 100 per cent and most of the business houses cooperated. The five factories of the village were very enthusiastic and gave 100 per cent cooperation.

This service was free to all. The expense being met through the Christmas Seal campaign which has always been very enthusiastically supported by the Hampshire community.

for HOMEMAKERS

HOME BUREAU RESOLUTIONS FOR 1947

THE Illinois Home Bureau Federation 1947 resolutions are being presented to the county organizations throughout the state this spring.

Members of the committee on resolutions were Mrs. Carroll Colegrove, chairman; Mrs. N. C. Ackland, and Mrs. Gilbert Brown.

The resolutions are as follows:

"During this period of reconversion from war to peace, we re-affirm our belief in the American way of life, with its ideals of service and opportunity for all men.

"We urge that Home Bureau seriously consider the need of conservation of land fertility, of forests, of waterways, and other natural resources.

"We believe there must be more home training for tolerance toward those of different race, color, or religion.

"We would suggest that Home Bureau members make greater use of the library at Springfield, through the reading courses offered by the extension department.

"We endorse the present county school survey. We believe that each Home Bureau member should become informed in order that she may vote intelligently. We advise Home Bureau women to show a friendly and helpful attitude toward the teachers of the community, and to cooperate in all possible ways with the local schools.

"We wish to encourage the efforts being made toward an appropriation for a new building and new equipment for the home economics department of the University of Illinois.

"We suggest that each county board consider these resolutions, and that they include such projects as they deem most needed in their county program for study and action.

"Finally we recommend that these resolutions be spread on our records and that a copy be sent to each Home Bureau county."

President Shuman in his editorial on page 3 of the RECORD *decries the fact that so few farm homes have been modernized. Do you agree? Who is to blame? We'd like to hear from you. Address letters to IAA* RECORD *Editor, 608 South Dearborn, Chicago 5, Ill.*

STEPHENSON HOME BUREAU HOLDS MANY NATIONS TEA

"A Tea of Many Nations" was held in Stephenson county reports Mrs. Roger Heitkam for Home Bureau members.

Mrs. Samuel Taylor, Lena, spoke on her life in Lucknow, India, where she was a missionary for six years. She wore a lovely red silk costume embroidered in gold thread, which was a bridal sari from India. She also had many fine pieces of handiwork from India to illustrate her lecture. Many of the members and visitors also exhibited souvenirs from other countries.

Mrs. Ena K. Chesney, Home Adviser, told about the International Organization — Associated Country Women of the World. Home Bureau members in Stephenson county as well as every Home Bureau member in the state of Illinois belongs to this world-wide organization of homemakers.

"Friendship" games and folk songs of different countries were sung. Flags of the various nations decorated the tea tables. Mrs. William Miller and Mrs. Wesley Schaper, charter members, poured.

ACCESSORY SET

It's time to think of spring accessories. If you've never crocheted, here is your opportunity to learn. Both hat and shoulder bag are simple rounds of single crochet; the directions are written for the just-learning crocheter. Of course, experts will want an attractive hat and bag set like this, too. For free instructions send a stamped, self-addressed envelope to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn, Chicago 5, Ill.

These four Illinois 4-H'ers have been picked to represent state at National 4-H Club Camp to be held next June in Washington, D. C. From upper left: Irene Downey, Putnam county; Miriam Wrigley, Peoria; Loren Nelson, Marshall-Putnam; Orvan Peters, Kankakee.

PLAN 4-H CAMPS TO BLANKET ALL OF STATE

Every farm kid in the state that belongs to a 4-H Club will be in reach of a club camp if plans drawn by an advisory committee of farm and home advisers develop.

The plan, endorsed by delegates from the Illinois Agricultural Association and the Home Bureau Federation, envisions four district camps to be developed in the state.

Shaw-waw-nas-see will serve northern Illinois and the state 4-H memorial camp, east-central Illinois. Camp sites for western and southern areas are to be determined soon.

The committee also decided that fund-raising and fund-dispersing activities are to be centered in one controlling agency so groups can work together for the benefit of the state-wide camp program as a whole.

Donors will have the privilege of picking the camps to which their gifts are to go but if no designation is made money donated will go to camps most needing funds.

HARDIN COUNTY LEADS THE WAY

(*Continued from page 6*)

brary facilities be maintained, and that special classes be held for handicapped and exceptional children.

The report also recommends that the present 107 local school board members be replaced by one county board of seven members.

Following the announcement of the recommendations, Porter said: "Immediately there arose a clamor and tumult. It is a fine theory—but. It is not practical. . . .the consolidation will cost too much. . . .the bonded indebtedness will be too heavy a burden on the taxpayers. . . .there are no buses to transport pupils. . . .buses will cost too much. . . .the road system required for a consolidated school system will be too costly."

Most of the men on the committee point out that the county cannot afford not to educate its children in the best possible manner. The initial cost will be heavy, they admit, but the school system will be more efficient and will give far more for less in the long run.

Hardin county is not as extensively farmed as other Illinois counties. Some of its farms are isolated and 16,000 of its acres are part of the Shawnee National Forest.

Most Live Near River

The bulk of the county's 8,000 population lives in a two or three mile strip of land along the Ohio river. Here, too, are its three incorporated municipalities—Rosiclare, population 1800; Elizabethtown, 650; and Cave in Rock, 500.

In an area mining about 90 per cent of the nation's fluorspar (used in metal industry, mainly steel), Rosiclare is the wealthiest of the three communities and probably is more satisfied with the status quo than the others. Its tax evaluation equals that of the rest of the county combined.

Rosiclare and Cave in Rock have their own high schools and they don't want to give them up. But their geographical location makes their selection as the site of the county's one senior high school highly improbable. The committee recommendations, however, would not force either town to give up its high school if it didn't wish to.

In the uplands away from the river, the educational facilities for rural children are none too desirable. There are 27 one-room schools with 395 pupils which the committee would like to see relegated to history.

There are 1500 grade school pupils in the county for the seven schools recommended, and 300 high school students for the senior high school recommended. Obviously there just aren't enough students available for two first class high schools.

Hauling children from sparsely-populated areas is another problem that scarcely can be avoided. Without good roads the consolidation cannot be a success. With the county in one road district it is now stripped of all unnecesssary administrative inefficiency. Adequate machinery can be used throughout the county, not just in one township as in many Illinois counties. With sufficient funds a good job is not too much to expect.

Good roads even without adequate outside help are not beyond the realm of plausibility in Hardin county; neither are good schools. The school survey committee has advocated a system it believes practical, adequate under the circumstances, and good.

It remains for the public to voice its approval or disapproval so a plan of action soon may be followed. In doing so, they may well ponder the words of the editor at Elizabethtown: "The future of this country rests with the coming generation. They must be educated."

'THERE OUGHTA BE A LAW'

(*Continued from page 15*)

be sold for feeding purposes only, without showing a negative blood test, but these animals will be restricted and under quarantine while being fed.

Many farmers have had the sad experience Sam Brown had when they bought cattle which looked healthy and later proved to be infected with Bang's disease. Many times the loss caused by bringing in one of these infected animals was several times its actual value in the damage they caused in the rest of the herd.

The above law was written and designed for your protection, and complete enforcement of all of its provisions will be very difficult, but each of you can help!

Require a clean blood test on every cow you buy, and furnish the same on every cow you sell! In the long run you will be helping yourself and your neighbors.

FARMERS SAVE ON PHONE RATE DECISION

Denial of an increase in telephone rates to the Illinois Commercial Telephone Company by the Illinois Commerce Commission will save rural and urban families in north central and southern Illinois $880,000 annually.

This is the estimate made by G. W. Baxter, director of claims and transportation for the Illinois Agricultural Association, after the decision of the commerce commission was made public recently.

An increase in rates was opposed by IAA representatives at five regional meetings held since last fall at Marion, Olney, Mendota, Paxton, and Monmouth on the grounds that the company was asking for a higher rate without first improving its service.

Many of the 180 towns affected were represented by local counsel or by counsel of the Illinois Municipal League, which took an active part in opposing the rate increase.

Farmers who appeared at these regional meetings, alleged that the telephone company's service and equipment were poor, Baxter said.

The commerce commission ruled that the company had not operated at an out-of-pocket loss, Baxter said, and for this and other reasons, the commission regarded its present rates as reasonable until such time as the company is able to prove otherwise.

Insure
THOSE GROWING CROPS

In 1946, we paid over one million dollars to insured Farm Bureau members to cover hail damage to growing crops. 28,000 Illinois Farm Bureau members were covered. Each year, more and more Farm Bureau members are protecting their year's income with this economical hail policy. See your friendly Country Mutual Fire agent today and get protection on those new crops. DON'T TAKE CHANCES ON HAIL

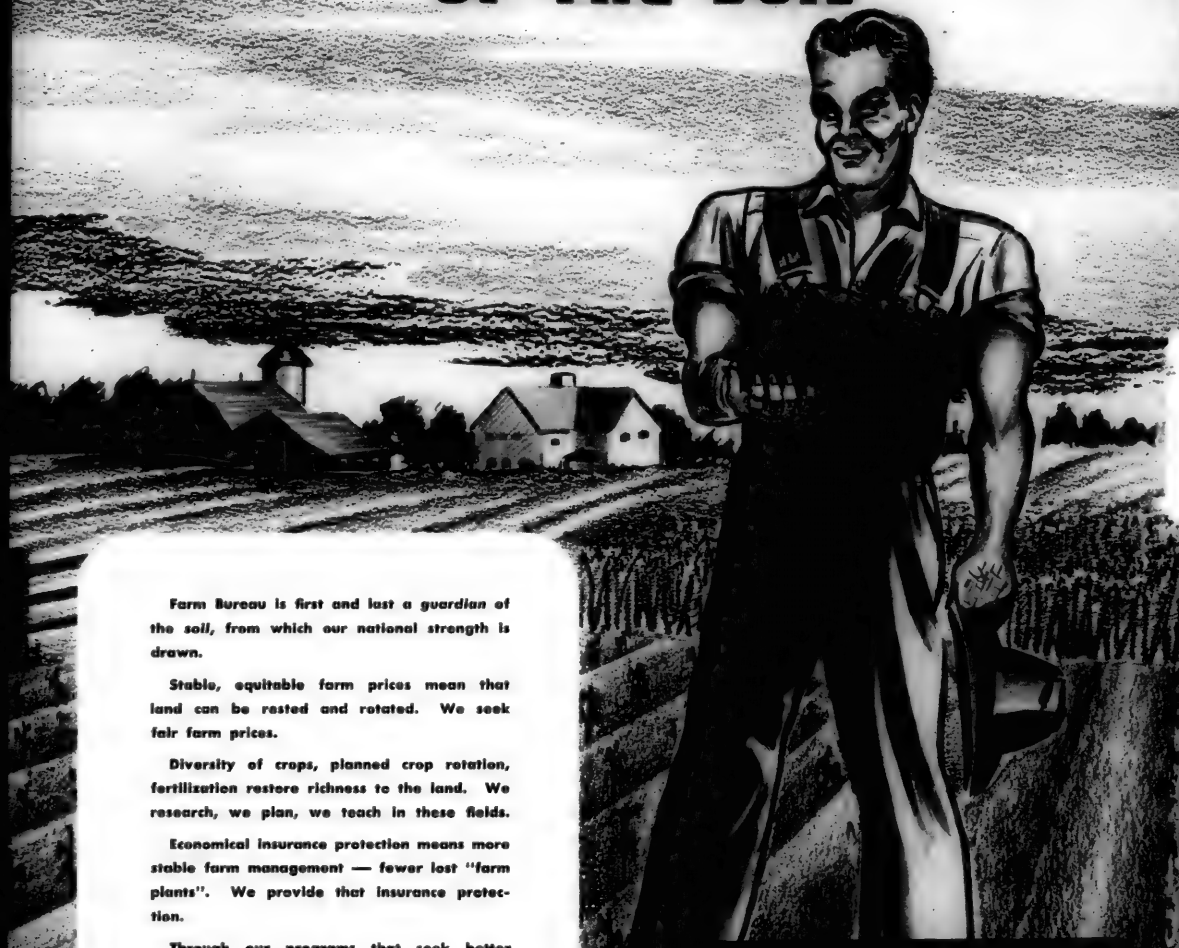
GUARDIAN
OF THE SOIL



Farm Bureau is first and last a *guardian* of the *soil*, from which our national strength is drawn.

Stable, equitable farm prices mean that land can be rested and rotated. We seek fair farm prices.

Diversity of crops, planned crop rotation, fertilization restore richness to the land. We research, we plan, we teach in these fields.

Economical insurance protection means more stable farm management — fewer lost "farm plants". We provide that insurance protection.

Through our programs that seek better roads, better schools, fair taxation, better farming policies we seek to make each acre of land return a *better living* in relation to what a year's cropping take out of the land and out of the man who crops it. This program is worthy of your strongest support.

Blue Seal hog feeds have been improved to bring to the feeder a sound, simplified, economical program.

The protein content of Blue Seal Hog Supplement and Blue Seal Summer Supplement has been increased and our former Pig Supplement and Sow Supplement has been combined to fit practical feeding conditions.

HOG SUPPLEMENT

Protein content has been increased from 35 to 40 percent! It's more economical—you get cheaper gains because it will balance more farm grains. Should be fed to pigs 75 pounds and over.

PASTURE SUPPLEMENT

A 42 percent protein mixture of high quality animal and plant proteins containing *no alfalfa meal*. Formulated to meet the supplemental needs of those feeders who raise hogs on pasture. Very economical feed for hogs that have access to good pasture.

PIG AND SOW SUPPLEMENT

A highly fortified 35 percent protein feed. This new feed is a combination of our former Pig Supplement and Sow Supplement. They have been combined into this one highly fortified feed to meet practical feeding conditions on Illinois farms. Pig and Sow Supplement is to be fed with farm grains to sows during gestation and lactation and to pigs up to 75 pounds in weight.

BLUE SEAL

DIRECT-TO-THE-FARM SERVICE

Blue Seal Feed Distributors offer a "Direct-to-farm Service" which saves time and expense. Adequate supply—Dependable delivery—Where you want it.

CHERRY BLOSSOMS, WORKERS & DRONES

By President Charles B. Shuman

THE famous oriental cherry trees in full bloom around the Tidal Basin in Washington, D. C., were a beautiful sight. We joined the thousands of tourists to stroll through the parks and buildings and other points of interest in the nation's capital.

As we stood beneath one cluster of fragrant blossoms I noticed that the flowers were attracting the same kind of bees that we have in Illinois. Busy worker bees were heavily laden with pollen and nectar which they would carry several miles to a hive where much of it probably would be consumed by the drones.

Washington is like that! Like the cherry trees it is beautiful. It has the hustle and bustle of the worker bees but it also has many thousands of drones. Unlike the bees in the hive, we have no effective system of eliminating the drones in Washington. Our federal offices and bureaus are filled with thousands of employees many of whom do little, if any, useful work and whose chief goal is to remain on the public payroll for the rest of their lives. Civil service has largely ceased to be a benefit to the public and has now become a device to maintain inefficient and unnecessary federal job holders at the expense of the tax paying public.

The purpose of our trip to Washington was not to see the cherry trees but rather to testify before the House Sub-Committee on Agricultural Appropriations. We were trying to reflect to Congress the thinking of you folks on the farms of Illinois when we asked for substantial reductions in appropriations. We urged a 20 per cent cut in administrative, office and salary expenditures at national and regional levels. We suggested that at least $100,000,000 could be cut from the Department of Agriculture appropriation without seriously reducing essential services.

However, the U. S. Department of Agriculture is not the worst offender in the matter of excessive spending of the taxpayers' money. In the Pentagon building alone there are more office workers today than there are citizens in the city of Bloomington, Illinois! Nearly 800 janitors are used in this one building with its 17 miles of corridors filled daily with milling throngs. Nearly two years after the end of the war with our Army and Navy forces largely disbanded we still have hundreds of "temporary" office buildings filled to overflowing with office workers submerged in red tape.

Your Congressmen have an unpleasant but necessary task to perform in reducing federal expenditures. I would like to suggest that we take a minute to write a few words of encouragement to our Representatives and Senators.

Farmer's Friend

'IF I HAD MY LIFE TO LIVE OVER AGAIN I WOULD BE EITHER A FARMER OR A FARM ADVISER'

Talking Farm Bureau with Organization Director E. L. DeLay.

This is a tribute to the men who, over the past 35 years, have added to the esteem of their profession and to the betterment of Illinois agriculture. We take the career of the oldest farm adviser as fairly typical of the work these men have done.

NEXT October, F. J. Blackburn will start his 30th year as a farm adviser for the Marion County Farm Bureau. Blackburn's career covers most of the 35 years Illinois has had farm advisers and extends across the period over which agriculture has made greater progress than in all the previous century.

As the oldest in point of service of Illinois' 99 county farm advisers, Blackburn has had a front row seat at this moving drama in Illinois agriculture. And like most farm advisers, when he hasn't been a spectator, he has been one of the principal actors.

"If I had my life to live over again," Marion county's first and only farm adviser said, "I would be either a farmer or a farm adviser." For Blackburn believes that the farm adviser has grown in stature over the years to a station where he is respected for what he has done for the agriculture of his community.

But the farm adviser's lot hasn't always been so pleasant to contemplate. Farm advisers still work pretty hard. But life isn't so rough as it was in the "good old days" described by Farm Adviser Blackburn.

Imagine the days of no paved highways and bottomless, impassable country roads; and the weary hours of traveling by horse and buggy and later the crank-it-yourself, none-too-dependable automobile. Those were the days, too, of no tractors and little farm machinery and almost no electricity. Often the farm adviser had to travel by train then plod through the mud from the station to the farm house where he stayed overnight.

The farm adviser also has seen a great change in the attitude of the folks in his county. "When I started work," Blackburn said, "many resented being told they could do better. Now they know that only the well-informed farmer can be a success."

That is particularly true in fruit farming which is a major activity in Marion county. When Blackburn started as farm adviser fruit production consisted chiefly of apples and pears. Since then peaches have become more important than apples or pears.

And today a fruit farmer is a highly trained specialist in skills and equipment that have come into common use during the later years Farm Adviser Blackburn has served. Fine fruit now depends on good soil, climate, cover crops, fertilizers, spray and dusting equipment, insect, disease, and erosion control.

The farm adviser won't claim the credit for the many innovations in agriculture which have meant money in the pocket for the average farmer, but much of it is his just the same.

Blackburn recalls using movies to preach the gospel of sound agriculture when the flickers were an oddity to 90 per cent of the people in Marion county.

Like many devices used by farm advisers, the movies to Blackburn were a means to an end; the end being the realization of a healthy, diverse, and stable agriculture. Many of his fondest hopes have been realized and many are in the process of realization. His experience has been duplicated in numerous Illinois County Farm Bureaus.

Starting on a day's trip around the county the farm adviser gets his tank filled by Farm Supply Service Company man, Lester Henne.

Visiting the farm of Dean Beals, the farm adviser discusses dairying conditions with Beals (right) and his son, Harold Beals (center).

Inspecting a prized brood sow and its health litter of pigs owned by Harold Beals, the farm adviser voices his encouragement.

Discussing labor conditions with Farm Labor Assistant Bill Williams.

Encouraging the activities of farm youth, the farm adviser admires a pair of sleek Herefords raised by Donald Shanafelt, a 4-H club vice president.

The diversity of Marion county agriculture is evident in the fact that last year it had 58,000 apple trees, 200,000 peach trees, and 15,000 pear trees in production. Forty thousand of its acres were in soybeans, 30,000 acres in corn, 25,000 acres in alfalfa and sweet clover, and 10,000 acres in winter wheat. Beef and dairy cattle are common and hog-raising is widespread.

Blackburn has echoed the cry of the farm adviser for three decades: "Farming has no future unless the land is taken care of."

Going even further, he tells Marion farmers that their land will produce as much as the higher-priced land in northern Illinois if it is cared for. Building the soil is and has been his major project.

One of his proudest achievements is his pioneer efforts in the field of potash deficiency in southern Illinois. Recognizing his experience and knowledge of the subject, the American Potash Institute has given his field work and investigation wide publicity through published articles.

His years of effort are beginning to pay off. "I doubt that any farm in the county was completely limed 10 years ago," Blackburn said. "Now many are completely limed, phosphated and potashed. Two hundred tons of straight potash were used last year and more would have been used had it been available."

Agriculture, like history, will move on into the long years ahead but now and then the farmers of tomorrow will look back to say of the farm advisers of our day: "They built us a solid foundation."

Getting a first-hand report on the prospects for a bumper peach crop, he examines Fruit Farmer Joe Hale's peach buds.

Examining the results of 2-D4 weed killer with Glen Key, soil conservation service technician, he sees for himself.

Watching Alson Myers dust his peach trees.

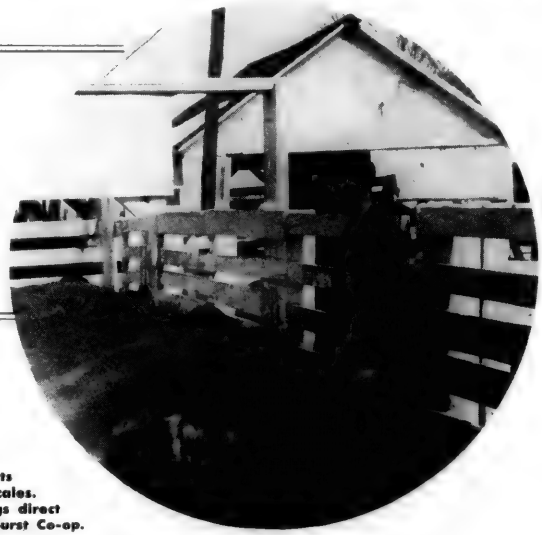
STRONGHURST GETS THE HIGH DOLLAR

HENDERSON COUNTY'S NEW CO-OP IS BRINGING AN ACTIVE MARKET RIGHT TO THE MEMBER'S DOOR

by **LEW REISNER,** IAA Field Editor



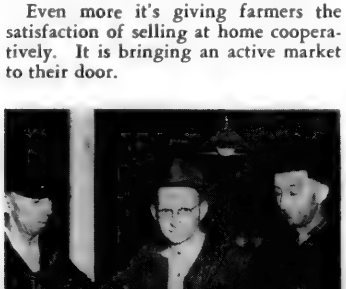
Roy Anderson waits his turn at the scales. He has sold his hogs direct to the busy Stronghurst Co-op.

LIVESTOCK producers in Henderson county have a right to be enthusiastic over their new direct hog buying program and recent sales tie-in with the statewide Illinois Livestock Marketing Association.

It's pretty well agreed that since their marketing co-op started buying hogs this winter direct from farmers at the yards in Stronghurst it raised the price on all grades and weights by at least 50 cents a hundred.

And C. A. Hartquist, manager of the Henderson Livestock Marketing Association, maintains this estimate is conservative. "Soon after we switched to direct buying in January," he said recently, "we had concrete proof that other buyers were offering as much as a dollar less than we were paying."

Even more it's giving farmers the satisfaction of selling at home cooperatively. It is bringing an active market to their door.



Manager Hartquist, center, fills out weight ticket for Roy Anderson as Sven Saverson, right, looks on.

Weekly hog receipts at the Stronghurst yards have doubled and many new patrons are now selling direct through the home co-op. This shows, in the opinion of Earl Brokaw, president of the Henderson County Farm Bureau, that the new service is popular.

To demonstrate how the county and state marketing associations tie in together, Hartquist explained his day's bidding. "I had a call this morning from Decatur," he said. "A Wisconsin firm wanted 250 hogs weighing between 210 and 230 pounds.

"I agreed to furnish all these hogs and at 10 o'clock I had them bought." He paid $27.50 a hundred for them.

Farmers who sold knew what they were getting before the hogs left their farm. They are protected. If the market should have gone up after they had sold and the association made a profit, the farmer would eventually get it back as a patronage dividend.

Losses? "So far," Hartquist admitted readily, "we've lost on just one day's buying, about $26."

They buy hogs only. Other species are shipped to co-ops on terminal markets every Monday. They expect to enlarge soon by getting into the stocker and feeder business, selling particularly to those wanting less than carload lots.

Although they expect a weekly average of about 900 hogs throughout the year, receipts have run as high as 650 daily for which they have paid as much as $42,000.

The co-op at Stronghurst is a pacesetter. Other buyers phone in to learn what they are paying. This naturally makes for a good market. "In effect," Hartquist says, "farmers get a patronage dividend every time they sell us a hog."

Hogs are trucked in from as far distant as 12 miles southwest of Carthage or about 48 miles from Stronghurst, from Aledo, 36 miles to the north, and west from the Mississippi river, the western boundary of Henderson county.

The farmer-members hire their own manager who grades and weighs their hogs. This helps. But just as important, the co-op's ability to get the high dollar rests with its tie-in with the Illinois Livestock Marketing Association.

All hogs purchased at Stronghurst and eight other concentration points in Illinois are sold through the Decatur

Business Manager Danforth, seated, shows Organization Director Stackhouse incorporation papers for their new marketing co-op in neighboring Henry county.

sales office of the Illinois Livestock Marketing Association.

All hogs are sold on a graded basis and they are sold direct to packers who place their orders directly with the Decatur sales office which in turn phones in the bids to country yards.

Currently more than 30 packers are buying through Decatur. It is direct, competitive and simple.

In Business 30 Years

News travels fast. Neighboring Mercer, Rock Island, Hancock, Henry and Adams counties, spurred by Henderson's success, will start their own county-wide marketing associations as soon as they can buy, build or lease yards.

The Henderson county cooperative is founded on a firm core of more than 200 patron farmers many of whom remember when the shipping association was first organized in 1917 as the Stronghurst Cooperative Shipping Association.

Plan New Building

It was reorganized this year in January as the Henderson Livestock Marketing Association. Hartquist has been with both agencies for more than 20 years. A yard man works full time for the association and a third helper, a bookkeeper, works on a part-time basis.

They plan to build a new office building and scale house, and to buy a new scale, for a cost of about $3,000. When they reorganized they raised $6,000 without campaigning. Eventually this may be increased to $10,000.

Any troubles? Well, mostly the troubles that come from a farmer being human. When a farmer sells his hogs and the market drops Manager Hartquist finds more hogs trucked in than he agreed to take.

But time and maybe a little understanding should cure that.

How Are Your Rural Roads?

WHAT IMPROVEMENT does your township or road district plan for the farm-to-market roads you have driven over this winter?

Many miles of rural roads have become impassable troughs of ruts and mud during the last few months.

Have the roads which were resurfaced in your neighborhood last summer held up satisfactorily?

Now is the time to be concerned about the road which goes past your farm. Road construction and maintenance will begin soon. You should know what the program is for your district.

In many counties improvements authorized by the $15,000,000 farm-to-highway appropriation have not been completed. What has your township done?

If additional state assistance for farm-to-market roads is to be expected, then wise use of the money locally is important. It must be made a good investment.

If you live on a township or road district road and are still in the dark about what is being done in your district, you should contact your road commissioner. Ask him what improvements are to be made and how much money will be available. Find out what kind and how much road equipment is owned by the district, what the road and bridge income is annually, and how much debt the district has. If you live on a county road, ask the same thing of your township supervisor or county commissioner. This information will help you understand the present condition of your roads and what you can expect in the future.

Around 11,000 miles of rural roads were scheduled to be improved with the $15,000,000 appropriation. Did you get full value from the amount spent in your township?

Now is the time to ask your road commissioner what road improvement activity he plans this season for the road on which you live.

Our Cover

THE Illinois state Capitol building at Springfield is the fourth of our series of cover pictures illustrating picturesque and historic Illinois scenes. It is the sixth Capitol building occupied by the Illinois General Assembly since the state was admitted to the Union in 1818. It was built in the gaudy, over-elaborate style of the late nineteenth century which by today's standards is neither beautiful nor efficient.

Ground was broken for the present Capitol March 11, 1868. Formal laying of the cornerstone took place Oct. 5 of the same year. Still unfinished, the building was occupied in 1876. In 1888 it finally was completed. The state planned to spend $3,000,000 on the structure but it cost $4,500,000.

The building is in the form of a cross and is 379 feet from north to south and 268 from east to west. From the ground to the flagstaff's tip it is 405 feet. The circular foundation upon which the great dome rests is 92½ feet in diameter and is built upon solid rock.

The exterior of the building is of Niagara limestone. Pillars are of polished granite, and floors, corridors, main stairway, and inner columns are of vari-colored granite and marble. The ceilings and walls are decorated with paintings and art work.

When the state Capitol was completed it was thought adequate for all possible growth but since then great changes have been made in its interior. For instance, the old water-powered elevators have been replaced by modern lifts. Two new buildings — the Centennial building and the Archives building — carry on state functions which could not be housed in the Capitol.

STRONGHURST GETS THE HIGH DOLLAR

HENDERSON COUNTY'S NEW CO-OP IS BRINGING AN ACTIVE MARKET RIGHT TO THE MEMBER'S DOOR

by **LEW REISNER**, IAA Field Editor

Roy Anderson waits his turn at the scales. He has sold his hogs direct to the busy Stronghurst Co-op.

LIVESTOCK producers in Henderson county have a right to be enthusiastic over their new direct hog buying program and recent sales tie-in with the statewide Illinois Livestock Marketing Association.

It's pretty well agreed that since their marketing co-op started buying hogs this winter direct from farmers at the yards in Stronghurst it raised the price on all grades and weights by at least 50 cents a hundred.

And C. A. Hartquist, manager of the Henderson Livestock Marketing Association, maintains this estimate is conservative. "Soon after we switched to direct buying in January," he said recently, "we had concrete proof that other buyers were offering as much as a dollar less than we were paying."

Even more it's giving farmers the satisfaction of selling at home cooperatively. It is bringing an active market to their door.

Manager Hartquist, center, fills out weight ticket for Roy Anderson as Sven Severson, right, looks on.

Weekly hog receipts at the Stronghurst yards have doubled and many new patrons are now selling direct through the home co-op. This shows, in the opinion of Earl Brokaw, president of the Henderson County Farm Bureau, that the new service is popular.

To demonstrate how the county and state marketing associations tie in together, Hartquist explained his day's bidding. "I had a call this morning from Decatur," he said. "A Wisconsin firm wanted 250 hogs weighing between 210 and 230 pounds.

"I agreed to furnish all these hogs and at 10 o'clock I had them bought." He paid $27.50 a hundred for them.

Farmers who sold knew what they were getting before the hogs left their farm. They are protected. If the market should have gone up after they had sold and the association made a profit, the farmer would eventually get it back as a patronage dividend.

Losses? "So far," Hartquist admitted readily, "we've lost on just one day's buying, about $26."

They buy hogs only. Other species are shipped to co-ops on terminal markets every Monday. They expect to enlarge soon by getting into the stocker and feeder business, selling particularly to those wanting less than carload lots.

Although they expect a weekly average of about 900 hogs throughout the year, receipts have run as high as 650 daily for which they have paid as much as $42,000.

The co-op at Stronghurst is a pacesetter. Other buyers phone in to learn what they are paying. This naturally makes for a good market. "In effect," Hartquist says, "farmers get a patronage dividend every time they sell us a hog."

Hogs are trucked in from as far distant as 12 miles southwest of Carthage or about 48 miles from Stronghurst, from Aledo, 36 miles to the north, and west from the Mississippi river, the western boundary of Henderson county.

The farmer-members hire their own manager who grades and weighs their hogs. This helps. But just as important, the co-op's ability to get the high dollar rests with its tie-in with the Illinois Livestock Marketing Association.

All hogs purchased at Stronghurst and eight other concentration points in Illinois are sold through the Decatur

Business Manager Danforth, seated, shows Organization Director Stackhouse incorporation papers for their new marketing co-op in neighboring Henry county.

sales office of the Illinois Livestock Marketing Association.

All hogs are sold on a graded basis and they are sold direct to packers who place their orders directly with the Decatur sales office which in turn phones in the bids to country yards.

Currently more than 30 packers are buying through Decatur. It is direct, competitive and simple.

In Business 30 Years

News travels fast. Neighboring Mercer, Rock Island, Hancock, Henry and Adams counties, spurred by Henderson's success, will start their own county-wide marketing associations as soon as they can buy, build or lease yards.

The Henderson county cooperative is founded on a firm core of more than 200 patron farmers many of whom remember when the shipping association was first organized in 1917 as the Stronghurst Cooperative Shipping Association.

Plan New Building

It was reorganized this year in January as the Henderson Livestock Marketing Association. Hartquist has been with both agencies for more than 20 years. A yard man works full time for the association and a third helper, a bookkeeper, works on a part-time basis.

They plan to build a new office building and scale house, and to buy a new scale, for a cost of about $3,000. When they reorganized they raised $6,000 without campaigning. Eventually this may be increased to $10,000.

Any troubles? Well, mostly the troubles that come from a farmer being human. When a farmer sells his hogs and the market drops Manager Hartquist finds more hogs trucked in than he agreed to take.

But time and maybe a little understanding should cure that.

How Are Your Rural Roads?

WHAT IMPROVEMENT does your township or road district plan for the farm-to-market roads you have driven over this winter?

Many miles of rural roads have become impassable troughs of ruts and mud during the last few months.

Have the roads which were resurfaced in your neighborhood last summer held up satisfactorily?

Now is the time to be concerned about the road which goes past your farm. Road construction and maintenance will begin soon. You should know what the program is for your district.

In many counties improvements authorized by the $15,000,000 farm-to-highway appropriation have not been completed. What has your township done?

If additional state assistance for farm-to-market roads is to be expected, then wise use of the money locally is important. It must be made a good investment.

If you live on a township or road district road and are still in the dark about what is being done in your district, you should contact your road commissioner. Ask him what improvements are to be made and how much money will be available. Find out what kind and how much road equipment is owned by the district, what the road and bridge income is annually, and how much debt the district has. If you live on a county road, ask the same thing of your township supervisor or county commissioner. This information will help you understand the present condition of your roads and what you can expect in the future.

Around 11,000 miles of rural roads were scheduled to be improved with the $15,000,000 appropriation. Did you get full value from the amount spent in your township?

Now is the time to ask your road commissioner what road improvement activity he plans this season for the road on which you live.

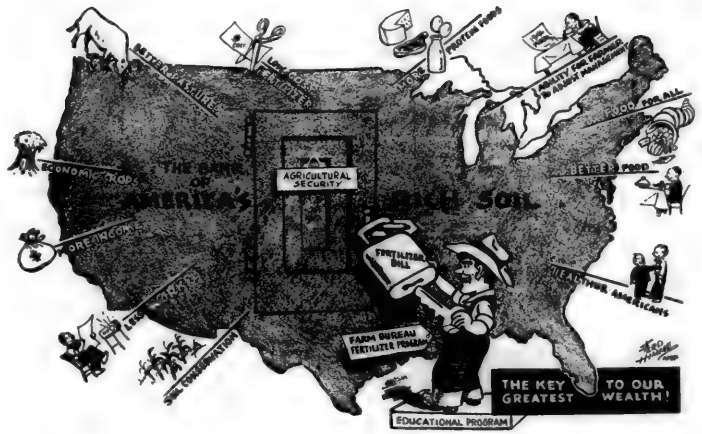
THE Illinois state Capitol building at Springfield is the fourth of our series of cover pictures illustrating picturesque and historic Illinois scenes. It is the sixth Capitol building occupied by the Illinois General Assembly since the state was admitted to the Union in 1818. It was built in the gaudy, over-elaborate style of the late nineteenth century which by today's standards is neither beautiful nor efficient.

Ground was broken for the present Capitol March 11, 1868. Formal laying of the cornerstone took place Oct. 5 of the same year. Still unfinished, the building was occupied in 1876. In 1888 it finally was completed. The state planned to spend $3,000,000 on the structure but it cost $4,500,000.

The building is in the form of a cross and is 379 feet from north to south and 268 from east to west. From the ground to the flagstaff's tip it is 405 feet. The circular foundation upon which the great dome rests is 92½ feet in diameter and is built upon solid rock.

The exterior of the building is of Niagara limestone. Pillars are of polished granite and floors, corridors, main stairway, and inner columns are of vari-colored granite and marble. The ceilings and walls are decorated with paintings and art work.

When the state Capitol was completed it was thought adequate for all possible growth but since then great changes have been made in its interior. For instance, the old water-powered elevators have been replaced by modern lifts. Two new buildings - - the Centennial building and the Archives building — carry on state functions which could not be housed in the Capitol.



Fertilizer Bill Would Enrich Nation's Soil

This explanation of the federal fertilizer bill was given to Farm Bureau leaders meeting in Springfield, March 31, by George E. Metzger, IAA secretary of organization and information.

TO START the nation on the road to regained soil fertility, the National Soil Fertility Bill has been introduced into the Congress.

The bill's objective would be achieved by a widespread educational program, conducted by established agencies of the government, with the cooperation of farmers.

The bill introduced in this Congress has virtually the same objective as the bill described in one of these meetings about a year ago. To help farmers discover for themselves the kind and amounts of fertilizer that should be used, the Extension Service in each state would establish a program of test demonstrations involving the active cooperation of approximately two per cent of the farmers in the state.

In accordance with plans worked out, these farmers would test fertilizers in different combinations applied in varying amounts on the most important crops. These farmers would be required to keep careful records on each test, both as an aid to themselves and for the information of their neighbors.

Under the test program it is contemplated that some of the fertilizers, particularly high-grade fertilizers, might be provided to these demonstrating farmers at reduced cost. Under the provisions of the bill the farmer would, for the most part, buy his fertilizers at the going rate and through regular channels. Soil management practices, as well as fertilizer tests, would be carried on by this group of cooperating farmers.

Under the provisions of the bill, the state will be the key unit in the operation of the program, and the state Director of Extension will be the official responsible for administering the program. He would have the advice and assistance of a state committee composed of two farmers, the director of the experiment station, a representative of the fertilizer industry, and a representative of farmer cooperative organizations. Funds appropriated by Congress for the program will be allocated to the states.

National policy for the program will be formulated by a national committee advising with the Secretary of Agriculture. This committee would be made up of farmer representatives from 12 of the state committees, plus three representatives of the Association of Land Grant Colleges. The Secretary of Agriculture would communicate with the state committees and directors of extension through the Extension Service and the office of experiment stations in the U. S. Department of Agriculture.

The carrying on of this proposed program would necessitate an increase in the production of high analysis fertilizers, particularly phosphate materials. The fertilizer production capacity of the country would be increased in several different ways.

(a) The Tennessee Valley Authority, which now produces a limited quantity of high analysis phosphate fertilizers at Muscle Shoals, Ala., would build a plant for the production of triple superphosphate at Mobile, Ala. This plant would be an experimental plant where an effort would be made to try out, on a commercial scale, the blast furnace method of making triple superphosphate. Work done thus far on this experimental method indicates that the blast furnace method might be approximately 20 per cent cheaper than the electric furnace method. During the period of operation by TVA, half of the production of the plant would be made available for test demonstration programs. The rest of the material would be distributed through farmer cooperative organizations. The bill provides that TVA would be required to sell this plant within five years after its completion. This is one of the safeguards to keep government out of commercial business.

(b) The bill also provides that farmer cooperative organizations will be eligible to receive from the Farm Credit Administration long-time loans at reasonable rates of interest up to 80 per cent of the value for the purpose of building new phosphate and potash plants near supplies of raw materials. Loans may also be acquired for the acquisition of nitrogen-producing plants built during the war. Any cooperative securing one of these loans would be required to sell a certain proportion of their production to the government for the soil fertility program. Cooperatives acquiring these loans would make no claim for income tax exemption.

(c) This bill also provides that the Tennessee Valley Authority will continue its educational activities within the Tennessee Valley, which would provide useful experience for the national program.

(d) It provides further that the Department of the Interior would conduct surveys in search of new reserves of phosphate and potash materials and gain more information about those already located.

(e) Another provision is that the federal government would be authorized to make payments to states and

IAA Grain Program Moves Rapidly in River Areas

STEADY progress is being made in the Farm Bureau's statewide marketing programs, according to reports made at the regular spring leaders meeting held in Springfield. Some 800 leaders representing the 99 county Farm Bureaus in the state attended this session to receive the latest information on various phases of the Illinois Agricultural Association's service and legislative programs.

Main activity in the IAA's grain marketing program at present centers in the river area. In shaping this program, Farm Bureau leaders were of the opinion that they should have ample grain supplies before entering into extensive merchandising operations. The river areas appear to be the most readily available source of such supply.

Heading up the grain merchandising program is the Illinois Grain Terminals Company with three affiliated river grain terminals: Havana River Grain Company to service Mason, Logan, Menard, Cass, Schuyler, McDonough and Fulton counties; Prairie Grain Company serving LaSalle, Lee, Henry, Marshall-Putnam, Stark, Woodford, Bureau and Peoria counties, and Western Illinois Grain Company serving Hancock, Henderson, McDonough and Warren counties.

Completing the chain of operations, county grain associations are being formed to tie in with the three river grain companies.

Havana River Grain has a new 70,000 bushel elevator that is expected to be ready to handle the wheat crop, and remodelling is started on the old elevator. Work has been started on a corn crib in connection with the new Havana terminal elevator. It will have bins for 12,000 bushels of ear corn and 8000 bushels of shelled corn.

Western Illinois Grain has just completed a year's operation of its elevator at Dallas City, a working relationship has been completed with county organizations in McDonough, Hancock, Henderson and Warren counties. In all four counties, grain companies have been set up or will be organized immediately and these county companies will be members of Wesetrn Illinois Grain.

Prairie Grain has three elevators purchased and is about to let a contract for construction of an elevator at one of the sites. The sites purchased are at Lacon, Hennepin and Ottawa.

IAA Field Secretary G. E. Metzger also explained the "five-year plan" in the grain marketing setup which seems to have created confusion in the minds of some Farm Bureau leaders.

The grain marketing program of the organization, he said, calls for member elevators to become Farm Bureau type cooperatives, which means that the members of the cooperative elevators should ultimately all be Farm Bureau members.

The plan for achieving this objective is as follows: The prospective member elevators' boards of directors will agree to set a definite date, after which members of the cooperative will not be accepted unless they are Farm Bureau members.

As of that date, any and all members of the elevator who are not Farm Bureau members for all time to come, or for as long as they shall live, may enjoy the full rights and privileges of membership in the elevator cooperative, including patronage refunds, even if they do not see fit to become Farm Bureau members.

The five-year plan, as it is commonly spoken of, has to do only with the LEGAL SETUP of the elevator. If, after five years from the cut-off date set by the elevator's board of directors, the elevator has failed to make the necessary legal changes in its setup, then the elevator shall be dropped from membership.

In the livestock marketing program, reported by Homer Curtiss, chairman of the IAA board's marketing committee, the main activity at present centers around the establishment of new and additional cooperative concentration points for the marketing of hogs close to home. This in reality is the expansion of the operations of the Illinois Livestock Marketing Association, an associated company of the Illinois Agricultural Association.

New concentration points in operation are at Stronghurst, Freeport and Effingham. The latter is a branch of the Shelbyville unit. Points in the process of organization are in Hancock, Mercer-Rock Island, Henry and Adams counties. The old concentration points which are operating successfully are at Champaign, Bloomington, Paris, Danville, Shelbyville and Decatur.

All of these points are affiliated with the Illinois Livestock Marketing Association which acts as sales agency with its sales office at Decatur. The Decatur sales office gets the orders and bids from packers all over the country and relays this information to the managers of the concentration points. The hogs are weighed and graded by the local manager and the packer pays on the home weights. The local concentration point manager is under the direction of a local board of directors.

Another matter discussed at the Springfield meeting was that of creamery territories. IAA Marketing Chairman Curtiss pointed out that experience has shown that most of the territories allotted by Prairie Farm Creamery, IAA associated state company, to the 10 member creameries are too large.

LEGISLATURE WEIGHS MEASURES OF VITAL INTEREST TO FARMERS

by PAUL E. MATHIAS

Secretary, Illinois Agricultural Association

MANY measures affecting farmers are before the present session of the Illinois legislature, but the General Assembly has been very slow to act upon them. Very little was accomplished during the first three months of the current legislative session. Members of both parties seemed content to let the work of the session drift in order that time might be devoted to the mayoralty election in Chicago. Returning after this election early in April, the members began to give serious attention to the work of the session.

Farm to Highway Roads

Of high interest to farmers is the report filed recently by the Farm to Market Road Commission which was appointed under 1945 legislation to study farm to highway road problems.

Reporting that 40,000 of the state's 75,000 miles of township and road district roads are of a primitive dirt road type, the Commission recommends:

That the state assume permanent responsibility for assistance to the township and road districts in providing all-weather surface highways from the farms to the main highways in Illinois.

That at least $15,000,000 be provided annually from a permanent source to effect a proper rural road assistance program.

The Commission stated that the most logical and defensible source of permanent revenue would be provided from a one-cent increase in the motor fuel or gasoline tax restricted to use on these roads. It proposes that the money be allocated among the township and road districts in the proportion that the mileage of township and road district highways in any township bears to the total mileage of this class of roads in the state.

As a requisite to state assistance, the Commission proposes that each township or road district be required to levy local taxes in the amount of the regular legal limit (.125 per cent of the full fair cash value).

This road program would be administered by the local highway commissioner and the county superintendent of highways. In general, the recommendations of the Commission follow the broad outlines of the legislation sponsored by the Illinois Agricultural Association in the 1945 legislative session under which the state first assumed responsibility for assistance in the construction of these local roads.

The Commission also recognized the serious problem in connection with bridges and has recommended that a survey be made in order that facts may be available upon which a program for assistance can be based. The Commission also would permit two or more road administrative units within a county to unite, upon referendum, for road administrative purposes.

School Legislation

There is an urgent demand that the legislature provide additional state assistance for schools. The School Finance and Tax Commission, also appointed pursuant to legislation enacted in the 1945 session, has recommended additional emergency state aid and also an increase in the general state assistance to schools.

The Illinois Agricultural Association is supporting measures for additional state assistance. However, it is not proposed that school districts shall be entitled to continue to receive these additional state funds unless they are efficiently organized. Now, school districts having an average daily attendance of less than seven pupils may not receive state funds unless the continued operation of the school is certified to be necessary by the county superintendent of schools.

It is proposed to raise this minimum attendance figure from seven to 10 in 1942, to 12 in 1951 and to 15 in 1953. Likewise, small high schools having an average enrollment of less than 10 pupils per grade would not be entitled to receive state aid. These proposals are in accordance with the recommendations of the Illinois Agricultural Association State School Committee and the Association is supporting them.

There are several proposals for simplifying reorganization procedure for schools. A number of the County Survey Committee would like to make their reports based upon the anticipated simplified reorganization procedure. Accordingly, it is proposed to postpone the date for the filing of the tentative reports of the survey committee from June 1 to Dec. 1, 1947 and the date for filing their final reports from Jan. 1 to June 1, 1948.

Home Economics Building

The Illinois Agricultural Association and the Illinois Home Bureau Federation are sponsoring legislation appropriating $2,000,000 to the University of Illinois for the construction and equipment of a home economics' building. The present facilities are outmoded and inadequate.

Tax and Appropriation Increases

There are many demands for additional appropriations from the state. Many of these demands are merited.

However, the legislature cannot meet the demands from present revenues even with the substantial surplus which the state has accumulated. Unless state taxes are increased, it will be necessary for the legislature to choose as between these increased demands and to allocate the funds available.

The 100 per cent assessment program, passed by a bi-partisan combination in the 1945 session over strenuous opposition of the Illinois Agricultural Association, will permit greatly increased taxes in most downstate areas.

There are many suggestions for amendments to the 100 per cent assessment legislation but as the IAA RECORD goes to press, no definite program seems to have been agreed upon or to be generally accepted.

Weed Law

The Illinois Agricultural Association and the State Department of Agriculture are sponsoring amendments to the weed and seed laws to further strengthen these laws.

Another bill supported by the Association and the Department would permit the county board in a county which desires to do so, to create a county weed control department. This department would be in charge of a county weed control commissioner who would supersede the township or road district weed commissioner. It is thought that the county weed control department could have spraying and other equipment for the control of weeds and that this equipment might be made available to landowners for a fee sufficient to cover operation costs. In a number of counties, the present arrangement is ineffective and it is thought that better results could be achieved under a county department.

Calfhood Vaccination

At present calves vaccinated between four and eight months of age are allowed to move freely until they reach the age of 20 months, even though they react to Bang's tests. Legislation to increase this age limit to 30 months, approved by federal authorities and practising veterinarians, was not opposed by the IAA. It has passed and is now effective.

Fertilizer Tags

The IAA approves the proposal of the division of foods and dairies of the State Department of Agriculture to do away with tags on fertilizer bags which are used only to collect department fees. The quality analysis would still be carried on the bag.

Daylight Saving Time

Farmers have consistently opposed daylight saving time. It results in many disadvantages to them and is confusing. However, only about 20 per cent of the people of the state live on farms. Daylight saving time is favored by urban groups. It would be impossible, the IAA believes, to secure legislation prohibiting daylight saving time during the summer months. If uniformity is to be had, it probably can be secured only by placing the entire state on daylight saving time.

Minimum Age for Drivers' Licenses

Legislation has been introduced to raise the minimum age for a driver's license from 15 to 17 years. The IAA would amend this proposal to permit children of 15 years attending high school, where there is no public transportation, to drive to and from school, and in other cases to provide that the minimum be placed at 16 years.

Butterfat in Ice Cream

The IAA is supporting legislation to increase the content of butterfat in ice cream to 12 per cent by weight of milkfat. During the war it was reduced to 10 per cent.

Farm Storage of Gasoline

The IAA safety department and the personnel of the Illinois Farm Supply Company have made suggestions to the IAA board of directors to govern the storage of inflammable liquids above ground. The IAA legal department is preparing a bill incorporating standards to govern such storage.

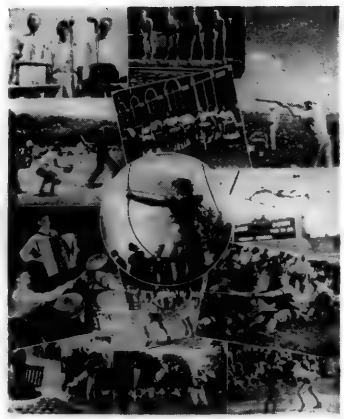
Free Gate at State Fair

The proposal of a free gate at the state fair was not opposed on the grounds that the IAA has long insisted on a policy that all pay or all be admitted free.

Albert Webb, IAA director from the 25th district, conducts a district meeting of Farm Bureau leaders at Carbondale. This is one of the regular meetings held by IAA directors in their district. At this session, Farm Bureau leaders asked for an open season on fox hunting for Southern Illinois, and voiced opposition to further establishment of wildlife preserves in the Crab Orchard area.

This is the Illinois Fruit Growers Exchange's new cold storage building which is expected to be completed this summer. It will have a capacity of 60,000 bushels of fruit stored in baskets and somewhat more when stored in boxes.

Bigger & Better Sports Festival



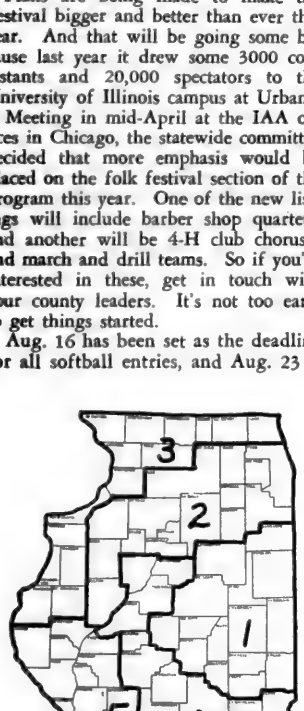
KEEP August 28 and 29 open dates on your calendar!

That's right — they're the days for the eighth annual Illinois Farm Sports Festival — the biggest fun event of its kind in the country.

Plans are being made to make the Festival bigger and better than ever this year. And that will be going some because last year it drew some 3000 contestants and 20,000 spectators to the University of Illinois campus at Urbana.

Meeting in mid-April at the IAA offices in Chicago, the statewide committee decided that more emphasis would be placed on the folk festival section of the program this year. One of the new listings will include barber shop quartets, and another will be 4-H club choruses and march and drill teams. So if you're interested in these, get in touch with your county leaders. It's not too early to get things started.

Aug. 16 has been set as the deadline for all softball entries, and Aug. 23 is the deadline for all other entries in the Festival.



Above are the six new districts which the state has been divided into for Sports Festival competition.

It also was decided to have the counties set up in 32 districts for Rural Youth Softball competition this year. District winners will compete at Urbana, and points also will be given for participation in district contests.

In order to spur competition this year, the state has been redistricted for the Festival. The map illustrated on this page shows the counties in the new districts.

Wrestling is being eliminated from the 1947 festival because of the past record of few entries, but tug 'o war will be a colorful event again.

The women plan to give more promotion to their events this year. Both teams and individuals will compete in table tennis, shuffle board, horseshoes and chair quoits. There will be two divisions in girls' table tennis, one for 4-H members and an open division for those over 16.

Softball will continue to be a big drawing card at the Festival with bowling nearing the top of the list.

A committee was scheduled to meet May 1 to work out the entertainment programs for the two days of the Festival program. There is considerable support for making the Friday afternoon program as big an affair as the Thursday night program in the University Memorial Stadium.

The Friday afternoon session usually has been held near Huff gym in front of a few temporary bleachers. It has been suggested that the Friday session be held in the Stadium and a special award ceremony be held to give proper recognition to Festival winners.

Chairmen named to the Festival events are: L. B. Culver, U. of I., woodchopping; Kenneth Flake, Henry, swimming; Mrs. Louise Foster, Bond, shuffleboard; Oliver Gaebe, U. of I., swing festival; Helen Garrison, Jefferson, table tennis; Lloyd Graham, Kankakee, skeet shoot; D. E. Hall, U. of I., 4-H physical fitness; H. W. Hannah, U. of I., rifle shoot; Ebb Harris, Grayslake, baseball; James Holderman, Grundy, trap shoot; A. C. Johnson, Kane, schedules; Don Karnes, IAA, track; Emmett Keim, St. Clair, 35'ers softball; Mrs. Orla Kemper, Marshall-Putnam, chair quoits; Mary Kitchens, Winnebago, girls' track; Duane Kuntz, Country Life, farm advisers versus IAA staff softball.

D. E. Lindstrom, U. of I., folk festival; Ellsworth Lyon, IAA, Rural Youth softball; Ralph McKenzie, U. of I., square dance jamboree; Charles Mayfield, IAA, co-chairman, special programs; F. E. Morris, IAA vice-president, softball; O. O. Mowery, Macoupin, all county softball; Eugene Mosbacher, McLean, county league softball.

J. T. Nelson, IAA, tabulation of results; Elizabeth Pace, DuPage, clock golf; W. B. Peterson, Illinois Farm Supply, co-chairman of special programs; E. I. Pilchard, U. of I., 4-H softball; Sam Russell, IAA tug 'o war; Lillian Schrader, Jersey, knot tying; H. J. Snider, U. of I., horseshoes.

Margaret Van Schoick, Wayne, girls rifle shoot; Clareta Walker, U. of I., co-chairman, women's events; Ray Watson, Mason, scoreboard and announcements; W. W. Whitlock, IAA, facilities; Jerry Trimble, Champaign, co-chairman, information.

Miss Eureth Freyermuth, LaSalle, ladies swimming; Miss Virginia Guthrie, Moultrie, dart throwing; Miss Miriam Morgan, Rock Island, ladies horseshoes; Mrs. Jane Pretchett, Shelby, ladies archery.

E. J. Barnes, Richland, volley ball; C. H. Becker, Illinois Farm Supply, bowling; Helen Bennett, Montgomery, ladies' bowling; William Bunn, Champaign, room reservations; Mrs. Clarence Castle, Will, girls' 4-H softball; Robert Castle, Country Life, umpire-in-chief; John Cox, IAA, co-chairman, information, and John Bryant, DeKalb, reporters.

LETTERS TO THE EDITOR

AGAINST CONTROLS

In the March issue of the IAA RECORD you asked for the opinions of those who oppose government control of production. Although I am not now a Farm Bureau member, I have been for many years. My son has taken over my membership. Therefore, it is not altogether inappropriate that I should express my ideas in the RECORD.

It is easy to list some 22 reasons why we should not tolerate government production control, let alone ask for it. A few of these reasons are of tremendous importance because they have to do with the future freedom of not only farmers but all the people of the United States.

That reasons against government control of production have been asked for by the editor of the RECORD is a hopeful sign that IAA officials are beginning to question their wisdom in preaching to Farm Bureau members the doctrine of price regulation and production contols since Henry Wallace first introduced the doctrine in the depression period.

Now that the membership has been so thoroughly trained, it will be difficult to induce them to swing to the opposite. However, if Farm Bureau officials recognize their responsibility, they can follow no other course than to try.

The following is a very concise outline:

1. Controls generate more controls. When controls develop loopholes, as they always do, or cause disastrous results, the remedy is to clamp down more controls.

2. When controls are used, there are always evasions which largely render the controls ineffective.

3. Wholesale evasions induce contempt of the law, undermining the moral stamina of the people.

4. Controls, subsidies, and government payments tend to lower efficiency, as the individual relies on the government rather than on his own efforts.

5. Controls destroy self-reliance. When an individual is limited in his efforts, he gives up trying to do for himself.

6. Controls promote high cost farming. In a free economy the successful farmer is constantly seeking lower costs. Restraints make this more difficult.

7. Controls destroy the initiative and enterprise of the farmer. Any limitation lessens the opportunity for exceptional rewards for exceptional performance.

8. Likewise controls for the same reason discourage attempts to attain individual excellence, and narrow the fields in which excellence can be attained.

9. Farming must be managed by the man on the job. Economic controls are management by men in Washington who do not know the particular circumstances of each farm.

10. As always has happened in the past and likewise in present times in foreign countries, controls followed by more controls result in the farmer first becoming just a laborer, and then a slave.

11. Controls necessitate government by bureaus.

(a). Government by bureaus is government by decree. (b). Bureaucrats are accusers, judges, and juries all in one. (c). Inevitably bureaucratic government becomes dishonest. (d). It is practically impossible for individuals to obtain redress for wrongs. (e). Bureaucrats use their power to introduce "reforms". We are now hearing rumors that farmers who will not do this and that are not fit to farm the land and must be removed.

12. Controls will increase the number of government employes with, for the most part, non-productive, economic parasites, who must be supported by the producers.

13. Controls increase the cost of government. Administration, supervision, and policing cost tremendous sums. That means higher taxes.

14. In all bureaucracies the tendency is for the establishment of a vested interest by the bureaucrats. This then becomes the main object of regulations. The result is poverty for the people.

15. It is impossible for an individual or bureau to regulate satisfactorily prices and production for only one product, let alone for many. Who can set a correct price or quantity of production for corn which has dozens of different uses in all parts of the country, subject to various transportation rates, labor conditions, etc.?

16. Bureaucrats are political appointees. Controls will be established and administered by them. These politicians will be appointed and not elected by the people. The result is that the politicians will control the people. The people will not control the politicians. This is not representative government. Good-by democracy!

17. Controls can be and have been changed without notice for reasons other than the benefit of farmers. Why should the Republicans keep the Democrats' promises, and vice versa?

18. When securely established, controls often are used for purposes other than those originally intended. They often are used to force acceptance of irrevelent regulations in other fields, or to punish those who have not conformed in other matters.

19. Frequently an individual farm to attain efficiency, and sometimes even to survive as a business enterprise, must produce more than alloted.

20. Controls are infringements of the rights of private land ownership.

21. The essence of all dictatorships, whether Communist or Fascist, is control of the people by the government.

22. To enforce controls effectively national police, a Gestapo, an N.K.V.D. as in Russia, must be set up. We will become a police state, and government will be by fear — not by consent.

Let us stay free and prosperous.

"The price of liberty is eternal vigilance."

CALENDAR SUGGESTION

I notice in the RECORD many congratulations on the Lincoln calendar the Farm Bureau has put out this year. It is a nice calendar and one that I believe every Farm Bureau member enjoys and appreciates.

I presume you will soon be designing a calendar for 1948, and I would suggest that you put out a similar one based on the life of Washington or Jefferson. These men were leaders in agriculture as well as in other ways. I am sure such calendars will be appreciated again next year.

John M. Quindry
Wayne County

We like Mr. Quindry's suggestion and will keep it in mind for 1949. Our 1948 Calendar featuring American scenes already has gone to press.

VOTELESS HIRED MAN

Last week Kane County Farm Bureau came through a very successful Farm Bureau membership drive.

We are living in a world of thought and principles based on evil and good thoughts. We, the older members of Farm Bureau, have seen the results of sound, cooperative, instructive and neighborly thoughts. Our 4-H progress also has been based on cultivated thought on *right and wrong* ways of raising livestock, improving crops, and bettering home conditions for a better and a happier rural life.

Now our rural youth of today are our up and coming Farm Bureau and Home Bureau members of tomorrow and that means your boy and mine. They are our hired men, learning by doing — not forgetting our young women on the farm, our future home makers.

By the time you probably are wondering what is on my mind. The problem is this: Our Farm Bureau made new amendments, one being that a hired man may get Farm Bureau auto insurance by joining Farm Bureau and paying his $15 membership. Now that's fine! But it also says that the hired man has *NO vote*. Now you tell me, how can you *be* a member of Farm Bureau and still *not be* a member? Is Farm Bureau based on commercialism?

When a lawyer has a case he looks for a weak link in thought and when he sees his opening the case is his.

You have a mighty weak link of thought in the hired man amendment, that! The big insurance companies are trying to corrupt our Farm Bureau set-up and poison the young man's or young woman's thoughts towards every good trait we have cultivated in them. It also makes it harder for our future Farm Bureau drives.

Farm Bureau directors wake up! Stop and take a look at your 1947 calendar. Look that man Abraham Lincoln in the face. Stop to think of his life based on good godly thoughts and equal rights for all.

Yours for a healthy and sound thinking Farm Bureau,

Kai S. Warner
Kane County

IAA Organization Director O. D. Brissenden makes the following answer:

"Your opinion on this matter is certainly appreciated. It should be pointed out, however, that the recent changes in policy resolutions approved at the 1945 annual meeting did not change the policy to which you refer. The by-laws and policy resolutions have for many years provided for two classes of membership — associate and regular. These policies were established with the approval of the membership and can be changed only with the approval of the membership.

"Regular membership is reserved to those who are actual producers of agricultural products. The classification of the hired man as an associate member is based on the thought that he does not share in the economic hazards of production and is the employe of a producer of agricultural products rather than the producer of agricultural products. As an associate member he does have all the advantages of services offered by the Farm Bureau with the exception that he cannot vote or hold office. These privileges will come with regular membership when he becomes a producer of agricultural products in his own right."

Membership Hurdles 140,000 Mark Set For 1947

COUNTY Organization Directors and the IAA organization department may take a bow. With the April 1 report on Farm Bureau membership, IAA Organization Director O. D. Brissenden announced that the year's goal of 140,000 has been surpassed. The official report revealed that membership on April 1 had reached 142,375!

Congratulations from the American Farm Bureau Federation were extended by Wilfred Shaw, former IAA director of milk marketing recently promoted to secretary-treasurer of the AFBF.

The new membership figure reflects the steady growth in Farm Bureau membership during the past several years. When the goal of 140,000 by Sept. 30, 1947 was set at the IAA annual meeting last year, it appeared to be a sizeable figure to shoot at. But when IAA Director Otto Steffey, chairman of the IAA organization-information committee, challenged the organization department to raise the membership to 140,000, Brissenden said his organization men would do it.

At that time, Brissenden said: "The growth in Farm Bureau during the past year has been phenomenal. It should continue during 1947 and the goal thrown out by Mr. Steffey should be attained."

The organization department has done that and more. From Oct. 1, 1946 to April 1, 1947 membership has risen 15,649 as compared with an increase of 15,174 from Oct. 1, 1945 to Oct. 1, 1946.

President Charles B. Shuman of the IAA echoed his statement of last November when he said: "This rapid advance is a tribute to the sound program of service to farmers offered by your organization. It is also a tribute to the ability and loyalty of our organization staff and especially to the thousands of Farm Bureau members who have served as volunteer workers."

BOND COUNTY FARM ADVISER HAROLD KUHNEN DIES OF HEART ATTACK

Harold Kuhnen, 44, farm adviser at Bond county since 1944, died suddenly April 13 of a heart attack, according to word received as this issue of the IAA RECORD went to press.

Mr. Kuhnen's death was a shock to his Bond county friends and to his coworkers in farm adviser circles in Illinois. The warmth of his friendly personality will be greatly missed in Farm Bureau circles.

Mr. Kuhnen was born Aug. 23, 1903, in Highland. He was graduated from the University of Illinois in 1925. Following graduation he worked as a fieldman for Beatrice Creamery Company at Champaign and Charleston. He went to Greenville in 1938 as fieldman for Pet Milk Company, and in September, 1944, he was named farm adviser in Bond county.

Mr. Kuhnen leaves his wife and three children: Ted L., 11; Linday Kay, 4, and Louis 2½ years old. He also leaves his mother and one sister of Highland.

TAX RATES STILL MAINLY A LOCAL MATTER

THE first tax bills since the adoption of the 100 per cent assessment program have been or soon will be received by Illinois property taxpayers. In many instances the taxes are greatly increased.

There is a tendency for local officials to disclaim any responsibility for this increase and to attempt to shift all responsibility for increased taxes to state authorities.

While action of the state legislature and state authorities made a part of this tax increase possible, the entire responsibility for tax increase cannot be placed upon the state. The 100 per cent assessment program was forced through the 1945 session of the state legislature in its closing days with a narrow vote margin by a bi-partisan combination of the state administration and the Chicago City Hall. The Illinois Agricultural Association and others bitterly opposed this legislation, pointing out some of the confusion and the increased taxing power likely to result.

The individual property tax bill is determined by two principal factors, namely, the amount of the assessment on the property and the amount of levy or demand made by the local officials. The 100 per cent assessment program raised the amount of the assessment on all property.

The governing body of each local governmental unit, whether county, school district or other agency, determines the amount to be levied or demanded of property within their particular unit. If the local governmental officials have carefully estimated and anticipated the requirement of their particular governmental unit and then have levied only a sufficient amount to meet these needs, the taxes ordinarily will not be greatly increased.

The governmental unit would levy or demand only that amount which it reasonably needs, regardless of the fact that it may have a great deal of additional, unused taxing power. It would not use the maximum rate.

However, if local officials, without taking the trouble to carefully and intelligently estimate their needs, blindly levy the maximum rate permitted by law regardless of the amount that such a levy may produce, then the tax bill may be greatly increased. The amount of money produced under the maximum rates permitted by the 100 per cent assessment program may substantially exceed the needs of the particular governmental unit.

The action of the state in adopting the 100 per cent assessment legislation gave local government units the means by which they may substantially increase local taxes. But the amount of the local levy or demand, what the taxpayer has to pay, is determined by the local governmental officials.

In the past, taxpayers too often have concentrated attention only upon the amount of the assessment upon their property. They have ignored the amount of the levy or demand made by the local officials. Under the present law, it is more important than before that attention be given to the amount of the levy or demand made by the local officials. With greatly increased taxing power, this demand ordinarily will determine the amount of the taxes extended and the amount of the tax bill.

Your Child and Rural Schools

IF RURAL people will keep the welfare of the child as the main guide post in school reorganization, there's a good chance they will avoid shortsighted planning. This was one of the major points brought out at the recent Illinois Conference on Rural Education held recently at Springfield. The conference, attended by county school survey committee members, rural educators, school officials and representatives of various interested groups, was sponsored by the Illinois Rural Education Committee. Dr. D. E. Lindstrom, University of Illinois, is chairman, and John K. Cox, IAA director of rural school relations, is vice-chairman of the committee.

School reorganization, it was reported, is moving ahead in Illinois, but some folks are "jumping the gun" and forming "protective" school districts in order to prevent being absorbed by other groups.

It also was pointed out that some reorganization isn't much improvement over the old setup. The problem won't be solved by consolidating a couple of small schools.

Earl J. Hughes, chairman of the McHenry county school survey committee, and a member of the board of directors of the Illinois Agricultural Association, asserted that the reorganization in progress must be integrated with the final plan of the survey committee.

Resolutions committee drafting action on rural school problems at the Illinois Conference on Rural Education, left to right, are: Luther Black, office of state superintendent of public instruction; Lyman Bunting, Ellery, IAA director; Harlan Boom, chairman, Coles superintendent of Schools; Mrs. J. S. Woodburn, Rock Island; Mrs. Joseph May, Libertyville; John Butterfield, Christian county; George Hayes, Henry county survey committee chairman, Dr. J. A. Spiekerman, DeKalb survey committee, and Dr. D. E. Lindstrom, U. of I.

The question of bad roads as a barrier to good reorganization plans was brought up. But one school survey member said they couldn't afford to sit around with poor schools until the roads were approved.

In some areas, such as Pulaski county, the problems of poor schools and poor roads are being attacked at the same time.

Pulaski county folks are recommending a county unit school district and a county-wide road district.

The unit school district is being favored because the folks want a 1947 educational model that will provide for growth and development with changing conditions. The unit district is flexible enough so that it can go in pretty near any direction. This type of district is one that maintains schools for grades one to twelve under one board of directors. It can have as many attendance units as desired and it makes the most efficient use of teachers, equipment, buildings and transportation.

Adequate representation on the board of directors of a unit district eliminates any fear of losing local control.

While the Illinois Conference on Rural Education is not an action group, its members represent many action groups, and therefore drafted some resolutions to show its position on various school problems.

The conference urged speedy enactment of legislation to enable the recommendations of county survey committees to be put into effect simply and practically.

Specifically they asked: for legislation requiring the approval of the county survey committees before further changes in present district boundaries may be considered.

Provision for a partial report or other means for a survey committee to call an election in certain territory prior to the complete report.

Provision for the extension of time until preliminary and final reports are due to enable committees to take advantage of pending legislation.

Provision of special financial inducements for the formation of community units districts serving pupils from the kindergarten through the 12th grade, and through the 14th grade where advisable by special state aid provisions for transportation, current educational and building programs.

The granting of additional power to the state advisory commission especially in matters pertaining to county boundary lines where local committees have not reached satisfactory agreement.

The drastic and early limitation of recognition to small high schools which are far less defensible than small elementary schools and far greater factors in impeding sound reorganization; to this end we deem 20 pupils in average daily attendance per grade as not too drastic a minimum in 1948.

They also recommend that legislation be enacted to permit the inclusion of a dual control district in a consolidated district by one election called under the school survey law, the whole consolidated district to be a unit control district.

Endorsement also was given to a single salary schedule of equal pay for equal training and service and urged immediate positive steps to accomplish this end.

A state survey committee was formed by the conference and held its first meeting March 28 in the Illinois Agricultural Association offices, Chicago.

Members of the committee are: Ralph L. Ostrander, McHenry county, chairman; George Hayes, Henry, secretary; Frank Shetter, Rock Island; R. C. Moore, Macoupin; Jeffrey Hughes, Franklin; H. P. Ash, Macon; Thomas J. Culbertson, Effingham, and H. T. Marshall, LaSalle. Purpose of the committee is to facilitate the study of mutual rural school problems and to promote legislation designed to make sane reorganization possible.

COUNTRY MUTUAL CASUALTY COMPANY

608 South Dearborn Street, Chicago 5, Illinois

IAA Names New Director and New Manager

I. E. PARETT, 50, Danville, Vermilion county farm adviser since 1935, has been named secretary of general services for the Illinois Agricultural Association, according to an announcement by President Charles B. Shuman.

I. E. Parett

This is one of the new staff posts set up through an administrative reorganization plan approved by the IAA board of directors last fall.

IAA departments which are under the direction of the secretary of general services are research, property taxation, road improvement, rural school relations, safety and public health, veterinary medical relations and soil conservation activities. A director of the latter department is yet to be named.

Parett is scheduled to take over his new duties June 2. A native of Indiana, Parett was graduated from Purdue University with a degree in agriculture in 1922. Following graduation he taught vocational agriculture and served as principal of Saunemin Township High School.

In 1930 he was named farm adviser of Morgan county and continued in that position until Sept. 1, 1935, when he went to Vermilion county as farm adviser. At the present time Parett is vice-president of the Illinois Farm Advisers Association.

He has been active in civic and church affairs in Danville, a member and former Sunday School superintendent of St. James Methodist Church and a past president of Danville Rotary Club.

His family is comprised of Mrs. Parett, a son, Dick, a daughter, Janet, both students at the University of Illinois.

DALE A. Rouse, 35, a fieldman for the livestock marketing department of the Illinois Agricultural Association for the past 18 months, has been named manager of the Illinois Wool Marketing Association. He will assume his new duties June 1.

Dale Rouse

Rouse has been a fieldman in the east central Illinois district with headquarters at Danville where he lives. He is a former employe of the Vermilion County Livestock Association.

He entered army service in 1942 as a private and rose to the rank of captain in field artillery serving at the battlefronts in France and Germany.

Rouse was born on a Wyoming cattle and sheep ranch and came to Illinois in 1937. He is married.

He will take over the duties formerly handled by Secretary Manager S. F. Russell and will devote his time to the development of better wool marketing facilities and the encouragement of greater participation by Illinois farmers in cooperative wool marketing.

. . . HE LOVES ME NOT

HE LOVES ME!

YES, THE BOSS DOES LOVE YOU, PORKY, for the way you, and other pigs like you, have helped retire that old plaster on the farm! That's why you've been vaccinated with Farm Bureau Serum — to make sure you bring a return on the investment he has in you.

REMEMBER: The smaller the shoat
The cheaper the shot!

ILLINOIS FARM BUREAU SERUM ASSOCIATION

Shorts in the News

Eldon Powel, 33, farm adviser in Brown county, has accepted a position with Illinois Farm Supply Company as district sales manager in the feed and plant food department, distribution division, effective June 1. Powel will serve approximately 28 member companies in the DeKalb and Bloomington districts.

Powel became farm adviser in Brown county two years ago, after previously serving Warren county as assistant farm adviser and organization director. Prior to his entry into Farm Bureau work, he spent almost seven years as a vocational agriculture teacher. He is a graduate of the College of Agriculture, University of Illinois, class of 1938. He is married and has one daughter four years old.

An Australian, Dr. Alexander K. Sutherland, has been added to the staff of the College of Veterinary Medicine staff of the University of Illinois. Sutherland graduated from the University of Sidney in 1937. Another addition to the college is Dr. J. E. Prier, a 1946 graduate of Cornell University.

Herman L. Schuette has been hired by Douglas and Moultrie county as youth assistant in charge of 4-H and Rural Youth activities. Schuette attended the College of Agriculture and until recently has been farming in Madison county.

Manning Kessinger, Macoupin county, is the new assistant farm adviser for Champaign county. A graduate from the College of Agriculture at Urbana and veteran of the last war, Kessinger has been teaching vocational agriculture at Tolono.

American Farm Bureau President Edward A. O'Neal and state Farm Bureau Presidents Ransom Aldrich, Mississippi, and Hassil Schenck, Indiana; and AFBF Research Director T. K. Cowden are representing Farm Bureau at the International Federation of Agricultural Producers conference in The Hague, Holland, May 12-23.

August 28 and 29 are the dates set for the eighth annual Illinois Farm Sports Festival which will be held again on the campus of the University of Illinois at Champaign-Urbana.

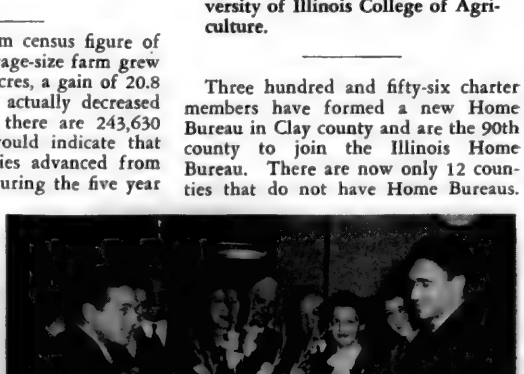
Iowa Farm Bureau predicts a membership of 125,000 and has already exceeded its 1947 goal by more than 1,000 members. The goal was 115,000 and now membership is more than 116,000.

Henry county last year on an experimental basis offered its members an insect spraying service for barns, barnyards and livestock. About 90 farms were sprayed, principally for flies and fleas. It proved so successful that a new portable spray outfit has been ordered for next season.

The ninth state-aid cancer diagnostic center has been opened at the Passavant Memorial Hospital in Jacksonville. Other clinics are located in Chicago, Evanston, East St. Louis, Champaign, Rockford, Springfield, DuQuoin and Peoria.

Havana River Grain Company will build a large ear corn processing building in connection with the new terminal elevator in Havana. It will be a wooden building with bins for 12,000 bushels of ear corn and 8000 bushels of shelled corn.

Although the farm census figure of 1945 shows the average-size farm grew from 174 to 194.8 acres, a gain of 20.8 acres, farm tenancy actually decreased by 402,850. Since there are 243,630 fewer farms this would indicate that 160,000 farm families advanced from tenants to owners during the five year period.



Marking the 20th anniversary of the Country Mutual Casualty Company, President Charles S. Shuman of the Illinois Agricultural Association (right) cuts the birthday cake and offers first slice to Frank V. Wilcox, Country Casualty manager.

Walter S. Batson, Shelbyville, has been employed by Illinois Farm Supply Company to head up member company relations activities, according to an announcement by C. H. Becker, manager. Batson will take up his new duties June 1. Batson has been farm advisor in Shelby county for the past 16 years. Previous to his going to Shelby county, he served as vocational agriculture teacher in Ridgefarm, Ill. He was born and reared on a farm in Wabash county and received his degree in agriculture from the University of Illinois in 1924.

Batson's work will bring him in contact with boards of directors and managers of member companies of Illinois Farm Supply Company on matters of policy and genetal relationship subjects. This position was created in the reorganization that took place in Illinois Farm Supply Company Jan. 1.

Effingham county opened its new cooperative stockyards at Effingham April 1. Frank Grieme has been hired as manager. Hogs and veals are being bought direct. Sheep and cattle will be bought or shipped to a terminal market as desired by the producer.

Hadley R. Read, assistant editor in agricultural extension at Iowa State College, will become extension editor of the University of Illinois College of Agriculture in June.

The rural pastors' short course will be held May 19-23 at the University of Illinois College of Agriculture.

Three hundred and fifty-six charter members have formed a new Home Bureau in Clay county and are the 90th county to join the Illinois Home Bureau. There are now only 12 counties that do not have Home Bureaus.

DAIRY FARMER FINDS IT PAYS TO ADVERTISE

By W. J. SWAYER*
President, Pure Milk Association

THE American Dairy Association is the dairy farmer owned and controlled medium through which he is enabled to convey to the consuming public the true story of his unexcelled health-giving product. Throughout the history of this relatively young organization which was conceived by the dairy farmer himself, he has been slowly but soundly building an instrument which will continuously enable him to bring to the consumer on a national basis through advertising, promotion and research, a better understanding and appreciation of the value of dairy products.

Individually, the dairy farmer can do little to advertise his product. Collectively, through pooling a very small individual contribution, he can create a fund which will by proper application return him manyfold his investment.

The effectiveness of the American Dairy Association has been proved. The need to expand and enlarge the program is apparent to all. Long range planning is required. I know that every dairyman, regardless of the outlet for his milk, would insist, if he were properly informed, that this activity be expanded, and would willingly give the relatively small contribution to make it possible. The job of informing the average dairyman rests with the leaders. Every dairyman's organization recognizes the need and endorses the program. The Illinois Milk Producers Association and Prairie Farms Creamery affiliated with the Illinois Agricultural Association have endorsed the expanded program.

When we as dairy farmers realize that by investing 1 cent per pound butterfat produced in the month of June, we are enabled to carry out a year-round sales and promotional activity for our product, we would be poor businessmen to fail to take advantage of it. In other words, by investing less than 2/10 of 1 per cent of the value of our butterfat, we can develop a national year-round advertising program. Where can we make a better investment?

*Vice-president, American Dairy Association; president, Dairy Products Promotion.

Dairy Products Promotion, the Illinois unit of the American Dairy Association, has endorsed the expanded program. The collections will be made from June deliveries at the rate of 1c per pound butterfat. Insist that the buyer make the deduction and forward it to Dairy Products Promotion, Inc., 28 East Huron Street, Chicago, Illinois.

I know you feel as I do that a job that is worth doing is worth doing well. Let us all do our part to make our American Dairy Association even more effective than it has been in the past.

GRAIN MARKETING PROGRAM MAKES RAPID PROGRESS

(*Continued from page* 9)

The IAA marketing committee recommends that if new plants are built to serve more Farm Bureau members, it would be better to re-allocate some of the present territories than to establish branch plants within the existing territories.

New plants, the committee recommended, should be constructed at strategic points in the territory, with the chief objective being better service to producers. New plants should be so located that they will bring about the least amount of interference with present facilities.

The IAA committee further believes that the sale of stock to build such facilities should take place in the vicinity of the plant, and that stock held in present facilities by producers located in the newly allocated territory, be adjusted.

O. D. Brissenden, IAA director of organization, in announcing that Illinois Farm Bureau membership has passed the 140,000 mark, asserted that the big job ahead is to see that every member has an opportunity to use the services of his organization. He declared that the participating member does not cancel his membership, but the non-participating member cancels with regularity.

Other reports given at the Springfield meeting which appear on other pages of this issue of the IAA Record were: fertilizer program, by Field Secretary Metzger; wool marketing, by L. L. Colvis, IAA secretary of marketing; state legislative report, by Paul Mathias, IAA secretary, and national legislation, by IAA President Charles B. Shuman.

FERTILITY BILL WOULD ENRICH NATION'S SOIL

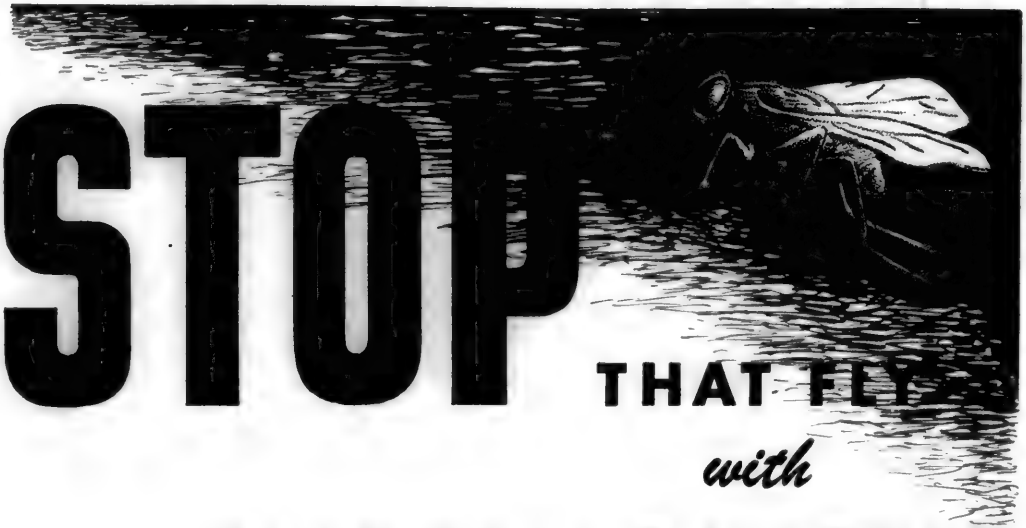
(*Continued from page* 8)

counties in lieu of taxes for lands acquired by the government to carry out the purposes of this act.

There are two principal items of cost in this program. Construction of the Mobile plant would cost approximately nine million dollars. It is contemplated that when the plant goes into operation, it will be largely self-supporting, with the possible exception of overcoming some production problems in connection with the new process. It is contemplated that within five years, the plant could be sold and presumably most of the public money invested therein recovered.

The second substantial cost is that of the test demonstration program. This cost is estimated at 16 million dollars a year for perhaps ten years. At the end of that period, which could probably be reduced approximately one-half, about half of this 16 million dollars would be used to place assistant county agents in counties to assist in conducting the educational phase of the program. The remaining half would be used for a few years to provide part of the fertilizers used by farmers cooperating in the test program.

The bill attempts to get a national soil fertility program established and in general use by farmers with a minimum of government in commercial business.



STOP THAT FLY

with

BLUE SEAL FLY SPRAY

The new Blue Seal Fly Spray will really do a fly killing job! It will knock 'em down and put 'em away for keeps! The ½% of D.D.T. works on the knocked-downed flies to finish them off. Blue Seal Fly Spray is a superior product which has been extensively tested on Illinois farms.

You'll get **MORE MILK**
FROM FLY-FREE COWS

Fly-free cows don't waste time and energy fighting flies. They're comfortable and happy and use the energy thus saved to produce more milk.

After being sprayed with Blue Seal Fly Spray, cows will remain fly-free all day due to its high repellency qualities. Your Blue Seal salesman has other special pest control products, too. Ask him about Blue Seal Fly Killer, 5% D.D.T. Oil Spray, 25% D.D.T. Emulsion Concentrate, Aersol Bombs, and 50% D.D.T. Wettable Powder.

Four of the men who helped with the organization of the Illinois Fruit Growers Exchange back in 1921-22 talk over old times at the Fruit Exchange annual meeting in Carbondale. Left to right: W. L. Cope, Marion; J. A. Gage, Jefferson; E. A. Bierbaum, Union county farm adviser; and R. B. Endicott, Pulaski.

FRUIT GROWERS SEE GOOD CROP • PRICE

"A GOOD fruit crop at a good price" was predicted for 1947 by L. L. Colvis, retiring manager, at the 26th annual meeting in late March of the Illinois Fruit Growers Exchange held in Carbondale.

Colvis told the membership that the Fruit Exchange handled more than a million dollars worth of fruit last year for Illinois growers and forecast an even bigger year in 1947 with higher quality fruit with a wider reputation.

Calling for support of the Fruit Exchange by southern Illinois orchardists, President A. O. Eckert, St. Clair county, said: "Agriculture in the future will be no stronger than its cooperatives. Keep them strong and agriculture will remain strong."

"Service to the member will be our first interest," T. L. Davis, new manager of the Fruit Exchange, said as he was introduced to the membership for the first time. Davis said he expected the organization's new cold storage building to be in operation by harvest time.

O. D. Brissenden, IAA organization director, paid tribute to the "folks in the fruit belt who despite frost, insects, disease, and long years of waiting have faith in the fruits of hard work. Keep doing the best job you can in your community and you will be doing all America a service."

The organization's subsidiary Fruit Exchange Supply Company distributed patronage refunds valued at $24,720.56. The refunds went to 800 patrons who bought the record-breaking amount of $549,349.45 of orchard supplies, insecticides and fertilizers during the fiscal year ending Dec. 31, 1946.

Half of the patronage refunds were paid in cash and half in stock on all dividends of $500 or less. On those over this amount a maximum of $250 in Class A six per cent preferred stock is issued and the balance in cash.

The increase in stock was authorized by the membership at the annual meeting to provide additional finance for the efficient operation and conduct of the business. The company is now authorized to issue 4000 shares of preferred stock and 3000 shares of common.

About 400,000 bushels of fruit and vegetables, mostly apples, were marketed by the Fruit Exchange last year, according to the manager's report. The volume was slightly under 1945 because of the short peach crop.

The Fruit Exchange last year handled a record apple crop of high quality amounting to 223,456 bushels. Retiring Manager Colvis said that precooling of peaches and federal inspection services would be continued next year. He attributed the enviable record of the Fruit Exchange to these factors and the wide area of distribution.

Colvis pointed out that Illinois fruit was eaten last year in every state from Massachusetts to Nebraska and from Minnesota to Texas.

Four directors whose terms expired in March were reelected. They are Arthur Foreman, Pike county; H. E. Hartley, Marion; D. B. Kirtland, Crawford; and Trevor Jeffries, Jefferson. Officers of the Fruit Exchange also were reelected as follows: A. O. Eckert, St. Clair, president; E. D. McGuire, Jackson, vice president; and F. G. Anderson, Union, secretary-treasurer.

Other speakers included Dr. Chester Lay, president of Southern Illinois Normal University; S. C. Chandler, state entomologist; and Fred P. Bierer, Fruit Exchange Supply Company manager.

Board and management of the Illinois Fruit Growers Exchange, an IAA affiliate, are shown together after election of officers. Left to right, standing: H. E. Hartley, Marion; Lyman Creed, Marion; Trevor Jeffries, Jefferson; Dr. L. A. Floyd, Bond; L. L. Colvis, former manager of the exchange and now IAA secretary of marketing; and Secretary-Treasurer F. G. Anderson, Union. Seated: R. B. Endicott, Pulaski; William Beauman, Johnson; C. R. Boland, Edgar; President A. O. Eckert, St. Clair; T. L. Davis, manager; and Arthur Foreman, Pike.

NEWS and VIEWS

TWO FARM FAMILIES WIN CONTEST FOR BEAUTIFYING THEIR HOMES

TWO ILLINOIS farm families have been named district winners in the 1946 Farm and Home Improvement contest sponsored by the St. Louis Chamber of Commerce in cooperation with the Extension Service of the Illinois College of Agriculture.

These district winners are the G. A. Coles, Macoupin county, and the Clint Logans, Clay county, both Farm and Home Bureau members.

The awards were made during a Chamber of Commerce luncheon in St. Louis, March 26, in honor of the county and district winners. Six Illinois counties had entries in the contest.

The Coles and their four children live on a 280 acre farm near Palmyra which they have owned for the last nine years.

Outstanding improvements made to their home during the past several years include electricity, running water system, modern kitchen, bathroom, and basement.

Extensive improvements were made on farm buildings and a farm pond was erected, 40 acres tiled, and several soil improvement practices were put into effect during 1946. The family is active in school, civic, 4-H club and Farm and Home Bureau work.

The Logans, also district winners, live on a 115 acre farm near Louisville which has been their home for the past 38 years.

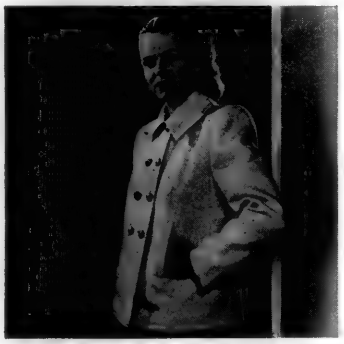
The Logans improved their farm home last year by installing a pressure water system, electricity, water softener tank, bathroom, and building a basement.

On the farm they concentrated on growing more and higher quality feed and conserving soil fertility. Logan raises purebred Shorthorn cattle.

The Logans are proud of the fact that they have given all three of their daughters a college education. Mrs. Logan has served as president of the Harter Community Club and is a member of the Clay county Home Bureau which was organized Feb. 24 of this year.

Mr. and Mrs. Clint Logan (left), Clay county, meet Mr. and Mrs. G. A. Cole, Macoupin county, at St. Louis. Both families were regional winners in a Farm and Home Improvement contest.

NAUTICAL NOTE



White wool is the big news in toppers for spring. Here's one of the season's newest coat patterns made up in fashionable white. Brass buttons, vertical slot pockets at the waistline and a pointed collar all add to its salty air. Wear it with blouses and skirts — or with dresses — or with your slacks and other sportswear. You'll find this coat simple to make because it presents no fitting problem. For free instructions send a stamped self-addressed envelope to Women's Editor, IAA RECORD, 608 South Dearborn, Chicago 5, Ill.

BAKED BEANS AND BROWN BREAD

Baked Beans

- 4 cups dry navy beans
- ½ lb. salt pork
- 1 cup New Orleans molasses
- 1 tsp. dry mustard
- 1 tblsp. salt
- ¼ tsp. pepper

3 cups boiling water (from simmered beans) Wash beans, pick over and soak for 3 hours in boiling water to cover. Cover, bring to boil in same water (to preserve minerals and vitamins) adding extra water if needed to cover well; skim; cook slowly until tender — about 50 minutes. Drain beans, reserving cooking water. Turn beans into bean pot or 3 quart casserole. Scrape rind of pork until white, score top by cutting down about 1 inch, and bury in beans with rind exposed. Mix remaining ingredients and pour over. Cover; bake in slow oven (325° F.) 3½ hours or until tender, uncovering during last hour of baking. If necessary, add more water, during baking. Makes 12 servings.

Brown Bread

- 1 cup bread flour
- 2 tsp. soda
- 1 tsp. salt
- 1 cup corn meal
- 1 cup whole wheat flour
- ¾ cup New Orleans molasses
- 2 cups sour milk
- 1 cup raisin or nuts (if desired)

Sift flour, soda and salt. Mix with corn meal and whole wheat flour. Mix molasses with sour milk; add dry ingredients. Beat well. If desired, add raisins or nuts. Steam 2 hours in greased molds filled two-thirds full and covered tightly.

for HOMEMAKERS

My Favorite Recipe

Plain Cake

1½ cups sifted cake flour
2 teaspoons baking powder
¼ teaspoon salt
4 tablespoons shortening
2 eggs
¾ cup Staley's Golden Syrup
1 teaspoon grated orange rind
½ cup milk

Sift together flour, baking powder, and salt. Cream shortening, add ½ cup of syrup, and cream until fluffy. Add egg yolks, one at a time, and beat well. Add sifted dry ingredients alternately with milk, stirring well after each addition. Add grated orange rind. Beat egg whites until stiff, add remaining ¼ cup syrup gradually, beating until mixture stands in stiff peaks. Fold into batter until well-blended. Bake in a greased 9-inch pan in a moderate oven (350 F.) for 25 to 30 minutes. Cool and frost as desired.

Mrs. B. J. Mills

HASN'T MISSED IN FIVE YEARS

Wayne county's fifth annual home bureau meeting was an occasion, at least in part, for tossing bouquets, according to Mrs. O. S. Wilkinson, county secretary. Mrs. P. C. Hill, who hasn't missed a meeting during the five years, was given special recognition. Mrs. Roy Fran, 4-H chairman, presented gifts to her fourteen 4-H club leaders. In addition, guests were welcomed from Richland, Edwards, Wabash and Jefferson counties.

ANTIQUES DRAW CROWD

A large crowd attended the antique exhibit held by the Kendall County Home Bureau. Several traveled many miles away to see the exhibit.

The exhibit included colonial and other eighteenth century glassware, silverware, linens and furniture. Furniture included cradles, beds, chairs and musical instruments, much of it more than 100 years old. The Home Bureau women conducting the exhibit were attired in dresses of periods dating back more than 100 years. The show was the climax of the evening with an antique auction, entertainment and exhibition square dance.

NEW HOME ADVISER

Mrs. Willis Case, Ford county publicity chairman, writes, "We are very fortunate in securing Miss Elizabeth Scott of Paxton, as our home adviser."

Shelby Rural Youth hear something about the road situation in their county from Charles Mayfield, director of the IAA's department of road improvement. President Clarence Schmitz is seated in middle of front row.

Rural Youth

By
ELLSWORTH D. LYON

Talk fests are getting under way early this year in various counties. Grundy exemplifies a good approach in preparation on the county level. For the April educational feature, President Harvey Ganzert called for volunteers for short talks. Eight Rural Youthers responded and drew the following topics upon which they spoke for two minutes. (1) school reorganization, (2) how can we have a better Rural Youth? (3) soil conservation, (4) is the younger generation going to the dogs? (5) does Grundy county need better roads? (6) which is more important, personality or good looks? (7) should nutrition be taught in the public schools, and (8) why is there an increase in auto accidents?

These short talks, making up all or part of the educational features, provide opportunity for a large number of young people to participate as well as build up a background of experience for all who take part.

Program Planning

Knox recently planned a six-month series of meetings built around personality development. The individual topics were chosen by the committee on the basis of needs and interests of the youth of the county. The month by month themes were planned as follows:

May 6-FORUMS:
Girls; Color in the room through accessories.
Boys: Use and care of farm machinery and tractor maintenance.

June 3-SYMPOSIUM:
"Health from the Ground Up" (Soil Conservation)

July 1-DISCUSSION (by small groups)
"Recreation" and a County Sports Festival

Aug. 5-INFORMATIONAL DISCUSSION in preparation for a Rural Youth tour which wiill be held on Aug. 29.

Sept. 2-DISCUSSION
School reorganization

Oct. 7-COUNTY TALK FEST

Each of the above topics planned so that a large number of members would have a part in each meeting and so that the entire membership may have the opportunity to participate by the end of the October meeting.

Young Married Groups

Rural young married groups are increasing in number in Illinois. There are 16 county groups which have been reported to date. Henry is the 16th.

The Rural Young Married People's group of Schuyler county enjoys a friendly game of Bingo.

SOYOIL

No. 90 RED BARN PAINT

The choice of Illinois farmers

This quality paint is a favorite with Illinois farmers. It protects the surface and improves the appearance of barns, sheds, corn cribs, and other farm buildings.

For a good barn paint, you can't beat No. 90 SOYOIL Red Barn Paint! Thousands of farmers in Illinois have proved its superiority. It is specially prepared for use in this climate.

You will be pleased with its rich color, its long-lasting qualities, and with its mildew-resisting properties. Here's a barn paint made for barns!

INTERIOR PAINTS

Now is a good time to re-decorate the interior of the house, too. A variety of colors and tints is available in the SOYOIL line. A choice array of pastel shades can be had in SOYLITE casein paints. Use of SOYNAMEL, in pleasing colors, is a quick, easy way to beautify kitchen and bathroom walls and woodwork.

VARNISH AND WAX

Re-finish your floors with I.F.S. Varnish and varnish stain. The stain comes in 5 colors and there are 3 types of varnish. Polish your floors with I.F.S. Paste Wax or the easy, Self Polishing Liquid Wax.

Recondition that roof with

I. F. S. ROOF COATING

and

SOY-ZINC

I.F.S. ROOF COATING is an asphalt and asbestos compound which seals cracks and worn places in old roofs. It is easily applied and gives added years to the life of your roof.

For metal roofs, gutters, and downspouts, we recommend SOY-ZINC. It is a primer for rusted metals and makes an excellent foundation for aluminum or metal paints. It can also be used as a finish coat.

ALUMINUM

Brighten up your farm with No. 998 Aluminum paint. A good all-purpose paint. Fine for painting fuel storage tanks, windmill towers and other metal equipment.

Distributed exclusively by 81 member companies affiliated with

ILLINOIS FARM SUPPLY CO.

Make Your Membership
RETURN A PROFIT!

The dollars you invest in a Farm Bureau membership can return to you, over and over again every year, if you use your Farm Bureau right and use it often. Start today making a check list of ways you WILL USE Farm Bureau to make or save more money this year:

✔ To buy better insurance coverage at lower rates — life, auto, fire, windstorm, hail, accident, liability and special coverages.

✔ To market livestock, grain, milk, wool, fruits and vegetables cooperatively at higher prices.

✔ To buy supplies at LOWER prices COOPERATIVELY, oil, fuels, feeds, plant foods, paints and serum.

✔ To utilize the findings of Farm Bureau research on any special problem, like soil erosion control.

✔ To follow with interest Farm Bureau's advisory and legislative activities in the fields of transportation, taxation, soil improvement, research, marketing, schools.

Country Life Insurance will help make important dreams come true!

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

MAN OF SERVICE — HEAR HIS MESSAGE

By President Charles B. Shuman

DURING the thirties when many of the unemployed flocked to the road as salesmen, farmers were forced to devise various and ingenious methods of quickly discouraging these peddlers. At the suggestion of one of our neighbors, several of the livestock feeders in our area purchased one bag each of a certain highly advertised and high priced mineral feed.

For several years we carefully preserved this same bag of mineral while we continued to feed our own home-mixed College of Agriculture formula. This one bag of mineral paid for itself many times over in time saved. The salesman for this brand soon gave up calling on people who assured him that they would be in the market for more of his mineral when their present one bag supply was exhausted.

The affiliated service organizations of the Illinois Agricultural Association and County Farm Bureaus were pioneers in a new program of sales based not upon sales pressure, but upon the member's needs. It was early recognized that farming was a highly technical business requiring many skills and a wide range of specialized services.

The insurance needs of farmers were great and largely unfilled until we developed our own companies and trained an agency force that is today rendering a service to Illinois agriculture of inestimable value. The local service men of the county service companies, marketing and supply cooperatives are filling a need for specialists trained to help us make practical use of the newest and best practices and materials developed by scientific research.

The day of the high pressure salesman is over. In his place we farmers will gladly accept the well trained specialist in sales service prepared to offer ideas and suggestions that lead to more efficient operation and better living standards. Our agricultural experiment stations are constantly developing better methods, better varieties and better materials for farm use. The extension service has the responsibility of bringing this information to the farmer. As an agricultural organization, we have an opportunity to accelerate greatly these valuable research and educational programs by applying the technique of sales service to this knowledge.

The next time your Farm Bureau general agent of insurance asks for an interview, give him a favorable hearing. The program he suggests may make it possible for the gains you have made to be passed on to the next generation. If your banker suggests consideration of the new program for the monthly purchase of savings bonds as a means of protection against periods of deflation, it may be that his financial knowledge should be heeded.

The salesman who offers a program fitted to the needs of the farmer is indeed a man of service. Give these men of service the opportunity to help you meet modern needs and modern competition.

. . . YOUR FRIENDLY COUNTRY LIFE INSURANCE AGENT

Whether you carry life insurance or not, a little or a lot, it will pay you to review your life insurance requirements now with your friendly, experienced Country Life Insurance agent. His recommendations are sound, they are free, and they are gladly given. Talk to our Country Life agent today and learn how little it costs to underwrite important, long-range plans — retirement, and education for your children, family security, the purchase of land, or whatever. Country Life Insurance will help make important dreams come true!

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the Nation, and to develop agriculture.

THE STATE FARM BUREAU PUBLICATION

MAN OF SERVICE — HEAR HIS MESSAGE

By President Charles B. Shuman

DURING the thirties when many of the unemployed flocked to the road as salesmen, farmers were forced to devise various and ingenious methods of quickly discouraging these peddlers. At the suggestion of one of our neighbors, several of the livestock feeders in our area purchased one bag each of a certain highly advertised and high priced mineral feed.

For several years we carefully preserved this same bag of mineral while we continued to feed our own home-mixed College of Agriculture formula. This one bag of mineral paid for itself many times over in time saved. The salesman for this brand soon gave up calling on people who assured him that they would be in the market for more of his mineral when their present one bag supply was exhausted.

The affiliated service organizations of the Illinois Agricultural Association and County Farm Bureaus were pioneers in a new program of sales based not upon sales pressure, but upon the member's needs. It was early recognized that farming was a highly technical business requiring many skills and a wide range of specialized services.

The insurance needs of farmers were great and largely unfilled until we developed our own companies and trained an agency force that is today rendering a service to Illinois agriculture of inestimable value. The local service men of the county service companies, marketing and supply cooperatives are filling a need for specialists trained to help us make practical use of the newest and best practices and materials developed by scientific research.

The day of the high pressure salesman is over. In his place we farmers will gladly accept the well trained specialist in sales service prepared to offer ideas and suggestions that lead to more efficient operation and better living standards. Our agricultural experiment stations are constantly developing better methods, better varieties and better materials for farm use. The extension service has the responsibility of bringing this information to the farmer. As an agricultural organization, we have an opportunity to accelerate greatly these valuable research and educational programs by applying the technique of sales service to this knowledge.

The next time your Farm Bureau general agent of insurance asks for an interview, give him a favorable hearing. The program he suggests may make it possible for the gains you have made to be passed on to the next generation. If your banker suggests consideration of the new program for the monthly purchase of savings bonds as a means of protection against periods of deflation, it may be that his financial knowledge should be heeded.

The salesman who offers a program fitted to the needs of the farmer is indeed a man of service. Give these men of service the opportunity to help you meet modern needs and modern competition.

PRESIDENT SHUMAN BACKS PROGRAM TO PROMOTE DAIRY PRODUCTS

FARMERS of the state are doing a remarkable job in production and cooperative marketing. We should extend our efforts beyond these two steps and enter the field of sales in an earnest way.

Farmers can well afford to spend more money in the field of advertising, promotion, research and merchandising. Now that consumers' goods of all kinds are becoming more available, food will have to meet keen competition in the market place for the consumer's dollar.

I heartily endorse the program which has been adopted by representatives of dairy farmers in undertaking a sales program on an expanded national scale and trust that every Illinois dairyman will cooperate in this important program by contributing one cent per pound of butterfat marketed during the month of June.

Charles B. Shuman, President
Illinois Agricultural Association

IT PAYS TO *Advertise* . . . .

DAIRY FOODS PROMOTION ROLLS INTO HIGH GEAR

AMERICA'S dairymen have banded together to take advantage of a simple fact that businessmen have known since buying and selling began — "It pays to advertise."

Under the banner of the American Dairy Association's aggressive nation-wide advertising and publicity campaign to make the consumer milk, butter, ice cream, and cheese conscious, the producer is assured a larger market for his product at a higher price.

American Dairy Association advertising constantly reminds the consumer that milk and dairy products make up nature's most wholesome diet.

A drive to strengthen demand for butter got underway with a smashing nation-wide merchandising event in June, spearheaded by a full-color center-spread in "This Week" magazine, the weekly supplement to leading metropolitan newspapers. Pointed to butter sales, this eye-catching advertisement went to approximately 9,000,000 homes the first Sunday in June. The St. Louis Globe Democrat and the Chicago Daily News carried the ad in the Illinois area.

The major objectives of the new campaign of the American Dairy Association are: (1) To protect dairy farmers' investment and income by stimulating sales, create satisfactory prices, rid him of surpluses; (2) to create better public understanding of the dairy industry and to develop greater public acceptance of dairy products; and (3) to expand and develop markets for all dairy products.

The ADA advertising program is spread over 12 months with sales creating advertising and merchandising activities in national magazines, in newspapers, on billboards and radio, and in retail food stores. This action gets 12 promotion dollars for one. For every dollar invested by dairy farmers through the ADA, related food advertisers and retailers spend $12 in cooperative advertising at no cost to producers. No farmer could advertise his own products with equal effectiveness, but when millions of farmers across the county join hands with Illinois dairymen, the goal can be accomplished and at a relatively small cost to each farmer.

During the month of June, 1c per pound butterfat marketed is deducted from milk and cream checks to raise the revenue for this advertising program. Dairy farmers in 36 states, representing 90 per cent of the nation's milk production, are cooperating in this milk program. This penny action in June, only 30 days, provides sufficient funds to carry on the ADA advertising and merchandising program reaching millions of people month after month throughout the year.

The American Dairy Association is a producers organization with its business program keyed to a cross section of the industry's viewpoint. The farmers support it, finance it, control its policies, counsel and plan with the dairy industry in developing sales and expanding markets for butter, milk, cheese and all other dairy products.

DAIRYMEN TO CELEBRATE MILK DAY

JUNE is dairy month. It is the time when dairy producers let the world know just how important dairy products are to a healthy diet.

The folks up around Harvard in McHenry county like the idea of dairy month. Why shouldn't they? They call their fertile dairylands "The Milk Center of the World!"

But they aren't satisfied with an uneventful month of quiet meditation about the wonders of milk. No sir, up around Harvard they whoop it up in a grand one-day celebration at which bossy reigns supreme and toasts are drunk in milk only.

The sixth annual Harvard Milk Day will be held June 12 and from the enthusiasm of both farmers and townspeople we gather that it will be the biggest and best Milk Day on record.

The program will include a parade, cattle show, selection of a Milk Queen and her court, and entertainment by radio artists. Prizes to be presented include milking equipment, trophies, and a purebred calf. Part of the program will be broadcast by WLS. Organizations taking part in the celebration include the McHenry County Farm Bureau, breeders associations, and milk dealers in the Chicago milk shed.

On next page are representative examples of the beautifully-colored advertisements being run in national periodicals by the American Dairy Association to promote the sale of dairy foods.

What is This 100 Per Cent Tax Assessment Law?

"JUST what is this 100 per cent property assessment law all about?" With a puzzled frown the farmer directed his question at an IAA tax man he met at a county Farm Bureau meeting.

"The law itself is a bit involved," the IAA man replied, "but I will try to answer your questions as simply as possible. What is it you would like to know about the 100 per cent assessment law?"

"Well, first of all, when does it go into effect?"

"It went into effect January 1, 1946. It applied to the property assessments and tax levies that were made in 1946. As you know, taxes levied one year are payable the next, so the tax bills you receive this spring are the first ones to be figured under the new legislation."

"Do the new laws make my taxes a lot higher?"

"The new 100 per cent assessment laws do not increase or decrease taxes. The amount of property taxes is determined each year by locally elected government officials such as school boards, county boards of supervisors, and road commissioners. The voters at the annual township meeting also levy taxes. The 100 per cent assessment laws have not forced these officials or citizens to levy either more nor less taxes than before."

"If the new law doesn't increase my taxes, then why is my tax bill so much higher than it was last year?"

"Well, costs of many local government services have increased about like prices of other things. It takes more money to operate schools, to maintain roads, and to keep county governments going than it did before the war. Your local officials probably had to make some increase in tax levies in order to meet these higher costs. On the other hand, some of your tax levying bodies may have made larger tax levies than was justified from the standpoint of increased costs. In either case, it was your local citizens and local officials who determined the amount of your property tax."

"Do you mean that the new 100 per cent laws haven't affected my taxes at all?"

"The new laws may have had some influence on your taxes because they changed the conditions and rules under which your local officials operate. The new laws do not cause these officials to levy higher taxes, but in many cases the new laws have permitted the officials to do so."

"Under the new laws how much more taxing power do these local officials have?"

"In general the taxing powers of the local officials have increased 40 to 50 per cent. However, in school or other taxing districts where the voters had raised the maximum tax rate in an election, the increase in taxing powers usually is not more than five to ten per cent."

"But where does the 100 per cent assessment come in?"

"In a way it came in 20 years ago when the legislature enacted a law requiring all property to be assessed at 100 per cent of its actual sale value. However, this law was never enforced. The assessing officials in each county fixed property assessments at any level they chose. In some counties property was listed for tax purposes at as little as 15 or 20 per cent of its actual value. In other countries property was assessed as high as 60 to 75 per cent of its real value. The new legislation provides the machinery for bringing assessments in each county up to an average of 100 per cent of actual value."

"But our assessor says he hasn't changed our property assessments. He assesses property just the same as before. Isn't he supposed to use the full sale value in assessing property?"

"The local assessors and boards of review operate just the same as they did before the new legislation was enacted. However, after they finish the assessment the county clerk now raises the property assessment to 100 per cent before he computes individuals tax bills."

"How does the county clerk know how much increase is necessary to bring the assessment up to 100 per cent?"

"The county clerk gets that information from the Illinois Department of Revenue. That Department compares actual sales prices with assessed valuations in every county. From this study the department is able to specify the amount of increase that is necessary in each county to bring the assessments up to an average of 100 per cent of sale values."

"How much have property assessments been increased here in Moultrie county?"

"In 1946 the Department of Revenue found that local officials listed properties in Moultrie county at an

Our Taxes

average of 25 per cent of their sales values. Therefore, the county clerk was instructed to multiply all assessments by four. That brought the assessed valuations up to an average of 100 per cent of full sale values."

"Then what is there to prevent our taxes from being increased by four times?"

"Well, as I indicated before, a section of the new law operates to keep changes in taxing powers somewhat in line with changes in the sale value of property. However, your best defense against unnecessarily large tax increases is in the election of intelligent, honest and efficient citizens as school, township and county officials. It is the men you elect to local offices who determine the size of your tax bill and how the tax money will be spent."

Depend On

"Did the IAA support the 100 per cent assessment program when it was enacted?"

"No, the IAA opposed the 100 per cent assessment bills when they were passed in 1945. The IAA foresaw that the very complicated laws would cause much confusion and warned state legislators that the laws would give unnecessarily large increases in taxing powers to local officials. However, the bills were forced through the legislature by a narrow margin when the state administration joined forces with the Chicago City Hall machine."

"What is IAA doing about the 100 per cent assessment laws now?"

"The IAA does not favor repeal of the 100 per cent assessment laws at

You And Me

this time. Uniform assessments are desirable so that legal provisions governing taxing powers and limitations can apply uniformly throughout the state, and so that state aid to needy schools and for relief purposes can be distributed equitably. The need now is for a simplification of the laws, and for more restrictive limitations on the increase in taxing powers of local officials. And that is what your organization is working for."

"I'm glad to know that the IAA is on the job in Springfield."

"The IAA is doing all it can. But remember, it's just the rules that are made in Springfield. It's you and your neighbors and the men you elect as school board members, township officers and members of the county board who set the amount of taxes to be raised and who spend the money."

"Yes," said the farmer as he started to leave, "and from now on I'm going to take a more active part in local governmental affairs. I think we've all got to do that if we're going to have efficient government and get a full dollar's worth of service for every dollar of taxes."

FARM WAGE RATES UP 10% OVER 1946

"FARM wage rates, continuing to set new seasonal records, on April 1 averaged 10 per cent higher in the country as a whole than a year earlier," the Bureau of Agricultural Economics reports. By regions, increases ranged from 7 to 11 per cent, except in the Pacific Coast States, where the average increase was 5 per cent.

"About 9,242,000 people were at work on farms of the nation during the week ending April 1. This total included 7,571,000 family workers and 1,671,000 hired workers. Both groups were slightly larger than a year earlier.

"April 1 wage rates were 389 per cent of the 1910-14 average, compared with 383 per cent last Jan. 1. The rise in wage rates during the first three months of the year, however, was smaller than usual for the season. Although wage rates were higher than a year ago, they were below the seasonal peak of last July."

Our Cover

THE majestic Blackhawk statue at Lowden Memorial state park near Oregon in Ogle county is the fifth of our series of cover pictures illustrating Illinois scenes. The 536,770-pound statue, built from a six-foot model designed by the late Lorado Taft in 1911 and dedicated to the Indian tribes that once inhabited the Rock River valley, stands 48 feet high on a natural rock base rising 300 feet above the surrounding valley.

It is not a statue of the famed Indian Chief Blackhawk but rather a composite Indian. Ten tons of plaster of Paris were used to make the statue molds and 2,273 cubic feet of concrete were used in its construction.

According to University of Illinois animal husbandry experts, this steer and others in background are in proper flesh to turn out to pasture after a winter in dry lot.

Stockmen HEAR RESULTS OF *Breeding Experiments*

BY LEW REISNER
IAA RECORD Field Editor

COLD wet weather was the primary cause of the serious loss of young pigs this spring. That is the opinion of veterinarians at the College of Veterinary Medicine as expressed during Swine Growers Day held in April at Champaign-Urbana.

A few farmers in each community suffered serious losses but contrary to many rumors pig losses of epidemic proportions were not due to a new disease, C. C. Morrill, staff veterinarian reported.

This year the wet weather and the temperature during February and March closely followed the pattern of 1943 and 1944, years when pig losses also ran high, Morrell said.

During Swine and Cattle Feeders Day, it is traditional that the College of Agriculture make public results of its livestock feeding tests and experiments.

This year 2500 stockmen crowded the university's auditorium and toured the college farms during the two-day meeting. They picked up a wealth of practical hints.

In discussing baby pig losses, Morrill said that in a few cases veterinarians have witnessed a disease not seen before. A type of dysentery or scours, it affects both sows and suckling pigs.

Symptoms have been loss of appetite, vomiting and severe diarrhea. Death losses have been heavy in pigs up to two weeks of age but losses were light in sows and pigs more than three or four weeks old. Since sows quit lactating in 24-36 hours, some pig losses may be due to starvation.

Buyers are showing a marked interest in production records of hogs, L. A. Weaver, head of the animal husbandry department at the University of Missouri, told the swine growers.

Producers who supply breeding animals to commercial producers would do well, he said, to observe the handwriting on the wall.

Weaver said work in Missouri showed that growthy pigs should reach a weight of 225 pounds at six months. To reach this weight in the time allotted, pigs must weigh at least 35 pounds when weaned and 3 pounds at birth. Heavy birth weights, he pointed out, are indications of vigor and ability to make rapid growth.

Rapid and cheap growth in pigs are aims stockmen consider of first importance. Is it possible to breed into a line of pigs a capacity to make rapid gains?

In 1939 the department of animal husbandry undertook an experiment to find the answer. They have developed a rapid growing line and a slow-growing line of hogs out of common ancestry. Their results are significant. The slow-growing line weighed 32.6 pounds less than the fast line at age 6 months last year.

Their slow growing line has developed longer legs and less depth of body. Rapid-line pigs have deeper, plumper hams, lower flanks, and shorter shanks.

In selecting breeding animals it would appear that large litters, broodiness and weights at weaning and at six months should also be considered in selecting for rapid growth.

★

This three sow-and-litters sunshine hog pen is shown on exhibit during Swine Growers' day. Materials in pen cost $85.

LETTERS TO THE EDITOR

BETTER ROADS — HOW?

I have been interested in reading the article Charles S. Mayfield (IAA director of rural road improvement) wrote for the February issue of the Illinois Agricultural Association Record in regard to farm-to-market roads in Illinois.

We live along one of these proposed roads and have been interested to see the improvements made as it means a lot to the farmers living out this way. We would like to know all the particulars that are involved in the proposed improvement, that is, the system of state allotment of funds that shall be made to the county engineers and township highway department.

In order to better understand the set-up, I would like to talk to Mr. Mayfield personally. Is he available to visit our county to study our problems? If not, would it be possible for him and other interested taxpayers to meet with him in Chicago in the near future? We want to get this road improvement going before it is too late.

We truthfully believe that it is the biggest step toward rural improvement that has been taken in many years and should be the foundation for future consolidation of rural schools. The farmers of Illinois need the support and backing of such fine measures as this new venture.

T. W. Reese
Henry County

The IAA appreciates the interest of Mr. Reese and men like him in seeking to improve the roads in their communities. Mr. Mayfield has met with a number of Farm Bureau groups interested in road betterment. He can meet with your county Farm Bureau within the next several weeks at your request.

THANK YOU

I want to compliment you on the May, 1947 I.A.A. Record. It is very attractively arranged. Headlines, color, and pictures makes one want to read it.

John R. Gilkey
Farm Adviser
Macon County

RURAL YOUNG MARRIEDS

I read in the I.A.A. Record that you are recognizing counties organizing Rural Young Married groups. Please do not forget to mention Christian county as we have organized this spring, and at the April meeting we had an attendance of 54 (second meeting) and at that rate we should have an attendance of 100 to 150 by August or Sepember.

Our programs consist of games, stunts, picture slides, discussions, special music, special speakers, group singing, picnics, square dancing, and educational features.

The last meeting consisted of a panel discussion on "Financing and Buying a Farm," with recreation and refreshments.

We have followed a plan similar to the Montgomery county group by not having a president and a complete set of officers. We have a committee of four couples attending to all the business of one month. Then also, two couples drop out and two more couples volunteer to carry on the business of the next month so that the responsibility doesn't rest upon one person.

Would it be possible for you to list the counties that have organized Rural Young married groups in the next issue of the I.A.A. Record? And would you be interested in a report from Christian county every month?

So far this county is very enthusiastic about this kind of an organization and I would say about 45 to 50 per cent of the group had never been in Rural Youth.

Mr. & Mrs. Donald Downs
Ex-Rural Youthers
Christian County

Counties having young married groups are: Stephenson, Boone, McHenry, Rock Island, Henry, Bureau, Warren, Knox, Hancock, McDonough, Schuyler, Woodford, Tazewell, Macoupin, Montgomery, Christian, Edwards, Edgar, and McLean.

FORT CHARTRES PICTURE

I am sending you a print of the old powder magazine at Fort Chartres taken in 1916. This was the only structure which remained standing at the time the state of Illinois began restoring the old fort to the present condition as shown on the IAA Record cover of March.

With the soil survey party composed of H. A. DeWerff, C. T. Hufford, I visited the site of the old fort in 1916 and took this picture. At that time only the foundations remained of the old barracks and other buildings. The outer walls of the fort had been entirely removed so that their former location could not be determined by anyone who did not know the original plan. Weeds had taken over as indicated in the photo.

H. C. Wheeler
Farm Adviser
Lawrence County

THANKS FOR REFUND

We wish to acknowledge receipt of checks representing a refund on the tour to California. We thank you for this and wish to express our appreciation of the action of the board of directors of the I.A.A. in voting to return this on a per capita basis. This is just another example of the high type of organization which that board represents.

Pearl Spickler
For Mr. & Mrs. V. S. Spickler
and Mrs. Della K. Wilson
Boone County

I have received my refund from tour to Calif. Thank you. Never expected any return for I could not figure out how it was accomplished at the original cost.

Joe. A. Park
Vermilion County

RUNNING WATER IN THE HOME

The reason why so few rural homes are modernized? The general reason — lack of education.

The blame — who is responsible for education? The greatest need today is for adult education. We do not really realize what carrying water into a house and out of a house really means until we have had it to do. Therefore, "what we do not really understand can have no personal meaning to us."

When Farm Bureau and Home Bureau combine resources on such projects as modernizing the rural homes, conservation of soil, rural health, and rural schools, etc. there will be such progress as to amaze everyone. Too many people are concerned with "who gets the credit" and not "who gets the running water in the home".

When leaders really cooperate on projects; when the farm wife AND THE FARM HUSBAND together realize that the end product of farming is better farm life, not more money or just more land, we will have more modernized farms; and when the farm husband AND THE FARM WIFE together realize that soil conservation means more dollars for better living (or perhaps even the future existence of this country agriculturally), then we will have a program of conservation of soil that will really produce results.

The reason so few farms are modernized is really that adult education has fallen far behind when it should have been way out in front.

Mrs. Merritt C. Ackland,
President
Morgan County Home Bureau

THANKS FROM IOWA

I want to express to you my appreciation for the fine trip that our county's delegation had in Illinois. I am the county organization director in Kossuth county, Iowa, and I can assure you that our group had their eyes opened as a result of the trip.

Owen L. Hurt
Algona, Iowa

DAYLIGHT SAVING TIME

We do not like the idea of Paul Mathias (IAA Secretary) suggesting a state law requiring that all time pieces be set one hour ahead in summer. He seems to think all urban people favor it. Does he not know that Decatur voted three to one against it?

Hugh Uttermack,
Clay County

Mr. Mathias did not express his opinion on the matter. In the May issue of the IAA Record, he merely reported the conclusion of the IAA Public Relations committee which was as follows: "Farmers have consistently opposed daylight saving time. . . . . However, only about 20 per cent of the people of Illinois live on farms. Daylight saving time is favored by urban groups. It would be impossible to secure legislation prohibiting daylight saving time during the summer months. If uniformity is to be had, it probably can be had only by placing the entire state on daylight saving time. . . . ."

Get Ready for the SPORTS FESTIVAL ★ NOW!

WANT to enter the eighth Illinois Farm Sports Festival, Aug. 29 and 30 at the University of Illinois? It's time to pick your sport. Particularly if you'd like to start playing now with a ball team.

You can enter sports events ranging from archery to wood chopping. There's something for every age group in the farm family, including a trap shoot for men over 70.

Your youth assistant, farm adviser or home adviser can supply you with details. You can participate individually and as a member of a team.

Here's a list of most of the sports and music events: *Archery*—men, individual; women, individual. *Bowling*—men, individual and team of five; women, individual and team of five.

Checkers—individual. *Chair quoits*—women only. *Clock golf*—women only; *Dart throwing*—women only. *Hog calling*—men and women.

Horseshoes—men singles and doubles; women singles and doubles. *Knot-tying*—women only. Physical fitness—4-H boys and girls. *Rifle shoot*—men individual and team; women, individual and team; special classes.

Shuffle board—women only. *Softball*—adult county league; Farm Bureau members over 35 years old; all county division; boys' 4-H club division; Rural Youth division; girls' 4-H division; womens' open division.

Swimming—boys division: 15 years and under, and 16 years and older, 50 yard dash and low board diving. Girls division: 15 years and under 16 years and older, 50 yard dash and low board diving.

Skeet and trap shoot—men individual and team; women, individual and team; special classes. *Track*—boys division: 15 years and under, and 16 years and older: 50 yard dash, 100 yard dash, high jump, broad jump, half mile relay. Girls division: 15 years and under, and 16 years and older: 75 yard dash, broad jump, and high jump.

Tug o'war—men, team of eight. *Volley ball*—men only. *Wood chopping*—men, individual.

Events for the Folk Festival include: Choral groups, community song leaders, family singing, folk dancing, music specialties, novelties, novelty bands, square dance callers; special groups for 4-H members, including 4-H chorus, 4-H marching teams, 4-H dramatization of story of songs or composers.

Twenty-nine teams, greatest number to enter in recent years, have reported for spring warm-up practice in the Illinois Farm Bureau Baseball League.

These teams will meet in district competition before the championship games are played at the Illinois Farm Sports Festival Aug. 28 and 29 at the University of Illinois, Urbana-Champaign.

Counties have been divided into districts by the league executive committee as follows: District 1, Boone, Carroll, Jo Daviess, Stephenson, Winnebago.

Dist. 2, DeKalb, Kendall, LaSalle, Will; Dist. 3, Bureau, Henry, Lee. Dist. 4, Cass, Henderson, Warren; Dist. 5, Peoria, Marshall-Putnam, Tazewell, Woodford.

Dist. 6, Ford, Livingston, McLean; Dist. 7, Champaign, Coles, Macon; Dist. 8, Montgomery, Macoupin; Dist. 9, Randolph, Saline.

TO YOUR FARM PICTURE with SOYOIL PAINTS

Clean, bright, freshly painted buildings – what an inspiring picture they make! A pure white house enhanced by the jolly dignity of a rich red barn!

SOYOIL can add beauty and charm to *your* farm!

HOW LONG SINCE YOU HAVE PAINTED?

Many Illinois farm buildings have not been painted for several years. War-caused shortages have forced many to wait. But unpainted buildings deteriorate rapidly! It is unwise to postpone too long, the attractive protection which Soyoil gives.

Plan now to paint up with SOYOIL!

Ask for FREE Color Card

Soyoil exterior paints are now available from your County Service Company's Blue Seal Trucksalesman.

Our famous No. 90 Red Barn Paint is a superior product designed for barns. It is even mildew resistant! Rich Red Iron Oxide, specially refined Soybean Oil and Linseed Oil are used to make a paint that gives adequate penetration on any type of surface, especially badly weathered ones.

Our No. 5 White House Paint has long been popular with farmers. Its lead, zinc and titanium pigments are ground in oil, one third of which is soybean oil. Gives a good white protective surface for a long time.

Another fine paint, SOYZINC is back again! Soyzinc is a special metal primer paint. Protects metal surfaces from rust and makes a nice looking finish coat of gray.

For a bright metal finish for roofs and equipment, we recommend Soyoil Aluminum paint.

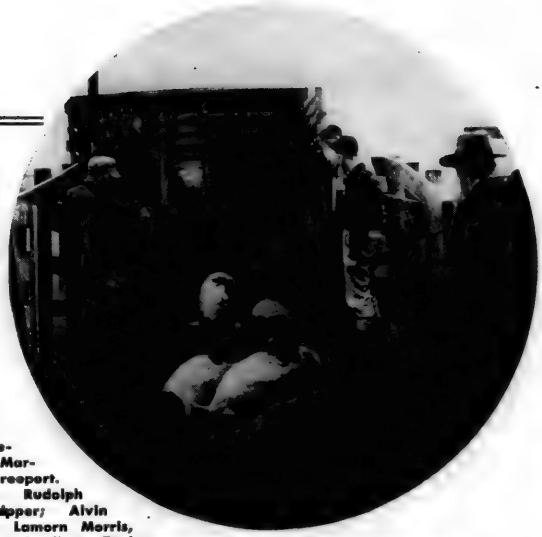
Freeport Co-op's FIRST 4 MONTHS Forecast Success



A truckload of hogs is unloaded at the Stephenson Livestock Marketing Yards at Freeport. Left to right, are: Rudolph Peterson, the shipper; Alvin Cooper, yard man; Lamorn Morris, the truck driver; Sterling Taylor; Joe Brown, yards manager; and V. J. Banter, farm adviser, Stephenson Farm Bureau.

By LEW REISNER
IAA RECORD Field Editor

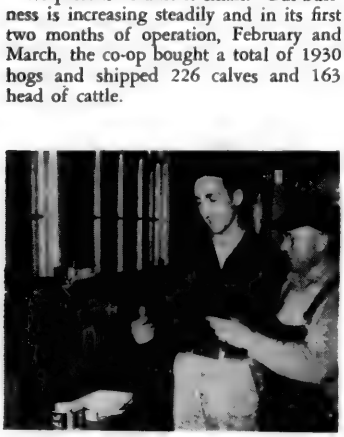
"COMPETITION has been tough but we've paid our own way from the day we started." That's the way Manager Joe Brown summed up the first two months' operation of the Stephenson Livestock Marketing Association.

Farmers say the co-op is already a price stabilizer. A Dakota stockman reported that the Freeport co-op had raised prices on hogs a dollar a hundred at Dakota.

Hogs are coming in from as far as 20 miles from Freeport. The yards have received shipments from outlying Kent, Lena, Winslow, Orangeville, Rock City, Ridott, German Valley, Baileyville, Shannon, Stockton, and Nora.

Although it started in a slack season and during weather that kept even milk trucks ice-bound, the Freeport marketing cooperative is off to a respectable start with its hog merchandizing program.

At present volume is small. But business is increasing steadily and in its first two months of operation, February and March, the co-op bought a total of 1930 hogs and shipped 226 calves and 163 head of cattle.



Merle Wise (right) watches Yards Manager Joe Brown get ready to adjust the scales to weigh in Wise's load of hogs.

"Since we reorganized we've served 250 customers. On this basis our business will double or triple this year," Stanley Worth, a director from Dakota, pointed out.

Competition, however, is strong. Old line buyers are well-established and well financed. Last year 17 buyers were purchasing hogs in Stephenson county. One buyer recently has been quoting Chicago prices for hogs he is buying at Freeport.

Their marketing cooperative will be successful, Manager Brown maintains, if farmers stick with their own company while it is getting a foot-hold.

Rudolph Peterson, Pecatonica, summed it up like this. "It's just like other co-ops getting started, I've got others chasing me for business. But I'd be cutting my own throat not to sell to my own company."

In addition to the concentration point at Freeport associations at Stronghurst and Effingham have been organized to buy direct. The Effingham yard is a branch of the Shelbyville marketing association.

Located conveniently adjacent to two highways, near the intersection of highways 26 and 20 on the north side of Freeport, the yards are built along the Illinois Central tracks. The railroad owns the yards, scales, and office building.

The need for a strong local competitive market is apparent. Stephenson normally produces 140,000 hogs annually. At present almost all of these hogs are being bought direct by old line packer buyers.

The new cooperative can take heart from the old Freeport Shipping Association, at one time one of the most successful shipping cooperatives in the state. In its golden era, the old shipping association dominated the Freeport market and in the late twenties was shipping more than 300 cars a year to terminal markets.

When the board of directors of the old shipping association decided they had to reorganize to survive, they agreed their best bet was a buying and merchandising program for hogs and a tie-in with the IAA affiliated Illinois Livestock Marketing Association, the state-wide cooperative sales agency with headquarters at Decatur.

The new Freeport co-op had scales and yards used by the old shipping association. Some $10,400 was raised through the sale of stock and the co-op was ready to go Feb. 3.

Organized in 1919 the old shipping agency had about the same competition to face as does the new co-op today. "I can remember coming to town with my father with a wagon load of hogs," Leslie Finkenbinder, Stephenson county organization director recalls. "Five or six buyers would meet us and offer to buy the hogs before we reached the yards. The old shipping association competed with them and thrived."

Will the new co-op match the record of the old shipping association? Sensible Stephenson county farmers say it will do it and then some. It's going to be another case of neighbors working together.

ONE hundred thousand pounds of milk daily — that's the processing capacity of the Prairie Farms Creamery at Henry in Marshall-Putnam counties and the goal of this IAA affiliate for Dairy Month.

June also starts the second year of operations for the Henry creamery. So June would appear to be an appropriate time to appraise the success of this year-old baby and maybe try to predict his future.

As creameries go, it has had remarkable success. Manager Dave Smith gives most of the credit to the farmer patrons who have given the creamery "unbelievable support" during the past year. Financially it also has done well. Besides it has been an important factor in helping maintain a higher price level to producers in the area it serves.

Truckers line up before Prairie Farms Creamery at Henry.

HENRY CREAMERY ENDS A *Successful* FIRST YEAR

By JIM THOMSON
IAA RECORD Ass't. Editor

By January the plant was operating at 40 per cent of capacity. Today it is around the 100 per cent capacity mark which could have been reached some time ago if more trucks had been available to reach more producers.

Growth has been steady and sustained with successive months recording satisfying gains. The creamery serves the counties of Bureau, Peoria, Marshall, Putnam, Stark, and Woodford.

The Prairie Farms Creamery at Henry produces large quantities of high quality products — butter, sweetened condensed milk, sweet cream, and condensed buttermilk. It also handles cheese manufactured at the Prairie Farms Creamery plant at Moline.

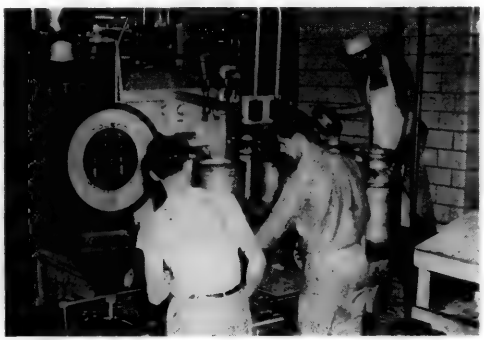
Several of the Prairie Farms Creameries also have given some serious thought to going into the manufacture of ice cream which is made only at the Mt. Sterling plant at present. The creamery at Henry will give the manufacture of ice cream more thought when machinery becomes available and the market appears suitable for the venture.

The Henry plant is modern in every detail. It gleams and sparkles everywhere with its stainless steel equipment and bright glazed tile. The milk evaporator, for example, cost $28,000 and is the only one of its kind in the organization's 10 creameries.

Milk product, said Smith, had wider use among more people during the war years and although a decline in prices is now in the wind, more people are going to appreciate the value of milk products as a staple food in the future so consumption may continue at high levels.

By continuing to advertise and publicize the importance of milk as a necessary food for good health, Smith believes the industry can sustain its markets. He believes, too, that there is a good domestic market for powdered milk that will become increasingly important as its use by commercial bakers increases and as women become educated to its economy and usefulness in the home.

The Henry creamery is the 10th of the Prairie Farms Creameries to be established but after a year's progress it does not expect to stay in that rank in importance. That appears certain.



On receiving line, Clarence Barker (right) removes lids from cans, pushes them to Lyle Hall (center), who weighs milk, dumps it and pushes can through washer. Donald Ringenberg checks weight, keeps record.

This gives you an idea of the great size of the power boiler at the Henry creamery. Turning valve is Plant Superintendent Joe Crabb.

PULASKI finds her own SOLUTION

By J. C. McCORMICK

DOWN in Pulaski county we have had a number of problems for several years. We have had poor schools primarily because we lacked the money to pay for better schools. We lacked the money because our training was not the type to enable us to earn it.

J. C. McCormick

In an almost purely agricultural county we have no schools that offer an adequate course in agricultural, domestic science or manual arts. We have been going around in a vicious circle having poor schools because of a lack of money and lacking money because of poor schools. We have a similar vicious circle in transportation. We have poor roads because we have no money to pay for good roads and we have no money because our transportation is so poor.

Two vicious circles are enough for any county but in Pulaski we suffer from yet another. We have poor health because we lack the money to pay for good medical care and we are unable to earn to capacity because so many of us are in poor health.

We have recognized these problems for a number of years but have felt that we were too poor and untrained to cope with them. We have looked to the Great White Father in Washington for aid and guidance in solving our troubles.

Some of our leaders advised us that the proper course to follow was to vote Republican and then the Great White Father in Washington would surely remember us down in Pulaski county. So we voted Republican with great enthusiasm. After they were elected, the congressman's sister-in-law got a good job in Washington and his cousin got a postmastership in Pulaski county but the schools were no better, the roads remained muddy and the malaria still gave us chills and fevers.

About that time some of our leaders declared that we had been poorly advised that if we voted for the Democrats the Great White Father in Washington would see that we had good roads, fine schools and no malaria. So we voted Democratic with such energy and conviction that all the Democrats were elected.

Then we thought our troubles were over for the Great White Father in Washington sent many of his learned men to Pulaski county to solve our problems. They were great men. We knew that because they were paid $10,000 per year and since none of us in Pulaski county could make that much money in a year, we were sure that anyone who could was truly a great man.

We heard J. C. McCormick, chairman of the Pulaski County School Survey Committee, make this talk several weeks ago. We were impressed by his convictions and believe you might be interested in what another county down in southern Illinois is trying to do. . . . The Editors.

These great men did strange things. They built roads in the middle of the winter by moving the mud from the side of the road into the middle. That was all right with us because we realized that they were great men getting $10,000 per year and whatever they did must be wise. But the Pulaski county mud being ignorant and unappreciative didn't realize they were great men and our roads became even more impassable than before.

In the summer time the great men took our workers from the towns and the hills where there were no mosquitoes and moved them to the swamps where there was an abundance of them. In the swamps they dug ditches that were very straight and had sides of exactly 45 degrees. But these ditches ended nowhere. That was all right with us who realized they were great men but the swamp water being ignorant settled in these ditches and the mosquitoes flourished in the late summer and fall as well as in the spring. And our malaria problem was worse than before.

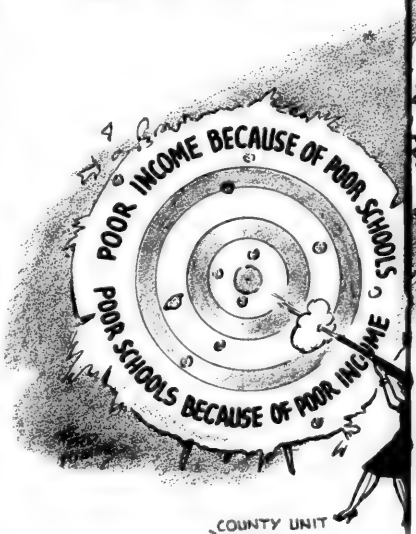
About the time we were becoming thoroughly discouraged the Illinois legislature passed a law providing for the appointment of a survey committee to make such recommendations for the improvement of the schools. We had just about come to the conclusion that if our problems were ever to be solved we would have to do it ourselves so we appointed just common, everyday homefolks to this committee. Most of them were farmers. And when I say farmers I don't mean people living on a country estate and making their money in town. I mean the common, garden variety of farmer who feeds the hogs, plows the corn, tries to make payments on the mortgage and needs a lot of things that he hasn't the money to buy.

This committee decided at the beginning that it would try to do three things:

(a) Recommend a 1947 model educational system.

(b) Provide in that system for growth and improvement.

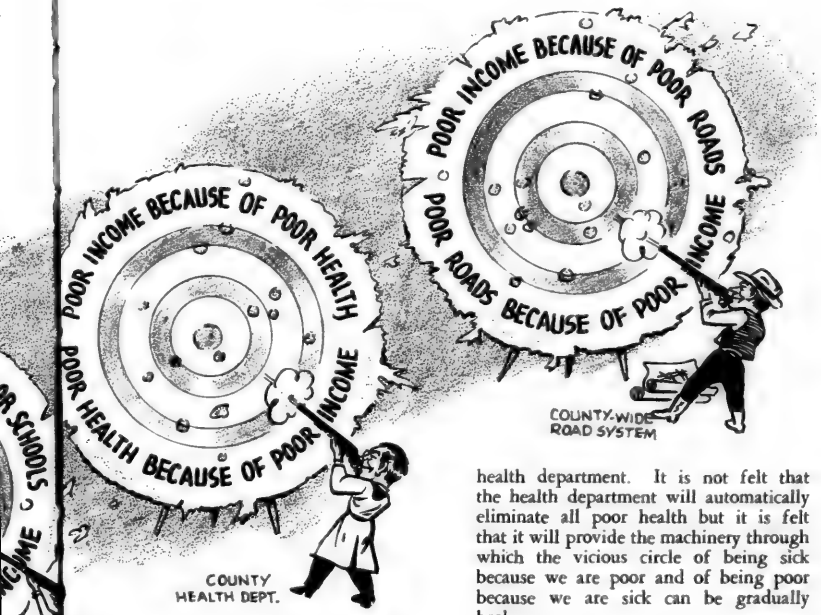
(c) Make improvements in the school system come from a wiser expenditure of present funds.



The committee maintained that all of the children were equally entitled to an education and all of the schools should be equally good. It was obvious that little improvement was possible without considerable consolidation. But consolidation requires transportation and transportation requires roads. And before we could have roads in Pulaski county we would have to have a radical change in our out-of-date road system. For 40 weary years we had tried to build and maintain roads under a system of small local districts and for 40 years we had failed. Under this out-of-date system are 14 dis-

tricts with 14 different road commissioners and 14 road clerks who must be paid before one dollar can go on the roads. The committee maintained that the system was expensive, inefficient and obsolete.

The first recommendation of the Pulaski County School Survey Committee was that the local districts be abolished and a countywide road district be formed under the county highway engineer to have charge of all the county roads except



city streets and state highways.

The committee maintains that any road district to be efficient must have three characteristics:

(a) It must be in charge of a trained highway engineer.
(b) It must have a reasonably complete set of road building and maintaining equipment.
(c) It must have year around paid personnel.

None of these conditions can be met by the small local districts. All of them can be met by the county-wide district.

This county-wide road system requires enabling action by the state legislature and Pulaski county respectfully requests the legislature to give us consideration. We would be very grateful for any aid from our sister counties in stressing this matter to the legislature.

According to Selective Service figures 31 per cent of the registrants of Pulaski county were rejected for physical or mental defects that rendered them unfit for military service. The committee felt that the best way to remedy this situation was to establish a county health department through which there would be trained personnel whose business it would be to look after the public health. So the people of Pulaski county by a vote of 5 to 1 in the November election established a health department. It is not felt that the health department will automatically eliminate all poor health but it is felt that it will provide the machinery through which the vicious circle of being sick because we are poor and of being poor because we are sick can be gradually broken.

The school lunch is a recent innovation in education that has had immense popularity where tried. Performance has been improved, absenteeism reduced, better eating habits have been formed, the cost of meals has been reduced and busy mothers have been relieved of the necessity of preparing bucket lunches. The committee has recommended that school lunches be made available to all school children.

We realize that the teacher is the heart of the school and that teachers are working for a living as well as trying to educate children. Therefore the committee has recommended that the teacher be paid a salary commensurate with the importance of his job and comparing favorably with workers of like training in other fields.

The committee recommends that the school curriculum be reorganized in the light of modern improvements in education. Most girl students will become housewives. It would seem elemental that they should receive some training in domestic science. Pulaski county is largely agricultural and such training should be available to those boys who want to engage in farming. Manual skills should be taught since many will make their livelihood through such efforts.

As a means of securing these improved schools advocated by the committee it has been recommended that all of Pulaski county be formed into one unit school district maintaining grades one to twelve and having one board of education. This board of education to be elected countywide but no more than three to come from any one township.

This county unit type of school district makes for more efficient administration. By eliminating district lines within the county more efficient transportation can be arranged. And transportation is the key to school improvement. Taxes can be equalized. The rate will be the same county-wide. Teachers can be sent to the various buildings as they are needed.

Economies may be affected in purchases when supplies are bought in large quantities. Handicapped children may be given special training since there will be more of them in a county than in a small district. These handicapped children are going to have to make a living and if they cannot be trained to be self supporting they will be a burden on the community.

The Pulaski County School Survey Committee feels that with the organization of the county unit system it will have provided the machinery for breaking the vicious circle of being poor because we have poor schools and having poor schools because we are poor.

We feel that better administration is the answer to the problem. We maintain that it is the duty of the school to furnish such training to all of the children that their talents, great or small, will be developed to such an extent that they can be useful, self supporting citizens capable of contributing to the common welfare. We think that the Pulaski County School Plan will help to attain these ends.

IAA Director Practices DIVERSE LIVESTOCK, GRAIN FARMING

By JIM THOMSON
IAA RECORD Ass't. Editor

"WHY don't you go out and sell 10 more, John?" John Evans looked up at his questioner in puzzled surprise. Up to that moment the day had been bright and profitable. His township's Farm Bureau new membership quota was 10 and he had filled it himself, between loads of corn, as he put it.

To say the least, he expected a little praise for a job well done. Instead, here was Harry Claar, IAA organization director for District One, taunting him with the typical Claar grin to do even better than the excellent job he already had done.

For a moment he felt like telling Harry Claar to go jump in Lake Vermilion, but on second thought he decided he would sign up 10 more just to show him he could do it.

Even an old campaigner like Harry Claar was surprised when Evans brought in 10 more memberships and threw in an extra one for good measure. He had signed up 21 new members himself in a township with a quota of 10. Not bad for work between loads of corn.

That little incident sums up the attitude of IAA Director John Evans. If he thinks a job is worth doing, he thinks it is worth doing well. Most certainly he considers the promotion of Farm Bureau a job well worth doing.

Evans, the only bachelor member, was elected to the IAA board of directors on November 1945 to represent the 18th district which includes the following counties: Vermilion, Iroquois, Edgar, Clark, Kankakee, and Cumberland. He succeeded W. A. Dennis of Edgar county.

Before going to the IAA board, Evans served as president of the Vermilion county Farm Bureau for eight years. He was elected to the Vermilion board in 1933 and has been a member of Farm Bureau since shortly after it was organized in Vermilion county.

Back in 1904 when John Evans was 12 years old, his uncle, Thomas Evans, an Illinois farmer, paid his brother's family a visit near Reading, Pa. When he was ready to return to Illinois he asked young John how he would like to come out to his farm for a visit. That's how he came to Illinois.

"I guess I expected to stay in Illinois for a month or so," Evans said, "but it's been a long month; I've been here ever since."

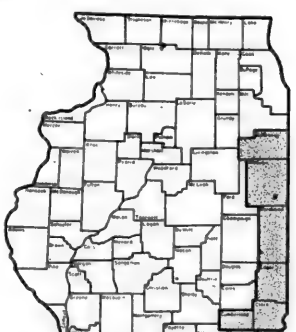
He grew up on the 353-acre farm three miles south of Hoopeston on the Dixie highway, helping his uncle and cousin George while growing to love the Illinois prairie land he tilled.

Then without warning tragedy struck from a black, stormy, summer sky. He had been plowing corn one sultry afternoon in 1917 with his team following a short distance behind another driven by his cousin George. As the storm brewed George decided to make one more round before going in.

With startling suddenness, a fiery bolt of lighting streaked out of the heavens and struck at George's cultivator and team. By the time John carried him to the farm house to get medical aid, he was dead.

From that day he assumed full responsibility for the operation of the farm with his cousin, Gladys M. Evans, and his brother, Richard. The Evans place is actually two farms run together. The homestead comprises 203 acres and several hundred yards away is another place of 150 acres laid out in three 50-acre fields.

Evans is a stickler for conservative, scientific farming. He grows some cash grain and generally has 100 fall and



Shaded area on map is 18th congressional district represented on the Illinois Agricultural Association board of directors by John T. Evans of Hoopeston.

Director Evans tunes in his radio with his constant companion around the farm, a black Newfoundland.

★ ★ ★

Editor's Note: This is the seventh of a series of articles to acquaint you with the men you elected to the Illinois Agricultural Association board of directors.

Director Evans pitches a hefty load of manure. He doesn't waste a bit; returns all of it to the fields. He planted windbreak in background a number of years ago.

Hogs and Angus calves crowd around the feed box as Director Evans feeds them some corn. Eastern style barn in background was built by his uncle who came from Pennsylvania.

* * * * *

spring pigs, 35 ewes and 50 lambs, and about 23 beef and milk cows, virtually all from his own breeding herds.

His cropping generally includes 100 acres in corn, 40 in oats, 26 in wheat, 25 in beans, 45 in clover, timothy or alfalfa and the rest in pasture. His rotation policy follows this scheme: corn (two years), oats, wheat or beans, legumes. He believes in applying plenty of manure and has limed and phosphated almost all the land twice.

Director Evans has a strong attachment for horses and still uses six regularly. In fact, he might still be using horses exclusively had not the war forced him to get a tractor five years ago. Here and there about the farm are many reminders of the nostalgic horse and buggy days. In a shed are two or three neat buggies and a cutter that would still cut a fancy figure with a prancing show horse.

Besides his Farm Bureau activity, Evans is a director of the Piper City Producers Crop Improvement Association, was for 28 years secretary of the Red Top Rural school district, and is active in the Hoopeston United Presbyterian church. He served as a township AAA committeeman in the early days of its operation.

"Farm Bureau," Director Evans said, "is a wonderful organization for farm people. It has accomplished much good in the past and has a great opportunity to do more in the future. If we do have a depression, I feel safe in saying that it won't be anywhere near as severe as the last one — thanks to Farm Bureau!"

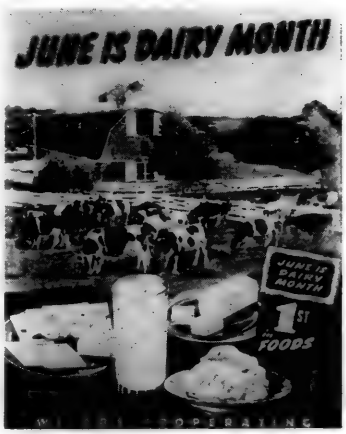
SUPPORT FOR TURKEYS ANNOUNCED BY USDA

The Department of Agriculture has announced a price-support program for 1947 turkeys marketed during Oct. 1, 1947 through Jan. 31, 1948. For this period, the Department will be prepared to buy dressed turkeys from processors who certify they have paid all producers not less than liveweight support prices which will be announced about Oct. 1 and which will reflect a national average price of 90 per cent of the Sept. 15 parity price for turkeys.

BLIND HENDERSON VET DIES OF WAR WOUNDS

Dale Johnson, 29, blinded and wounded war veteran, for whom neighboring farmers in Henderson county raised $6,200 to help buy a small farm, died May 12 as a result of his wounds.

His neighbors hoped to buy him a small farm where he could familiarize himself with the surroundings. Because of the high cost of land, the money was invested in government bonds to be held until a suitable farm became available.



June is Dairy Month

Letters to the Editor are welcomed from readers on any subject related to agriculture. Writers should sign letters with name and address. Names may be withheld if desired. Address *Letters to the Editor, Illinois Agricultural Association Record, 608 South Dearborn, Chicago 5, Ill.*

OIL COMPANY DECIDES TO SELL FUEL TANKS

One of the large oil companies doing business in the Midwest has decided to follow the established policy of the Illinois Farm Supply Company in selling its farm fuel storage tanks. Its old policy of leasing the tanks to farmers ended May 15.

Illinois Farm Supply Company feels that this move by its competitor proves the wisdom of the decision it made years ago to get the farmer patron to own his fuel tank rather than to lease it and thereby pay for it eventually yet never own it.

Regarding the change in its policy, the oil company said: "Farmers meanwhile have shown a growing desire to purchase the tanks for their own ownership. Since it is desirable that farmers, rather than the supplier should own the tanks, the time appears to have arrived in working out this problem to transfer the tanks to the users."

CHARLIE CARRIER RETIRES

Charles E. Carrier, 78, who started working for the Illinois Farm Bureau during the horse and buggy days, retired recently. He had worked since 1935 as organization director for Macon county.

The Rural Youth banquet season is over. Banquet activities during the year have shown much thought and preparation. Guests have been heard to say, "How could they think of so many things to do?" The answer lies in well made plans by committees and then putting responsibilities in the hands of many people.

A look into the committee organization and evening program of Rock Island's Plantation Party held May 9, in East Moline senior high school, illustrates the thoroughness of planning which made possible the entertainment of 240 guests without a dull moment from "mixer" to "good night." Committees were as follows: Programs and table decorations — Dorothy Magerkurth, John Rollins; decorating hall — Sue Montgomery, Joe Gieger; registration and name tags — Arnold and Erma Struss; tickets and publicity — Helen Norris, Bob Sievers; recreation, dance and music — Lynn Stone, Roger Struss; menu and serving — Janice Larson, Duane Magerkuth; punch bowl — Gertrude and Ralph Sievers.

Get Acquainted

Each committee called upon various members of the three Rural Youth units of the county for assistance and got it. The plan for entertainment was like this: Upon arrival, guests found a committee ready with pencils and suitable name tags so that the process of getting acquainted was made easy right from the start. Immediately a mixer card with the title "Know Your Neighbor" and spaces for 34 names was passed out.

After 20 minutes of getting acquainted, the guests went to the banquet hall where tables were located by song titles in large

letters corresponding to the song title on the back of each name card. In addition to singing by the entire group, the table song titles made singing by tables easy.

Following the dinner came a program of special musical numbers, the address, and recognition of guests and committees. While tables and chairs were being cleared away, guests had an opportunity to visit. Then came the grand march and dancing, with quadrilles, reels, and ballroom dancing interspersed.

Visitors Help

Various Rural Youth guests from visiting counties helped with the recreation. Lois Johnson, Henry, was one of the song leaders. Harley Andrews, Knox, led the grand march. Eddie Dew, Ogle, called the Virginia Reel. Gavin Cross, also from Ogle, gave the directions for the Texas Schottische. Howard Eldrencamp, Whiteside, led Oh! Suzanna.

The speaker was the Rev. Axel Pearson. He based his address on the Rural Youth Slogan, "Serve your community and know your neighbor," and emphasized knowledge of people and the attitude of service.

Other counties have done as well. Rock Island is used only as an example of good planning in entertainment so as to provide committee responsibility for a large number of members.

It would be well for your county to begin now to plan for fall and winter banquets. Right now while your banquet experience is still a topic of discussion, sit down and make a list of important points to remember. A careful filing of committees, menus, responsibilities, activities to avoid and include will greatly help in banquet planning in the future.

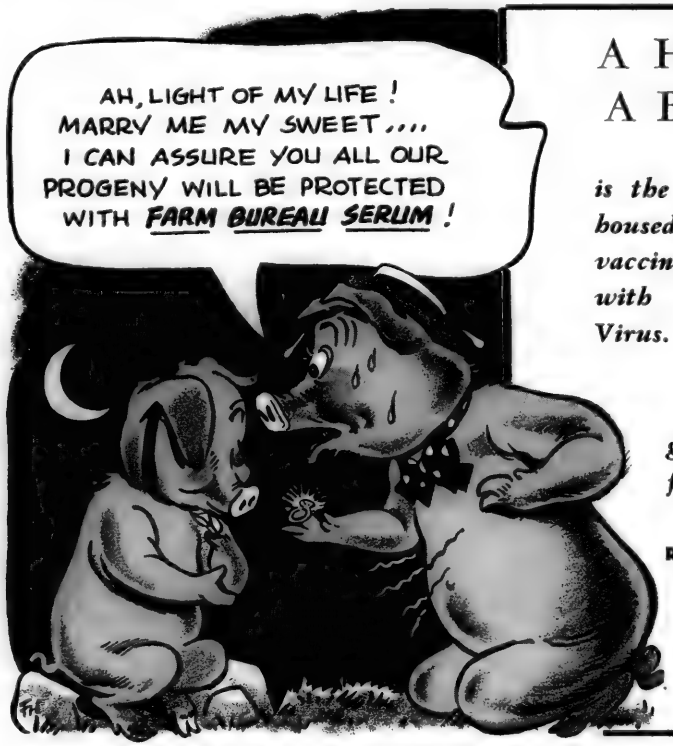
Brown County Rural Youthers studied the county school situation at the April 14 meeting. Present were Glenn Thomas, chairman of the County School Survey Committee; and two other members of the committee — Noah Marshall, and Lyndal Hoover. They presented the plan which the committee has recommended for grades one to eight.

Scheduled for May — "Cooperatives", with Robert Ericsson, manager Prairie Farms Creamery, Mount Sterling, as speaker.

Menard, new and going strong, heard Dr. Don Van Houweling, director of Veterinary Medical Relations of the Illinois Agricultural Association, speak May 6 on "Animal Health and Relationship to Human Welfare." He also showed a motion picture entitled "Batting Brucellosis."

The young married group of McHenry has been learning about deeds and abstracts.

The IAA and county Farm Bureaus certainly have had growing pains. In the last 18 months 35,000 new members — enough for a fair-sized city — have joined the Farm Bureau in Illinois.



A HOG WITH A BRIGHT FUTURE

is the hog that is fed properly, housed in sanitary quarters and vaccinated against hog cholera with Farm Bureau Serum and Virus. . . .

Yessir! Nothing to do but grow fat and make money for the boss.

Remember: The Smaller the Shoat The Cheaper the Shot

ILLINOIS FARM BUREAU SERUM ASSOCIATION

A STREAMLINED HOG FEEDING PROGRAM

GET 'EM

Farrow large, strong litters. To do this a well fortified ration must be given the sow during breeding and gestation periods. Pig and Sow Supplement has been formulated to supplement farm grains in the ration of the sow to insure the greatest number of live, strong pigs at birth.

KEEP 'EM

Profits depend on weight of litter at weaning time. This calls for a *large* number of *heavy* pigs. Proper nutrition is a very important factor. Start pigs eating as young as possible and feed the sow extra well throughout lactation. Balance farm grains with Pig and Sow Supplement and wean large litters of heavy, healthy pigs.

FINISH 'EM

A well balanced ration saves on farm grains —gives fast growth—economical gains. Feed pigs well all the way to market weight using 40% Hog Supplement on dry lot or 42% Pasture Supplement on pasture. These feeds balance the nutrient deficiencies of your farm grains which means cheaper gains and more profits.

Shorts in the News

Paul Laffey, assistant farm adviser in Marshall-Putnam counties since his discharge from the air forces in the fall of 1945, has succeeded L. J. Hager as farm adviser. Mr. Hager died suddenly March 12. Laffey graduated from the state College of Agriculture in 1941 and farmed for a year at his home in Hancock county before entering the service in 1942. He was a first lieutenant and heavy bomber pilot in the 15th air force. Laffey was married in April to Blanche Feldott, former assistant home adviser in Will county.

The America United national radio forum, which includes 10 programs on farm problems by Farm Bureau and the Grange, has been resumed on NBC stations and can be heard at noon daylight saving time or 11 a.m. central standard time on Sundays. The program, now in its third year, provides a forum for discussion of current issues by representatives of agriculture, labor, and industry.

Warren E. Myers, vocational agriculture teacher at Mazon high school in Grundy county, has been named Stark county farm adviser. He succeeds Wayne Gilbert. Myers comes from Bond county and graduated from the College of Agriculture in 1938. He is married and has three children.

What's the best way to plant corn—hill-dropping or checking? Tests at the University of Illinois reported by Jack Rundquist of the agronomy department show no advantage for hill-dropping over checking. Checked corn gave the highest yield in 1945 and 1946. Drilling with or without furrow openers on level land didn't increase yield over either checking or hill-dropping.

Continuing strong demand for meat is expected to keep prices from declining to support levels this year, according to the Department of Agriculture. Following are the support prices announced for hogs to September: June 21-28, $15.60 per cwt; June 28-July 5, $15.75; July 5-12, $16; July 12-19, $16.25; July 19-26, $16.50; July 26- Aug. 16, $16.75; Aug 6-Sept. 6. $17.

On medium quality soil best corn yields can be obtained by planting at the rate of three stalks per hill, according to four years of experiments at the University of Illinois agricultural experiment station.

Producers in the Carlinville area began shipments to the new Prairie Farms Creamery plant in May. Originally the smallest of PFC's 10 state-wide cooperative creameries, the Carlinville unit under Manager Fletcher Gourley is now the largest. It handled 1.5 million pounds of butter-fat last year. The new plant allows for maximum flexibility for expansion. Its equipment is the most modern available.

James O. Cain, manager of the Jacksonville office of Illinois Grain Corporation, an IAA affiliated grain brokerage co-op, said oats acreage in his territory is very small while beans and corn acreage should be high. His office handled four million bushels of grain last year.

The Knox County Oil Company recently bought a grain elevator at Knoxville where they will handle feed, seed, and fertilizer. They plan to build a warehouse and set up a county-wide distribution agency.

IAA President Charles B. Shuman addresses 40 Future Farmers April 25 at the Blackstone Hotel in Chicago. Prairie Farmer awarded this three-day all-expense paid Chicago trip to 10 Future Farmers of America in Illinois, Indiana, Michigan and Wisconsin. Right of Pres. Shuman are Arthur Page and Julian Bentley (right) of Prairie Farmer.

Illinois winners of the 1947 Prairie Farmer Future Farmer award trip to Chicago are shown after they arrived in the big city. First row, left to right, Kenneth Koertner, Pearl City, and Gilbert Blankenship, Yorkville. Second row, left to right, Len Shaw, Maroa; Lyle Schertz, Benson; Dick Higbee, Berwick; Clyde Miller, Erie; and Kenneth Cheatham, Greenville. Third row, left to right, Edmund Mitsdarfer, Philo; Ira Aves, Jr., Kirkland; and Virden Trotter, Adair. With the boys are back row, (left), J. B. Adams, Illinois executive secretary of the F.F.A. and (right) Wendell Unfer of Prairie Farmer.

During tree planting ceremony 4-H and Rural Youth members listen to Dr. Blair (left in black coat and hat) tell of his long experience with trees. Cabin in background is on bank of Rock river.

CAMP SHAW-WAW-NAS-SEE

FARM YOUTH GATHER TO PLANT TREES

"NOTHING should give you more enjoyment in the years to come than the planting of these trees. May God reward all of you."

Talking quietly and with deep conviction, Dr. Joseph Blair, dean and director emeritus of Illinois' College of Agriculture, thus addressed 300 northern Illinois Rural Youth and 4-H Club members.

The occasion was the tree-planting ceremony held in April near Kankakee at Camp Shaw-waw-nas-see, once an Indian camp site and now a summer camping ground for northern Illinois farm youth.

Dr. Blair's talk marked the first pause in a busy day for the 300 farm kids from 21 northern counties who gathered to help plant the trees.

Rural Youthers earlier had planted a windbreak of 150 evergreens along the northern boundary of the camp and 4-H'ers planted native deciduous trees, two for each of the 21 counties represented, on a large open area north of the Rock river and immediately below the evergreen windbreak.

Shaw-waw-nas-see is the first of four district camps to be developed under the new state 4-H camping program. It will be administered by farm and home advisers and state extension specialists.

The camp will open June 22 for its first group of 200 4-H Club members and will run through July 15. Each group will get a three-day camping holiday at a cost of $8 for each camper.

The following species of trees were dedicated to these counties by 4-H Club members: Will, Paper Birch; Cook, Horse Chestnut; McHenry, Green Ash; Ford, Pyramid Linden; Bureau, Quaking Aspen; La Salle, American Beech; Whiteside, Sugar Maple; Lee, Hackberry.

Grundy, English Elm; DeKalb, Scarlet Oak; Woodford, American Sycamore; Henry, White Ash; McLean, Wheatley Elm; Kankakee, Pin Oak; Livingston, Red Leaf Norway Maple; Kendall, Norway Maple; Stark, Red Maple; Marshall-Putnam, Thornless Honeylocust; Iroquois, American Linden; Lake, Ginkgo; DuPage, Eastern Red Oak.

County Rural Youth groups providing windbreak trees were: Bureau, Lee, Livingston, Grundy, McLean, DeKalb, Iroquois, Stark, Ford, LaSalle, Will, Woodford, McHenry, Kendall, Stephenson, Marshall-Putnam, Whiteside and Cook.

Helping to plant evergreen windbreak are, left to right, Ford County Rural Youthers: Joanne Radliff, Sibley; Lyle Liddle, Sibley; James Summers, Gibson City; Mona Stugen, Paxton; Robert Lawrence, Gibson City; Irene Gustafson, Paxton.

NEWS and VIEWS

ASSOCIATED WOMEN PLAN WORLD MEETING IN HOLLAND

An interesting program is being planned for the triennial conference in Holland of the Associated Country Women of the World in September.

Among the events are a reception at the Stedelijk Museum (Modern Art), a film on the reconstruction of Holland, a concert by the famous Concertgebouw orchestra and a "Dutch Day" which will feature a show-play. This will include a flag parade, greetings from all the countries, and an exhibition of dolls in national costume.

The second week of the conference will be devoted to day trips to farms, dairies, flower markets, the American war cemetery in Margraten and the battlefields at Arnheim. A delegate representing the Illinois Home Bureau Federation will attend.

PRESIDENT TO SPEAK

Miss Pearl E. Barnes, president of the Illinois Home Bureau Federation, will be the annual meeting speaker for the DuPage County Home Bureau Annual Meeting, June 26, in Wheaton. — Mrs. John A. Wiesbrock, DuPage County Home Bureau publicity chairman.

STAR STITCH BLOUSE

The charm of this crocheted blouse lies in its simplicity. Straight rows of star stitch form the complete sweater and that's good news for the beginner. Soft baby wool is used for this pretty blouse. For free instructions send a self-addressed stamped envelope to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

SHORTY GLOVES

Plain or striped, these shorty gloves are sturdy hand protectors. For all your sporting life — rowing, driving, ball games, picnics — they're tops for good looks and long wear. Crochet them with or without the bright stripes in a strong washable cotton. For free instructions send a self-addressed stamped envelope to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Ill.

SPONSOR UNIQUE CONTEST FOR WHITESIDE WOMEN

The Rock River Production Credit Association is sponsoring a window display contest for the Home Bureau units of Whiteside county.

A window has been secured in a business building in Sterling, and each unit plans and arranges its own display, writes a short article for publication on the display. The exhibit is left in the window for two weeks during which time the windows are judged. Prizes are to be awarded.

At present three units have exhibited "Proper Table Setting," "Home Bureau Aims," and "Feed Bag Clothing and Accessories." — Mrs. J. G. Gridley, Whiteside county publicity chairman.

CONGRATULATIONS

Hats off to Henry County Home Bureau. They held their annual tea May 1, and honored 115 new members by presenting them with corsages. The 115 new members resulted from a two weeks drive just before the tea. This brings the membership in Henry County Home Bureau to 557.

KENDALL BURNS NOTE, IS NOW DEBT FREE

On May 28, members of Kendall County Home Bureau were surprised at the dessert luncheon when the note for the Home Bureau car was burned.

"We had such a successful money making campaign . . . antique exhibit and the serving of the livestock banquet . . . that we are able to pay off the note on our new car. Think of it, in five months to be free of debt," writes Mrs. Frank Slauf, Kendall county publicity chairman.

EDGAR HEARS NEW HOME ADVISER

The tenth annual meeting of the Edgar County Home Bureau was held April 9 in Paris.

Mrs. Helen Drew Turner, newly appointed home-adviser-at-large, University of Illinois Home Economics extension staff and former home adviser in Edgar county, gave the home adviser's report and introduced Miss Laura E. Heddleson, Iowa, the new home adviser.

Mrs. A. R. Rohlfing, Farmington, former president of the Illinois Home Bureau Federation, gave the address in the afternoon.—Mrs. Owen Curtis, County publicity chairman, Edgar county.

MY FAVORITE RECIPE

Baking Powder Biscuits

2 cups sifted flour
3 tspns. baking powder
1 tsp. salt
2 to 4 tblspns. shortening
2/3 to ¾ cup milk

Sift together flour, baking powder and salt. Cut or rub in shortening. Add milk to make a soft dough. Turn out on lightly floured board and knead gently ½ minute. Pat or roll out ½ in. thick. Cut with floured biscuit cutter. Bake on ungreased baking sheet in hot oven (450° F.) 10 to 12 minutes. Yield: About 18 biscuits.

VARIATIONS:

Cheese Biscuits — Add ½ cup grated or shredded nippy cheese to flour mixture before adding milk.

Frankfurt Biscuits — Add 2 frankfurts cut in pieces to flour mixture in biscuit recipe before adding milk.

Savory Biscuits — Sift ¼ teaspoon dry mustard and ½ teaspoon poultry seasoning with dry ingredients.

Parsley-Bacon Biscuits — Add 1 tablespoon minced parsley and 1 slice cooked bacon, chopped to biscuit recipe.

for HOMEMAKERS

MATCHING PLAID SET

Summer and cotton plaid go hand in hand. This deep-crowned plaid gingham bonnet covers a smooth hairdo and frames the face with a turned back cuff. A self bow trims the back. When buying fabric for the hat get enough material for gloves. For free instructions send a self-addressed stamped envelope to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5, Illinois.

ST. CLAIR HOME BUREAU HEARS YOUTH DIRECTOR

E. D. Lyon, IAA director of Young People's Activities, spoke on "Our Obligations to Youth" at the ninth Annual Meeting of the St. Clair County Home Bureau, May 14, at St. Paul's Church Hall in Belleville.

Mrs. Charles Young, safety chairman for the Illinois Home Bureau Federation, presented the safety report in the form of a skit. At the luncheon the New Athens unit was honored for outstanding progress made during the past year. — Mrs. A. A. Germain, St. Clair county publicity chairman.

DAUGHTER BORN

A daughter, Marilyn Rae, was born, May 2, to Mr. and Mrs. Ray Hanley, Winchester. Mrs. Hanley was the former 4-H chairman for the Illinois Home Bureau Federation.

TO DISCUSS CHINA

Kane County Home Bureau scheduled Mrs. Leland S. Brubaker, Elgin, to discuss China at their annual meeting May 22. — Mrs. Cecile M. Reckinger, chairman-at-large, Kane County Home Bureau.

ADAMS COUNTY HOLDS 29TH ANNUAL MEETING

The 29th annual meeting of the Adams County Home Bureau was held May 22 at the Salem Church Hall in Quincy.

Miss Irma Cottingham, extension specialist in 4-H Club work at the University of Illinois, was scheduled to be the afternoon speaker. Miss Margaret Walbridge is beginning her tenth year as home adviser in Adams county.—Mrs. Ray Sims, president, Adams County Home Bureau.

TO CELEBRATE IN MACON

Plans are being made for a membership tea to be held in May or June for new Home Bureau members in Macon county.

"We have increased our membership by about 150 members and five new units this year so we feel we should celebrate in high style," states Mrs. Everett Goffinet, Macon county publicity chairman.

PUBLICITY CHAIRMAN BACK

We are glad to have Mrs. Edward A. Schilf, Illinois Home Bureau publicity chairman, back on the job reporting the affairs of her organization. She had been confined to the hospital because of illness.

BUFFET CLOTH

This hand-crocheted table or buffet runner provides a lovely setting for your party refreshments. It is easy to do. If you'd like matching napkins just insert a crocheted motif in the corner of each napkin. For free instructions, send a self-addressed stamped envelope to Women's Editor, Illinois Agricultural Association Record, 608 South Dearborn Street, Chicago 5.

MADISON HOLDS CONTEST

Mrs. Richard E. Ellis, Madison county publicity chairman, reports that they celebrated National Home Demonstration week the first week in May by having window displays all over the county. Each unit in Madison county displayed articles that were made in Home Bureau.

Morgan County Farm Bureau recently completed a $20,000 remodeling program. The bright, modern lobby of the office in Jacksonville shown above gives you a glimpse of one of Illinois' most beautiful Farm Bureau interiors.

EVERY WHEEL Should wear BLUE SEAL

RUGGED

Blue Seal Tractor Tires are built to work on rough plowed ground or smooth hard pavements. The deep, rugged tread bites into the earth, giving maximum traction. Tapered sides of the widely spaced cleats throw off the dirt in a self-cleaning action. The continuous center rib gives an unbroken, smooth road ride.

TOUGH

Blue Seal Truck Tires are tough. The rayon cord construction makes the tire run cooler and longer. The tough rubber tread, supported by the tough carcass gives a tire that can take a lot of punishment.

STRONG

Blue Seal Passenger Tires are strong and serviceable. Built to give a quiet ride and long life, they have proved their strength and durability on rough, unpaved roads.

See Your Blue Seal Salesman

ILLINOIS FARM SUPPLY COMPANY
608 SOUTH DEARBORN ST. CHICAGO, ILLINOIS

There's nothing prettier, nothing makes a man prouder than new corn stretching up, deep green, full of vigor and promise. But remember this: Hail strikes hard and fast and without warning. It can cut that corn to ribbons before your eyes and leave you standing there, no longer proud, but mighty SAD. But you needn't take chances with hail. Last year Country Mutual Fire Company paid out over $1,000,000 to reimburse Illinois Farm Bureau farmers for hail damage sustained to growing crops. This year, enjoy the same low-cost protection. See your Farm Bureau insurance agent today and learn how little it costs to know that your growing crops are safe.

SAFETY ISLANDS IN THE COUNTRY

By President Charles B. Shuman

SEVERAL years ago an elderly friend came with me to Chicago on one of our annual cattle marketing trips. We rode all night on the caboose, watched our steers sell and, it being his first trip to the City, we started to see the sights. After a wild ride on the elevated train to the Loop, we started walking up a busy street. Suddenly we were caught in the middle of a crossing by the changing traffic light and were forced to stand on a safety island while traffic whizzed by. Visibly shaken by these experiences, John insisted that I take him to the railroad station, from where he refused to move until train time. Safe and sound at home, John was convinced that the city was the most dangerous place on earth.

Months later, I realized that John had a false sense of security, as I stood at a distance in helpless, frozen horror and watched a friend drive his farm truck squarely in front of a speeding passenger train. Again and again I have had this sense of security shaken as I watched the lifeless body of a neighbor boy pulled out of the lake, or the hired man's wife picked up with a broken leg after a fall from a cherry tree, or another neighbor rushed to the hospital for amputation as a result of pulling at clogged weeds in a combine.

We on the farms must face facts. Agriculture is one of the three most hazardous industries in America today. Farm accidents in Illinois alone last year resulted in 190 deaths and 230 permanent injuries and disabilities. If all the victims of farm accidents in Illinois last year were gathered together in one place, we would have a crowd of 1327 people.

We are in the midst of a great era of mechanization in agriculture. If we are not to be overcome by our machines, we must add the elements of skill and safety to power and speed for success in modern farm operation. Accidents can be prevented if we will train ourselves and our children to be safety conscious.

The designated period of July 20 to 26 as Farm Safety Week could well be used by all of us to carefully eliminate hazardous conditions in our homes and on our farms. We can, in effect, make "safety islands" out of our own farms so that we can in truth say "safe and sound at home on the farm."

The Illinois Agricultural Association RECORD is published monthly except August by the Illinois Agricultural Association at 1501 W. Washington Road. Mendota, Ill. Editorial Offices, 43 East Ohio St., Chicago, Ill. Entered as second class matter at post office, Mendota, Ill., Sept. 11, 1936. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1933. Address all communications for publication to Editorial Offices, Illinois Agricultural Association RECORD, 43 East Ohio St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmasters: Send notices on Form 3579. Undeliverable copies returned under Form 3579 to editorial offices, 43 E. Ohio St., Chicago 11, Ill.

LET'S GO TO THE SPORTS FESTIVAL

PLAN BIGGEST AND BEST FARM SPORTS EVENT ON RECORD

This is an action shot of girls' softball taken during an Illinois Farm Sports Festival a few years ago.

PLANS for the biggest and best Illinois Farm Sports Festival in history are now well under way.

So get somebody to take care of the chores Thursday and Friday, Aug. 28-29, folks, because those are the days we expect to see you in Urbana-Champaign. Get out and root for the home county. Or better still, get on one of your county's teams.

Yes, even grandma and junior will be able to add a few points for the greater glory of the home county. So get on a team or enter the singles events now before it is too late.

What would you like to do? There must be something in the list below that you can do better than the other fellow. Come on, your county needs those points.

Take your choice. Here are most of the events planned: archery, baseball, softball, bowling, checkers, 4-H physical fitness, hog calling, horseshoes, rifle shoot, skeet shoot, trap shoot, swimming, track, tug o' war, volley ball, woodchopping, chair quoits, clock golf, dart throwing, horseshoes, knot tying, shuffleboard, table tennis, barber shop quartet singing, choral and family singing, music specialties, novelty bands, folk dancing, and square dancing.

Wrestling has been dropped from the festival program this year because of the lack of entrants. Added will be the barber shop quartet. So get out the old derby, glue on a handlebar mustache and round up three other fellows who can carry a tune and you're all set. Also added are 4-H rhythm and marching groups. And for a few laughs we are planning a pie-eating or watermelon eating contest during one of the dinnerbell hour broadcasts. No points are awarded in the eating feats.

Bowling this year will have a special division for Rural Youth, with classes each for boys and girls teams and singles. A mixed doubles event also has been arranged for Rural youth members. Men and women will continue to have team and singles in the "Open" division.

The skeet and trapshooting events have been expanded to include competition for women and juniors, oldtimers and doubles of father and son, husband and wife, etc., in the trap shooting. Skeet shooting also has been enlarged but there are no classes for women.

By June 15 seven Farm Bureau baseball leagues were conducting district play and an eighth district was being worked out. Indications are that competition will be strong this year because of the close scoring. All of the teams say they have an eye on the championship won by Will county last year. District champions will settle the issue during the Sports Festival.

In the same way champions from 32 districts in the state will meet during the festival to decide the winner of the state Rural Youth Softball tournament won by Carroll county last year. Rural Youth district playoffs must be completed by Aug. 10. All counties will receive points if their Rural Youth softball team participates in district play.

Another departure from former years will be the elimination of the general program of competition and entertainment held at the university's Memorial Stadium the first night of the Festival. Substituting will be a "three-ring circus" of music, dancing, and entertainment.

1. A square dance jamboree for the folks who like the old time dances will be held in Huff gymnasium.

2. For the younger folks who like to "cut a rug" Dick Cisne and his orchestra will provide the jive for a big swing festival at a place to be announced later.

3. And for the folks who would rather look on, a general program of entertainment will be held at the university Auditorium including music, singing, and a special showing of the IAA color movie of the 1946 Sports Festival.

The climax of the two-day event will be the staging of several final contests, such as woodchopping and hog-calling, at the Stadium Friday afternoon, the awarding of trophies and ribbons to the winners, and the selection of a Sports Festival queen. Both WLS and WDZ will provide talent for entertaining the spectators.

All contestant entries in the Sports Festival must be made through county Farm Bureaus or Home Bureaus and the names of contestants in all events except softball must be in the Illinois Agricultural Association office at 43 East Ohio Street, Chicago, Ill., by August 25. Softball eligibility lists must be postmarked before midnight, Aug. 16.

Room reservations will be handled

(*Continued on page* 21)

Shelby Lends a Helping Hand

By LEW REISNER
Field Editor, IAA RECORD

THE co-op livestock yards at Shelbyville branched out this spring and on April 1 opened yards in neighboring Effingham county.

The Effingham yards, following the pattern of other newly organized co-op yards, are buying hogs and veal calves. During their first month they handled $70,000 of livestock, mostly hogs bought and paid for at the local yards.

Leo Mecum, Effingham yards manager, says farmers from almost every point in the county, and a few from adjoining counties, have used the yards as a point to sell stock. In April they received 1087 hogs, 138 calves, and 25 head of cattle.

The yards at Effingham were started by mutual agreement between Effingham and Shelbyville County Farm Bureaus. Since books and overall management are centered at Shelbyville, money is saved on overhead, bookkeeping, and the pooling of stock loads moving to market.

Scales, office building and unloading chutes were provided by the Shelbyville cooperative. The large covered pens, built this spring, are owned by the Pennsylvania railroad.

Effingham is cutting into the territory of the parent cooperative at Shelbyville but the managers say there is plenty of business for both yards.

Effingham county, located south of Shelby county and between St. Louis and Terre Haute in south central Illinois, borders on the southern edge of the heavy Illinois livestock belt. Although nearly every farmer raises hogs, dairying is the chief farming interest.

Whether hog populations are too scattered, or for other reasons, packer buyers have not located in Effingham county but they are buying in Shelby county, Effingham's neighbor to the north. Packer buyers, however, have been moving south steadily each year from their original bases in northern Illinois.

In any case, this is the first buying point of any size in Effingham county and the support farmers are giving the co-op proves its need and eventual success.

It is felt that in time Effingham should approach the volume of the Shelbyville co-op which last year bought and shipped 25,849 head of hogs, calves, sheep, and cattle.

Meanwhile, the Shelbyville cooperative, a charter member of the Illinois Livestock Marketing Association, is completing its 15th year as a successful buyer of livestock.

Headline illustration above shows new scale house, loading pens and yards at the Effingham concentration point.

"Most of the troubles that come up in a new yard we've pretty well outgrown," LaRue Sauers, former manager of the Shelbyville yards, explained. "Farmers have learned how we sort and pay on a weight basis."

Sauers said their volume on hogs has increased steadily since the yards started buying direct in 1932. Sheep, lambs, beef cattle and feeders handled have decreased sharply, indicating a county-wide decrease rather than a falling off of business.

Sauers was hired as the Shelbyville manager in 1943 but transferred to Decatur on June 1 to the state sales office of the Illinois Livestock Marketing Association where he will work as assistant sales manager under H. W. Trautmann.

At the state sales office Sauers will be in contact with all direct buying points in the Association, including Shelbyville and Effingham, since the Decatur office takes all orders from packer buyers and fills them through its state-wide network of local buying points.

This idea of a state-wide cooperative sales agency with local buying points to compete with packers buying direct from farmers is still a new concept to many Illinois farmers.

But the idea is practical and popular. County after county is organizing livestock marketing associations although many at present exist only on paper.

Farmers like to sell their livestock at home. If they can sell them at home cooperatively so much the better — Shelbyville's many years of success would indicate this.

Taking the long view the future of the Illinois Livestock Marketing Association looks bright. For the present, men who should know say it is fast becoming one of the largest order buyers in the country.

Left: Quoting day's hog market over phone, LaRue Sauers, Shelby co-op marketing manager, talks to shipper as C. T. Shields, Lakewood farmer, listens in. Right: Leo Mecum, Effingham manager, weighs in hog for Fred Feller, Altamont.

U. S. PAYS HIGH PRICE FOR FEEDING WORLD

AMERICA'S grocery bill is falling, but it still is close to the all-time high.

Americans are paying a big price for feeding the rest of the world.

This is the most salient fact of our 1947 economy as Congress faces the issue: Where do we go from here?

Big credits to the hungry nations as advocated by Henry Wallace could and undoubtedly will send food prices soaring again.

Limited food exports, on the other hand, would be likely to hold prices down or force them lower.

* * *

COUPLE the export program with the current high rate of employment and all-time record payrolls and you have the answer to a near 100 per cent rise in the cost of dinner tonight since the food surplus years of 1935-39.

Take a look at our food exports during the year 1945-46 alone:

Forty-four per cent of our home-grown wheat and flour went out of the country, 42 per cent of the dried milk, 31 per cent of the skimmed milk, 45 per cent of the rice, 41 per cent of dry beans and peas, 41 per cent of the canned fish, 18 per cent of corn and corn products, 25 per cent of the cheese, 11 per cent of the fats and oils, and 10 per cent of the egg yield in dried and frozen form.

These and other export items add up to 10 per cent of our total foods, produced here and imported into the United States.

* * *

PURCHASES for export by the Army, the Department of Agriculture for account of foreign nations, and by private traders acting for foreign buyers, are following the same pattern this year.

This still leaves plenty for Americans to eat — about 90 per cent of the total — but it creates a high price pattern which affects nearly all lines of food.

The only thing that saves the situation from becoming worse for consumers is our continuing record crops.

The wheat output, for example, has spiraled from 758,000,000 bushels in the year before the war to 1,291,000,000 bushels estimated for 1947. Corn production zoomed from 2,316,000,000 bushels to successive 3,000,000,000 bushel crops.

* * *

BEEF production is running at a new 40-year high. Dairymen are turning out more milk, cheese, butter and ice cream than ever before.

Potatoes are over-flowing the market place, and last year's big onion and citrus fruit crops dropped prices far below profitable returns to growers.

Turkeys and broiler chickens hit the toboggan last winter. Prices fell below government 90 per cent parity guarantee levels. The same thing happened in potatoes and for a while in eggs, so the government moved in and bought.

WHY DOES President Truman appeal for lower prices while his agricultural administrators buy produce to keep prices up?

The answer goes back to the war year of 1942. The government asked farmers to produce more soybeans, peanuts, hogs, eggs, milk, chickens, wheat, corn, sugar beets and a lot of other things.

The organized farmers said, "O.K., but how about some price insurance? We're afraid a big plowup will break the market as soon as the war is over and leave us holding the bag with all our surpluses."

The farmers took their cue from war industries which had been awarded cost plus contracts.

So Congress enacted the Steagall amendment which, in effect, guaranteed the producers 90 per cent of parity, or what they consider is a fair price, for the years 1947 and 1948.

SO FAR, the government has found it necessary to buy potatoes, eggs, turkeys, some chickens, dry milk and wool to keep its pledge to farmers.

The whole program has cost between $100,000,000 and $200,000,000 instead of the $2,000,000,000 a year some government economists estimated it might cost.

What really is going on is that Uncle Sam is lending money abroad so England, France, China, Japan and others can buy our wheat, eggs, dry milk, beef, lard, corn, rice and vegetable oils.

These foreign purchases keep prices up, easing the problem of government price supports at home.

* * *

FOOD PRICES averaged 122 per cent of parity in March after a steady rise from 94 in 1941.

Is the government still paying farmers subsidies not to produce?

This question arises over soil conservation payments which totaled $253,523,000 in 1945-46.

These payments were not made for leaving farm lands idle. They were paid to encourage farmers to conserve the soil by buying lime and phosphates, strip cropping, contour planting and cultivation to prevent erosion — tree planting, sowing clover seed and winter cover crops, etc.

SECRETARY of Agriculture Anderson argues that the public has an interest in soil maintenance and future food production.

If farmers let their land wash down the river they will lose, of course, but so will consumers when the food supply drops and prices go up.

Congress is planning sharply to reduce these payments for 1947 and wipe them out entirely for next year.

A lot of farmers agree that the payments are unjustified at a time when farm income is high.

Federal administrators fear not only the loss of thousands of jobs, but they have a genuine concern lest the whole soil conservation program and the gains of the last decade be wasted.

Flooded fields were not an uncommon sight in Illinois this spring. Here Richard Erickson of Orland Park surveys a 40-acre lake on one of his fields. Incessant rains have done inestimable damage to grain crops.

ILLINOIS Agricultural Association and all but one of its 15 affiliated companies have moved—lock, stock, and barrel—into their new Chicago office building.

The transfer was completed on June 28 when Country Mutual Casualty Company, last of the companies to be transferred, was moved into the new office building purchased this spring by the Illinois Agricultural Association.

Along with newly decorated, smoke-free offices the IAA and associated companies have acquired a new address, its second in more than 25 years in Chicago.

All mail should be addressed to 43 East Ohio Street, Chicago 11, Illinois, except for Farm Supply Company.

Illinois Farm Supply Company, only company not yet moved, will remain at its present address in the Transportation building for at least a year.

Moving the IAA and associated companies was one of the largest moving jobs tackled by the Chicago moving concern that contracted the operation. The large, covered moving vans made 150 trips to complete the transfer of more than 1½ miles from one office to the other.

The transfer company, experts in their field, moved most of the larger companies, as well as the IAA, during weekends. The offices during the work week were not seriously disturbed.

The new home has 86,000 square feet of rentable floor space and is now fully occupied, principally by the IAA and its associated companies.

The ground floor is occupied by eight shops, including a restaurant. The second floor is occupied by the IAA office manager, personnel director, and departments under their charge.

On the third, fourth and fifth floors is contained the Country Life Insurance Company, largest single user of office floor space. The Illinois Agricultural Auditing Association is also on the fifth floor. Country Mutual Casualty Company is located on the sixth and seventh, and Country Mutual Fire Company on the eighth floor.

The ninth and tenth floors will be used by the Farm Supply Company as soon as they are available. At present the ninth is being used for files and the tenth for offices of the president, treasurer, comptroller, and legal and publicity departments.

The eleventh floor houses all other departments of the IAA and affiliated companies.

In its moving the IAA did not run into a serious hitch. Because they started remodeling the new building early in the spring, they got ahead of the homebuilding rush and, due to the wet spring, had no trouble hiring workmen who otherwise might have been employed out-of-doors.

Steady growth of the IAA and associated companies has accentuated the move to acquire new office quarters. In 1921 the IAA leased 5050 square feet of space in the Transportation Building, its former location.

Today before moving, the IAA and associated companies occupied 56,190 square feet of office space and 7,665 square feet of storage space, more than 1½ acres. Employees have also grown in numbers from 54 in 1920 to 425 persons now employed in the Chicago offices.

The new location lies 12 blocks north of the Transportation Building in a business district one block off Michigan Avenue. The heart of the Loop can be reached in three minutes by subway from the near-by Grand Avenue subway station.

Our Cover

OUR front cover this month is a picture of the new home of the Illinois Agricultural Association at 43 East Ohio Street, Chicago. As the RECORD goes to press, the IAA is in the midst of moving from its old location at 608 South Dearborn. The new building is 12 stories high and is a few blocks north of the Loop across the Chicago river. It is in Chicago's most rapidly developing modern business area.

Except for brick on the alley side, the building exterior is of Indiana limestone with a granite base.

The building is of fireproof construction and is serviced by four high-speed elevators with enclosed fireproof shafts. Situated on a corner lot, it is well-lighted and has a light court at the rear, above the first three floors. Farm Bureau people visiting in Chicago are cordially invited to inspect the new building.

SOIL TESTS VALUELESS WITHOUT A BALANCED PERMANENT PROGRAM

There are no miracles in the mechanics of soil testing and a lot of requests for soil tests are valueless unless they're followed by a "planned, permanent soil improvement program."

This warning appears in a short article in the June issue of the Madison County Farm Bureau News.

"If you have a poor old field you want to get the last bushel of corn or tomatoes out of," the article states, "don't bring in a pint of dirt and expect the Farm Adviser to tell you how to do it. It can't be done.

"The soil testing laboratory is set up to give farmers a valuable guide on the present fertility condition of their farm and a program to build it up to the best economical farm output.

"That isn't done in one year either — it can't be. Test first, then follow a planned, permanent soil improvement program."

SO FAR, the government has found it necessary to buy potatoes, eggs, turkeys, some chickens, dry milk and wool to keep its pledge to farmers.

The whole program has cost between $100,000,000 and $200,000,000 instead of the $2,000,000,000 a year some government economists estimated it might cost.

Is the government still paying farmers subsidies not to produce?

Congress is planning sharply to reduce these payments for 1947 and wipe them out entirely for next year.

Flooded fields were not an uncommon sight in Illinois this spring. Here Richard Erickson of Orland Park surveys a 40-acre lake on one of his fields. Incessant rains have done inestimable damage to grain crops.

IAA MOVES TO 43 EAST OHIO ST.

SOIL TESTS VALUELESS WITHOUT A BALANCED PERMANENT PROGRAM

Christian county 4-H Club boys learn something about concrete at a recent farm concrete school held at the Farm Bureau office. Seated, left to right: Robert Reber, Dale Westerman, Don Southard, Ralph Jones, Cecil Damery, Bill Jones, and Lester Southard. Standing are S. A. Kincaid, cement company representative, and Glenn H. Gordon, youth assistant.

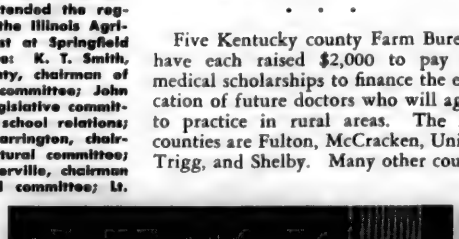
Shorts in the News

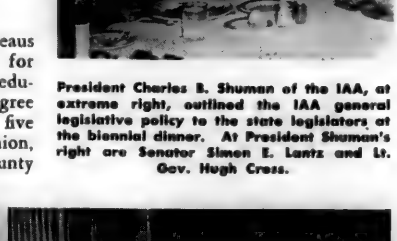
Ken Cheatham of Greenville, a sophomore in the University of Illinois College of Agriculture, is the new state president of the Future Farmers of America. The state convention was held in Urbana. Cheatham succeeds Richard Higbee of Berwick. The new secretary-treasurer is Edward Heine of Hampshire. Virden Trotter of Adair was named reporter.

• • •

LaRue Sauers, 29, manager of the Shelby County Marketing Association since 1943, has been named assistant sales manager of the Illinois Livestock Marketing Association. Sauers comes from Sangamon county and is a graduate of the College of Agriculture. He formerly was employed by Peoria Producers and taught vocational agriculture. He has two children.

Some 150 of the 200 members of the Illinois General Assembly attended the regular biennial dinner with the Illinois Agricultural Association as host at Springfield in May. Left to right are: K. T. Smith, IAA director, Greene county, chairman of the IAA public relations committee; John K. Cox, member of IAA legislative committee and director of rural school relations; Rep. Harold D. Kelsey, Barrington, chairman of the House agricultural committee; Sen. Simon E. Lantz, Congerville, chairman of the Senate agricultural committee; Lt. Gov. Hugh Cross, Jerseyville; Mrs. Hugh Green and Hugh Green, Jacksonville, speaker of the House; F. E. Morris, vice-president of the IAA and member of public relations committee; and Paul Mathias, IAA secretary and chairman of the IAA legislative committee, who spoke briefly on the IAA legislative program.





IAA membership on May 31, last official count, now stands at the record high 144,040, an increase of 16,000 from the same month last year. Cook leads the state with 3920 members.

• • •

How much can you save by buying a hog, then processing, quickfreezing, and placing it in a locker? Said Robert Dunlap of Effingham: "At present retail prices for meat my cost would have been $91.20. I saved $23.11 on one 191 pound dressed hog."

• • •

Special agricultural weather forecasts prepared for Illinois by the U. S. weather bureau are being carried by the following radio stations: Chicago, WLS, 11 a.m.; Peoria, WMBD, 11:30; Peoria, WWXL, 10:45; Urbana, WILL, 12:30; Cairo, WKRO, 11:30; Springfield, WTAX, 11:35; Springfield, WCVS, 11:45.

• • •

Five Kentucky county Farm Bureaus have each raised $2,000 to pay for medical scholarships to finance the education of future doctors who will agree to practice in rural areas. The five counties are Fulton, McCracken, Union, Trigg, and Shelby. Many other county Farm Bureaus have contributed varying amounts for this purpose.

• • •

Galesburg grade school students are listening to their country cousins with quite a bit of interest this summer. The reason: Knox County Rural Youthers are teaching them how to tend and get the most out of a vegetable garden. Sumner Johnson is chairman of the group undertaking the project.

• • •

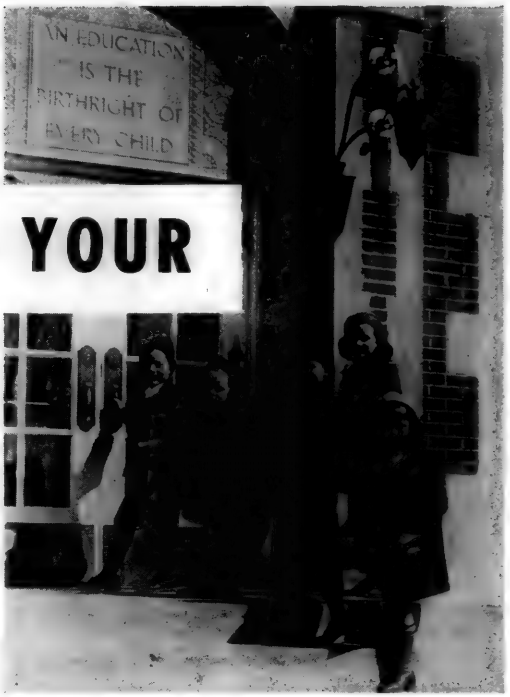
McLean county is the top corn producing county in the United States according to a recent report of the census bureau. The next three, in this order, also are Illinois counties: Livingston, La Salle and Iroquois. Champaign is seventh, Bureau, 12th, and Henry, 15th. Other Illinois counties which placed among the first 50 in national rank are as follows: Vermilion, 23; Lee, 27; Kankakee, 31; Whiteside, 43; Will, 45; and DeKalb, 48.

• • •

Livingston county is the nation's third largest producer of oats according to the census bureau. Eight other Illinois counties were listed among the first 50 in the nation in oats production. They are: La Salle, 7; Iroquois, 11; McLean, 16; Ogle, 29; Bureau, 34; Will, 36; and Lee, 50.

President Charles B. Shuman of the IAA, at extreme right, outlined the IAA general legislative policy to the state legislators at the biennial dinner. At President Shuman's right are Senator Simon E. Lantz and Lt. Gov. Hugh Cross.

WHAT • • *is best for* YOUR SCHOOL DISTRICT?



SHOULD the county school survey committee recommend a plan of school reorganization it thinks the public will accept? Or should it recommend changes it believes necessary but which might not be approved by the voters?

These questions often arise in the deliberations of the County School Survey Committees. What is the answer? Is it better to be satisfied with a plan that will offer a few minor changes or should the school committees break with the past and recommend a plan for schools which will still be modern and flexible 25 years from now?

Some people say: "Well, some change is better than none at all." That may be true generally. But I'm afraid it isn't always true when applied to the reorganization of our schools. Why? Because suppose your county committee decides on a certain measure of consolidation and reorganization. All right, your district is set up. You sell bonds; you construct a new building; you elect your new school board. You have made your improvements.

Now your school system is pretty well frozen for the next several decades. But a few years hence your grown up children may decide they want something better for their children, or they may decide they can have more efficiency and economy under a different type of school reorganization. They may have to make the same decision you have to make now, only then it may be a lot more expensive.

The director of this department has held consistently that the job of the County Survey Committee is to make recommendations which they consider to be for the best interests of the people, both now and in future years. Their work is to consider, make proposals, and explain.

If they do that, they have complied with the intent of the law regardless of whether those proposals are voted up or down. Then too, if a partially satisfactory solution would be accepted by the public today, perhaps a better plan would be accepted tomorrow after more educational work.

By JOHN K. COX, Director
IAA Rural School Relations

An uninformed public does not know what plans for the future are best. Many still see no particular limitations in the small one-room school which enrolls one pupil in a grade or in the small high school that neglects to prepare 80 per cent of its graduates for living and working in the community. Some think the high school must be all right because Junior plays on the basketball team. The handicapped school like the handicapped child is often more warmly loved and more stoutly defended than the self-reliant school or child.

It is unsafe for a county survey committee to follow public opinion where such thinking is predominant. A county survey committee that tries to figure out what the public is thinking and makes its recommendations only on that basis is not giving people the benefit of their broader knowledge and study. If that county committee guesses wrong, they have made a much bigger mistake than if the best plan were voted down.

Our policy has been to discourage school reorganization, except such as is approved by the county survey committee, until the county committee can make proposals for an over-all reorganization plan which considers the rights of all. Some county committees have been too quick to give approval to locally inspired consolidations. It is hoped that the County Survey Committees will rectify the mistakes that have already been made.

The larger administrative district embracing both grades and high school will in general provide more flexibility in view of future demands, as well as more efficiency and economy. If that is our goal, we should discourage half way steps in school reorganization if such steps will tend to freeze further progress toward arriving at our goal.

GOLD FROM THE GRASS ROOTS

FARMING has come down through the ages as an art, but to keep pace with our times it must become a business using the principles of business. It must lower the cost per unit, grow more on fewer acres, cull out boarding cows for higher producing herds, grow more home-grown feeds, make higher quality hays to substitute for costly concentrates, use labor saving methods, and use permanent land use methods for conservation of the soil and water resources.

Farming is Manufacturing

Farming is basically a manufacturing process of converting the plant foods of the earth into feeds, foods, fibers and oils. Farming is also a way of life. But to be a rich and enduring life, it must be economically sound; it must provide the means to educate children, pay for roads, buy a new car and the thousands of services and things scientists and engineers can provide, and farmers can use.

Over all, this farming must remain the foundation of the American way of life, the builder and preserver of the self-reliant individualists who see the hand of God in their surroundings.

America is safe in such hands, but we are not yet even near to the approaches to this ideal. Much remains to be done before we achieve our ideal.

The opportunities for lowering the costs of production so as to still make a profit in a lower and perhaps wider market have hardly been touched in many instances. Never before has agriculture had so many new technologies from science and engineering that can be used to greatly increase efficiencies and lower the cost of production. These technologies seem to offer us the best opportunity to compete with the people of the world who must hitch women to an irrigation wheel, plow with oxen, or live by some dictatorship that promises food and security, but at the cost of the individual liberty which we cherish.

Here are some examples to illustrate how to lower cost of production:

More Crops — Fewer Acres

The U. S. average corn yield is about 34 bushels per acre. Instead of making our total volume of corn on about 90 million acres, there would be more profit and better feed and soil conservation if this same volume of corn were to be made on about 60 million acres.

About 40% — 35 million acres — of U. S. acres planted in corn each year yield only about 12 to 20 bushels per acre. With such yields, the cost of production is about one dollar or more per bushel. Under such conditions there can be no profit with corn selling at one dollar per bushel. With corn at two dollars there still is no buying power. In such communities humans compete with the mule for corn — it does not show up on the table often enough as bacon and eggs, or milk, cheese or steaks.

Science today shows practical means to make nearly 100 bushels or more per acre on any corn land of America in normal years at costs ranging from 30 cents to 70 cents per bushel, with profits of $60 to $80 per acre when corn is worth one dollar. Yields of

STOP!

Before you turn that key, stop and consider the consequences of driving without adequate insurance protection — the serious public liability and property damage risks, damage to your own car, the medical expenses that could be involved. Consider these things, then get in touch with your insurance agent at the Farm Bureau and get the facts on low cost, complete Auto Insurance coverage.

Country Casualty Auto Insurance policies are issued ONLY to Farm Bureau members. It is YOUR company, operated by YOUR representatives, to protect YOU while YOU drive, at a savings to YOU.

If you do not have adequate insurance coverage you are taking tremendous risks. Have a talk today with your Farm Bureau insurance representative. His job is to see you have proper protection.

COUNTRY MUTUAL CASUALTY COMPANY

Headline illustration at left shows one of IAA Director Curtiss' contoured fields. This field has been contoured since 1936.

By LEW REISNER
Field Editor, IAA Record

HOMER CURTISS, IAA director from the 13th congressional district is a modern and progressive farmer and farm leader. You can see it in his farming operations; you can tell it by his efforts on behalf of Farm Bureau.

This stocky, even-humored director is as much a part of his community as the rolling prairie and sparsely-wooded hillsides typical of the countryside around his farm home near Stockton in Jo Daviess county. But his interest and influence in farm affairs do not stop at the county line.

Curtiss came to the IAA board in 1942, succeeding Leo Knox of Morrison, and represents Jo Daviess, Winnebago, Carroll, Whiteside, Ogle and Lee counties.

Not long after his election to the state board, Curtiss was selected as a member of the nation-wide dairy committee of the American Farm Bureau Federation. As an IAA director he has worked on the board's marketing committee.

Farming is Traditional

"I guess I inherited an interest in farm organization work," Curtiss said recently. His grandfather, George W. Curtiss, introduced the bill establishing Farmers' Institute when he was a member of the legislature at Springfield. The Institute, although primarily educational, was the farmers' forum of its day.

Another ancestor, Major E. A. Giller of Whitehall in Greene county, his maternal grandfather, was master of the state Grange and, during his lifetime, was active in the affairs of the national Grange.

The elder Curtiss, in a sense the founder of the family farm, was an eastern railroad man who came west to live in northwestern Illinois. He bought the 160 acres that is now the Curtiss homestead for a total of $200 in 1851 and at one time owned about 1000 acres near Stockton.

Homer is the fourth generation Curtiss to own the home farm. He took over management in 1927 after his brother, George, left to manage the McLean County Service Company, a position he still holds.

* * *

Editor's Note: This is the eighth of a series of articles to acquaint you with the men you elected to the Illinois Agricultural Association board of directors.

After graduating from the University of Illinois College of Agriculture in 1927 Curtiss worked for a year in Marshall-Putnam county as assistant farm adviser. He returned to the home farm in the spring of 1929 and with his bride, the former Bernadine Shuman of Sullivan, a sister of IAA President Charles B. Shuman, started farming on shares.

Buys Homestead

The young couple had just got a good start farming before the depression came.

"Although times were hard we seemed to get along," Curtiss recalls, and during 1935 he contracted to buy the home farm. In 1942 he bought an additional 120 and now farms 400 acres with the help of a hired man and his three school age sons.

One of the first farmers in Jo Daviess county to sign for soil conservation, Curtiss has had more than 10 years' experience with contour and strip farming. He contours only the steeper slopes. Much of his land is level prairie.

Curtiss is milking 34 cows this summer, somewhat more than the 25-30 cows he normally keeps. His excellent herd of purebred Holsteins seldom is far from the top in the local dairy testing association.

In addition to his dairy herd, Curtiss raises about 150 hogs a year and maintains a flock of chickens. He also raises hybrid seed corn for one of the larger commercial seed companies, about 60 acres a year, on a contract basis.

He follows a four year corn, corn, oats and sweet clover rotation on the home farm. On the rougher land he rotates

In action with his hay field chopper, IAA Director Curtiss watches windrow as his son, George, works with pitchfork, and small nephew looks on.

In their spacious living room, Mr. and Mrs. Curtiss are surrounded by their children, left to right: Margaret, 14; George, 17; Cynthia, 4; Robert, 15; and Richard 7.

Demonstrating his labor saving granary, Curtiss and Wilson Westaby, hired man, stand by sack of corn they have just ground with hammer mill. Grain chute above his head conveys corn from bin. No hand shoveling is necessary.

corn, oats, and two years of alfalfa. He pastures both the sweet clover and alfalfa, although the alfalfa is generally cut for hay the first year.

The Curtiss family have always been active Farm Bureau members. Homer's father was a charter member and his brother George was the first treasurer of the Jo Daviess County Farm Bureau. His father was state president of the Farmers' Institute before Farm Bureau was organized.

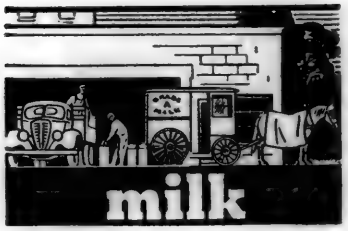
Activities are Varied

Homer has served on the Jo Daviess Farm Bureau board for 15 years, as president for one term and as secretary in recent years. Active in civic affairs, Curtiss is a township supervisor by appointment, a director in the local farmers elevator, and a Moderator of the Stockton Universalist church. Locally he is probably known best for his natural, rich bass voice which for years has found expression in barber shop quartets and larger choral groups.

Mr. and Mrs. Curtiss have five children of school and pre-school age: George, 17, Robert, 15, Margaret, 14, Richard, 7, and Cynthia, 4. With this growing family to send to school, education is an everyday reality for the Curtiss parents.

Homer's personal creed for Farm Bureau stems from his many experiences with education, formal and informal. "Farm Bureau's great opportunity," Curtiss firmly believe, "lies in its ability to educate. Bring farm folks together, give them the facts, and they'll find the right answer."

Shaded area on map is 13th congressional district represented on the Illinois Agricultural Association board of directors by Homer Curtiss of Stockton.



Milk prices to producers have declined approximately 20 per cent from the high point reached in the latter part of 1946.

These price reductions to producers in many cases have not been passed on to the consumer in the form of lower retail prices for dairy producers, especially fluid milk and cream. It is in the best interests of producers to see that price declines be reflected in retail prices as promptly as possible, in order that consumption of milk might be maintained or increased. Farmers do not look with favor upon lower milk prices at a time when the prices of commodities which they purchase are increasing. This situation becomes further aggravated when the decline in producers' prices merely serves to increase handling margins of milk dealers.

The evaporated milk marketing agreement and license, which set minimum prices which evaporated milk plants must pay for milk, was terminated by the Secretary of Agriculture June 30. This "condensery code price" has been established pursuant to this agreement and license since June 1, 1935. For several years, the condensery code price has been substantially less than prices actually paid by evaporated milk plants, and it was felt that the marketing agreement and license had become obsolete. There is a feeling among producers, however, that the need for a new evaporated milk marketing agreement and order might be necessary in the not too distant future. Consequently, provisions for a new program of this type are under consideration at the present time.

The Prairie Farms Creameries received more than 50 per cent more butterfat during the first six months of the current fiscal year than they did a year ago. The Prairie Farms Creameries are rapidly expanding their operations toward a more diversified program. In this connection, condensing pans are being installed currently in Galesburg, Mt. Sterling, and Olney to improve their facilities for processing milk.

Based upon U. S. D. A. figures, dry skim milk powder is being produced in larger quantities than during the war when needed so urgently. Authorities say that the increase in powder production means that the conversion from farm separated cream to whole milk deliveries is continuing in spite of recent price relationships, and, that fluid milk consumption has contracted to make more skim milk available for manufacture into non-fat dry milk solids.

That dairy farmers in Illinois recognize the need and value of advertising their products was demonstrated by the record-making contributions to the American Dairy Association during the month of June. Farmers contributed 1 cent per pound of butter-fat marketed during the month to defray the cost of the expanded advertising program of the American Dairy Association for the next year.

CALFHOOD VACCINATION

DOES IT WORK?

by JIM THOMSON

Asst. Editor, IAA RECORD

ARE Illinois farmers sold on the benefits of calfhood vaccination for the prevention of brucellosis, commonly known as Bang's disease?

That's what Dr. C. D. Van Houweling, director of the IAA department of veterinary medical relations, and I decided to find out. Because there still is doubt in the minds of some people that vaccination of young breeding stock (generally around six months old) is the best preventive for Bang's disease.

The most logical place to start questioning farmers about Bang's disease is in Jersey county in the St. Louis milkshed where they probably have had closer acquaintance with Bang's disease control programs than any other county.

Jersey's experience with vaccination stretches back to the twenties when distraught dairymen, willing to try anything, used a virulent form of vaccine later condemned as dangerous.

Later Jersey enrolled many herds in the federal government's blood test and slaughter program, under which diseased cattle were exterminated. But the cost of this program due to animals lost as reactors so discouraged the dairymen that most of them gave it up.

In search of something better, Dairymen Ray Pearce of Jerseyville and Earl Hannold of Brighton enrolled in 1936 in an experimental vaccination program conducted by the Bureau of Animal Industry. Both herds had over 15 per cent infection. The gradual elimination of the disease from their herds during the experimental program pretty well convinced Pearce and Hannold of the effectiveness of vaccination.

If there was any doubt in their minds, it vanished during a succeeding county area vaccination program started in 1942 in Jersey county under the direction of the Illinois Department of Agriculture in cooperation with the Bureau of Animal Industry, U. S. Department of Agriculture and the Jersey County Farm Bureau.

Jersey thus became the first county in the state to come under the federal county area Bang's disease vaccination control program. Dr. T. K. Jones, veterinary livestock inspector for the USDA, said Jersey county was first at the suggestion of Dr. H. H. Seely, a local veterinarian who saw the value in the program. The original impetus, he said,

Editor's Note: The opinion expressed here by Jersey county farmers is not the result of controlled experiments.

Jersey County Farm Adviser C. T. Kibler and IAA Director of Veterinary Medical Relations Don Van Houweling question farmers regarding their experience with calfhood vaccination for Bang's disease. Left: seated, Kibler and Ray Pearce. Standing is Van Houweling. Center: Kibler and L. F. Nail. Right: Otto Heidemann, E. A. Heidemann, Van Houweling, and Kibler.

also was due chiefly to the enthusiastic attitude of the dairymen, the Jersey County Farm Bureau, and the full cooperation of Farm Adviser C. T. Kibler.

We followed Dr. John E. DeCamp, the federal veterinarian, as he went about his routine vaccination work on Jersey county farms. Most of the farmers in the county have come to accept calfhood vaccination for Bang's disease as commonplace, he said.

Dr. DeCamp said that during the 10 years (1935-45) he worked in Missouri on the test and slaughter method of Bang's disease control, he decided it wasn't practical there and it wasn't practical anywhere unless it could be kept up.

The calfhood vaccination program in Jersey county is made available to any farmer at no cost to him. The vaccination is also available in any other part of Illinois without cost to the farmer.

After five years of the calfhood vaccination program in Jersey county covering almost 100 per cent of the breeding stock in the county, what do the farmers think of it?

Visiting representative farms across the county, we were unable to find one farmer who was willing to go on record as being opposed to calfhood vaccination.

Ray Pearce: "If vaccination was just 75 per cent effective you would still be away ahead. As I see it, the man who doesn't vaccinate is just plain ignorant. Back in the late twenties and early thirties waves of abortions through my herd had me on the ropes. I was ready to sell out. My herd dropped to 30 head. Now as a result of the state and federal calfhood vaccination program, I never worry about finding an aborted calf in the morning. Calfhood vaccination for Bang's disease has given me 100 per cent protection. My herd has increased to 92 head."

Earl Hannold: "I can't praise calfhood vaccination too highly. Prior to the program in Jersey county, I had 14 cows that lost their calves in one year. I was ready to try anything. Since the start of the Bang's control program by calfhood vaccination, I have had about 70 calves vaccinated. Not one of them has lost a calf.

Otto Heidemann: "I think calfhood vaccination should be made compulsory. Before 1935 we averaged two or three abortions from Bang's disease each year. We got pretty disgusted with it and my brother George sent to Kansas City in 1935 for some vaccine which he injected himself. Later we went in with the program in the county. Today we have 40 head and haven't had an abortion since we started vaccinating in 1935."

Alvin A. Schroeder: "Several years ago I had 24 head and all but four or five had aborted. So in 1942 when I went in with the vaccination program I had the calves bled and vaccinated. In '43 we started losing calves from unvaccinated cows so we vaccinated everything and quarantined the infected cows. We have lost two or three calves from vaccinated adults but we never have lost a calf from an adult vaccinated in calfhood."

Otto Schneider: "I have never had any trouble with Bang's disease in my Brown Swiss but I have gone along with the vaccination program since 1942. I think it is a good thing."

L. F. Nails: "I began vaccinating in 1937 but was a bit skeptical of what it might do. I have no doubts any more. Since '37 every calf in my herd of 70 Guernseys has been vaccinated. I have a clean herd." I vaccinated before the government started the present program and if they quit the program now I would go right on vaccinating myself. When I buy replacements for my herd I refuse to accept anything that isn't vaccinated."

L. A. Landon: "Before vaccination of my herd of about 45 Jerseys I had an occasional Bang's abortion. Since 1940 I have vaccinated 75 calves. I haven't lost a calf that way since. I'm sold on the program 100 per cent. Fact is I won't even bid on an animal unless it is vaccinated. The most dangerous animal is the clean cow from a clean herd."

YOUNG COUPLE *Starts out with* FARM BUREAU

Watching Ila and Donald nail sign to tree is George Kemp, Peoria County Organization Director, who sold them a Farm Bureau membership.

By LEW REISNER, Field Editor
IAA Record

"THERE'S a lot of headaches in getting started but it's been worth it." That's the way Donald and Ila Kuntz, newly-weds, feel about their first four month's of farming on their own.

Alert, friendly, and hard working, Ila and Donald Kuntz are typical of the many well-educated, modern young farm couples who, in a modest way, started farming this spring.

Her newly painted kitchen and freshly papered dining room indicated that Ila was pretty well settled in their home on the 110 acre farm three miles west of Peoria that Donald rented last fall.

"All this buying, moving, papering and painting has meant a lot of work," Ila said, cheerfully. To which Donald could truthfully add: "And it costs a lot more than it normally would."

In fact that's his advice to anyone, like himself, starting out. "Be sure you've got enough money on hand."

Through his 4-H, vocational agriculture training, Rural Youth activities, and his contact with Farm Bureau, Donald is abreast of up-to-date farming practices.

His thrifty spring pigs, for example, had been moved in individual hog houses to clean pasture ground. All his corn was planted on the contour. He has joined the Farm Bureau Farm Management Service, although both admitted, ruefully, that their only entries were in the expense section.

The Kuntz's got their start in much the same way that a good many Farm Bureau families have started before them — through their limited savings, by borrowing from banks, but mostly from gifts and loans from both parents.

All of their grain and most of their foundation stock of 14 sows, 30 hens, and two cows, came from home. Ila brought 30 hens from her mother's flock and in addition has 300 spring chickens. She plans to increase this number to 500 next year if she can get a new brooder and chicken house.

From his 14 Poland China sows Donald saved 96 pigs, an excellent record for this wet cold spring. An experienced hogman, Donald hopes to expand his swine operations and eventually would like to raise purebreds as he did in his 4-H club work.

"We had hoped to milk about six or eight cows. Peoria is close and would make a good market," Donald said. But the high prices for which dairy cows are selling has kept them from it.

Their biggest outright purchase and one they are proudest of is their new row crop tractor. Ila admits she loves to drive it, too, even though she wrapped a harrow around a hind wheel when she was dragging with it.

Ila tries to get her pup to obey as Donald, giving his dog a friendly scratch, looks on. Pups are litter mates.

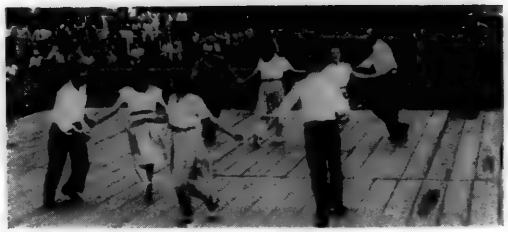
Ila and Donald graduated from the Princeville high school in 1943, started going together shortly after graduation, and were married in November of last year. Both are 22 years of age.

He took a vocational agriculture course in high school, and after graduating was an active member in Rural Youth. He took Ila who has also had 4-H club work to many Rural Youth social affairs before they were married.

Now that they are married the Kuntz's have joined Farm Bureau, a logical step since Donald comes from a Farm Bureau family. His father, Edward Kuntz, is vice-president of the Peoria County Farm Bureau.

What of the future? "We both decided before we were married," Ila said, "that someday we wanted to own a good large farm of our own." And with their energy and training, they've every reason to believe this dream of their future will come true.

Checking over their Farm Bureau-Farm Management account book, Ila and Donald Kuntz ruefully note that expenses are only entries to date. Income side of the ledger should be bolstered later this year.



Now's the time to whip your folk dance team into shape for the Sports Festival in August. Whiteside Rural Youth show how it's done.

Rural Youth

By
ELLSWORTH D. LYON

Skilled Driver activity has been evident over most of the state. A majority of the counties has been sponsoring activities suggested in "Your Safety" — safety talks (the directors of the department of safety and young people's activities, representatives of the state highway police, and local officers have spoken to Rural Youth groups), use of the bulletin entitled "Behind the Wheel," safety mixers, and safety demonstrations. Some counties have used all of these, while others have just started on the program.

To date 22 Rural Youth counties have registered with the departments of safety and young people's activities to take the Skilled Drivers' course. They are: Clark, Clay, Cook, Edwards, Fayette, Gallatin, Iroquois, Kane, Kendall, Knox, LaSalle, Massac, McLean, Monroe, Montgomery, Richland, Schuyler, Shelby, Vermilion, Whiteside, Williamson, and Woodford.

Beginning in July these counties and any others that desire to participate will begin study in the short course for Skilled Drivers' and will cover four units. While these four units are planned for July, August, September, and the first half of October, they will be sent out as groups desire them. The course of study will follow the same general subject matter as lessons which have appeared in "Your Safety." They are designed to prepare the participants for both oral and written examinations, and for driving demonstrations.

Advancement in skilled driver activity will be by three steps. First will come the county written examination, or contest, early in October. The winners in the county will take the second step by going to the district later in October or early November for actual driving tests, with the state police and the departments of safety and young people's activities cooperating. The third step will be the state driving contest at the annual meeting of the Illinois Agricultural Association. There the state winner will be picked through an actual driving test sponsored by the same agencies as for the district contest.

Recognition in the form of awards will be given the various winners, as well as all who successfully complete the course.

We should be glad to know of your activities in the Skilled Drivers' program and publish your successes in the IAA RECORD so that other groups may benefit from your experiences. Here are some of the comments received during these earlier stages of the program: "I am a 100 per cent backer in . . . . the Skilled Drivers' Club" — Woodford. "Any information on the Skilled Drivers' Club will be appreciated. The Knox county group voted to take this course." "The Rural Youth in Fayette are planning to organize a Skilled Drivers' Club." "We are anxious to begin work in this activity" — Montgomery. "Please send us 15 copies of 'Behind the Wheel,' and other material you may have of value to our Skilled Drivers' Club" — Edwards.

Every county, including those listed above, is entitled to the privilege of taking the Skilled Drivers' course. Let us know if you desire to register your group and receive the lessons. The study and practice of safety on the highway will help Rural Youthers to become safe drivers. A safe driver will save lives and money.

Dr. Van Houweling, director of the department of veterinary medical relations

Dr. C. D. Van Houweling, IAA director of veterinary medical relations, speaks to Marshall-Putnam Rural Youth on the relation of animal diseases to human health.

IAA, has been speaking before Rural Youth groups, and says that he is encouraged by the interest on the part of youth in the control of animal diseases and the relationship of animal health to human welfare. He will be glad to meet groups which might call upon him during the summer and fall. If you have an open date, let him know as summer speaking engagements will be easiest for him to fill. Other department heads, of course, will be glad to assist in the Rural Youth program.

W. W. Whitlock, director of department of safety and public health spoke at Clark's spring banquet on the theme, "The Responsibility of Rural Youth in Social Activities," applying the responsibility of the individual to the group and of the group to the individual. Whitlock appeared before the McLean Rural Youth, May 12, and spoke on "Fire Protection in the Home."

The Whiteside Rural Youth carried a full page article entitled "Spring and Tractors" in the May issue. It is good to know that Rural Youthers of Whiteside are thinking in terms of safety.

District Soil Conservationist, Siliman, showed slides and gave a talk to Will Rural Youth at the May meeting on the all important topic of "Soil Conservation." The Rock Island group heard Ray Hessprich, soil conservationist on this theme at its spring hop.

RIVER ELEVATORS TO RISE SOON AT LACON, HENNEPIN

LARGE river elevators to be built for the fast growing Prairie Grain Company will be started this summer at Lacon and Hennepin on cites along the Illinois river north of Peoria.

The Eikenberry Construction Company of Bloomington signed an agreement in mid-June with Prairie Grain Company to build the elevators. Each elevator will have a capacity of 125,000 bushels and will cost at least $125,000 to build and equip.

It is not expected that either elevator will be completed before next summer, in the opinion of George Iftner, manager of the state-wide Illinois Grain Terminals Company with which Prairie Grain Company is directly affiliated.

Iftner said that when completed these river houses will be used to assemble grain grown locally. The elevators will then feed this grain into terminal markets, moving it largely by barge on inland waterways to take advantage of cheaper water transportation.

The elevators will be of a design common in the grain belt, consisting of four concrete tanks 24 feet in diameter with six interstiched bins. They will stand 100 feet high, capped by a 28-foot cupola.

Prairie Grain is one of the three river operating grain companies being built by the Farm Bureau in Illinois along the state's principal waterways. The other two are the Western Illinois Grain Company and the Havana River Grain Company with headquarter offices at Dallas City and Havana, respectively.

The Havana River Grain Company has all but completed its new river house at Havana and will be ready to move the wheat crop as it is harvested, probably in late July. A large corn crib and sheller also being built and installed at Havana should be ready for the corn crop this fall.

Iftner said the wheat crop around Havana, although about two weeks late, is the one bright spot so far in the Illinois crop outlook. A bumper harvest is expected.

A wet cold spring that climaxed into damaging river floods during mid-June has also had the effect of cutting oat acreages and the potential oat harvest far below livestock requirements.

JULY IS A DANGEROUS MONTH

ONE Illinois farm person is killed each day and 10 are injured in July farm and home work accidents, according to the Illinois Agricultural Association safety department accident average for the past ten years.

By W. W. WHITLOCK
Director, IAA Safety Dep't

This does not include traffic accidents. Throughout the country more farmers are killed in autos than at work, and the trend is toward a still greater increase in auto accidents, especially in July.

Here in Illinois, machinery still takes the lead in July farm accidents. Overturning, speeding, refueling, and falling off tractors are big items this month. Combining and haying accidents contribute largely to the great increase in July.

The fact that horses lead the livestock accidents in July by a considerable margin is understandable with the hotter weather, heavier farm work, and increased irritability because of insects. Also because of the nature of the work horses stand unattended much of the time.

Falls and home accidents certainly take their share this month. Cleaning, canning, gardening — all these and other chores can be more safely done with a little forethought and common sense.

Burns and explosions do not come from firecrackers alone. Careless handling of gasoline, refueling machinery, and home cleaning with flammable liquids make as large a "blow-up" as dynamite and percussion caps.

Sunstroke and excessive heat need not kill as many farmers as they do. Use of salt tablets along with small but frequent drinks of cool (not cold) water will help. Rest periods during very hot weather will also help.

Lightning takes its share in July accidents, especially if fences are ungrounded, buildings unrodded, and if individuals expose themselves or get under a lone tree during an electrical storm. This seems to be a bad year for lightning, by the way. Just a couple of weeks ago there were more farmers killed by lightning in one week than in all of last year.

Recreational accidents, a large item in the miscellaneous column, increase in July also. Drowning and other swimming accidents account for a large share of these deaths.

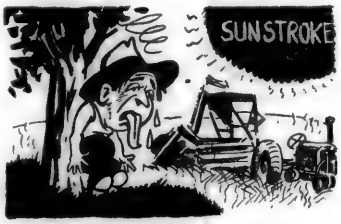
July is a fitting month for the observance of National Farm Safety Week, July 20-26. All farm people can well use this week for planning special emphasis on the saving of farm lives not for just one week, or one month, but throughout the year. Let's make Farm Safety a state affair, a community affair, a family affair.

1. While auto accidents increase in July

2. 160 farmers from machinery'll get hurt or will die

3. Falls 80 deaths and injuries will make,

4. And farm animals 70 or more will take.



5. Heat exhaustion and sunstroke then take their turns,

6. While 13 will be unlucky with explosions and burns.

7. At isolated trees and lightning don't scoff

8. Even if swimming or play doesn't finish you off.

"I have confidence in our Organization and their products," says Ray Folgate of Stephenson County. Mr. Folgate and son Harold are regular users of the Blue Seal "Direct-to-the-Farm" Feed Service provided by Stephenson Service Company.

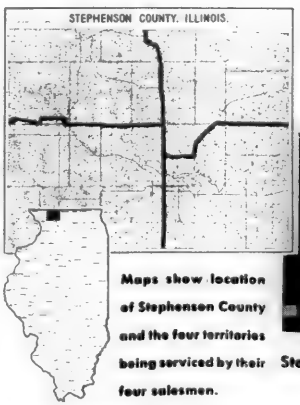
BLUE SEAL "*Direct-to-the-Farm*" FEED SERVICE HELPS FARMERS MAKE MONEY!

Ray Folgate and son Harold, like many successful Farm Bureau folks use this "Direct-to-the-Farm" Service to advantage. Ray keeps careful cost records and knows the feeding methods which make money. Last year his dairy herd of 22 Brown Swiss produced an average of 472 lbs. of butter fat. This amounted to $249.66 per cow over feed costs. The Folgates feed Blue Seal Dairy Balancer along with alfalfa and corn.

Farmers like the Blue Seal "Direct-to-the-Farm" Service and here are the reasons:

1. **No wasted time going to town for feed.**
2. **No large inventory of feed.**
3. **Minimum storage facilities.**
4. **Minimum loss from rats and mice.**
5. **Convenience of regular deliveries.**
6. **High quality fresh feed on hand at all times.**

When the Illinois Farm Supply Company started distributing Blue Seal high quality feeds, they decided that a direct-to-the-farm feed service was the only way to give the farmer the kind of a service he needs. The wisdom of this decision has been proved many times in the years that have followed. This month we call to your attention the success enjoyed by Stephenson Service Company in servicing their patrons through the use of the Blue Seal "Direct-to-the-Farm" Service plan. Regular routes were established, each salesman servicing patrons in different areas on different days in a definite rotation plan. This route system assures the farmer of regular feed deliveries according to his needs.



Maps show location of Stephenson County and the four territories being serviced by their four salesmen.

Stephenson Service Company's warehouses are centrally located at Freeport.

CALFHOOD VACCINATION—DOES IT WORK?

(*Continued from page* 15)

Frank S. Parsell: "I've been vaccinating everything in my herd of 75 purebred Herefords since 1942. No, I never have had any trouble with Bang's disease before or after vaccination. But I have enough confidence in my Farm Bureau that when they recommended vaccination of my herd that was good enough for me."

Herschel Fritz: "I had trouble with abortions from Bang's back in '37 and '38. In 1938 I had a private test and had my Angus vaccinated. Since vaccination I have had no trouble. If the state and federal governments should stop the program now I would have it continued on my own."

Lawrence Finkes: "I started vaccinating in 1940 after becoming discouraged with the test and slaughter method of control. After losing 11 cows by test and slaughter I decided to vaccinate on my own hook. My herd of Holsteins has doubled in size to 81 head since prevaccination days. I'm sure it could never be that big without vaccination."

THERE'S GOLD AT THE GRASS ROOTS

(*Continued from page* 10)

200 bushels per acre are possible with special procedures.

More Butterfat Per Cow

The 1946 report of 1124 Dairy Herd Improvement Associations of the Nation shows that cows producing about 5,000 pounds of milk and 200 of butterfat per year returned only $78 above the feed cost. The return was $208 above feed cost when the cow yielded twice the amount of milk and butterfat per year.

Of the 627,878 cows tested, approximately 100,000 cows produced more than 425 pounds of butterfat per year. So you see it can be done. For contrast, the average production for all cows in Indiana last year was 4,200 pounds of milk and 188 pounds of butterfat, with a net return over the cost of feed only $52 per cow.

The five million farmers who produce our milk supply must have fewer and better cows, with more milk per cow per feed unit and less work and more profit. The market could be wider too, because most people would like to buy more milk if they could afford it.

More Plant Food

About 21 per cent of the cash the American farmer spends for production is for feed purchased, and he spends only about 4 per cent for the purchase of plant food and lime. Plant foods are cheaper than feeds.

Doctor O. C. Rost, University of Minnesota, has new data to show how seven dollars spent for phosphate alone — not a good, complete fertilizer practice — returned about $50 in oats, alfalfa, and corn over a five year period. This data is the average of five year's results from increased yields of 174 T. V. A. test demonstration farms scattered over the state of Minnesota.

Why not get 1,000 bushels of corn from only 10 acres and have 10 acres for 40 tons of good alfalfa hay, instead of having 1,000 bushels of corn from 20 acres and no alfalfa?

Every average dollar spent for sound research in our American industries has returned untold hundreds of dollars. Some of our most successful great american business industries spend as much as four to even six per cent of their gross income for research. The gross farm income in 1945 for eight North Central States was about 6.9 billion dollars. In the same year these eight North Central States appropriated about 3.2 million dollars for research for their Agricultural Experiment Stations which was only about 0.045 per cent of the gross farm income.

By contrast eight Southeastern States had a gross cash farm income in 1945 of about 2.6 billion dollars, which is about 4.3 billion dollars less than that of the eight North Central States. These eight States appropriated about 2.4 million dollars state funds for their Agricultural Experiment Stations, which was about 0.088 per cent of their gross farm income.

It is interesting to note that these Southern States with a much lower income spent twice as much of their income in support of new farm facts as did these Northern States. In both cases home support is much too low.

Federal support is good and indications are that it may be much better. Perhaps if we fear Federal Government programs that are administered far from home with checks that come from Washington, we need to do more for ourselves. Let's not overlook that farming is on a national scale, but grass-rooted in its problems. Programs that are national in scope need Federal coordination and assistance but grass-rooted administration because there is where the folks and the problems are — and that is where the gold is.

PLAN BIGGEST SPORTS FESTIVAL ON RECORD

(*Continued from page* 4)

through the Champaign County Farm Bureau.

The eighth annual Sports Festival is the second since the four-year lapse during the war. It is again being sponsored by the Illinois Agricultural Association, County Farm and Home Bureaus, University of Illinois, Agricultural Extension Service, Prairie Farmer—WLS, WILL, WDZ and other cooperating radio stations.

Chairman of the administrative committee of the Festival is Otto Steffey, IAA director from Stronghurst. Co-chairmen of the swing festival are Oliver Gaebe of the university and Gladys Skelley of Prairie Farmer. Square dance jamboree co-chairmen are Ralph McKenzie, Kane county, and Helen Pelletier, Douglas county home adviser.

Co-chairmen of the general program of entertainment at the Auditorium are Mrs. Florence Kimmelshue of the university and George E. Metzger of the IAA.

To compete in the Sports Festival contestants must be affiliated with Rural Youth or 4-H Clubs or belong to a Farm Bureau or Home Bureau family. Entry blanks are now available at your county Farm Bureau.

LETTERS TO THE EDITOR

Being a member of the Illinois Agricultural Association it is my privilege to receive a copy of the RECORD each month. In the June issue there is an article headed "What is This 100 Per Cent Assessment Law?"

The questions relating to the new phases of the revenue law are pertinent ones and are answered in a condensed way which the average man can understand readily. However, many taxpayers are not reached with copies of the IAA RECORD. Will your office grant me permission to make mimeographed copies of portions of this article?

These articles may be given to "Inquirers" in place of oral answers.

A. R. Matheny,
Treasurer, Hardin County

The 100 per cent assessment law is not easy to understand. That is why we made a special effort to explain it as simply as possible. We are pleased Mr. Matheny liked it and hope he will make full use of it for the benefit of the taxpayers in Hardin county.

THRIVING YOUNG MARRIEDS

The Rural Marrieds of Edwards county have a new organization. We've had three meetings so far. Here's our set-up. Glenn Shepherd and Quentin Roosevelt were elected chairmen; Mrs. Albert Walker, secy.-treasurer; and Mrs. Robert Green, song leader for the coming year.

We have three couples take charge of each meeting. These couples, determined by alphabetical order of their names, make up three committees which have charge of educational features, recreation, refreshments. As new members come, their names will be added.

Virgil Judge, county supt. of schools, and Sgt. Earl Stroup, highway patrolman, have given talks.

Each couple takes sandwiches or cookies and the refreshment committee serves a beverage. Average attendance has been 25. We think this is a great organization and are hoping you'll give us a little mention in the IAA RECORD. We have an age limit of 15 years of married life. If at the end of that time, we are still a going bunch, we'll organize a new group and call it the "Old Married Folks Club."

Mrs. Albert Walker
(Betty Ann Mode)
Edwards County

ANTI DAYLIGHT SAVING

In your "Letters to the Editors" department in the June issue of the RECORD, you give an editorial to a letter written by one Hugh Uttermack of Clay county relative to daylight saving time.

You state therein that only about 20 per cent of the people of Illinois live on farms, which may be true, but do you realize that 20 per cent dig their living and the living for the other 80 per cent out of good old Mother Earth, for you know that everything originates from the earth, and you can only coordinate with old Mother Earth by sun time.

If this other 80 per cent want daylight saving time they can let the clocks alone and begin their working day an hour earlier. Does that 80 per cent go to bed an hour earlier? Or spend a quiet hour with their families? Or do some constructive work for their minds or bodies or families or neighborhoods?

I'll venture to say that 40 per cent of that 80 per cent spend that extra hour in taverns, night clubs and the like, or else country people would not have to be trying to set up laws to keep taverns out of rural districts. No, that rural population is being squeezed to the point where it has to take whatever price is offered for its products, and pay whatever price is dictated on the supplies it needs to buy. They tried to change our clocks to a man made time rather than adhere to God's celestial time. Is it any wonder than the young people of this nation are thinking twice and three times before taking up farming, and then passing it up?

Think it over, go out and become a farmer in some form or other from the first of March till the first of December, get the facts of all this actually going through all the operations, then let's hear the result of it through the RECORD.

O. G. Henning
La Salle County

IF ALL HOG GROWERS VACCINATED AGAINST HOG CHOLERA

Yes sir, it might look like this if all farmers vaccinated against hog cholera. We're sure that it would mean a saving of many millions of dollars to hog producers through a reduction in pig losses.

We recommend early vaccination with fresh, potent F. B. Serum.

NEWS and VIEWS

It's Sports Festival Time!

Home Bureau contestants in the annual State Sports Festival, August 28-29 at the University of Illinois, are getting ready for the big event under the direction of their state recreation leader, Mrs. Emile Rediger, Lexington.

The names of all contestants must be sent by the Home Bureau office to the Illinois Agricultural Association office in Chicago before Aug. 25.

Mrs. Rediger urges that women and older girls begin to practice now for the various events open to them. In a letter to all county recreation chairmen, Mrs. Rediger suggests that the various sports be played at the unit meetings sometime during the summer months and in August the elimination contests be held at some county wide event to select the contestant or team and an alternate to represent the county.

A copy of the rules and regulations for the 1947 Festival has been sent to all county Home Bureau recreation chairmen. A supply of the booklets has been sent to each Home Bureau office.

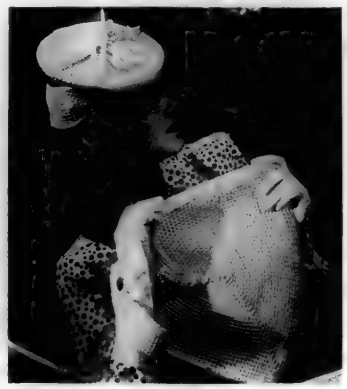
All events are listed in two divisions, a junior group of all under 35 years and a senior group which includes all those 35 years and over before July 1, 1947, . . . exception is table tennis: junior class 4-H girls not over 16, senior class, any other eligible person.

Women's events this year are archery, bowling, chair quoits, clock golf, dart throwing, horseshoes, knot tying, rifle shooting, shuffle board, swimming and table tennis. Some of the women will want to enter events in the folk festival, too.

WAYNE HOLDS CANCER DRIVE

The Wayne County Home Bureau sponsored the Cancer Control Drive again this year. We are proud to report $1,056.20 was collected. Expenses amounted to $18.02. A check for $1038.18 was sent to the Illinois Division of the American Cancer Society in Chicago.—Mrs. O. S. Wilkinson, Wayne County Publicity Chairman.

PACKABLE ACCESSORIES



If you're taking a trip these packable accesseries will be of special interest to you. The set packs flat and comes out of your traveling bag fresh and unwrinkled. The hat is a medium sized pancake trimmed with narrow grosgrain bows and held on the head by a deep band across the back. For free instruction send a stamped self-addressed envelope to Women's Editor, Illinois Agricultural Association Record, 43 East Ohio, Chicago, Ill.

TRIM YOUR OWN

There are many ways to trim handkerchiefs: hand-rolled edges, hemstitched edges, embroidered corner designs and embroidered initials. Trim your own. One yard of 36-inch wide linen will make nine handkerchiefs. For free instructions send a self-addressed, stamped envelope to Women's Editor, Illinois Agricultural Association Record, 43 East Ohio, Chicago, Ill.

Home Bureaus Plan Camping Retreat

Summer time is the time to camp — and that means Home Bureau members are making plans for camping, too.

Members in 15 counties of the central part of the state are making plans for the annual Home Bureau Retreat to be held at East Bay, Lake Bloomington, Aug. 10 through Aug. 12. The counties listed in the Home Bureau Retreat group are Champaign, Douglas, Peoria, Livingston, Mason, Moultrie, Logan, Piatt, DeWitt, McLean, Macon, Tazewell, Woodford, and Coles.

"The idea of the camp is for rest and pleasure. We have a program planned that is inspirational as well as recreational and will be a treat to all who attend," announces Mrs. Dale Huffman, Mason County, camp director.

"This camp is to have the facilities for 125 women and we hope to have a capacity crowd. Rates are $7.25 for the entire camp. Each camper furnishes her own bedding," continues Mrs. Huffman.

Mrs. Esther Olson, Macon County, is treasurer of the Home Bureau Retreat at East Bay this year.

Whiteside and Henry counties report that their members attend the district Homemakers camp held at Camp Hauberg, near Port Byran.

The program at Camp Hauberg is both educational and recreational. Mrs. Mary Ligon, Home Economics Extension specialist, University of Illinois, will conduct the educational discussions as she did the previous year. Handicraft, boating, and camp fire singing are some of the other events planned for the camp.

Greene county reports that they have not held a camp since the war. And, Madison county does not plan to have a camp for this year.

for HOMEMAKERS

MASCULINE SWEATER

Every regular guy wants his clothes to be really masculine with no frills whatsoever. That is why this young man approves of his cardigan sweater knit of warm wool. The back is plain and the neckline forms a V. For free instructions, send a stamped, self-addressed envelope to Women's Editor, Illinois Agricultural Association Record, 43 East Ohio, Chicago, Ill.

RURAL WOMAN

I am a woman, living on a farm.
My days are taken up with little tasks.
I gaze out through my window every morn
And view the corn fields glistening with dew.
The green stalks, holding convérse all the while,
They growing, lift their leaves up to the sun.
The flowers in my garden call to me
To loosen up the soil around their feet,
That they may gather nourishment with which
To make for me the waxy blooms I love.
My children growing strong and clean and true
Fill all my hours with loving labor dear.
Although I cannot go to wider fields
To serve my country great and fellow man,
Right here, in my own home, I am a part
Of that great Federation, whose true aim
Is betterment of all conditions which
Affect the home, the first concern of man,
Then, reaches to community and state to make
A worthy citizen the aim of every youth.
—from the LaSalle County June Newsletter.

Farm Women Are Told That Life In England Is Austere

Residents of Logan county enjoyed a special treat when the Logan County Home Bureau organization sponsored Lady Worsley-Taylor of England at an open meeting for the public at the Christian Church in Lincoln, May 20. Lady Taylor told of postwar conditions in England.

Lady Taylor and her daughter, Dorothea, arrived in the United States May 1, from their home in Clitheroe, Lancashire, England. This is their first trip to America. Lady Taylor is on a lecture tour which began at the University of Delaware and is to include many of the colleges throughout the United States and various women's organizations throughout the United States and Canada.

Lady Taylor is chairman of the Women's Institutes of Great Britain, the largest women's organization of the country. The Women's Institutes, similar to the Home Bureau organizations in Illinois, have done much to improve the rural conditions, she reports.

Both the Women's Institutes of Great Britain and the Illinois Home Bureau Federation are affiliated with the Associated Country Women of the World. Approximately 56 women's organizations throughout the world belong to this international organization.

In September, for the first time since the war, the Associated Country Women of the World are meeting in Amsterdam for their triennial meeting. A representative from the Illinois Home Bureau Federation will attend the meeting in Amsterdam.

In her address Lady Taylor described an English woman's weekly shopping tour for groceries. "We are allowed just over one-quarter of a dollar's worth of meat per person. Incidently I was horrified at a dinner in the East when I saw people leaving on their plates a full week's ration of meat! We are allowed one ounce of fat, two ounces of butter, and four ounces of margarine, two ounces of tea, one-half pound of sugar, and four ounces of chocolate or sweets. We didn't have the latter during the war."

She also said that bread, which was not rationed during the war, is now rationed. "Two slices of bread are considered a full course in a restaurant today. You are allowed three courses; soup, meat or fish, and a sweet. If you have bread you must either do without your soup or your sweet."

These lads are the Schmuhl Popsters of Will county, the only Illinois 4-H Club group to win honorable mention in a national cow judging contest conducted with photographs by Hoard's Dairyman. Left to right: Wayne Triem, Dale McMahon, James Smith, James White, Michael Greenley, Jerry Warning, Bill White, John Smith, Bill McMahon, and Marion Owen, club leader. Bob Madsen was absent.

Brand New, but HUNGRY for SOYOIL!

Here's a brand new barn

— which will soon be protected from the elements by SOYOIL — the paint for barns. This stately barn will be made even more attractive with durable, pleasing Soyoil.

If you have some new construction, protect your investment—don't let the weather get a headstart with its damaging work! Dress the new barn in protective Soyoil!

FOR OLD BUILDINGS

You can't beat Soyoil No. 90 Red barn paint for re-painting older buildings. In addition to improving the appearance of the barn, Soyoil No. 90 is also mildew resistant. It works especially well on weatherbeaten, porous surfaces because special penetrating oils make it a good primer as well as an excellent finish coat.

Soyoil barn paint comes in two beautiful colors — No. 90 Red is the most popular with our folks, but many choose the quieter, more dignified gray.

However, if you prefer a white barn, our No. 5 Outside White house paint makes a beautiful job.

For all metal surfaces we recommend Soy-zinc metal primer and Soyoil Aluminum paints.

"..AND UNPLEASANT DREAMS, FARMER JONES!"

TONIGHT, before you drop off to sleep, lie quietly and think about the answer to this question: "What would happen to my family and me if tonight FIRE should destroy our home, our car, our barn, granaries, and farm equipment?" If you are not adequately insured against FIRE, the answer to this question may keep you awake.

So, here's how you can secure Peace of Mind: This afternoon, have your Farm Bureau insurance agent stop out and give you all the facts on low cost fire insurance coverage. You'll be amazed at how little it costs, in relation to the risks you avoid, when you insure against fire.

To the Girl who married for Love

A young farm couple starting out today on a shoestring can still know very real security. We usually associate farm security with rolling green acres, or money in the bank. But there is also genuine security in a Country Life insurance policy hidden away in the cedar chest.

For those young couples not blessed with a land inheritance — and who might otherwise face years of uncertainty — Country Life insurance becomes a Fairy Godmother, turning a few dollars a year into a great estate, underwriting the ambitious plans of youth, assuring a new bride of security in the event of her partner's death. Invite your friendly Country Life agent to be one of the first callers at your new home. He has an important place in your future.

SATURDAY NIGHT AND A NEW PLATEAU

By President Charles B. Shuman

I AM glad that the towns and cities of the Midwest are Saturday night towns. These Saturday nights in town provide one of the few opportunities during the busy crop season for us to visit with our neighbors, determine the state of the nation and hear the side of the news that the local weekly doesn't dare print. Saturday night is one of our essential institutions — it is in a sense a weekly "town meeting".

On a recent Saturday night, I listened in on a lively sidewalk debate on prices and price cycles. One man quoted a news story based on the forecast of a rather prominent eastern economist, who predicted that we had attained a new, higher level of prices. Much of the argument hinged on the necessity of maintaining a high price level in order to successfully manage our huge federal debt.

My thoughts went back some twenty-seven years to a Farmers' Institute meeting in the court house where, as a boy, I listened with great interest as another expert explained that our price level had reached a new and higher "plateau". Many farmers at that time followed this reasoning and assumed heavy debt loads to purchase farm land. The "new plateau" later turned out to be, in reality, a mirage.

Let us look critically at the plateau on which we now stand. We are forced to conclude that agriculture is in a very vulnerable position. Farmers are seriously concerned with the extreme height to which the inflationary spiral has carried prices. Public opinion is turning against us under a constant barrage of propaganda. Many farmers themselves have forgotten, or never experienced, the 1921 to 1932 catastrophe.

How soon we forget! In 1920 it was a "new plateau", in 1932, the farmers "never expected to see $1 corn again". In 1947, we cannot understand how prices could sink "below a reasonable level".

If the experiences of centuries of economic history mean anything, they should warn us against building upon a mirage that appears to be a plateau. Rather, we should draw our plans as individuals and as an organization to anticipate the most unfavorable contingencies we can now imagine.

The higher the air castles, the more disastrous may be the fall and the more we may need a good parachute. In coming months, I hope that we can examine some possible parachutes.

Tony Van Clooster, southern Illinois dairy farmer, poses with his purebred Guernsey.

Dairyland OF Tomorrow

HERMAN BUSS stood knee deep in lush red top and blue grass pasture. Across the fence his dairy herd was almost lost from view in a field of sweet clover grown shoulder high in mid-June.

"During the drought and depression when I bought part of this farm for $10 an acre I didn't think I could ever build it back to grow pasture like this," Buss said.

Buss farms near Olney in southern Illinois. His improved legume and native pastures fit into a carefully planned program. He is going heavier into dairying.

He believes dairying in southern Illinois has a profitable and promising future. "I'll have my cows out on pasture up to nine months a year and I won't have as much tied up in land and buildings," Buss explained. "I've got it figured out that I'll be producing milk cheaper than farmers north of me, at least for the southern market."

Herman Buss, along with his neighbors, has a good local market for his milk. He sells to the Prairie Farms Creamery at Olney. A sister cooperative, the Prairie Farms Creamery at Carbondale also serves southern Illinois dairymen.

This market for milk is not necessarily confined to southern Illinois. From Olney and Carbondale south to the Gulf of Mexico there's a shortage of fluid milk. To the west, St. Louis is expanding its milk shed.

Although they may be a Johnny-come-lately in the fluid milk business, southern Illinois dairymen are alert to the need for producing a top quality product, particularly since large grade A milk markets are near at hand.

Earl Stage, a Prairie Farms patron near Olney, has gone the whole way in a quality program. An enthusiastic dairyman, Stage plans to remodel his barn and has already build a simple but adequate milk house and equipped it with a new electric milk cooler.

Since the Olney cooperative pays a 30 cents per hundred premium for milk cooled electrically and stored in a milk house of approved design, Stage estimates his own quality program will pay for itself in a fairly short time.

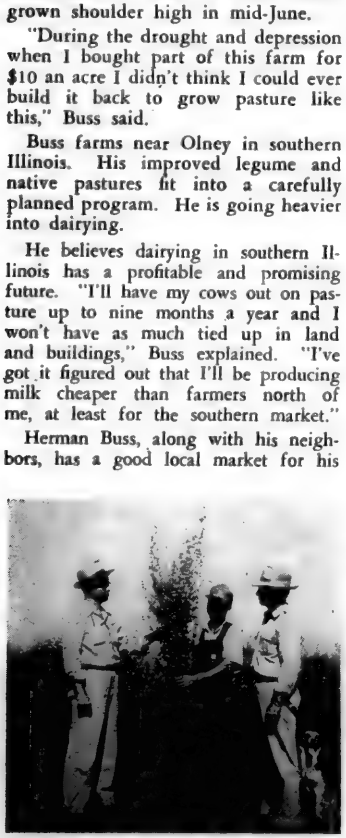
Stage indicated that his milk house could probably be built today for about $250. Milk coolers, such as the one Stage has installed, cost from $260 to $400, depending on size.

Dairy farmers have received strong support from the University extension services and county Farm Bureaus, particularly on pasture improvement.

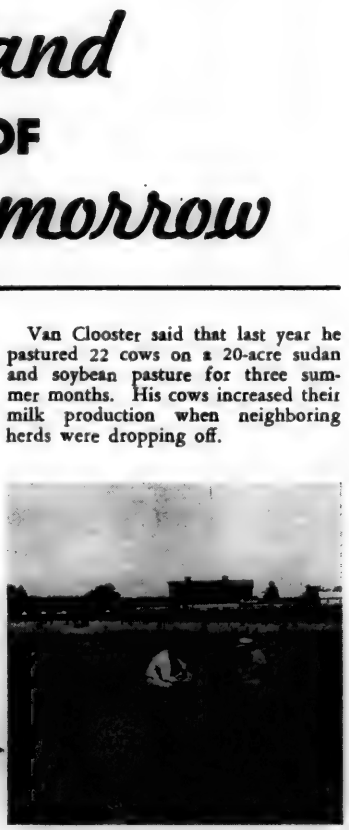
Farm Adviser W. C. Anderson of Jackson county said that one of the most popular summer pastures has been a soybean and sudan grass mixture. This was confirmed by Tony Van Clooster who farms near Murphysboro.

Field chopper on Charles Piper farm near Olney makes light work of harvesting corn for ensilage, excellent winter roughage for dairy cows.

Van Clooster said that last year he pastured 22 cows on a 20-acre sudan and soybean pasture for three summer months. His cows increased their milk production when neighboring herds were dropping off.



Farm Adviser Ed Barnes, Richland county, examines sweet clover field with Herman Buss, farmer, and Roger Taylor, fieldman.



Jackson County Farm Adviser Anderson looks over sudan and soybean pasture with Tony Van Clooster. Mixture is recommended for summer pastures.

(Left) These fine young Jersey heifers will provide top quality breeding stock for Stage's dairy herd. (Right) Anderson and Russell Wilson, Murphysboro farmer, talk over feed problems, look at new dairy equipment in reconverted horse barn.

Legumes, for pasture and hay, are being grown in increasing acreages. Larger dairy herds and soil productivity follow in the wake of alfalfa and the clovers.

Although dairying in southern Illinois expanded rapidly during the war, the average herd is still small, not exceeding six cows. However, Anderson estimates that the average 80 acres will easily keep a 15 cow dairy herd. Thus, farmers with small herds already established can increase their milk production considerably.

Such an increase has been anticipated by the two Prairie Farms Creameries at Olney and Carbondale.

Farmers in the area are supporting the practice of artificial insemination, a program which is already providing a foundation stock of excellent heifer calves from proven herd sires.

Thirty southern Illinois counties, employing 28 technicians, have formed the Southern Illinois Breeding Association at Breese. The largest ring in the state, it will breed an estimated 30,000 cows this year at a cost of $7 an animal.

In the matter of dairy barns, a good many farmers are looking at the old

By LEW REISNER
Field Editor, IAA RECORD

and often unused horse barn with a critical eye. Russell Wilson, near Murphysboro, decided to convert his into a modern 20 cow barn.

It cost, he indicated, somewhere in the neighborhood of $2,500 for stalls, drinking cups, cement floor and manger and other improvements.

Other farmers who are planning to convert horse barns into milking parlors and loafing sheds where six cows can be milked at one time. They think the job will cost about $1,500.

Feed is another important factor for producing milk and while much of the grain and all roughage is produced locally, protein concentrates and grain are generally shipped in.

Many southern Illinois dairymen are looking to the Benton feed mill and their county Blue Seal feed trucks to supply them with their outside feeds. The Benton Feed mill was put into operation this year as part of the feed operations of Illinois Farm Supply Company.

Southern Illinois farmers are turning to dairying as have farmers in Wisconsin and Minnesota as a way of rebuilding and maintaining their soils and as the surest, steadiest source of farm income known to the American farmer.

They believe, and they have backed this belief with their efforts and money, that the future of dairying in southern Illinois is assured.

(Left) Earl Stage, Olney, lowers can of milk into new electric cooler. Milk properly farm chilled brings him a premium.

(Center) Fieldman Taylor and Stage talk over sanitation problem in front of milk house. New Jeep station wagon helps Taylor in working with farmers.

(Right) This purebred Guernsey shows top dairy type, Farm Adviser Anderson finds. Large dairy barn in background is uncommon for area.

REPORT

FROM SPRINGFIELD

IN THE 65th General Assembly, there was little purely agricultural legislation which was controversial. Farmers were most interested in legislation dealing with road improvement, property taxes, school support and school reorganization, and appropriations.

The 65th General Assembly perhaps will be remembered as the first Illinois General Assembly which appropriated a billion dollars. The General Assembly has authorized State expenditures at a level which, in times of normal economic conditions, will necessitate either a substational reduction in state expenditures or greatly increased state taxes.

A total of 1675 bills were introduced in the session. Of these, 739 were passed. A few of the more important bills affecting farmers are listed in this article. In view of the fact that these bills were not highly controversial, the voting records on them are not printed at this time.

STATE FUNDS FOR LOCAL ROADS

The General Assembly appropriated $15,000,000 for a continuation of state aid in the construction and surfacing of all-weather township and road district roads. In 1945, the IAA sponsored legislation under which the state, for the first time, recognized its obligation to assist in the construction of these township and road district roads. The appropriation made in 1947 continues this assistance.

The Farm-to-Market Roads Commission recommended that $30,000,000 be appropriated for assistance on these roads, the money to be derived from an additional 1c on the gasoline tax. There was objection to increased state taxes at this time, and the budget provided $20,000,000 for these roads, the money to come from the General Revenue Fund. Later, commitments were made for state funds for assistance to housing, largely in Chicago, and it was proposed that the appropriation for state assistance in the construction of these farm-to-highway roads be reduced to $15,000,000 and that the money be taken from the gasoline tax.

It appeared to the Association that the funds could not be taken from present gasoline tax revenues without impairing the road construction programs of the state, the counties, and the municipalities. Accordingly, the Association opposed proposals to take this money from gasoline tax funds. It also opposed the reduction of the appropriation.

By PAUL E. MATHIAS
Secretary, IAA

The bill, as passed, makes the appropriation of $15,000,000 from the General Revenue Fund. The money is to be allocated among the townships and road districts in proportion to their mileage of these township and road district roads. It is to be used for all-weather surfacing of these roads and for the construction of bridges and culverts. The township or road district highway commissioner and the County Superintendent of Highways together select the roads to be improved and determine upon the type of improvement.

Seventy-five thousand miles of the more than one hundred thousand miles of roads in the state are maintained by the townships and road districts. It is necessary that they have state assistance if many areas are to have all-weather farm-to-highway roads.

ROAD DISTRICT CONSOLIDATION

The Association sponsored legislation which would permit townships to consolidate for road purposes. Upon petition of the voters in two or more townships, the question of consolidating these townships for road purposes would be submitted to referendum. If approved upon referendum, one township highway commissioner and one clerk would be elected for the enlarged district and would have charge of the roads in the enlarged district.

The Association also supported legislation making it clear that road districts in commission governed counties may combine or consolidate into larger units.

In many areas, there is the feeling that the townships and road districts are too small for efficient, economical road construction and maintenance. If the township or district spends its limited funds for equipment, it has no money left for labor to use the equipment, and if it spends its money for labor, it lacks equipment to do a good job.

By consolidating, these townships or road districts can pool their resources and get more improved road mileage for their money. This legislation will enable local people to enlarge their road administrative districts where they desire to do so.

Another bill permits townships or road districts to exchange machinery and equipment with other governmental units.

PROPERTY TAX LIMITATION

The Illinois Agricultural Association supported efforts to place reasonable state limitations on property taxes. The 100% assessment legislation enacted in 1945, which the IAA opposed, gave many local governmental units greatly increased taxing powers. With rising costs, many of these governmental units were hard

pressed. Many took advantage of the increased taxing powers and property taxes in large portions of the state were substantially increased.

The IAA joined with other organizations in supporting legislation which limits the maximum amount of property taxes which may be levied to 15% to 25%, on the average, more than the 1945 maximum levy. This legislation has been approved by the Governor and should be of assistance in holding local property tax levies within reasonable bounds.

STATE AID FOR SCHOOLS

The question of the amount of state support for schools was one of the most controversial of the session. The pressure of increased teacher salaries and rising costs caused schools to look to the state for increased assistance. The School Finance and Tax Commission recommended substantial increases in state aid.

The Association favored reasonable increases both in the emergency and as a permanent program. However, the Association believed that the increases should be primarily for the assistance of needy schools, that is, for those requiring equalization aid.

The Association supported emergency legislation which provided for paying 1946 state aid claims on the basis of 150%. This would have required an additional $9,000,000, two-thirds of which would have been used downstate. Much of this money would have gone to the districts requiring equalization aid. However, this bill failed to pass and in lieu thereof legislation granting a flat amount of $6 per pupil was passed. This requires about $5,500,000 additional money.

The School Finance and Tax Commission recommended that flat grants for elementary pupils (that is, the amount per pupil that goes to all school districts) be increased from $19 to $25 per pupil and that the flat grants for high schools be increased from $4 to $10 per pupil.

The Commission recommended that the equalization aid to needy districts be increased to a basis of $120 for both elementary and high schools. In computing equalization aid, if the local school tax levy of 25c on the full value plus the amount of the flat grant does not produce $80 per pupil for elementary schools or $90 per pupil for high schools, then the state now contributes an additional amount sufficient to assure the district $80 per elementary pupil or $90 per high school pupil, as the case may be, in computing equalization aid).

After a bitter struggle, on the closing night of the session legislation was passed which raised the flat grants from $19 to $22 for elementary pupils and from $4 to $7 for high school pupils. The equalization aid to needy districts was increased from $80 to $90 per pupil for elementary schools and from $90 to $100 per pupil for high schools.

Total appropriations for schools approximated $85,000,000 including appropriations for pupil transportation, handicapped children, the school lunch program and similar purposes.

COUNTY SCHOOL SURVEYS

Legislation was enacted extending the time for filing the tentative reports of the county school survey committees from June 1 to Dec. 1, 1947 and the time for filing their final reports from Jan. 1 to June 1, 1948. The legislature also appropriated sufficient monies to provide the county school survey committees with the full amount of money authorized in the original legislation, for the expenses of these committees.

Legislation also passed which will permit the counties which did not vote for school surveys in 1945 to vote on the question of conducting a school survey in their respective counties. School board members in these nine counties will vote this Fall upon the question of conducting a school survey.

WITHHOLDING STATE AID

The IAA and other organizations joined in sponsoring legislation designed to assist county school survey committees and local people in furthering the school reorganization program now under way. Based on the assumption that the state is not obligated to encourage the continuance of small, inefficient grade and high schools, legislation was passed requiring the state to withhold state aid from elementary schools having fewer than ten (now seven) pupils in average daily attendance after June 30, 1949, 12 pupils after June 30, 1951 and 15 pupils after June 30, 1953.

Also high schools with fewer than nine pupils per grade in average daily attendance will not be eligible for state aid after June 30, 1951. Exceptions may be granted in case where the county superintendent and state superintendent of public instruction find that such requirements will cause undue hardship.

COMMUNITY UNIT DISTRICTS

In response to requests from many school survey committees that legislation be enacted to permit the establishment of 12 grade unit district with one election, legislation was enacted for this purpose.

Upon petition to the county superintendent, the question of organizing a 12 grade unit district is submitted to the voters in the territory involved. In order to carry, a favorable vote is required in both the rural territory and in the urban territory included in the proposed district.

If established, this unit district will supersede *all other elementary or high school districts or parts thereof in the*

(Continued on page 21)

THE Lovejoy monument at Alton is the seventh of a series of front cover pictures illustrating historic and picturesque Illinois scenes. It was erected to the memory of Elijah Lovejoy, famed abolitionist.

Moving to St. Louis from Maine where he was born in 1802, Lovejoy established a school then started a religious paper in which he strongly condemned the practice of slavery which was common at the time.

Prominent St. Louis men asked Lovejoy to moderate the tone of his editorials. He refused. When mobs threatened his life and property, Lovejoy moved across the Mississippi to Alton, Ill. Here he fared no better. Mobs destroyed his press several times in one year.

On the night of Nov. 7, 1837, Lovejoy, then 35, was killed when he went to the defense of his building under attack by a mob. News of his death stirred the North profoundly and led to more active sentiment in favor of the abolition of slavery.

Front Cover

Headline illustration shows the beautiful layout of the new Prairie Farms Creamery at Carlinville. The strange-looking structure at far right is the cooling tower which cools water which in turn cools milk.

★ ★ ★

YESSIR! It was a great day in Carlinville when Prairie Farms Creamery held its open house and folks came from miles around to see the most modern dairy plant in the country.

It was Saturday, Aug. 2, and the old mercury was pushing past the 100 mark outside and close to 118 inside, but that didn't keep the crowds away. Registration topped the 3000 mark and there were many who never got to register. Counting those who only saw the outside of the plant, a conservative estimate of the total number of visitors would be from 5000 to 6000. State police estimated that from 500 to 800 cars were parked in the plant vicinity.

The local newspapers gave a real boost to the event with special editions carrying congratulatory messages from Carlinville business firms. The story of the opening was told with banner headlines and numerous pictures of the new plant's facilities.

And naturally the loyal farmers who have been supporting their cooperative creamery since its start back in 1938 were just a little bit proud. In 1938 the creamery started from scratch. Today it's a $2,000,000 business. It's the biggest industry in the progressive community of Carlinville. Dividends to patrons last year were more than $25,000.

Three of the present board members of the Carlinville creamery have served since the cooperative was started. They are Thad Loveless, vice-president, Macon county; C. L. Whitlock, president, Montgomery; and Fred Heepke, Madison.

President Charles B. Shuman of the Illinois Agricultural Association in his address at the open house program emphasized that Illinois farmers look upon their farm cooperatives as essential farm tools. This is in contrast to the use made of cooperatives in other countries and even in some parts of America where they are looked upon as instruments for social or political reform, he said.

"Among several factors contributing to the success of our cooperatives," President Shuman said, "whether purchasing or marketing, have been the emphasis on quality of product, efficient management, large volume operations, financing by purchase of stock by farmers and a close tie-in with the Farm Bureau organization."

President Shuman lauded the Carlinville creamery for its past record of service and asserted that the future success of the cooperative would be judged by farmers in a number of ways. It will be judged by its ability to provide greater bargaining power to the farmer, by its assistance in eliminating wide and unjustified price fluctuations, by its reflection of proper price premiums for quality, by its creation of new methods and economics resulting in cash savings to the members and by the extent to which it becomes an integral part of the Farm Bureau movement in Illinois, working with all groups for better long-time levels of farm income," he concluded.

Visitors to the modern Carlinville plant saw some of the latest equipment in the dairy business. They were impressed by the ultra-modern laboratory with its stainless steel cabinets. Here milk and cream are tested and the composition of manufactured products of the plant are analyzed.

They saw huge stainless steel vats for cooling and pasteurizing, two storage tanks of the same material that will hold nearly 90,000 pounds of milk, three automatic compressors capable of developing 70 tons of refrigeration every hour, a milk drying machine that processes approximately 3000 pounds of milk per hour, 211,000 pounds per hour separators, and a churn that churns 2000 pounds of butter at one time.

The Carlinville creamery building contains approximately 21,000 square feet of floor space, and without a doubt is one of the finest dairy buildings in the country.

Members of the Prairie Farms Creamery of Carlinville board of directors are, from left to right, F. A. Gourley, manager; B. H. Wagehoft, treasurer, Christian county; Bert Ruyle, Macoupin; Talmage Defrees, secretary, Bond; Fred Heepke, Madison; Walter Sohling, Calhoun; Gus Heneghan, Jersey; J. W. Martin, Greene; Thad Loveless, vice-president, Macoupin, and C. L. Whitlock, chairman, Montgomery.

BUYER BEWARE!

ILLINOIS land, riding in the wake of a two year crop and livestock price boom, has soared $100 to $200 an acre higher than the future earning power of the soil warrants. This buyer beware warning, aimed directly at young farmers and renters with just enough for a down payment on a farm in their pockets, was sounded time and again at the land appraisal clinics held recently in Christian, Coles, and Stephenson counties.

These clinics, sponsored jointly by County Farm Bureaus, the College of Agriculture, and the St. Louis Federal Land Bank, repeatedly brought to light the appalling spread between the prices farms are bringing at present and the probable future earning power of these same farms after crop and livestock prices drop.

All this, as one young veteran remarked, is something to think about for a farmer who plans to buy a farm with a modest down payment, and expects to pay for the balance by working the land for the next 10 or 20 years.

At a typical clinic held on the 232 acre farm operated by Robert Wishart near Mattoon in Coles county, the soil type and over-all productivity were outlined by R. S. Smith, soils expert, C. L. Stewart, land economist, and J. B. Cunningham, farm management expert, all from the University at Champaign.

After each farmer put down his bid on the farm, the average was compared with that of Clair Hay, an experienced Land Bank appraiser, and then checked with its present sales price.

The group thought the farm, based on its future earning power, to be worth $181, and this compared closely with Hay's appraisal of $175 an acre.

Robert Wishart, who has operated the farm for a number of years, said, reflectively, that he wished he could buy it at that price. Later, the men confirmed that similar farms in that locality have been selling for $300 and more an acre.

Cunningham points out peak in farm prices to Bill Thissell, Charleston farmer, and Henry Macke, right, of Mattoon, as Farm Adviser Myers looks on, during recent farm appraisal clinic in Coles county.

At the meetings Dr. Stewart related that farms are selling for at least 25 per cent more than they were two years ago in 1945. Prices have been increasing at a rate of one per cent per month for the last 25 months.

Farmers agreed that farm lands in the cash grain belt have doubled in value in many instances since the war began. Prices in Coles county were quoted at $350 and $375.

Other areas of the state, however, are not witnessing quite such a boom. In northern Illinois, for example, the Albert Scheffner farm near Freeport, also the site for a land clinic, was appraised at $139 and would probably sell readily at $225-$250. It was in an excellent state of fertility and with better than average buildings.

The land boom in southern Illinois has also been more modest. Farms near Carbondale, although varying widely in selling price, are moving most commonly at prices between $60 and $75 an acre, an increase since 1941 of not much more than 20 per cent.

It is true that the big and spectacular sales have been made to city buyers, but contrary to a popular impression, Stewart said, a careful study has shown that most of the land is being bought by active and retired farmers.

And it's the farmers themselves, Stewart added, who are paying the highest prices, and an unusually large number are planking down the cash. A big share of the sales are 40 and 80 acre tracts. This was contrasted to depression days when entire farms were lost, and consequently sold, outright.

The tendency now among farm owners who plan to sell eventually is to hold onto their farms, Stewart said. People who own farms have no better place to put their money, and in general very few farms, considering the boom in land prices, are changing hands.

A few farmers are gambling with the high prices and are buying land on a shoestring, especially in the grain belt, in the hope that they'll have two or three years of high prices to reduce their debt by $50 to $60 an acre.

Have farm lands reached their peak? Probably not as yet. "My personal estimate," Stewart said, "is for farm land values to spurt a little after the harvest this fall. A good crop of corn and beans will put a lot of cash in farmers' pockets."

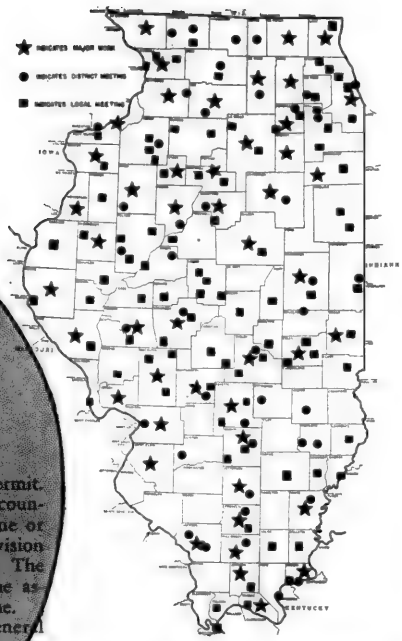
Farm real estate, he thinks, will reach its peak this winter and then slowly decline for three or four years, stabilizing at about 80 per cent of current values.

By Lew REISNER
Field Editor, IAA RECORD

Farmers listen intently during farm appraisal clinic as J. B. Cunningham, farm management specialist, discusses soil type and building outlay on Albert Scheffner farm near Freeport.

Karl LaBunne, Forreston, a prospective land buyer, looks over oats crop with Stephenson County Farm Adviser Banter, right, at Albert Scheffner farm.

WHAT Is Your PROBLEM



Map illustrates the extent of the activity of the Division of General Services over a nine month period beginning Oct. 1, 1946.

by JIM THOMSON
Asst. Editor IAA RECORD

WHAT are the farmer's chief interests outside the actual business of farming?

Betterment of his community living conditions would no doubt stand high. That involves better schools, better roads, fairer taxation, research, rural safety and public health.

All these factors for better farm living are promoted by the Illinois Agricultural Association and most County Farm Bureaus as a duty to farmer members.

On the state level, the departments working for the betterment of local living conditions are banded together as the Division of General Services under the direction of I. E. Parett, former Vermilion county farm adviser.

Each department is headed by a director who coordinates and interprets IAA policy and attitudes on schools, roads, taxation, and public health to county Farm Bureaus and non-Farm Bureau groups also interested in rural welfare.

The departments and their heads are as follows: safety and public health, Walter W. Whitlock; research, L. H. Simerl; road improvement, Charles S. Mayfield; rural school relations, John K. Cox; veterinary medical relations, Dr. C. Don Van Houweling; property taxation, Bert Vandervliet; and soil improvement, (director to be named).

Parett said the goal of his Division of General Services is the establishment in every county of committees to work with each of the directors named above.

These seven men, Parett said, are and will be available to all County Farm Bureaus to assist in the solution of local problems as far as time will permit. The overwelming majority of the counties have availed themselves of one or more of the members of the Division of General Services, Parett said. The others are welcome to request the assistance of the division at any time.

What are the men in the general services division doing and what are they trying to do?

Rural School Relations—At present one of the principal jobs of Director Cox is his work with County School Survey Committees, which for many months now have been considering what is best in the reorganization of Illinois rural schools. This work has brought him in close touch with most of the County Farm Bureaus in the state.

John K. Cox

Cox appears on programs sponsored by Farm Bureaus, Home Bureaus, Parent Teachers' Associations, the high school visitors office of the University of Illinois, normal schools, county school superintendents, Illinois Rural Education Committee and various civic groups.

In most of these meetings, Cox outlines and explains IAA policy in regard to schools and particularly to rural school improvement. Writing for newspapers and magazines, he has done much to publicize the IAA's school reorganization program. He is a member of the IAA state legislative committee.

Research—This department, headed by L. H. Simerl, functions as a fact-finding service for the IAA board of directors, its officers, members of other IAA departments and County Farm Bureaus. This department is responsible for the collection and systematic filing of economic information of interest and importance to farmers and farm organizations.

One of the more important jobs of the department of research was the assistance it offered the Illinois Agricultural Association School Committee. The work and report of this committee laid the foundation for the rural school reorganization and improvement move-

TRY IAA DIVISION OF GENERAL SERVICES
IT MAY HAVE THE ANSWER

ment now underway in Illinois. During the past year the department of research has worked closely with the IAA Economic Study Committee which is studying present and proposed national agricultural policies and programs to make recommendations as to which should be given future support.

Road Improvement—No one will deny that Director Mayfield has an almost limitless field to work in in his efforts to assist County Farm Bureaus with the improvement of their rural roads. Up to the present, the work of the department has consisted primarily of explaining present road laws, methods of administration and finance and the recent state grants for farm-to highway roads.

Detailed studies of acute road problems have been made in a number of counties. Specific information is furnished in accordance with local requests. Director Mayfield is always willing to help any Farm Bureau group with their road problems.

He attends numerous meetings with members of County Farm Bureaus, and county and local road officials in order to better formulate a local road program. In his many talks, Mayfield points out that it is largely through the efforts of the IAA and county Farm Bureaus that recent rural road improvements have beeen made.

Property Taxation—Director Vandervliet's chief function is to keep County Farm Bureau tax committees informed of all developments in the tax field which are of some importance to farmers. At present he is studying county road and bridge levies and county budgets which are being adopted this month. For the benefit of County Farm Bureaus, Vandervliet works out year around programs to enable Farm Bureaus officials to work with local taxing officials.

The IAA believes in vigorous local government with lively interest of farmers of the locality in that government and its tax policies. Director Vandervliet carries through this IAA feeling to the counties by promoting farmer interest in tax problems at the grass roots.

Rural Safety and Public Health—Because farm accidents have taken an increasingly heavy toll, especially since the use of farm machinery has become more common, Director Whitlock's efforts to keep farmers safety-conscious has become increasingly important.

Whitlock furnishes special pamphlet materials on safety and public health to County Farm Bureaus regularly as well as in answer to special requests. He has worked with a number of County Farm Bureau committees in the organization of rural fire departments. This service is available to any Farm Bureau sponsored group.

Skilled Drivers activities in the Rural Youth organization have been organized throughout the state by the department in cooperation with the IAA department of young peoples activities. Whitlock also has organized safety programs for all of the member companies of the Illinois Farm Supply Company.

He is available on request to speak on safety and public health at County Farm Bureau sponsored meetings. The department complies and makes available to County Farm Bureaus data on Illinois farm accidents.

Veterinary Medical Relations—Dr. C. Don Van Houweling likes to work with County Farm Bureaus on problems concerned with animal disease control in their areas and he is generally ready on short notice to consult with County Farm Bureaus at their request. Dr. Van Houweling is working in an advisory capacity and not as a practicing veterinarian.

Some of his time is spent in developing cooperation between the various organizations and agencies in the state engaged in animal disease control. He gives technical advice upon request to several of the IAA associated companies such as the Illinois Cooperative Locker Service, Illinois Farm Bureau Serum Association, and Illinois Farm Supply Company. He has advised shipping associations on such things as the handling of livestock in transit to prevent injury and disease.

Dr. Van Houweling also works to promote better relations between organized agriculture and the veterinary profession. He has consulted with many Farm Bureaus and spoken at meetings and is pleased to be of service at any time.

Members of the staff of the IAA Division of General Services are shown together during one of their periodical conferences to talk over their plans and problems. Left to right: Charles S. Mayfield, rural road improvement; Walter W. Whitlock, rural health and public safety; I. E. Parett, secretary of the division; Bert Vandervliet, property taxation; Dr. C. Don Van Houweling, veterinary medical relations; and L. H. Simerl, research. Absent when picture was taken was John K. Cox, rural school relations director.

COLES COUNTY 4-H HAS CALF SCRAMBLE

Coles county 4-H boys think football is a sissy game after holding one of the few Calf Scrambles ever held in the Midwest. Twelve 4-H boys entered an arena in front of the grandstand at the Coles county fair with a 10 ft. rope, halter, and intentions of catching one of the eight white face 275 lb. calves turned loose.

There was plenty of hard, fast action until the last calf was gotten under control. It was touch and go for several minutes as to whether the boy or calf would come out on top in the scramble; however, the boys outlasted the calves and eight of the boys came out of the ring leading a fine Hereford steer calf for one of their 1948 4-H projects. Every boy could show plenty of evidence of having seen action in the arena.

Eight sponsoring companies from Mattoon and Charleston paid $30 for each calf in order to make the value of the calf more attractive to the 4-H members.

IAA Director Albert Webb, Franklin county, (right) presides at a special meeting held in Carbondale July 30 in protest against the bill to put the Crab Orchard Ordnance District in Williamson county under the jurisdiction of the Department of Interior. Farmers asked that the land be returned to agriculture instead of to wildlife. President Truman signed the bill as law a few days later. Left to right: L. B. Broom, Pulaski-Alexander farm adviser; Herb Borum, Williamson county organization director; E. A. Fosse, Williamson (behind Borum); Alonzo Bouyer, Williamson; William Bride, Pulaski-Alexander; Otto Finger, Pulaski-Alexander; G. J. Christenson, Franklin county farm adviser, and Director Webb. Behind Christenson is I. E. Parett, IAA secretary of special services, who assisted Director Webb in conducting the meeting.

R. L. Graves Joins IAA Transportation-Claims Department

ROBERT L. GRAVES, 29, who has been employed in the traffic department of the Illinois Central Rrailroad for the past nine years, has joined the staff of the Illinois Agricultural Association as assistant in the transportation - claims department.

Robert L. Graves

Graves will assist Guy W. Baxter, director of the transportation-claims department, and will spend most of his time checking freight bills on agricultural commodities for Farm Bureau members and the Illinois Farm Supply Company.

Getting the fish ready for close to 200 attending a new-member fish fry held in Marion July 29 are left to right: Williamson County Organization Director Herb Borum and Mrs. Borum, Mrs. Jones and Sam Jones.

Prairie Farms Wins Fair Blue Ribbon

THE Prairie Farms Creamery of Olney is proudly flaunting a blue ribbon for its high quality cottage cheese entry in the Illinois State Fair at Springfield. The Prairie Farms entry took first place.

The pasteurized cottage cheese was entered in the open class in competition with dairies from throughout the state. Judging was on the basis of flavor, body and texture, color, salt and package.

The blue ribbon cottage cheese was prepared by Walter Koertge, superintendent of the bottled milk department.

REV. GEO. NELL MARKS HIS 25TH ANNIVERSARY

The Rev. George Nell, long-time friend of Farm Bureau and the Illinois Agricultural Association, recently observed his 25th anniversary as pastor of the Island Grove Catholic church. The Rev. Nell's tireless, early-day efforts to help farmers in his community were described in a two-page article in the June, 1937, issue of the IAA RECORD. He was one of the founders of the Jasper County Farm Bureau.

Afternoon swimming classes are shown in the process of changing at the old swimming hole at Camp Shaw-waw-nas-see near Kankakee. Campers were 4-H'ers from four north central counties.

President Charles B. Shuman (left) of the Illinois Agricultural Association hands a check for $5,000 to Dean H. P. Rusk of the University of Illinois College of Agriculture. The money was given by the IAA to a state-wide fund to provide camp facilities for 4-H Club members.

Verne Hoar Heads Western Ill. Grain At Dallas City

VERNE HOAR, who has been in the grain business most of his life, is the new manager of the Western Illinois Grain Company at Dallas City. He succeeds Fred Watts, now manager of the Havana River Grain Company.

Verne Hoar

Hoar was born and reared in Colchester and operated the mill there for many years. After selling the mill several years ago, he worked at the Seneca Shipyards during the war, then returned to grain marketing as manager of the Western branch elevator at Adrian. On March 1 he became manager of the Barge Terminal elevator. He is married, has three married children, and three grandchildren.

WILLIAMSON COUNTY GETS NEW FARM ADVISER

Williamson county, which hasn't had a farm adviser since January will get a new one Sept. 15 when Ralph C. Broom, 31, takes over his duties. Broom is from Edgewood and graduated from Effingham high school and the College of Agriculture. He has done rural rehabilitation work, taught vocational agriculture and in recent years has been operating a fruit farm and serving as a Veteran's administration appraiser.

This is the White County Farm Bureau's new $100,000 home which they recently moved into. It is one of the finest Farm Bureau buildings in the state.

White Co. Builds $100,000 Home

AMONG the proudest Farm Bureau people in Illinois these days are the folks down in White county. They have one of the finest new Farm Bureau buildings in the state located at Carmi.

Construction was finished recently at a cost of $100,000 and the building was occupied this summer. The new Farm Bureau structure is 60 feet x 80 feet and stands on three lots.

Planning was started in June 1945 but construction was delayed by material shortages. It is built of brick with a concrete foundation and is fireproof throughout.

Rooms are spacious and well-lighted. Less than half the floor space is occupied by the Farm Bureau. The rest is rented by a dentist, a law firm, an oil drilling company, county nurse, public aid commission, and the county superintendent of schools.

This is a view of the front office of the new White County Farm Bureau at Carmi. Inlaid map in marflex floor is of White county.

Bonds to the amount of $100,000 at four per cent interest were issued to pay for the building. All furnishings are paid for. Most of the stock is being held by Farm Bureau members.

The Illinois delegation to the Farm Bureau Midwest Training School held at Upper Sandusky, Ohio in July are shown as they posed for a group picture.

Street music by these Fair damsels quickly drew a crowd of music lovers.

Most popular cow at the Fair was this one behind glass and made of solid butter.

Headline illustration shows IAA Director Chester McCord and his son-in-law, Harold Heady, with a pair of the McCord prize Jerseys.

★ ★ ★

He has had 13 cows qualify for the "Ton of Gold" rating. To qualify a cow must produce 500 pounds of butterfat for four consecutive years. McCord was the first in Illinois to receive the Gold Star Herd Award and the first in the state to win the Constructive Breeders Award, an honor he has received six times.

He has bred 28 five-star bulls and has had a herd production average for the past 16 years of 457.9 pounds of butterfat per cow. It is no wonder that buyers come from nine states to get the McCord Jerseys.

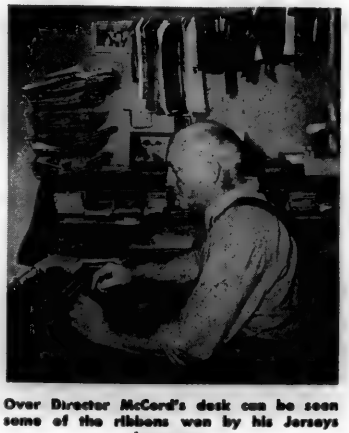
The IAA director from the 23rd district has built his soil as he has built his herd—methodically and always with an eye to the future. Care of the soil and care of his herd, he says, together are the keystone of his success.

The entire farm except 20 acres has been limed and 180 acres have received phosphate application. Potash and nitrates also have been applied systematically. Manure all goes back to the fields.

His soil building is paying off with yields of 40 bushels of oats and 50-70 bushels of corn to the acre, well above average for the surrounding community.

McCord is assisted with the management of the farm by Harold Heady, a recently returned veteran who is married to Mr. and Mrs. McCord's only child, Marietta.

Sixty acres of the farm are in timber and an average of 100 acres are in corn, 100 acres in soybeans, 75 acres in oats and the rest in pasture and hay.



Over Director McCord's desk can be seen some of the ribbons won by his Jerseys last year.

By JIM THOMSON
Ass't. Editor, IAA Record

WHEN I asked Chester McCord, IAA director from Jasper county, to show me some of the ribbons his Jerseys had won in cattle shows I wasn't quite prepared for what happened.

He and Mrs. McCord started bringing in ribbons from every part of the house till the dining room floor was almost covered. There were still plenty more in the attic, they advised me, but I suggested that perhaps we already had enough.

All the pride and satisfaction McCord has in his career as a farmer is embodied in those ribbons. Because they represent a good measure of success, hard work, and years of planning.

Director McCord has won many honors during his 25 years of dairying and raising pure bred Jerseys. But strangely enough, his most prized possession has nothing directly to do with his Jerseys. It is a modest scroll presented to him in 1941 by the Newton chapter of the Future Farmers of America naming him the outstanding farmer in the community and conferring upon him honorary membership in the FFA.

On the IAA board for the past 12 years, McCord represents the counties of Jasper, Crawford, Richland, Lawrence, Wabash, Effingham, Fayette, Marion, Clinton, and Jefferson.

He was born on a farm in Jasper county and finished his education at Charleston Teachers College. He then taught rural school for two years. His third year was interrupted when he enlisted in the army.

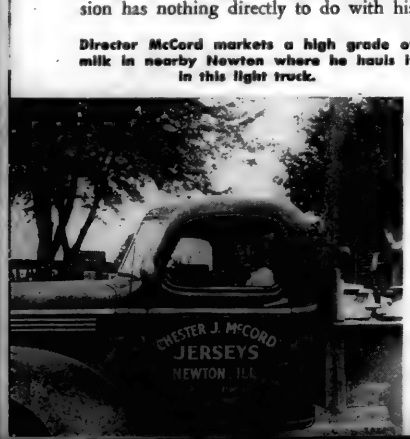
While recovering from illness in an army hospital, McCord decided to make a career of dairy farming. On returning home he married the former Marie Halterman and started farming with 100 acres and three heifers.

Today, Director McCord farms his own 340 acres and 160 acres besides. He maintains a milking herd of 24-34 cows which he has culled over a long period of years and has brought to a high state of perfection. Altogether he had 60 head of Jerseys during my visit to his farm.

★ ★ ★

Editor's Note: This is the ninth of a series of articles to acquaint you with the men who represent you on the Illinois Agricultural Association board of directors.

Director McCord markets a high grade of milk in nearby Newton where he hauls it in this light truck.



His cattle barn is always kept spic and span to conform with Grade A standards. Here he points interior white.

His rotation follows this pattern but is not strictly adhered to: corn, corn, oats, soybeans, pasture (including such hay crops as clover, sweet clover, lespedeza, timothy and brome grass).

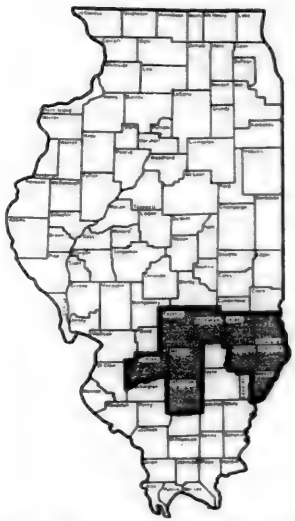
He also raises about 75 pigs each year. Several years ago while McCord was shipping cream to the Prairie Farms Creamery at Olney, Newton businessmen asked McCord to supply the town with milk since Newton was getting its milk from outside the community. Since that time virtually all of his milk has been marketed in fluid form. By sticking to the St. Louis Grade A code he receives a high premium for his high grade milk.

McCord joined the Crawford County Farm Bureau in 1922 and served as secretary five years before becoming a charter member and first president of the Jasper County Farm Bureau which he helped organize in 1936. He served as president for 10 years.

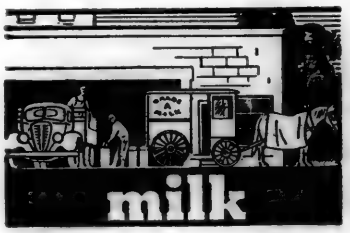
Director McCord is a director of the American Jersey Cattle Club, and a member of the State Advisory Board of Livestock Commissioners, the Newton Civic Club, and East St. Louis Shrine. He is a 32nd degree Mason and has been active in the Brockville Christian Church and the local school. He was superintendent of the Sunday School for 10 years and a school trustee for many years. McCord also was honored as a Master Farmer in 1936.

His "learn and do better" attitude is summed up in this remark: "If I never had a dime I would stick to the man who did. Not to get his dime, but that I might learn to get one for myself.

"The soil," he says, "is the foundation of all of the nation's basic wealth. From the Extension Service of the County Farm Bureau we can learn to maintain the fertility of that soil, and through the state and national Farm Bureau we hope to work out and maintain a balance between agriculture and industry. This balance being all-important to our nation's security."



Shaded area on map is 23rd congressional district represented on the Illinois Agricultural Association board of directors by Chester McCord of Newton.



Sanitary Milk Producers, representing two-thirds of the producers supplying the St. Louis, fluid milk market, maintain that prices to producers there are not sufficiently high to encourage them to supply the market with a sufficient quantity of milk.

After a series of meetings with handlers to negotiate premiums over minimum prices established by the federal order, it became apparent that if producers were to receive more money for their milk it would have to be accomplished through an amendment to the order. Consequently, a petition was filed with the Department of Agriculture and a hearing held July 17.

Will Rogers, Jr., former congressman from California and son of the late humorist, presided at the hearing.

Other representatives of the Department of Agriculture were Orville A. Jamison, principal market specialist, Fred Shipley, market administrator, and Foster R. Lewis, acting market administrator.

In their testimony, on behalf of the Sanitary Milk Producers, witnesses stressed the need for higher price if the market is to have a sufficient supply of milk. This market has been short of milk for a considerable period of time and it has been necessary for handlers to haul milk out of Wisconsin and other areas to supplement the local supply. This situation has been aggravated during recent months by a decline in prices to producers while feed, labor, and other costs entering into the production of milk have been increasing.

Under the current provisions of the federal order prices to producers are determined by adding specified premiums to average prices paid by twenty-three Mid-Western Evaporated Milk Plants. These premiums have been $1.10 for the months July through November, 90c for the months December through March, and 80c for the months, April, May, and June, for Class I milk.

Prices requested by Sanitary Milk Producers would increase these premiums to $1.55 for the months July through December, $1.25 for the months January through March, and 90c for April, May, and June. Substantially similar increases were requested for Class II milk.

Witnesses appearing on behalf of Sanitary Milk Producers included: R. D. Pennywell, President and A. D. Lynch, Secretary-Manager of the Association; J. P. Mason, Assistant Director of Dairy Marketing, Illinois Agricultural Association; Fletcher Gourley and Harold Brackett, manager of the Prairie Farms Creameries of Carlinville and Carbondale respectively; A. J. Surratt, state agricultural statistician; Summer Wilson and John Voss, farmers from Butler and Aviston, and others.

Although no results for the hearing have been announced by the Department of Agriculture, an early decision is expected.

At the hearing in St. Louis on the federal milk marketing order are left to right: Judson P. Mason, IAA assistant director of the dairy marketing department; A. D. Lynch, secretary, Sanitary Milk Producers; R. D. Pennywell, president, Sanitary Milk Producers; and Leigh Kagy, SMP legal counsel.

In view of the evidence presented, it is almost certain that producers will receive a substantial increase in the price of milk, especially during the fall and winter months when milk is always badly needed on the St. Louis market, and when milk production is most difficult to maintain.

The first Bureau County Sports Festival was held at the Bureau County Fair Grounds July 31. Winners of the major contests were to represent the county at the State Sports Festival at Champaign Aug. 28 and 29.

LOOK

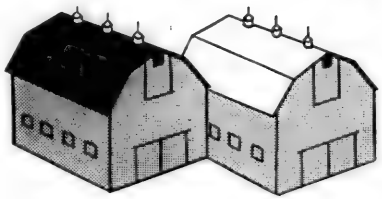
WHO'S ON FARMER *Wilson's* PAYROLL!

Farmer Wilson had one of those hogs — an old red sow — that no fence could hold. He should have sold her a month ago. Last week she broke out onto the highway, caused a serious auto accident, and today Farmer Wilson has a registered nurse on his payroll. You see Farmer Wilson was held LIABLE for that accident — as happens only too frequently. And before the suit is settled, that old red sow may cost him a lot of money.

Now livestock WILL break onto the highway and cause accidents, and strangers WILL be injured on farm premises — and all too often a farmer who is unaware of his liabilities pays heavily. That's why your Country Mutual Casualty Company makes available its Farmers General and Employers Liability policy — to protect you against possible liability losses. Discuss this policy with your insurance representative at the Farm Bureau.

COUNTRY MUTUAL CASUALTY COMPANY

DOUBLE PROTECTION



RAIN OR SHINE

Here is the roof treatment that gives you *double protection*. The black asbestos fibre coating seals the roof against rain; the aluminum coating reflects sunlight and heat, giving your building a cooler interior. This double coat treatment gives an all-weather roof that will protect and add years of service to your building. The aluminum coat also adds a smart, finishing touch to the job.

EASY TO USE

I.F.S. Roof Coating is easily applied. All loose dirt and scaly paint or gravel should be swept away and the surface should be dry. The roof coating is then applied with a good knotted roof brush. Do not brush out too much but put on a liberal amount and brush evenly. If surface is badly cracked, 2200 roof cement should be used before roof coating is applied.

To permit thorough drying, Aluminum Roof Coating should not be applied until about two weeks after the roof coating.

I.F.S. ROOF COATINGS

2000 Asphalt roof paint is a non-fibred, black liquid asphalt coating for waterproofing and leak-proofing composition, felt and metal roofs.

2100 Black Asbestos roof coating is a thick, heavy, liquid roof coating made of high grade asphaltum and long fiber asbestos. For waterproofing and leak-proofing composition, felt, metal, and gravel roofing.

2200 Black plastic roof cement is a fibred asphalt base cement for use in sealing cracks and nail holes before applying roof coating. Should be applied with a trowel.

2300 I.F.S. Roof and Metal Paint is designed for preservation and decoration of old, dried and worn composition shingles and roofing. Will not crack. It comes in two colors—Green (No. 2300) and red (No. 2400).

997 Asphalt Aluminum Roof Coating is designed for bituminous surfaces such as asphalt composition roofs or surfaces coated with No. 2000 asphalt or No. 2100 asbestos roof coating. Gives a bright metallic finish which reflects heat and light.

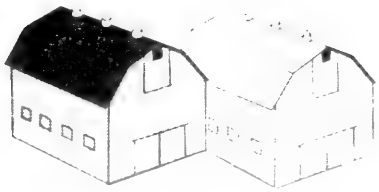
COUNTRY MUTUAL CASUALTY COMPANY

COUNTRY MUTUAL CASUALTY COMPANY provides protection for you as a farm operator and employer, full protection on your auto or truck — collision, liability, property damage, fire, theft coverage, medical expense reimbursement, 4-H Club Calf, coverage against loss of cargo.

DOUBLE PROTECTION



Here is the roof treatment that gives you *double protection*. The black asbestos fibre coating seals the roof against rain, the aluminum coating reflects sunlight and heat, giving your building a cooler interior. This double coat treatment gives an all-weather roof that will protect and add years of service to your building. The aluminum coat adds a smart finishing touch to the job.

EASY TO USE

B-S Roof Coating is ready to apply. Apply to dry roof only. Scrape off loose paint and gravel. Sweep off dust and dirt. Sweep away and the surface should be dry. Thoroughly stir coating. It is then applied with a good quality roof brush. Do not brush out too much but put on a liberal amount and brush evenly. If surface is badly cracked, 22% roof cement should be used before roof coating is applied.

To permit thorough drying, Aluminum Roof Coating should not be applied until about two weeks after the roof coating.

Rural Youth program planners get ready for the coming year. Left, Macon county — left to right: Don Rocke, assistant farm adviser; Helen Wilson, assistant home adviser; James D. Vollmer, Elizabeth Cunningham, Katherine Damery, Bill Loveless, Emma Boyd, and James Parish. Right, Menard — left to right: Mary Johnson, Charles Barton, L. W. Chalcraft, Menard county farm adviser; Delos Johnson, Esther Ruppel, Lowell Becker, and Kenneth Bast.

Rural Youth

By
ELLSWORTH D. LYON

District Skilled Drivers' contest and District Talk Fests will be held jointly from Oct. 20 to 30, and will be sponsored by the IAA departments of safety and young people's activities. The state police will give the actual tests in driving, while W. W. Whitlock will direct all activities relative to the contests. Driving contests will run from 3 p.m. to 5 p.m. In the evening on each date, the Talk Fest will be held and will be conducted as in former years. Recreation activities will conclude all evening programs.

The dates and locations will be as follows: Oct. 29, Carmi; Oct. 21, Carbondale; Oct. 22, Vandalia; Oct. 23, Jacksonville; Oct. 24, Champaign; Oct. 27, Galesburg; Oct. 28, Canton; Oct. 29, Amboy; Oct. 30, Yorkville. The Farm Bureau office will be the center of activities, with meeting places in a few instances, in near-by buildings.

Rural Youthers of both sexes are urged to participate in the driving activities. Whitlock points out in the four-unit Skilled Drivers' course that it is young men and women of Rural Youth age who are causing the largest percentage of fatal highway accidents. He says that here is an opportunity for Rural Youthers to do their share in community service while learning how to drive, and thus preventing many accidents. He has recently visited a number of counties relative to Skilled Driver activity and finds a great deal of interest in some counties.

The District Rural Youth Talk Fests should prove outstanding again this year. Each succeeding year for a number of years has witnessed an increase in the number of participants. More than 100 young people have represented their counties in the districts during each of the last two years.

Because of the great value to individual Rural Youthers in personality and leadership development and growth in confidence to speak their ideas in public meetings, Rural Youthers are encouraged to participate in County Talk Fests and invite their friends to join Rural Youth and engage in this helpful activity. Broad participation on the county level will mean good Talk Fests on the district and state levels. The State Talk Fest will be held in St. Louis, Nov. 18, at the annual meeting of the Illinois Agricultural Association.

In all reports of Rural Youth meetings in Clay County since the announcement of Skilled Drivers' Clubs, there has been some mention of safety on the highway or other phases of safety. This group will profit greatly by this study, and should go far in the Skilled Driver activities.

Darrell McAfee, president Christian County Rural Youth, gives encouraging news of Rural Youth strength in his county. "At our July meeting we had over 100 persons in attendance, and 31 new members signed up. Congratulations, Christian! Broad participation in activities will hold that membership and insure further growth.

Roy Varner, secretary Brown County Rural Youth, reports 90 present at the mid-July meeting. His report of the educational meeting would indicate that all present were well instructed on bee keeping: "Leonard Robins spoke on Bee Culture. He stated that there were six honey cooperatives in the United States. Most Illinois Bee keepers are small operators. Bees were put here to pollenize plants. Honey bees are the only ones domesticated. The bee is 15 times more benefit to the farmer than to the bee operator. He also told us how a queen bee was produced."

Box socials, as well as boat rides, picnics tours, and dances have been among the summer social activities of Rural Youth. Left to right: Elizabeth Classen, Mrs. Henry Geise, Mrs. Paul Dieter, and Shirley Wilcox hold the most beautiful boxes at DuPage's box social, where boxes averaged better than $4 each.

IAA RESEARCH HEAD RESIGNS TO JOIN EXTENSION SERVICE

L. H. SIMERL, director of the IAA department of research since March, 1942, has resigned to join the extension service of the University of Illinois College of Agriculture.

L. H. Simerl

Simerl is well-known to many farmers through the state for his work as secretary of the Illinois Agricultural Association School Committee and the IAA Economic Study Committee.

Born and reared on a Champaign county farm, Simerl was graduated from the College of Agriculture in 1932. He taught vocational agriculture and in 1937 became an extension specialist in the agricultural economics department. He received his master's degree in 1939 and studied at the University of Chicago.

In his new job, much of his work will be with Farm Bureaus on adult education in the field of agricultural products marketing. Simerl is married and has two children.

WINNEBAGO F. B. BUYS 24-ACRE TRACT

The Winnebago County Farm Bureau recently purchased a 24-acre tract of land in Rockford and plans to develop it into a $150,000 business and recreational center for local farm people. It will serve as a memorial to the county's 4-H youths who were killed in World War II.

A 4-H livestock pavilion where farm youths may exhibit their livestock will be one of the first buildings to be erected, it is hoped.

A central administrative building is planned for the Farm and Home Bureau offices, and associated companies, and will house an auditorium and gym. Playgrounds, baseball and softball diamonds, and possibly tennis courts, will be laid out in the park area.

Rapid growth of the Winnebago County Farm Bureau and expansion of its services have forced the move. The Farm Bureau has tripled in size during the past 10 years, and about 750 young farm folks are taking part in 4-H and rural youth activities.

LEGISLATIVE REPORT FROM SPRINGFIELD

(*Continued from page 7*)

area. Provision is made that if more than two full townships or 72 square miles are included in the new district, then no more than three board members may be elected from one township. This is designed to provide wide representation on the school board of such district.

The IAA supported this legislation and urged the inclusion of the provision for wide representation on the school board.

OTHER SCHOOL LEGISLATION

Legislation was introduced fixing the minimum school term at nine months instead of the present minimum of eight months. About 4,000 rural schools still have less than a nine months school, about 2,000 of them having eight months or less.

The IAA did not favor the enactment of this bill at the present time and sponsored an amendment postponing its effective date to July 1, 1949. This amendment was adopted but the bill as amended failed to pass.

A bill was introduced to increase the minimum teachers' salary from $1200 to $1800 and another bill to increase the minimum teachers' salary on a graduated scale to $1400 to $2200 depending upon the amount of training which the teacher had had. Both bills failed to pass.
